Sub: Proposed Captive Jetty Facility at Village Kharmachela, Taluka Pen, Dist. Raigad, Maharashtra by M/s JSW Infrastructure Ltd., Mumbai.

Dear Sir,

JSW Infrastructure Ltd. (JSWIL) has proposed to develop a captive jetty facility to the south of the existing JSW Steel plant, Dolvi Works, near village Kharmachela for handling cargo for the cement plant and steel plants under expansion. The facility will be developed with the construction of 500 m length jetty with all modern equipments in phases to cater to the demand of various inbound/ outbound cargo of about 12 MTPA.

In phase I, about 200 m continuous length jetty will be developed to handle cargo of about 3.0 MTPA, and in Phase II another 300 m length jetty to handle about 9.0 MTPA various cargo. In phase I, various cargo to be handled in the proposed jetty facility includes Clinker, Limestone, Dolomite, Cement, Slag, and Steel products. In phase II, there will be provision to additionally handle Coal (CBRM), Iron Ore (IBRM), Fertilizer, Sulphur, Gypsum, Fly Ash, etc. including the other cargoes. The Jetty facility will be supplemented by a port backup area of about 10 Ha for cargo handling and storage.

The proposed jetty facility is located on the right bank of the Amba River/Dharamtar Creek, fronting cement plant, at a distance of about 1 km south of the Dolvi steel plant. Three alternatives sites including the proposed location has been examined before selecting the site. Being located in the close proximity of the cement plant, the transportation would be completely bereft of road transport and the cargo transport would be through mechanized means. Hence, this would ensure cleaner environment and least intrusion to the eco-system.

We are herewith submitting the filled Form I, Pre-Feasibility Report, and proposed Terms of Reference (ToR) for the grant of ToR for EIA studies for its Environment Clearance (EC).

We trust you will find the submissions in order and shall grant us an early opportunity to make a presentation before the esteemed EAC on the salient features of the proposed project.

Thanking you.

Yours sincerely,
for JSW infrastructure Ltd.
