Sub.: Mining of Bajri (Minor Mineral) with production capacity of 1,50,000 TPA (ROM) by Lessee Shri Rajendra Singh Ranawat, located near Village-Lasani, Tehsil – Deogarh, District –Rajsamand, Rajasthan (MLA:339.62Ha)– Information regarding.

Sir,

The proposal of Lessee Shri Rajendra Singh Ranawat is for mining of Bajri (Minor Mineral) with production capacity of 1,50,000 TPA (ROM). The mine lease area is river bed Khari passing through villages Lasani, Kalalon ki Anti, Sopari, Isharmand, Malklaliya, Malkot, Kakrod, Pushalo ka Khera, under Deogarh Tehsil in Rajsamand District of Rajasthan.

2. The proposal of EC was recently appraised before the EAC in its meeting held during **May 30-31, 2018** wherein the Committee deliberated the information submitted by State Government of Rajasthan and Project Proponent. The representatives of State Government of Rajasthan were also present during the meeting. Based on the detailed deliberations and discussions on the information submitted by the State Government of Rajasthan and Project Proponent, the Committee **deferred** the proposal. The detailed Minuets of EAC meeting may kindly be seen at <http://environmentclearance.nic.in>. **The EAC has also suggested that the proposal can only be considered after submission of the following requisite information:-**

- (i). The Committee deliberated the issues and is of the view that **Department of Mines and Geology, Government of Rajasthan shall first confirm whether the instant LOI/Lease is valid or not before consideration of the Proposal.**
- (ii). **The Committee deliberated the sections submitted by PP and noted that it is not clear from the section that till what lateral and depth extents the material will be excavated. Thus, the PP is required to submit the sections clearly marking the lateral and depth extents of present ground profile as well as proposed excavation profile at individual sections. The same needs**

to be verified/approved by the State Mines and Geology Department, Govt. of Rajasthan.

- (iii). The PP needs to submit a database in structured tabulated form clearly mentioning the nomenclature of the section line, latitude and longitude of both the extents of section line, chianages and respective levels (RL, AMSL) of all the points taken on that section line. That means with the help of this database profile of ground at that section line can be drawn with the help of suitable CAD software.
- (iv). Thus with the help of existing ground profile and proposed extents of excavation considering the stipulations of lateral extents of sustainable sand mining guidelines, as mentioned above, The PP shall estimate the proposed quantum of excavation in tonnages with the help of Specific Gravity verified by the State DMG between every two consecutive sections. Such estimation shall be furnished by the PP in tabular form which includes the nomenclature of section lines, area proposed for excavation, distance between two consecutive section lines, volume, specific gravity, tonnage of the mineral, maximum depth extent from existing ground profile. Respective plans shall also be submitted clearly marking the area to be excavated. The same needs to be verified by the State Mines and Geology Department, Govt. of Rajasthan. In addition to this a composite plan mentioning the above proposed excavation zones for the entire mine lease area also needs to be submitted. Thus PP needs to submit a plan clearly showing the area to be put in under excavation and no excavation zones. Respective KML files of such lateral extents of excavation and no excavation zone within ML shall also be submitted by the PP.
- (v). PP needs to submit a plan clearly mentioning the width of river, lease boundaries, area left under safety zones as prescribed as per Sustainable Sand Mining Management Guidelines, 2016, as per statutory requirements under Rajasthan Minor Mineral Concession Rules and other competent authority.
- (vi). It was found that the plans and sections were not depicting the dates (period) of survey further in order to ensure the ground survey PP should submit the dates (period) of survey, the model no & details of the instrument used for such survey, field recordings and observations along with name, signatures and contact details of the Surveyor explicitly be mentioned and recorded in the field book as well as in Plan & Sections.
- (vii). In addition to this soft copy (Excel or CSV file, DWG file) of all such survey recordings should also be submitted in proper order & sequence in order to cross check & verification samples checks of sections.
- (viii). The Committee deliberated the issues w.r.t. erection of pillars and accordingly suggested that the PP needs to erect the pillars with the following specifications and submit the details (in table form) of the same along with photographs. The specifications inter-alia are as (a) the distance between two adjacent pillars shall not be more than 100 meters; (b) the pillars shall be of square pyramid frustum shaped above the surface and cuboid shaped below the surface; (c) each pillar shall be of reinforced cement concrete; (d) the pillars shall have a base of 0.30m X 0.30m and height of 1.30m of which 0.70m shall be above ground level and 0.60m below the ground; (e) all the pillars shall be painted in yellow colour and the top

ten cm in red colour by enamel paint and shall be grouted with cement concrete; (f) on all the pillars, distance and bearing to the forward and backward pillars and latitude and longitude shall be marked; (g) each pillar shall have serial number in a clockwise direction and the number shall be engraved on the pillars; (h) the number of pillar shall be the number of the individual pillar upon the total number of pillars in the lease; and (i) the tip of all pillars shall be a square of 15 cm on which a permanent circle of 10 cm diameter shall be drawn by paint or engraved and the actual boundary point shall be intersection of two diameters drawn at 90 degrees.

- (ix). The proposal of EC was appraised before the EAC in its meeting held during April 29-30, 2015 wherein the Committee desired that Project Proponent shall submit clarification of Rajasthan State Pollution Control Board w.r.t. rank of officer who presided the Public Hearing as per the provisions of the EIA Notification, 2006. The Ministry vide letter dated 21.05.2015 has requested the PP/SPCB to submit the clarification. The same is still awaited from PP.
- (x). PP shall submit the compliances as per the Ministry's Office Memorandum No.3-50/2017-IA.III(Pt.), dated 30.05.2018 by an undertaking by way of affidavit to comply with all the statutory requirements and judgment of Hon'ble Supreme Court dated the 2nd August 2017 in Writ Petition (Civil) No. 114 of 2014 in the matter of Common Cause versus Union of India and Ors.

3. The matter has been examined in the Ministry and accordingly the undersigned is hereby directed to request **Project Proponent and Department of Mines and Geology, Govt. of Rajasthan** to kindly submit the above mentioned requisite information online to the Ministry of Environment, Forest and Climate Change, Indira Paryavaran Bhawan, 3rd Floor, Vayu Wing, Aliganj, Jor Bagh Road, New Delhi- 110003 for further necessary action on the matter.

Yours faithfully,

(Surendra Kumar)
Adviser/ Scientist 'G'
