To
Shri. M.s Ravindranath,
Asst General Manager
Airport Authority of India
Goa Airport
Dabolim Goa- 403 801

Subject: Compliance of conditions of Environment clearance– Reg.

Dear Sir,

This has reference to the inspection to your unit on 03.06.2017 by the undersigned. It was observed the solid waste handling storage / handling area is inadequate, the waste have been dumped/ handled outside the shed, the workers are handling the waste without any cloves. The Activated carbon filter and sand filters in STP are under repair The STP is running almost at full capacity of 300 KLD. A Cell has been formed however, there is no person qualified in the field of environment.

The project was monitored lastly in March, 2016 and you has been advised to do RWH, enhance the STP capacity and improve the STP operation, install flow meter, stop the discharge of sewage in the drains, improve garbage sorting area. To comply with the above, you have constructed three RWH tanks, installed the flow meter at STP and stopped sewage flow into drain. However, the capacity enhancement of STP and improvement of garbage sorting area are not yet done. You are therefore directed to

(i) take necessary action to enhance the capacity of STP and repair the sand filters and activated carbon filters and put them in use.
(ii) take necessary action for proper handling of garbage.
(iii) monitor noise level and ambient air quality in and around airport regularly.
(iv) appoint a qualified person in the Environmental Cell
(v) renew consent order of SPCB, Goa

This issues with the approval of Competent Authority.

Yours faithfully,

(E.Thirunavukkarasu)
