2. The Proposals were considered by the Special EAC meeting held on **08.01.2018** **wherein** the Committee has made detailed deliberations on the issues mentioned in minutes of the meeting (copy enclosed). The Committee noted that there is a requirement of identification of active mining area within leased river stretches and subsequent identification and preparation of cross-section for assessing replenishment of sand in coming years. Hence, mining permission is technically required to be granted so as to conduct replenishment studies in future and demonstrate the same to State Govt. to regulate mining of paleo deposits in future. Accordingly, EAC recommended mining of river sand/ bajri to up to 25% capacity of the annual proposed production capacity **subject to submission** of information and undertaking as below:

- i. DMG, State Government to submit demarcated river stretch through latitudes and longitudes (out of the total lease) where river sand/ bajri mining can be permitted based on available reserves and Original Ground Level (OGL) at each cross section in consultation with State Irrigation Department;
- ii. PPs and M/s CMPDI to submit latitudes and longitudes of the identified cross
