Since, the District Geological Survey Reports are awaited from the Geology &
Mining Department/Dy.Commissioners concerned, it will not be possible to process
your case in absence of the District Geological Survey Reports.

Therefore, alternatively, you may formulate the E.I.A./E.M.P. for the stream/river system and submit the same for further necessary action at this end. Besides, you will submit co-ordinates of minimum four points forming a rectangular polygon or more than four points in case of irregular shape clearly depicting the aerial extent of the project site.
