

Agenda notes for SEIAA meeting dated 21.06.2022 etc. and minutes of the meeting

Online Proposals

82nd Meeting of SEIAA, Odisha dated 21.06.2022, and 22.06.2022 at 10.30 a.m.

Sl. No	Proposal Category (B1, B2) and Proposal type (TOR/EC/MO/DIEC/MODIT OR/Transfer of EC)	Project Sector and EIA notification Schedule.	Auto generated File No.	Name of the Applicant/ Project Proponent	Title of the proposal	Date of receipt of the proposal online	Status indicated in the PARI VESH portal	Decisions of SEIAA in the previous meeting	Current Status and Agenda Note	Observations / Decisions of SEIAA Meeting
1.	B1, EC	1(a) Mining of minerals	SIA/OR/IND/34495/2019	Adish Minerals Private Limited	Proposed Chrome Ore beneficiation Plant of Capacity 1,20,000 TPA throughput at Mouza-Baunsamuli, Thana Badachana, District-Jajpur.	25.03.2021	Under examination of SEIAA after SEAC	Online proposal for EC	<p>This is regarding a new proposal for Installation of Chrome Ore Beneficiation Plant. The project has submitted at SEIAA under Category 'B' Ha. As per the EIA Notification, 2006, this project falls in the schedule under Sl.No.2(b)-"Mineral Beneficiation Unit" of non-coal mining sector. The project proponent has submitted proposal for grant of EC for Installation of Chrome Ore Beneficiation Plant of capacity 1,20,000 TPA (0.12 million TPA throughput) of M/s Adish Minerals Pvt. Ltd.</p> <p>The following documents have been received Form-1, Form-2, PFR, EIA & EMP, land schedule etc.</p> <p>The following deficiencies/omission have been noticed in the above documents.</p> <ul style="list-style-type: none"> • Nil <p>Whether SEAC recommended the proposal –Yes</p> <p>Other Points</p> <ol style="list-style-type: none"> 1. As per EIA Notification dated 14th Sep, 2006 as amended from time to time, the project falls under Category "B", Project or Activity 2(b) – Mineral Beneficiation Unit. 2. It is a green filed project as the plant is to be set up a unused land. 3. For this project ToR has been issued by SEAC on dated 20.08.2019 vide letter no. 231/SEAC-4/19. As per ToR the 	

									<p>baseline Study was conducted during the period 1st March 2019 – 31st May 2019 (Pre-Monsoon Season) and accordingly prepared EMP report.</p> <p>4. The Major Objective of the Company is to Beneficiate Low Grade Chrome to Chrome concentrate and sell to various industries of Odisha & other states of India. The Project will have an 100% capacity of beneficiation 120000 TPA of Siliceous Chrome ore material. The concentrated chrome ore output is envisaged as 74400 TPA with conc. Of Cr₂O₃ between 46 to 54%.</p> <p>5. Site Location and Connectivity - The site is located at Mouza-Baunsamuli, Thana-Badachana, District-Jajpur of Odisha. Total Area of the plant is 13.43 acres. Out of Total land, 5.38 acres (5.435 Ha.) had been acquired at Village-Salapada, Tehsil-Darpan, Thana-Badachana, District- Jajpur of Odisha State. There is no habitation in the proposed area. Nearest habitation is Salapada which is at a distance of 0.30 km from project site. The site is well connected with the road. NH-5 is at a distance of 12-15 Km from the project site. The nearest railway facility is Barithengarh Railway Station which is 7.5 km. The Nearest airport is Bhubaneswar at 53 km and nearest seaport is Paradeep at a distance of 84 km (SE) from the project site. Water Bodies: KumariaNadi- 8.2 Km & Mahanadi River- 17 Km. Nearest town Chandikhol located at a distance of 10.0 Km from the project site. NH- 5 connects the factory site with major cities like Jajpur, Dubri, Sukhinda, Kailpani in order to get their raw materials transported to the factory site. It also connected the States like West Bengal, Andhra Pradesh, therefore the end processed products can easily be transported to the buyer's site with the convenient connecting Conveyance Facilities.</p> <p>6. The project area is not coming in D.L.C. report and also not involved Wildlife Sanctuary area and the land is purchased by the project Authority.</p> <p>7. Public Hearing was conducted on 15.12.2020 and the most of the people in the PH supported the project. There is also public apprehension that depletion of ground water and water pollution. The project Authority assure that total water requirement for this project will be 120 m³/hr and already Central Ground Water Authority has given permission to extract 138 m³/day water and 30 % of the total water requirement will be recycled and reuse in the plant. No waste water will be discharge to the outside from the plant premises.</p> <p>8. Water Requirement: Total Water requirement for the plant– 2,880 m³/day. Water will be kept in closed circuit & will be recycled and hence, conservation of freshwater to about 30% of the total requirement. Thus fresh make water requirement is envisaged to be 46 m³/hr or 1,104 m³/day and source is bore well. Total</p>
--	--	--	--	--	--	--	--	--	--

									<p>Circulation Water:120 m3/hr or 2,880 KLD.The unit has applied to CGWA for drawl of water vide Application Number: 21-4/2404/OR/IND/2020, Dated: 07.01.2020. Treated water from STP will be used for plantation activities and greenbelt development.</p> <p>9. There is a provision for rain water recharging and also provision for rain water harvesting pond 34 KLD and that water to be used for the beneficiation plant.</p> <p>10. PowerRequirement: There will be an installation of a 315 KVA Transformer and it has been estimated that approximately 292 KVA will be used for running the motors of the Plant &Machinery if all machines work at full capacity and there will be utilization of the rest 24 KVA for the Office administrative & Staff Quarters. The Power connection will from CESU. In future, if there will be an expansion of the plant capacity from current 100% capacity of 1, 20,000 tons, accordingly the power connectivity for 33 KVA transformer will be installed. In Case of Power Failure situation, it is envisaged that a D.G Set of 320 KVA, of Kirloskar make will be installed which willoperate the plant at full load even there is a power cut.</p> <p>11. Fuel: Diesel as a fuel is required for running the Tipper & JCB Loader. And there will be requirement of 115 litres per Day.</p> <p>12. The Raw Material used will be Chrome Ore of below 40% Grade Cr₂O₃ with 10% moisture with recovery rate of 62%. The finished products generated will be Chrome Concentrate Cr₂O₃ with 8% moisture.</p> <p>13. The project will generate 90 nos. of manpower, out of which 70 nos. Labourer's skilled & unskilled employees and the rest 20 nos. will be recruited as Administrative & operating facilities.</p> <p>14. Safeguard Measures like, as regular water sprinkling shall be carried out in critical areas prone to pollution, like haul road, loading & unloading points. It shall be ensured that the ambient Air Quality Parameters conform to the norms prescribed by the central pollution control board in his regard.</p> <table border="1" data-bbox="1153 1117 1836 1412"> <thead> <tr> <th>Source of Pollution</th> <th>Pollutants</th> <th>APC measures</th> </tr> </thead> <tbody> <tr> <td>Raw material handling yard (Unloading, Stacking)</td> <td>Fugitive Dust</td> <td>Dust suppression system such as water sprinkling</td> </tr> <tr> <td>Screening</td> <td>Fugitive Dust</td> <td>Dry Fog system</td> </tr> <tr> <td>Internal Roads</td> <td>Fugitive Dust</td> <td>Mobile Tanker, Internal Roads will be made Black</td> </tr> </tbody> </table>	Source of Pollution	Pollutants	APC measures	Raw material handling yard (Unloading, Stacking)	Fugitive Dust	Dust suppression system such as water sprinkling	Screening	Fugitive Dust	Dry Fog system	Internal Roads	Fugitive Dust	Mobile Tanker, Internal Roads will be made Black

Screening	Fugitive Dust	Dry Fog system																			
Internal Roads	Fugitive Dust	Mobile Tanker, Internal Roads will be made Black																			

									<p>local employment</p> <p>21. SEAC recommended the proposal with following specific conditions:</p> <ol style="list-style-type: none"> a. Waste water that will be generated from the tailing shall be treated in ETP wherein hexavalent Chromium shall be reduced to trivalent chromium by dosing it with appropriate standard chemical following due technical procedure. b. PP shall obtained NOC to use Panchayat road from concerned BDO. c. Big tree including the fruit bearing trees shall not be cut and if necessary to relocate, the same may be de-rooted and replanted in green belt area/along the boundary wall. <p>22. The proposal was placed in the 81th meeting of SEIAA was held on 26.05.2022 and was decided that “This EIA study report (final) does not quantify the potential impact of the different processes. Mitigation measures are also not specific, but couched in vague terms. This EIA study report may be forwarded back to SEAC for a detailed site inspection and re appraisal of water budgeting, waste disposal and mitigation of particulate matter pollution in the surroundings”.</p> <p>23. Accordingly, the ADS letter has issued to the PP and now the PP has submitted their ADS for consideration. The SEAC also submitted their appraisal report and mentioned two of the committee members visited the project site on dated 17.03.2022. Following are the observations and recommendation of the sub-committee of SEAC.</p> <ol style="list-style-type: none"> i) The PP shall submit a sketch of the layout map (not to scale) of the proposed plant showing the boundary wall, material entry and exit gate and employees movement gate separately, Tailing pond, ETP, Recirculation pond, Rain water Harvesting pond. ii) The waste water that will be generated from the tailings shall be treated in ETP wherein hexavalent Chromium shall be reduced to trivalent Chromium by dosing it with appropriate standard chemical following due technical procedure. This is to be put as a specific condition. iii) The PP shall obtain NOC to use the Panchayat roads from the concerned BDO for transportation of both input materials and finished products including the responsibility of maintaining the road if damaged by such transportation.
--	--	--	--	--	--	--	--	--	--

									<p>This is to be put as a specific condition in EC.</p> <p>iv) The big trees including the fruit bearing trees shall not be cut and if necessitated to relocate, the same may be de-rooted and replanted in green belt area/ alongside the boundary wall.</p> <p>If it becomes inevitable to cut the said trees, the same may be done only with due necessary permission from appropriate authority of forest department, Government of Odisha with necessary compensatory plantation/ afforestation as per the applicable rules/ laws.</p> <p>v) A copy of letter of consent tied up with M/S Ramky for disposal of tailings was shown to the sub- committee by the PP/ consultant and it was okay.</p> <p>24. The SEAC recommended for grant of Environmental Clearance valid for 10 years with stipulated conditions as per Annexure-E in addition to the following specific conditions:</p> <p>a. The waste water that will be generated from the tailings shall be treated in ETP wherein hexavalent Chromium shall be reduced to trivalent Chromium by dosing it with appropriate standard chemical following due technical procedure.</p> <p>b. The PP shall obtain NOC to use the Panchayat roads from the concerned BDO for transportation of both input materials and finished products including the responsibility of maintaining the road if damaged by such transportation.</p> <p>c. The big trees including the fruit bearing trees shall not be cut and if necessitated to relocate, the same may be de-rooted and replanted in green belt area/ alongside the boundary wall. If it becomes inevitable to cut the said trees, the same may be done only with due necessary permission from appropriate authority of forest department, Government of Odisha with necessary compensatory plantation/ afforestation as per the applicable rules/ laws.</p> <p>In view of the above the proposal may be placed in the SEIAA meeting of consideration.</p>	
2.	B1, EC	1(a) Mining of minerals	SIA/ OR/ MIN/ 4568 8/201	M/s Tarini Minerals Pvt. Ltd	Joruri Iron & Manganese Ore Mines of M/s Tarini Minerals Pvt.	01.11. 2019	Deferred by SEIAA	Online proposal for EC	<p>This is regarding a new proposal for enhancement of production capacity of Iron ore. The project has submitted at SEIAA under Category 'B1' Ha. As per the EIA Notification, 2006, this project falls in the schedule under SI.No-1(a) –“Mining of Minerals” of non-coal mining sector. The project proponent has submitted proposal for grant of EC of Joruri Iron & Manganese Ore Mines of M/s Tarini Minerals</p>	

			8		<p>Ltd over mining lease area 66.368 Ha for "enhancement of iron ore production to 4.27 lakh TPA along with existing crushing unit of Primary Crusher (40 Tph) And 2 X 12 Tph secondary crusher, located at Village(s) Jajang & Khandbandh, Tehsil-Barbil, District Keonjhar</p>			<p>Pvt. Ltd. over mining lease area 66.368 Ha forenhancement of production capacity from 46287 TPA to 4.27 Lakh TPA along with crushing & screening plant located in village Jajang & Khandbandh, Tahasil-Barbil, Dist-Keonjhar (Violation case).</p> <p>The following documents have been received Form-1, Form-2, PFR, EIA & EMP. Forest clearance certificate of 15.068 Ha, Remediation plan etc.</p> <p>The following deficiencies/omission have been noticed in the above documents.</p> <ul style="list-style-type: none"> • Nil <p>Other Points</p> <ol style="list-style-type: none"> 1. Initially there is a lease agreement in between the Collector Keonjhar on behalf of Govt. of Odisha and the lessee Sri Naranjan Pattnaik in a court paper on 06.02.1990 and Power of Attorney given to Sri Diptiranjana Pattnaik brother of Sri Niranjana Pattanaik for 20 years lease period. 2. The mining lease was executed on 06.02.1990 for 20 years with obtaining CTO from SPCB, Odisha and the lease period expires on 05.02.2010. The lessee has applied an application for lease renewals to the Collector Keonjhar vide letter no. 10745 on dated 22.11.2008 but the PP has not attached any renewal documents regarding this. <ol style="list-style-type: none"> a. While getting the mining lease initially the lessee has not obtained EC as the mining lease granted on dated 07.02.1990 which is before the commencement of EIA Notification of 1994 & 2006. b. As per the MoEF & CC Notification No. F.No. 11-51/2015-FC on dated 01.04.2015 mentioned that the tenure of lease period is 50 years as per Section 8A (3) of the MMDRA Act 2015 and the said lease period extended upto 05.02.2040. 3. The PP applied a proposal to MoEF & CC vide letter no. nil on dated 14.11.2009 for renewal of mine lease and enhancement of production of Iron ore and the Ministry issued a TOR On dated 18.01.2010 and following points area as follows:- <p>The EAC in its meeting held on December 21-22, 2009 prescribed the following TOR on dated 18.01.2010.</p> <ol style="list-style-type: none"> 1. Year-wise production details since 1994 onwards and clearly stating the highest production achieved in any one year prior to 1994. The model used and input parameters used for modeling, air quality control, wind flow, location map, location of sensitive receptor and if any habitation.
--	--	--	---	--	--	--	--	---

									<ol style="list-style-type: none"> 2. Water requirement for the project and detailed water balance. 3. Necessary clearance from Competent Authority. 4. Details water conservation measure to be adapted by the PP. 5. Impact of the project on water both surface and ground water and necessary safeguard measures. 6. Necessary data and documents in case the working will intersect groundwater table, a detailed hydrological study should be undertaken and report furnished. 7. Details of first order stream, if any passing through lease area and modification/diversion proposed. 8. Detail of rainwater harvesting proposed, if any Information of site elevation, working depth, ground water table should be provided both AMSL and bgl. A systematic diagram may also be provided for the same. 9. Quantity of solid waste generation to be estimated and details of its disposal and management be provided. 10. Reclamation plan, post mine land use progressive green belt development plan shall be prepare in tabular form. 11. Impact on local transport infrastructure due to the project and its management. 12. Details of infrastructure facilities to be provided for the mine workers. 13. Public hearing. <p>4. The Ministry appraised the proposal in the EAC meeting held on July 22-24, 2013 as per the TOR issued on dated 18.01.2010 and the outcomes are as follows:-</p> <ol style="list-style-type: none"> a. The cost of the project is Rs. 5.0 Crores, Environmental cost towards EMP is Rs. 136 lakh towards capital investment Rs. 13 lakh towards annual recurring cost, budget for CSR-113 lakh as capital cost with 28 lakh as recurring cost for the surrounding areas. b. It was a violation case. The mine was operating from 1992 to 2008 and has enhanced production since 2007 from 15,000 to 2,08,000 TPA with obtaining prior EC. c. Forest Clearance obtained only for 15.068 Ha lease area vide letter no. 8-22/91-Fc dated 07.02.1992. d. It was also noted that the entire mine lease is forest
--	--	--	--	--	--	--	--	--	---

										<p>area land and FC is not yet obtained for entire area.</p> <p>e. The baseline study was carried out during December, 2009 to February, 2010 hence data was more than 3 years old therefore, the committee was of the view that baseline data shall be collected for further one season. The committee decided to defer the proposal to be brought back after the following information is submitted:</p> <ul style="list-style-type: none"> ▪ The baseline data for one season ▪ Twelve (12nos) mines are working in the vicinity of the Joruri iron and manganese Mines; hence the cumulative impact assessment needs to be done. ▪ The discrepancy in EIA/EMP report and mine plan viz land use details, conceptual plan etc. shall be rectified. ▪ The MoEF & CC transferred the proposal to SEIAA, Odisha as the lease is < 100 Ha based on the EIA Notification 14.08.2018. <p>5. The proposal was placed in SEAC meeting held on 05.12.2018 and subsequently ToR was issued by SEAC vide letter no. 1084/SEAC-174 on 14.12.2018.</p> <p>6. The proponent has complied all the TOR condition issued on 14.12.2018 by SEAC and accordingly submitted Final EIA/EMP report along with Remediation Plan and the natural and community resource augmentation plan for Assessment of ecological damage for the violation period.</p> <p>7. The SEAC recommended the proposal for grant of EC subject to submission of stage-I Forest Clearance.</p> <p>8. After several clarification again the proposal was placed in SEIAA meeting held on 19.05.2022 and accordingly clarification raised vide our letter no. 4602/SEIAA dated 23.05.2022 on the following point as follows:</p> <p>a. First of all, the PP has to intimate the period during which mine has been operated or any activity ancillary to mining has been taken up without having the EC, and the quantum of violation production made by the PP during this period. The quantum of violation of EP Act/EIA Notification, 2006 for assessment of penalty / compensation may be known by referring to the said report.</p> <p>Reply: The mine was under operation till the year 2009-10. The mine was operated on the basis of Consent to Operate. The excess production calculated by DDM Joda was 680348.60 Ton and issued demand notice vide letter</p>
--	--	--	--	--	--	--	--	--	--	--

									<p>no. 4134/Mines dated 02.09.2017 for deposit of Rs. 67,33,84,159/- but amount deposited on dated 30.12.2017 and again returned 11/01/2018.</p> <p>b. A remediation plan has to be submitted by the PP to remedy the adverse impact on environment comprising of soil, water, air, accumulation of waste and its improper disposal, etc. The remediation plan has to be approved by SEIAA.</p> <p>Reply: The remediation plan submitted and details attached separate file ADS letter.</p> <p>c. As per the OM of MoEF&CC dated 09th September, 2011, the PP has to inform the SEAC about the status of his application for forest clearance, along with the necessary documents from concerned forest authority. If after consideration the SEAC recommends the project for EC and the SEIAA approves of the proposal for grant of EC, a time limit of twelve months may be given to the PP to submit the requisite Stage-I forest clearance.</p> <p>Reply: The proponent has applied an application form online on dated 03.12.2019 for Forest Clearance for diversion of entire 66.368 Ha. forest lands still it is pending. The Forest Clearance application is pending due to some documents at Project Authority end as it appears in Parivesh Portal.</p> <p>In view of the above the proposal may be placed in the SEIAA meeting for consideration.</p>
3.	B1, EC	Industry-2	7399 8/28-IND/04-2022	M/S. Hindalco Industries Limited	Proposed Expansion of Existing FRP plant from 1.35 Lac TPA [Hot Rolled Coil (HRC) & Cold Rolled Coil (CRC)] to 5.85 Lac TPA Hot Rolled Coil (HRC) including existing 1.35 Lac TPA Cold Rolled	04.04.2022	Under examination of SEIAA after SEAC	Online proposal for EC	<p>This is regarding an expansion proposal for Installation of Chrome Ore Beneficiation Plant. The project has submitted at SEIAA under Category 'B' Ha. As per the EIA Notification, 2006, this project falls in the schedule under Sl.No.2(b) –“Mineral Beneficiation Unit” of non-coal mining sector. The project proponent has submitted proposal for grant of EC Expansion of Existing FRP plant from 1.35 Lac TPA [Hot Rolled Coil (HRC) & Cold Rolled Coil (CRC)] to 5.85 Lac TPA Hot Rolled Coil (HRC) including existing 1.35 Lac TPA Cold Rolled Coil (CRC) at Villages Jamda and Jamda (Nimpali), Tehsil Hiraikud, District Sambalpur (Odisha) and the Project proponent is Sri. Surajit Mitra (Asst. Vice President & Unit Head Hiraikud FRP).</p> <p>The following documents have been received Form-1, Form-2, PFR, EIA & EMP. land schedule and CTO etc.</p> <p>The following deficiencies/omission have been noticed in the above documents.</p> <ul style="list-style-type: none"> • Nil <p>Whether SEAC recommended the proposal –Yes</p> <p>Other Points</p> <ol style="list-style-type: none"> 1. The proposal is for Environmental Clearance of M/s. Hindalco

				Coil (CRC) at Villages Jamda and Jamda (Nimpali), Tehsil Hirakud, District Sambalpur (Odisha) by Hindalco Industries Ltd.			<p>Industries Ltd. for Proposed Expansion of Existing FRP plant from 1.35 Lac TPA [Hot Rolled Coil (HRC) & Cold Rolled Coil (CRC)] to 5.85 Lac TPA Hot Rolled Coil (HRC) including existing 1.35 Lac TPA Cold Rolled Coil (CRC) at Villages - Jamda and Jamda (Nimpali), Tahasil-Hirakud, District Sambalpur (Odisha) of Sri. Surajit Mitra (Asst. Vice President & Unit Head Hirakud FRP)</p> <ol style="list-style-type: none"> 2. The project falls under schedule 3 (a) "Metallurgical industries (ferrous & non ferrous)" Category-B as per the EIA notifications, 2006 amendments thereafter. 3. Environmental Clearance was obtained for Captive Power Plant of Indian Aluminium Company Ltd at Hirakud(60 MW) by MoEF & CC on dated 11.05.1989. 4. EC issued by MOEF & CC on 10.01.2001 for Expansion of Aluminum Smelter Plant at Hirakud by M/s India Aluminium Company Ltd. 5. The ToR Letter issued by SEIAA, Odisha vide their letter no. 3488/SEIAA dated 18.11.2021. 6. Public Hearing for the proposed project was conducted on 09.03.2022 at District Auditorium, near Circuit House, Sambalpur by Odisha Pollution Control Board. The major issues raised during the Public Hearing were regarding employment, environmental pollution, education & sports, health care facilities, peripheral development, CSR activities, etc. Company has allocated ` 30.612 Crores for implementation of the commitments made during Public Hearing, as per OM dated 30thSept. 2020 & 20thOct. 2020. 7. The project proponent has clarified that the project is not located within Severely Polluted Area (SPA) of IB valley and distance of Hirakud FRP unit is 16.5 KM away from the nearest CPIC area. 8. The existing area of FRP Plant is 19.401 Ha. Additional area of 4.63 Ha will be required for proposed expansion project. Total FRP Plant area after expansion will be 24.031 Ha. The same is under possession of the company. Out of the total FRP plant area i.e. 24.031 ha, 2.88 ha will be covered under green belt/plantation within the plant premises for the expansion project. Apart from the above, 5.1 ha of additional area (adjacent to the FRP plant area) will be covered under
--	--	--	--	---	--	--	---

									<p>greenbelt/plantation to cover 33% (7.98 ha) of the plant area under the greenbelt. And 10.8 ha has already been covered under plantation outside the plant premises.</p> <p>9. M/s. Hindalco Industries Limited has an existing Aluminium Smelter of capacity 2.16 Lac TPA, Casting Plant of capacity 2.6 Lac TPA and CPP of 467.5 MW capacity at Villages Jamda, Lambaduguri, Taranagar, Jamda (Nimpali), Larbhanga, Tehsil Hiraakud, District Sambalpur (Odisha) operating as per the Environmental Clearance obtained for 3.60 Lac TPA smelter & captive power 967.5 MW from MoEFCC, New Delhi vide Letter No. J-11011/400/2006-IA II dated 6th February, 2008, further amended vide letter no. J-11011/144/2006-IA II (I) dated 19th October, 2009.</p> <p>10. As per the EIA notification, 2006 as amended from time to time, stating that "In case of secondary metallurgical processing industrial units, those projects involving operation of furnaces only such as induction & electric arc furnaces, submerged arc furnaces & cupola with capacity more than 30,000 tons per annum (TPA) would require EC". As no such furnaces were proposed in the FRP plant, therefore, No EC was required for the same and the FRP Plant is operating on the basis of CTE & CTO obtained for the same. The initial CTE for FRP Plant [(1.35 lac TPA (Stage I) and 1.50 Lac TPA (Stage II) as a part of Phase II expansion of Smelter Plant] was issued by SPCB, Orissa vide File No. 5288/Ind-II-Noc-4655 dated 27.03.2010. where, a Special condition no. 2 stated that "The unit shall inform MoEFF, GOI, about the incorporation of FRP plant in the above expansion proposal & shall take additional environmental protection measures required if any advised by MoEFF, GOI". Apart from the above, as per common condition (3) of CTE stated that "Construction of stage-II of phase-II expansion shall commence after requisite land is acquired and environmental clearance is obtained from MOEF, Govt. of India." Accordingly, intimation regarding FRP plant was submitted to MOEFCC vide letter dated 25.10.2010. The CTO was issued by OSPCB for Proposed FRP Plant (CRM) (1.35 Lac TPA) vide letter no.10958/Ind-I-Con -6394 dated on 30.05.12. The CTO was issued by OSPCB for Proposed FRP Plant (CRM, HRM) (1.35 Lac TPA) vide letter no. 6919/Ind-I-Con -6394 dated on</p>
--	--	--	--	--	--	--	--	--	--

									<p>01.05.2014. The current CTO issued Vide letter no. 3212/IND-I-CON-6394 dated on 20.03.2018 further amended on 18.12.2020 (valid upto 31.03.2023). Further, CTE was obtained from SPCB, Orissa vide file no. 5747 /Ind-II-Noc-6280 dated on 13.06.19 for Modernization of Hirakud FRP unit [to enhance the value addition of the existing CRC by increasing the tension levelled and degreasing the production capacity and Hirakud FRP and enhance the capability to produce Coils of thickness of 0.4 – 4 mm (currently 0.6 – 3.18 mm) width of 2000 mm (currently 1600 mm) with Hard Alloy Coil as the focused product and establishment of Polycrack Converter of Capacity of 0.5 MT/day to make the plant site non -hazardous solid waste free]. As per General conditions A(1) of the CTE stated that “The proponent shall inform to the MoEFCC, GOI, about modernization of existing FRP plant as same was not part of the original proposal for which EC has been obtaining & shall take additional pollution control measures as advised by the MoEFCC, GOI” and General Condition A(3) stated that “Under no circumstances the proponent shall increase Flat Rolled Aluminum Productions beyond 135000 TPA as granted in the existing consent to operate (CTO)”. Accordingly, intimation regarding FRP plant was submitted to MOEFCC vide letter no. HFRP/ENV/2018-19/029 dated 23.09.2019; The modernization is under implementation phase as per CTE obtained.</p> <p>11. As per NGT order issued on 12.02.2020 “regarding applicability of EC for Re-rolling / Cold Rolling Mills operating as per CTE & CTO”, para 10 states that “the Ministry has accepted the recommendations no. (iii). of EAC to allow those units, operating under the CTEs/CTOs obtained from the respective State Pollution Control Boards, for a period of one year. Further, it has been decided that the requirement of EC or not for such units is a policy decision. Hence, the Ministry will constitute an Expert Committee, other than an EAC, having metallurgical experts for their recommendations”.</p> <p>12. Therefore, considering all the facts given above, HIL has proposed to obtain EC for the Proposed Expansion of Existing FRP plant from 1.35 Lac TPA [Hot Rolled Coil (HRC) & Cold Rolled Coil (CRC)] to 5.85 Lac TPA Hot Rolled Coil (HRC) including existing 1.35 Lac TPA Cold Rolled Coil (CRC) at</p>	
--	--	--	--	--	--	--	--	--	---	--

									<p>villages Jamda, Jamda (Nimpali), Tehsil Hirkud, District Sambalpur, Odissa. Finished Product (CRC) from Hirkud FRP plant will remain 1.35 lac TPA. Rest of the 4.50 lac TPA semi-finished Product (HRC) will be sent to the FRP plant (CRC) proposed within the existing plant premises of Aditya Aluminium (A Division of Hindalco Industries Ltd.) at Lapanga, Tehsil Rengali, District Sambalpur (Odisha).</p> <p>13. Location and Connectivity - Nearest national Highway is NH-6 at 2.5 km and State highway is SH – 10 at 8 km. Nearest Railway station are Hirkud Railway Station is 4 km and Sambalpur Railway station is 6.5 km and Sambalpur Road Railway Station is 8.5 km. Nearest Reserve Forests are Lakshmi dungri RF is at 0.5 km, Lamdungri RF at 2 km and Jamarha RF is at 3 km. Nearest water bodies are Mahanadi River adjacent to plant, Hirkud Reservoir is at 2.25 km, Power channel reservoir is at 3 km, Rapta Nala is at 3.5 Km, Kharjor Nala is at 0.8 Km and a low lying area (in Northern corner of the additional land of FRP expansion project). No National Park, Wildlife Sanctuary, Biosphere Reserve, PFs falls within 10 km radius of the plant site.</p> <p>14. The unit configuration and capacity of existing and proposed project is given as below: - HRC (Hot Rolled Coil): From 1 x 1.35 Lac TPA to 1 x 5.85 Lac TPA (Expansion) CRC (Cold Rolled Coil): 1 x 1.35 Lac TPA (No Change)</p> <p>15. Raw Materials - The raw materials required for the proposed expansion project include - Ingots from Hirkud Smelter (1.85 LTPA) and Sheet Ingots from Aditya Aluminium (A Division of Hindalco Industries Ltd.) (4.50 LTPA including 3.40 LTPA Molten Aluminium & 1.10 LTPA Aluminium Scrap). Fuel required for the proposed expansion project include Premium LSHS/LDO (Sulphur <= 1.5%) (21450 KLA) from Oil Refineries at Barauni/ Haldia/ Vizag and PNG (86.32 Million SCM) by GAIL (India) Ltd. Premium LSHS/LDO shall be replaced with PNG in Melting-Holding furnaces, subject to the availability by GAIL (India) Ltd. The equipment will be capable of taking care of PNG fuel also.</p> <p>16. Water Requirement - After expansion, total fresh water requirement will be 573 KLD (Existing 211.5 KLD & Additional</p>
--	--	--	--	--	--	--	--	--	---

									<p>361.5 KLD). Water is being / will be sourced from Hirakud Reservoir via pipeline through existing CPP, permission for which been obtained by M/s Hindalco Ltd. for 14 cusecs water. The additional quantity will be within the approved water drawl permission for the complex. Permission for obtaining 14 cusecs water from Hirakud Reservoir has been obtained M/s Hindalco Ltd. Hirakud from Department of Water resources vide letter no. 31007/WR, WR-MAJII-WRC-0007 – 2015 (OSWAS) Irr.-II-WRC-28/17 (Physical) dated 21.12.2017.</p> <p>17. Power Requirement - The total power requirement for the expansion project will be 55 MW (including Existing 25 MW & Additional 30 MW). Power is being & will continue to be sourced from existing CPP of Hindalco Hirakud.</p> <p>18. Project Cost - The total capital cost of the project is Rs. 1500 Crores. Capital cost for environment protection measures is proposed as Rs. 35.40 Crores and annual recurring cost as Rs. 2.79 Crores /annum. The total employment generation after the proposed expansion project will be 1493.</p> <p>19. Baseline monitoring has been carried out as per Standard ToR during Summer Season (March to May, 2021).</p> <p>20. Ambient air quality monitoring was carried out at 10 locations during March to May, 2021 and the baseline data indicates the ranges of concentrations as: PM2.5 ranges between 28.9 to 51.9 µg/m3, PM10 ranges between 61.6 to 90.5 µg/m3, SO2 ranges between 5.6 to 17.3 µg/m3 and NO2 ranges between 12.3 to 28.7 µg/m3. The maximum CO concentration was found to be 0.98 mg/m3 at Sambalpur & it was not detected at some locations. AAQ modelling study for point source as well as line source emissions indicates that the maximum incremental GLCs after the proposed expansion project would be 4.06 µg/m3, 1.62 µg/m3, 0.29 µg/m3 & 1.81 µg/m3 with respect to PM10, PM2.5, SO2 and NO2. The resultant concentrations are within the National Ambient Air Quality Standards (NAAQS).</p> <table border="1"> <thead> <tr> <th>Discipline</th> <th>Anticipated Impact</th> <th>Mitigation Measures</th> </tr> </thead> <tbody> <tr> <td>Air</td> <td>Construction Phase: Dust (Particulate Matter) and NOx concentration due to</td> <td> <ul style="list-style-type: none"> Sprinkling of water on construction site and on unpaved roads during </td> </tr> </tbody> </table>	Discipline	Anticipated Impact	Mitigation Measures	Air	Construction Phase: Dust (Particulate Matter) and NOx concentration due to	<ul style="list-style-type: none"> Sprinkling of water on construction site and on unpaved roads during
Discipline	Anticipated Impact	Mitigation Measures													
Air	Construction Phase: Dust (Particulate Matter) and NOx concentration due to	<ul style="list-style-type: none"> Sprinkling of water on construction site and on unpaved roads during 													

										<p>Leveling activity and Heavy vehicular movement may cause health effects such as respiratory diseases. However, the impact will be for short duration and of minor nature. This will be confined within the plant boundary.</p>	<p>construction.</p> <ul style="list-style-type: none"> • Mobile vacuum dust sweeping system on industrial roads and vacuum dust cleaning system for plant area • Construction equipment having PUC certificate will be deployed. • Proper upkeep and maintenance of vehicles. 	
										<p>Operation Phase: The major air pollutants due to FRP expansion are the PM and oil & emulsion fumes from the process stack. Fugitive emissions due to material handling, transportation or material transfer.</p>	<ul style="list-style-type: none"> • Demisters have been installed with CRM stack to ensure PM emission levels within the prescribed limits i.e. 50 mg/Nm³. And also minimized the oil & emulsion fumes generated during rolling process. • PM from stacks attached to proposed remelt & casting facility will be limited to 100mg/Nm³ with suitable technology. Regular road washing on internal roads • Cleaner fuel will be preferred instead of conventional fuels i.e. Premium LSHS/LDO or PNG (gas subject to availability) • Three CEMS (Continuous Emission 	

										<p>Soil stockpiling which results in soil deterioration or reduce fertility of soil if not managed properly.</p>	<p>Construction & demolition waste will be managed as per C&D Management Rules, 2016.</p> <ul style="list-style-type: none"> To minimize the extent of soil stockpiling, soil will be used in greenbelt/plantation . 	
										<p>Operation Phase: Degradation of soil quality may take place due to the settling of air borne dust, contamination due to the effluent discharge, material spillage, unscientific disposal of solid and hazardous waste, if any. This may lead to change in physicochemical characteristics of soil of the area.</p>	<ul style="list-style-type: none"> Use of efficient pollution control system Adequate stack height helps to control dust emissions. No waste water is being /will be discharged outside the plant premises. Solid and hazardous waste is being/will be disposed of as per prevailing rules. A horticulturist has been engaged who ensures soil quality improvement in the plant area, by adequate manuring and fertilizing. Therefore, no adverse impact on the soil quality of the area is / will be anticipated. Besides, soil samples are being collected and tested at regular intervals from the nearby 	

									areas.	
									<p>21. The project proponent along with the consultant M/s J.M. Enviro Net Pvt. Ltd., Haryana made a detailed presentation on the proposal.</p> <p>Considering the information furnished and the presentation made by the consultant, M/s J.M. Enviro Net Pvt. Ltd., Haryana along with the project proponent, the SEAC recommended for grant of Environmental Clearance valid for 10 years with stipulated conditions as per Annexure – B with following specific conditions:</p> <ol style="list-style-type: none"> Dross generation and Utilization plan for its complete and safe management. Must have provision of 5percent of solar power of the total demand of 55,000KVA. This EC is recommended without prejudice to the fact that the operation of this unit without EC since order of the Hon'ble NGT dated 12/2/2020 shall be dealt with as will be decided by MOEF & CC and / or Hon'ble NGT or any other appropriate authority or court of law in the matter as to the requirement of EC or not for such units. <p>In view of the above the proposal may be placed in the SEIAA meeting for appraisal.</p>	
4.	B1, EC	1(a) Mining of minerals	SIA/OR/MIN/61542/2007	Sree Metaliks Ltd.	Proposal for enhancement of production capacity of EC of Khandbandh Iron Ore Mines(35.774 Ha) of Sree Metaliks Ltd. for enhancement in production capacity from 0.702 MTPA to	08.03.2022	Under examination of SEIAA after SEAC	Online proposal for EC	<p>This is regarding a new proposal for enhancement of production capacity of Iron ore. The project has submitted at SEIAA under Category 'B1' Ha. As per the EIA Notification, 2006, this project falls in the schedule under SI.No-1(a) –“Mining of Minerals” of non-coal mining sector. The project proponent has submitted proposal for grant of EC for enhancement of Iron ore production capacity from 0.702 MTPA to 1.50 MTPA for Khandbandh Iron Ore Mines (35.774 Ha) along with Crushing & Screening Plants Located In Baitarani Reserve Forest Near Village Khandbandh Under Barbil Tahasil of keonjhar District, Odisha. The Project proponent is Sri Rewati Raman Sharma Director of M/s SREE METALIKS LTD.</p> <p>The following documents have been received Form-1, Form-2, PFR, EIA & EMP. land schedule and CTO etc.</p> <p>Other Points</p> <ol style="list-style-type: none"> Initially the project Authority had obtained EC from SEIAA Odisha vide letter no. SEIAA/362 dated 06.09.2010 for production of Iron Ore having capacity 0.702 MTPA. The mine is operation. It is a captive mine. The Public Hearing was held on 18.02.2009 and EC was granted on 06.09.2010, and the mining activities started since March 2018. 	

				<p>1.50 with crushing & screening plants located in Baitarani Reserve Forest under Keonjhar Forest Division near village Khandbandh under Barbil Tahasil of Keonjhar District, Odisha</p>				<ol style="list-style-type: none"> 2. The Regional Office of MoEF & CC submitted certified EC compliance report on dated 03.03.2022. As per MoEF & CC certified compliance report it reveals that the PA complied all most all conditions of EC. 3. Now, the proposal for enhancement of Iron ore production capacity from 0.702 MTPA to 1.50 MTPA for Khandbandh Iron Ore Mines (35.774 Ha) along with Crushing & Screening Plants Located In Baitarani Reserve Forest Near Village Khandbandh Under Barbil Tahasil of keonjhar District, Odisha 4. The Khandbandh Iron Ore Mines is captive mines of M/s Sree Metaliks Ltd spreads over an area of 35.774 hectares located in Baitarani Reserve Forest under Keonjhar Forest Division near village Khandbandh under BarbilTahasil of Keonjhar District, Odisha. The entire mining lease area of 35.774 ha falls within the Baitarani Reserve Forest. The Mining Lease area was granted vide letter no III(A)SM-36/2002/407/SM dated 11.01.2017 under Rule 8(2) of MCR 2016 for a period of 50 years in favor of M/s SreeMetaliks Ltd. Subsequently, the ML was executed on 11.01.2017 for a period of 50 years from the date of execution i.e. w.e.f. 11.01.2017 to 10.01.2067 in favor of M/s SreeMetaliks Ltd. After the execution of the lease deed the mining operation was started on 21.03.2018. 5. The proposal was appraised in the SEAC meeting held during 14.7.2021 and the committee recommended for prescribing ToRs for undertaking EIA study for proposed project. Accordingly, SEIAA, Odisha prescribed ToRs vide letter 1798/SEIAA dated 26.07.2021 for Environment Clearance enhancement in production capacity from 0.702 MTPA to 1.50 MTPA with crushing & screening plants by fully mechanised mining method. 6. As per the EIA Notification 2006(and amendment thereof), the project fall under activity wise 1(a) and Category 'B' with area threshold limit. 7. The life of the mine is calculated to be 08 year after the modified review period. (5 years of Review of Mining Plan period + 3 years of conceptual period). 8. During plan period 2 quarry i.e. 1 & 2 will be developed and further it will merge to single Quarry. Fully Mechanized open cast mining with Crushing & screening units. Geological Reserves is 17.71 Million Tonnes. Mineable Reserves is 10.973 Million Tonnes, Average Bench height & width are 6m & 9m respectively. The final slope angle of the pit will be 45° at the end of the life of the mine, Cut-off grade considered is +58% Fe. Mineral reject is +45 to -58% Fe. 70% of the mineral reject produced will be blended with +58% ore and consumed, Life of
--	--	--	--	---	--	--	--	---

									<p>mine is 8 years including the present plan period, Total generation of waste during plan period is 1969469 Cum. During Conceptual period 1047192 cum waste will be generate. Out of which 30% will be utilized for road maintenance. Remaining 70% will be backfilled in the earmarked site, Total generation of mineral rejects during plan period is 2710383 T. During conceptual period 655187 Cum mineral reject will be generated. out of which 70% will be blended and used and remaining 30% will be stacked temporarily in 2 no's of subgrade dump and further it will be re-handled, Mode of transportation will be through 25t to 30t dumper/Volvo.</p> <p>9. The total 1.620 ha safety zone area is been under green belt/plantation program.</p> <p>10. The Deep Hole–Drilling and blasting using bulk explosive (SME) shall be practiced. The design of blasting parameters was determined (Burden, Spacing, Charging and Stemming) to minimize the impact of ground vibration, noise & air over pressure and fly rock. Basically the blasting design would be with a spacing of 3.0 m and Burden of 2.5m and with a sub grade drilling of 0.6 m depth (10% of total bench height). The blasting is being carried out as per CFRI, Dhanbad.</p> <p>11. Reclamation and rehabilitation work will be undertaken as per the progressive mine closure plan.</p> <p>12. Total quantity of water requirement for the project is 159.80 m³/day out of which 150 m³/day will be met from Sona River and 9.80 m³/day will be from ground water. For withdrawal of water from both the source NOC had been obtained from the Proponent.</p> <p>13. Total Electricity required is 735 KVA and same will be sourced from state Grid. Two no's DG set of 15 KVA and 25 KVA shall be installed for standby purpose. At present power requirement meets from DG set only.</p> <p>14. Fuel Requirement in mine will be 5 KLD HSD for mining equipments and haulage purposes, which is procured just in time manner from outside petrol pumps.</p> <p>15. There will be 166 employees required for Mining Operation. However secondary employment shall be generated with the operation of the mine, which shall directly affect 166 families and indirectly affect another 85 families for their livelihood.</p> <p>16. The ML area is approachable from Joda via Bichhakundi. It is 8 km away from Joda. Banspani and Jururi Railway station are the nearest railway station from the lease area. Banspani Railway station at 10km and Jururi Railway station is 12km away from the lease area. Bhubaneswar airport (320 km away) is the nearest airport from the area. There is an airstrip/ helipad</p>
--	--	--	--	--	--	--	--	--	--

									<p>near Bhadrasai, Barbil which is around 21km from the lease area.</p> <p>17. The project will start within 45 days of issuance of environmental clearance from SEIAA Odisha</p> <p>18. Project Cost is Rs 32.43 Crore (Rs 29.8 Crore capital cost + Rs 2.63 Crore CER Cost)</p> <p>19. The monitoring to study the present environmental condition in terms of its components at the location was carried out from Oct 2020 to Dec 2020.</p> <p>20. The meteorological conditions in an area regulate the transport and diffusion of air pollutants released into the atmosphere. These data are very important for proper interpretation of the baseline information as well as for input prediction for air quality prediction models. Based on the last three months' average diurnal climatologically data from the AERMOD source. Wind is blowing from South-West to North-East and resultant wind direction is 117° which is 14%.</p> <p>21. Average rainfall of 10 years from 2006 to 2018 is 1418.7mm. Site specific temperature is 130 min and 340 max. Similarly Humidity is 19% to 97%, Rainfall is 0.0mm to 13.1mm. Predominant wind direction is SW to NE.</p> <p>22. For Ambient Air Quality eight location are chosen. Out of eight, four are chosen from Project site & four are chosen within the buffer zone having distance 2.73 to 4.56km within 5km radius distance from the project boundary inward direction to the resultant wind direction is expected to carry the total pollution load. It is observed that the all parameters at all stations are well within the limits prescribed by Central pollution control Board.</p> <p>23. The baseline air quality data indicates that the average PM10 ranges from 41.8-80.2µg/m³, PM2.5 ranges from 11.8-45.20µg/m³, SO2 ranges from 4.2-9.22µg/m³, NOx ranges from 8.2-17.2 µg/m³. As per NAAQS norms 100, 60, 80 & 80 µg/m³ respectively is the ranges. The concentration of Particulate matter in nearby areas shows that the impact of mines is not so significant or the line source of dust emission is under control. In an overall sense the AAQ are well within the NAAQS standard for the area.</p> <p>24. Based on the proposed production enhancement, the maximum increments in the concentrations of PM10, PM2.5 & NOx are 5 µg/m³, 0.1 µg/m³, 0.1 µg/m³ respectively and the resultant concentrations are well within the NAQMS standards.</p> <p>25. To assess the level of fugitive dust due to mining and allied activities, 8 monitoring stations were selected within the lease considering the activity area. The fugitive emission from probable sources within the leasehold area are well within the</p>
--	--	--	--	--	--	--	--	--	---

									<p>limits and is under control due to regular water sprinkling on the haulage roads and open areas within the mine.</p> <p>26. The assessment of noise pollution on neighborhood environment due to the project was carried out keeping in view, all the considerations mentioned. Location N1, N2,N3& N4 are within project site. N5,N6,N7& N8 is farthest from the Project area which are within 2km to 6.50Km from the mine lease boundary. Core Zone Noise quality ranges in day time 55.1 to 60.8dB(A) & at night time 43.1-45.3 dB(A). Buffer Zone Noise quality ranges in day time 42.7to 45.3 dB(A) & at night time 35.8-37.5 dB(A). So, as per CPCB Residential area day time will be 55dB(A)& night time will be 45 dB(A) from which it is understood that the buffer zone noise quality is within the norms.</p> <p>27. The surface water location has been chosen within 10km radius from the project site to know the surface water quality. Considering no such discharge from the project, any surface water impacts is quite impossible other than any probable seepage and percolation to nearby static water bodies, however four surface water samples were considered i.e. Upstream & Downstream of Suna River, Water from river Baitarani near village Jalahari& water from Dalco Nala.</p> <p>28. The pH of the water samples collected ranged from 6.5 to 7.8. TDS ranges from 63 to 105mg/l, Sulphate ranges from 9 to 23mg/l, Nitrate ranges from 2.2 to 3.6mg/l, Chloride ranges from 12.4 to 16.2mg/l, Fluoride ranges from 0.26 to 0.54mg/l. However, from Surface water standard IS2296-Class-C pH ranges 6.5-8.5, TDS 1500mg/l, Sulphate 400mg/l Nitrate 50mg/l, Chloride 600mg/l & Fluoride 1.5mg/l it is observed that all the 4 location water are within the permissible water.</p> <p>29. The local water level fluctuation between Pre and Post monsoon 2011, in the Project area is between 4.0 to 4.5 m. The annual replenishable groundwater resource of the area is about 46.57 mcm. Based on the regional utilization of GW, the stage of development is only 41.40%.</p> <p>30. The ground water location has been chosen within 10km radius from the project site to know the ground water quality. Open wells as well as operating public bore wells were chosen for the sampling.</p> <p>31. The pH of the GW samples collected ranged from 6.2 to 6.99 and within the acceptable limit of 6.5 to 8.5. The total dissolved solids were found in the range of 38.4-182.2 mg/l. Total Hardness is ranged from 34 to 104mg/l. Chloride ranges from 13.6-28.17mg/l. Sulpahte ranges from 1.57-5.71mg/l. Iron ranges from <0.07mg/l. However, as per GW standard</p>	
--	--	--	--	--	--	--	--	--	---	--

									<p>IS:10500:2012 all the values are within the acceptable limit at all locations.</p> <p>32. In all samples, toxic substances are within the limits, with bacteria is in absence. Thus, the ground water is required can be used for drinking and domestic use after necessary primary treatment, softening and disinfection.</p> <p>33. The study area is characterized by two types of soil – Alfisols and Ultisols. Soil samples from 5 locations are taken within the core and buffer zone for analysis. From the analysis the pH ranges from 6.48 to 6.72 from this the it concluded that soil is weak acidic in nature, Bulk Density ranges from 1.28-1.31 gm/CC. Water holding capacity ranges from 21.2- 22.1%. Nitrogen ranges from 0.051- 0.056 %. Phosphorus ranges from 0.0-17 0.019 %. Potassium ranges from 0.066- 0.069 %. From the above soil analysis data soil is fertile and good for agriculture process.</p> <p>34. The common flora existing in the lease hold area as well as in the buffer zone around a radius of 10 Kms of the project area are Shorearobusta, Terminliabelerica (Bahada), Terminalia tomentosa, Adina cordifolia, Anogeissus latifolia (Dhaura), Madhucalatifolia, Lagerstroerniaflosreginae, Lagerstroerniaparviflora (Patuli), Holarrhena antidysenterica, Phyllanthusemblica, Ficus benghalensis, Madhuca indica, Anoegeissus latifolia, Diospyros melanoxylon, Mangifera indica, Terminalia alata (Asan), Syzygium cumini (Jamun), Schleicheraleosa (Kusum) etc. Elephant, Sloth bear, Monitor Lizard are placed under Schedule-I as per Wild Life (Protection) Act, 1972 is found in the buffer zone area.</p> <p>35. There is no National Park, Wildlife Sanctuary, Elephant Reserve, Biosphere Reserve, Ramsar site or Tiger Reserve in the study area. Site Specific Conservation Plan prepared and approved by PCCF (wild Life) and Chief Wild Life Warden, Odisha vide memo No 4400/1WL(C) SSP-311/2011 dated 02.07.2011. The project has estimated cost of Rs. 82 lakhs for both buffer & core zone. Out of the above amount Rs. 68.00 lakhs has been deposited under CAMPA.</p> <p>36. There are 27 villages are coming within 5 km of the project impact zone the Khandbandh Iron Ore Mines project area for which need based assessment survey has been done. For immediate implementation 6 villages has been taken i.e. Khandbandh, Chormalda, Kundrupani, Guruda, Chhatabar & Tilapur.</p> <p>37. There is no human settlement in the M. L. area. The project does not envisage any leasing or acquisition of private land. Hence there will not be any land ousters who have to be</p>
--	--	--	--	--	--	--	--	--	---

									<p>resettled our rehabilitated.</p> <p>38. The project located at Khandbandh under Barbil division in Keonjhar District, Odisha. The total work force are highly skilled, skilled workers, semi-skilled, Executive staff & contractual are 166, Out of which, 30- 40 employees belong to villages are-Khandbandh, Chormalda, Kundrupani, Guruda, Chhatabar&Tilapur, within 5-7km radius of the M L area.</p> <p>39. The average Volume to Capacity (V/C) ratio for base year of study road network is estimated is about 0.279. In the study road network, improvements such as road widening on NH-215 which is going to be completed soon, road widening from Joda to Kalimati is going on which has been considered for performance evaluation.</p> <p>40. As per the CRRI study the additional allowable Iron ore is estimated for base year as per maximum V/C threshold (0.70) is about 214 Million Tons Per Annum (MTPA) for study road network in Joda- Barbil region. So, the additional traffic from Khandbandh Iron Ore Mines i.e. 8 tucks/hour add in the existing traffic on the road after start the mining operation which will have very negligible impact. The V/C ratio will remain in Category "B".</p> <p>41. Impact Assessment of the study area carried out for both operation and Mine Development phase of the proposed mines and mitigate measures are recommended for different environment such as Air, Water, Land, Biological Environment, Socio economic, Noise.</p> <p>42. Water sprinkling will be done at regular intervals on the dust prone areas such as haul roads and other possible dust generation areas to suppress emission and distribution of dust particles. Plantation will be undertaken in the safety zone to arrest the air borne dust from further spreading.</p> <p>43. In order to take extra protection measure of kundranalla loose boulder wall retaining wall followed by cemented wall followed by garland drain has been made. Settling pond/ check weirs has been provided at the strategic location. Further during the expansion the same run-off management structures will be augmented towards arrest the wash-off materials to settle the sediments.</p> <p>44. The maximum noise level prescribed by Director General of Mine Safety (DGMS) for an 8 hours exposure is 90dB (A). Therefore, control measures suggested keeping the noise level within permissible limit.</p> <p>45. Delay detonators will be used to split a large vibration package in to a number of small vibration levels. Vibration will also be minimized by changing the broad blasting parameters on trial &</p>
--	--	--	--	--	--	--	--	--	--

									<p>error basis.</p> <p>46. During the social impact assessment process, locals raised the question regarding more job opportunities. The proposed facility would generate jobs for the women laborers during construction as well as operation phase. This project will increase the economic activities around the area, creating avenues for direct/indirect employment in the post project period.</p> <p>47. Site selection has little relevance with respect to a mining project, which is mainly guided by geological occurrence of minerals and ores. Moreover, as stated earlier, Khandbandh iron ore mines is an existing iron ore mine of M/s. SreeMetaliks. Therefore, the site alternative is not pertinent with respect to the present proposal.</p> <p>48. For Work Zone weekly twice at various locations in the mines with parameters PM10, PM2.5, NO2, SO2 & CO and mineralogical composition monitoring will be done.</p> <p>49. For Ambient Air Quality two consecutive day in a week/station or as per SPCB requirement at 5 different locations (Core zone 2 + Buffer zone 3) with parameters Sulphur dioxide (SO2), Oxides of Nitrogen (NO2), Respirable Particulate (PM2.5/10) & CO monitoring shall be done.</p> <p>50. For Meteorology Continuous monitoring throughout the year 1 location within the mine lease area of parameters Wind speed and direction, Rainfall, Temperature and humidity monitoring shall be done.</p> <p>51. For Surface water Quarterly once or as per SPCB/MoEF & CC requirement as per IS 2296 location Upstream and downstream of Baitarani, Jalahuri, Sunanadi monitoring shall be done.</p> <p>52. For Ground water Quarterly once or as per SPCB/CGWA/MoEF & CC requirement as per IS-10500:2012 monitoring shall be carried out Near Mine Lease area, Open well near village Jurudi, Jajanga & Jalahuri</p> <p>53. For Noise level of work zone & ambient noise level Fort-nightly once or as per SPCB/DGMS requirement active mine working area, haul road, lease peripheral areas and based on their requirement & priority & different locations in and around the mines with consulting with Regional Officer, SPCB respectively monitoring shall be carried out.</p> <p>54. For Vibration monitoring shall be carried out at least two places within the mine lease area at an appropriate distance from the blast face. It shall be ensured that the vibration level due to blasting are less than the DGMS prescribed limits with parameters such as peak particle velocity, Air over pressure, fly rock measurements monitoring shall be carried out.</p> <p>55. For Socioeconomic environment in and around (local Villages)</p>
--	--	--	--	--	--	--	--	--	--

									<p>of the mines as per CSR activities and reported six monthly with EC compliance monitoring carried out. For Biological Environment Green belt development monitored inside mines area and buffer zone where ever plantation is being/will be carried out as per the six monthly compliance report.</p> <p>56. Details of Occupational Health environment shall be monitored and reported along with six monthly compliance reports.</p> <p>57. After analysis the analysis report are shall sent to OSPCB and Regional Office, MoEF& CC monthly basis. A copy of report shall be available in the mines with the concerned inspecting officers.</p> <p>58. The project has incurred an expenditure towards establishment of infrastructure related to environmental management system is Rs.76 Lakhs. However, the operating cost envisaged for recurring expenditures is Rs.26.14 Lakhs per year.</p> <p>59. For the socio-economic development of the local villages SreeMetaliks has been spend nearly 30 lakhs for different CSR activities for the year 2020-21. As per the recommendation of Need base assessment study by AISD, an amount of Rs 755.97 lakhs has been estimated for various socio-economic development in next 5 years. However in lieu of the recent notification of CER Spending, the final implementation plan and associated costs shall be decided based on the outcomes of Public Hearing is coming around Rs 2.63 Crore and according the project cost is Rs 32.43 Crore.</p> <p>60. The Public hearing was held on 06.12.2021 at 11.00 am at Baitarani Reserve Forest. SushamaBilung, Additional District Magistrate, Keonjhar and Shri Puskar Chandra Behera, RO, SPCB was addressed the meeting. The main demand of the public during PH was dust control, more plantation, ambulance facility, teachers facility for local village, development of local school infrastructure, peripheral development like road, water facility through tube well, electricity and employment for local people etc. The Project Authority assure to fulfill the demand of the public.</p> <p>61. Statement of issues and demands raised by the public and commitment of the project proponent during the public hearing held on 06.12.2021 at 11.00 am at Baitarani Reserve Forest 03 kms from village Khandbandh and about 20 mts from DalpahadBasti under Baitarani Reserve Forest(A) area. The public hearing implementation cost is coming Rs 2.63 Crore.</p> <p>62. Risk Assessment and Disaster Management Plan in connection with mining and allied operations of the project will be spelt out in detail to cover possible dangers / risks / explosions /accidents, etc. likely to arise from the project operations, including on site</p>
--	--	--	--	--	--	--	--	--	--

									<p>and off site emergency plans to meet the disastrous situations if any.</p> <ul style="list-style-type: none"> • Occupational Safety & Health • Socio Economic Study • Biodiversity Study with Audit Mechanism • Blasting Study • Dump Slope Study <p>63. Due to the proposed project there will be improvement in physical infrastructure by up gradation of nearby infrastructural facilities. M/s Shree Metaliks Private Limited is very much conscious about the socio-economical development of neighbouring areas, wants to change the quality of life and to develop social well-being of communities where it operates.</p> <p>64. As the project will be considerable employment & trade opportunities with the commencement of the production activities. Secondary jobs will also bind to be generated to provide daily needs and services to the work force. This will increase the demand for essential daily utilities in the local market.</p> <p>65. The EMP has been designed within the framework of various legislative and regulatory requirements on environmental and socio-economic aspects. Capital Cost earmarked for environmental Management Plan is 55.00 lakh and recurring cost shall be 19.lakh/annum</p> <p>66. Dust will be generated from mine working faces, occasional drilling and blasting, stock piles, crushing activity and also during handling and transportation of the material.</p> <p>67. Wind erosion resulting in particulate dispersion, fugitive dust during loading and unloading are mitigated by adopting optimum height of release of material from trucks, spraying water to maintain optimum moisture on the surface to preclude dust raise, provision of greenery surrounding the stock piles.</p> <p>68. Water sprinkling in haul roads to reduce the fugitive dust emissions.</p> <p>69. Overloading of trucks will be avoided to mitigate fugitive dust during transportation of mineral.</p> <p>70. Dry fog system has also been fixed in tertiary crusher area.</p> <p>71. Noise Quality Management</p> <p>72. Plantation of native trees in row around mine periphery including safety barrier area along the roads, other noise generating centers and simultaneous plantation in backfilled area to act as acoustic barriers.</p> <p>73. Sound proof operator's cabin for equipment like Excavator, Tippers/Dumper, etc.</p> <p>74. For less noise generation proper and regular maintenance of</p>	
--	--	--	--	--	--	--	--	--	--	--

									<p>equipment shall be carried out.</p> <p>75. Providing in-built mechanism for reducing sound emissions.</p> <p>76. Providing earmuffs to workers exposed to higher noise level.</p> <p>77. Workers which are engaged in the noise prone area regular health check-up of workers including Audiometry test shall be carried out.</p> <p>78. The noise level status shall be displayed in the operational machinery on the machines to know the extent of noise level and to control the time to which the worker is exposed to higher noise levels.</p> <p>79. Waste water generated from domestic purpose which is being treated through STP. Garland drains & retaining walls have been constructed all around the dumps and plantation of native species on the dump slopes to minimize erosion. Drain shall regularly de-silt and maintained. Regular maintenance shall be carried out for the run-off management structure.</p> <p>80. Detail planning has been made for undertaking plantation. Regarding green belt development plan, till date a total of 4.696 Ha area has already been covered under plantation in safety zone area etc. within the lease area. Total 11740 no's of plantation existing at strategic locations like Safety zone, Dump slope, Haul road side etc. Further, for the next 10 year Lessee has planned for plantation of 18000 no's of saplings over an area of 7.04 Ha. Capital cost of Rs 21 lakhs & recurring cost of Rs 9.64 lakhs has been estimated for this purpose.</p> <p>81. Adoption of systematic and scientific mining, proper and timely execution of various environment management plan like fixed, mobile water sprinkling, rainwater harvesting, controlled blasting practices, effective solid waste management technique, surface run of management, surface drainage management, occupational health management, etc., will ensure maintenance of future environmental quality within statutory limits after the proposed expansion also.</p> <p>82. The proponent along with the consultant M/s. Ardra Consulting Services Pvt. Ltd., Bhubaneswar (NABET certificate No NABET/EIA/1922/IA0055) made a detailed presentation on the EIA/EMP report before the SEAC.</p> <p>83. The SEAC in its meeting held on dated 28.03.2022 decided to take decision on the proposal after receipt of the following information / documents from the proponent.</p> <p>(i) A comparative statement in matrix form of base line data regarding environmental parameters during the year 2009 submitted w.r.t EC granted is 2009 and the same parameters data in 2021 for above proposed EC be submitted.</p>

										<p>monthly basis apart from Wildlife Week, World Environment Day, VanoMahostav, Earth Day etc. Apart from employee, we used create awareness among locals, School children through Audio visual, Essay writing and Painting competition.</p> <p>The approval of PCCF (wild Life) and Chief Wild Life Warden, Odisha is attached as Annexure-15 and Authenticated flora & fauna list is attached as Annexure-16.</p>
										<p>xvii. Comments on petition received through SEIAA on this mine be submitted.</p> <p>The comments of the petition received through SEIAA is attached as Annexure-17.</p>
										<p>85. The SEAC opined Comments of the lessee at Annexure – 17 of the ADS on petition received through SEIAA on this mine is satisfactory and to the fact and hence, no field visit is required.</p> <p>86. Considering the information furnished and the presentation made by the consultant M/s. Ardra Consulting Services Pvt. Ltd., Bhubaneswar along with the project proponent, the SEAC recommended for grant of Environmental Clearance with stipulated conditions as per Annexure – E.</p> <p>In view of the above the proposal may be placed in the SEIAA meeting for consideration.</p>
5.	B2, EC	8(a) Building and Construction projects	SIA/OR/MIS/2379/47/2021	M/s Alishan Realcon Private Limited; Mr. Manoj Kumar Dash, Director	Proposal of EC of Proposed Construction of (S+5) Storied Residential Apartment Building over an plot area of 15256.64 Sqm (1.52 Ha) With Total Built	14.11.2021	Under examination of SEIAA after SEAC	Online proposal for EC	<p>This is regarding a new proposal building and construction project. The project has submitted at SEIAA under Category 'B' Ha. As per the EIA Notification, 2006, this project falls in the schedule under Sl.No-8(a) –“Building & Construction” project. The project proponent has submitted proposal for grant of EC of M/s. Alishan Realcon Pvt. Ltd for construction of housing project of S+5 storied residential apartment building over an built-up area of 39, 288.93 sqm at mouza-Nuahata, Dist-Cuttack, Odisha of Sri manoj Kumar Dash (Director) of M/s. Alishan Realcon Pvt. Ltd.</p> <p>The following documents have been received Checklist, EMP, PFR, Form-1A, Land Schedule and scrutiny fee Other Points</p> <p>1. The proposal is for Environmental Clearance of M/s Alishan Realcon Pvt. Ltd for Proposed housing Project of S+5 storied</p>	

				Up Area- 39288.93 Sqm, At Mouza- Nuahata, Cuttack, Dist - Cuttack; of M/s Alishan Realcon Private Limited; Mr. Manoj Kumar Dash, Director				<p>residential apartment building over an built-up area of 39,288.93 Sq.m. at Mouza- Nuahata, Dist – Cuttack, Odisha.</p> <p>2. The project falls under category “B” or activity 8 (a) - Building and Construction projects under EIA Notification dated 14th September 2006 as amended from time to time.</p> <p>3. Alishan Realcon Private Limited has proposed for development of private housing project of area 15256.64 sqm in plot No.: 1085, 1122, 1124, 1090 Khata No- 13-D1, 498/240, 139 & 498/2111 at Mouza- Nuahata, Cuttack, Dist-Cuttack.</p> <p>4. Location and connectivity - The proposed site is located at Mouza- Nuahata, Cuttack, PS- Balianta, Dist- Cuttack, Odisha. The Geographical co-ordinate of the project site is Latitude 20°22'24.81"N & Longitude 85°53'19.57"E. The project site is well connected with the National Highway-16 & Puri-canal road located at the distance of 0.1 Km & 0.2 km. The nearest Railway station is Mancheswar Railway Station at a distance of approximately 5.5 Km from the project site. The nearest Airport is Biju Patnaik International Airport, Bhubaneswar which is at a distance of 16 Km from the project site.</p> <p>5. The site is coming under development plan of Cuttack Development Authority.</p> <p>6. 									<p>STP loss will be 8.5 m³/day and 26.98 m³/day surplus will be generated which will be discharged to the drain.</p> <p>9. Power requirement: The total consolidated electrical load estimate for proposed project is about 1435 KW. The power will be entirely supplied by source of TPCODL of Odisha State Electricity Board. Also, in case of power cut, 100 % power backup generator will be provided for common uses only. For this purpose diesel generator having 700 KVA (2 nos.) capacities will be provided. There are 70 nos. of Solar Lighting poles (@72 Watt) has been proposed for Street lighting, Energy conservation by using Solar Street Lighting = 70 x 72 = 5040 watt = 5.04 KW Energy Saving by using Solar Lighting = 71 KW Energy Saving by using Solar Street Lighting = 5.04 KW Total Energy Saving = 71 + 5.04 = 76.04 KW Total Energy Saving = 76.04/1435 = 0.0529 = 5.2 %</p> <p>10. Rain Water Harvesting: Rain Water will be harvested and recharge through 07 recharge pits from the plot area.</p> <p>11. Parking Requirement: Total parking area provided is 8146.17 m² sq.mt./ 278ECS and space provided is stilt and open parking area.</p> <p>12. Fire fighting Installations: Fire fighting system will be installed as per recommendation of the Fire fighting Officer, Odisha and as per the guideline of NBC (part-4).</p> <p>13. Green Belt Development: Green belt will be developed over an area of 3051.32 sqm which is 20.0 % of the plot area; by using the local species like Radhachuda, Nageswar, Akash Neem, Ashok, Polanga, Karang, Bela, Pijilu, Kaniara, Tagar, Hena, etc.</p> <p>14. Solid Waste Management: From the proposed housing project solid waste in form of food waste from kitchen and miscellaneous waste will be generated @ 0.45 kg/person/day, which will be about 556 kg/day. The waste generated from floating population in residents will be @ 0.15 kg/day, which will be 21 kg/day. The generated solid waste from the residential apartment will be segregated as biodegradable and non-biodegradable. This will be collected in separate colored bins. Proper waste management practices will be adopted during the collection, storage and disposal of the generated solid waste and construction and demolition waste.</p>

									Requirement & Sources	(4702 KVA) Solar - 455 KW (506 KVA) CESU - 3777 KW (4196 KVA)	Solar - 54 KVA TPOCDL - 2704 KVA	TPCODL – 6900 KVA
									Capacity of DG sets	1500 KVA	4500 KVA	6000 KVA
									Water requirement	551.4 KLD (Fresh)	241.4 KLD	792.8 KLD
									Sewage Treatment Plant	750 KLD	300 KLD	1050 KLD
									Estimated Population- Residential, Commercial, Floating/visitors	5930 nos.	2830 nos.	8760 nos.
									<p>8. The daily power requirement for the proposed complex is preliminarily assessed as 7460 KVA (Solar System- 560 KVA&TPCODL – 6900 KVA). In order to meet emergency power requirements during the grid failure, there is provision of 6 nos. of DG set having total capacity 6000 KVA for power back up in the Residential Building Project.</p> <p>9. For energy conservation, Roof Top Solar Power plant for captive power Generation = 12x 38KW = 560 kVA, Total Energy Conservation = 7460 KVA, Total Energy saving = 560/7460 = 8 %.</p> <p>10. Fresh make up of 792.8 m³/day will be required for the project which will be sourced from Ground water. Waste water of 1017 KLD will be treated in a STP of 1050 KLD capacity, which includes primary, secondary and tertiary treatment. After treatment the treated water will be discharge to the Prachi Drain.</p> <p>11. Rain Water will be harvested through 23 nos. of recharging pits.</p>			

								<p>12. Firefighting system will be installed as per recommendation of the Firefighting Officer, Odisha and as per the guideline of NBC (part-4).</p> <p>13. Green belt will be developed over an area of 23616.0 sqm which is 35.11% of the plot area; by using the local species like Casia Fistula, Conocarpus, Agave, Amla, Mango, Water Apple, Royal Palm, etc.</p> <p>14. From the residential complex solid waste in form of food waste from kitchen and miscellaneous waste will be generated @ 0.45 kg/person/day, which will be about 3942 kg/day. The generated solid waste from the residential complex will be segregated as biodegradable and non-biodegradable. This will be collected in separate-coloured bins. Proper waste management practices will be adopted during the collection, storing and disposal of the generated solid waste.</p> <p>15. Solid waste from sweeping and Dry Garbage containing non-biodegradable wastes like polythene bags, metal, ceramic Waste, glass etc. shall be stored in separate garbage bin and send to approved recyclers. Around 140 kg/day of STP sludge will be generated.</p> <table border="1"> <thead> <tr> <th>S. No.</th> <th>Category</th> <th>Counts (heads)</th> <th>Waste generated (kg/day)</th> </tr> </thead> <tbody> <tr> <td>i)</td> <td>Residents</td> <td>8760 @ 0.45 kg/day</td> <td>3942.0</td> </tr> <tr> <td>ii)</td> <td>Floating Population</td> <td>876 @ 0.15 kg/day</td> <td>131.4</td> </tr> <tr> <td>iii)</td> <td>STP sludge</td> <td></td> <td>140.0</td> </tr> <tr> <td colspan="3">TOTAL SOLID WASTE GENERATED</td> <td>4213.4 kg/day</td> </tr> </tbody> </table> <p>16. by the Sub-Committee of SEAC to the proposed site. The project proponent has furnished the compliance and the SEAC verified the same as follows:

Sl. No.	Information Sought by SEAC	Compliance furnish
i)	Provisions of solar power (8%) of total power demand in stated to have been made. Details of plan and consumption calculation vis-s-vis the generation of the same be submitted.	Total power generation KVA. Total power demand KVA. So total solar power proposed Project is 7.57 Details solar calculation 1.
ii)	Layout of internal drains in project with connection to existing drains.	The Layout Plan showing building with connection attached in Annexure-2.
iii)	Permission from BMC and Highway authority (if the drain is immediately connecting to adjacent highway drain) for discharge of treated water.	The nearest drain to the Prachi Nala which is adjacent. The drainage plan has Bhubaneswar Municipal letter no. 24923, dated drainage approval letter 3.
iv)	Layout drawing showing separate parking for commercial, residential and floating population with separate entry and exits for the same.	The layout plan showing Residential and Floating entry and exits is attached
v)	Traffic study report and fire clearance	The traffic density report Indian Institute of Technology. Traffic study report is attached. Fire Clearance recommendation Annexure -6.

20. The SEAC in its meeting held on dated 15.03.2022 decided to take decision on the proposal after the site visit by the sub-committee of SEAC.

21. The proposed site was visited by the sub-committee of SEAC on 16.03.2022. Following are the observations of the sub-committee and proponent needs to submit relevant documents as below:

- a) There is a dead canal inside the premises of the project. The possession and permission including developments of the same like- constructing Culvert etc to be provided

									<p>from the appropriate authority.</p> <p>b) Water storage arrangements and permission from appropriate authority.</p> <p>c) Main Entry and Exist drawing with dimensions and pavements provision.</p> <p>d) Total Parking, ECS and Visitor Parking (both 2 and 4 wheelers). Also % of visitor parking w.r.t. total parking.</p> <p>e) Land details for Service Plots including Ownership and Kisam.</p> <p>f) Solid waste disposal facilities and any tie up for garbage disposal (documents to be provided with a brief on how the types of solid wastes to be separated).</p> <p>g) NOC from BMC for drain connection and disposal of treated water load of the project.</p> <p>h) Copy with Possession of Private land connecting the final drain (external).</p> <p>i) Drainage map of internal drains, Rain water harvesting their nos, dual plumbing lines and final connection. Calculation of Rain water harvesting.</p> <p>j) Details of WTP if any.</p> <p>k) Source of water with permission letter, Fire permission.</p> <p>l) No of OHT and Tanks for Dual Plumbing.</p> <p>m) Certified compliance report of PH-1 or earlier project.</p> <p>n) Party to give an undertaking that all statutory permissions including CGA, Fire etc to be obtained for the composite project as a whole.</p> <p>22. The SEAC in its meeting held on dated 12.04.2022 decided to take decision on the proposal after receipt of information / documents as pointed out at para 21 above.</p> <p>23. The project proponent has furnished the compliance and the SEAC verified the same as follows:</p> <table border="1"> <thead> <tr> <th>SI. No.</th> <th>Information Sought by SEAC</th> <th>Compliance furnished by the proponent</th> </tr> </thead> <tbody> <tr> <td>i.</td> <td>There is a dead canal inside the premises of the project. The possession and permission</td> <td>We have submitted the letter to Superintending Engineer, Prachi Division, Bhubaneswar for construction of V.R. Bridge over Rudraour Sub-Minor Crossing. Submitted Letter is attached in</td> </tr> </tbody> </table>	SI. No.	Information Sought by SEAC	Compliance furnished by the proponent	i.	There is a dead canal inside the premises of the project. The possession and permission	We have submitted the letter to Superintending Engineer, Prachi Division, Bhubaneswar for construction of V.R. Bridge over Rudraour Sub-Minor Crossing. Submitted Letter is attached in

For this project ToR has been issued by SEIAA, Odisha vide letter no. 8999/SEIAA dated 18.09.2020 for EIA studies. 2. Public hearing was conducted on 21.12.2021 at Dhanarasi, Ganjam and 36 persons were present in the PH and the following point raised in the PH as follows: <ol style="list-style-type: none"> a. Construction of protection wall/stone patching/guard wall along riverbank b. The lessee shall not deploy heavy vehicles for transportation of sand through village road as there is a chance of damage the village road through transportation of heavy vehicles. c. The Govt. may regulate the price of sand so that it can available to the local people for construction of Anganwadi Kendra/Houses at cheaper price. d. The Sand mining should not be allowed from Dhoba Sahi Masani of Tentupada village to Sagadia Sahi as due to the sand extraction the nearby lift irrigation points will be affected. <p>In view of the above the proposal may be placed in the SEIAA meeting for consideration.</p>
40.	B2, Trans_EC	1(a) Non Coal Mining	SIA/OR/MIN/2716/69/2022	Janaki Devi Mishra	Proposal for Transfer of EC for Bhimpur Sand Bed over an area of 10.425 acres or 4.219 ha. at village Bhimpur, Tahasil-Purushottampur, District Ganjam from Tahasildar, Purushottam	07.05.2022	Accepted By SS(S EIAA)	The proposal was placed in the 81 st meeting of SEIAA and was decided that as follows: "The EC earlier given is revoked	<p>This is regarding a transfer of EC proposal for mining of minor mineral Sand. The project has submitted at SEIAA under Category 'B2' as the lease area is ≤ 5 Ha. As per the EIA Notification, 2006, this project falls in the schedule under SI.No.1(a) "Mining of Mineral" of non-coal mining sector. The project proponent has submitted proposal for transfer of EC of from Tahasildar, Purushottampur to Janaki Devi Mishra (Successful Bidder).</p> <p>The following documents have been received Form-7, earlier EC copy, covering letter and scrutiny fees. The Tahasildar, Purushottampur has submitted the cluster certificate for Kanaka Sand Quarry that Bhimpur Sand Bed and Kanaka Sand Quarry are coming under cluster and the distance between them is 400 meters. Earlier the Tahasildar, Purushottampur had submitted the cluster certificate for Bhimpur sand bed that there are no mines located within 500 meters and the proposal was treated as</p>

					pur to Janaki Devi Mishra (Successful Bidder).			pending proper clarification on whether the lease area is part of a cluster".	<p>category B2 and EC was granted by SEIAA vide EC Identification no. EC22B001OR143015 dated 07.05.2022 in favour of Tahasildar, Purushottampur and now the successful bidders (Lessee) has submitted the proposal for Transfer of EC in his name.</p> <p>Now the SEIAA may consider the cluster certificate which is contradictory to each proposal and cluster certificate shows that both the mines will come under Category B1 project and the area under cluster is more than 5ha.</p> <p>The proposal was placed in the 81st meeting of SEIAA and was decided that as follows: "The EC earlier given is revoked pending proper clarification on whether the lease area is part of a cluster".</p> <p>The Tahasildar vide his letter dated 13.06.2022 has submitted that the Bhimpur Sand Bed is only 84 meters from Kanaka Sand Bed. But the Tahasildar has submitted to take the Bhimpur Sand Bed as an individual lease as Kanaka sand Bed was situated at 1.81 km as per the old mining plan of Kanaka Sand Bed during the apply of EC of Bhimpur Sand Bed.</p> <p>The Authority may take a decision of the above submission whether cluster approach shall be applied to both the instant case i.e Bhimpur and Kanaka Sand Bed.</p>
41.	B2, TRANCEC	1(a) Mining of minerals	SIA/OR/MIN/263141/2022	Gaurang Jalan	Proposal for production of Lime Stone 0.0115 MTPA Dolomite 0.03826 MTPA crushing (200 TPA) at village Dharaura Lanjiberna in the district of Sundargarh of	28.03.2022	Accepted By SS (SEIAA)	The proposal was placed in the 76 th meeting of SEIAA and was decided that as follows:	<p>This is regarding a transfer of EC proposal for mining of mineral.
