Accreditation No. – NABET/EIA/1417/SA 028 dated 8th June 2017

May 2017

1 Public Hearing

The proposed activities qualify the Project under Category A and hence, the process of Public Hearing forms a pre-requisite for obtaining Environmental Clearance under EIA Notification, 2006. As the project site is located in Dibrugarh & Tinsukia of Assam, Oil India Limited (OIL) requested the Member Secretary of Assam State Pollution Control Board to arrange the public hearing. Upon receipt of the request the Member Secretary selected 26th December 2016 to be the date of Public Hearing.

Along with the application OIL provided sufficient copies of Draft Environmental Impact Assessment (EIA), and Executive Summary in English and Assamese to make them available at the following places:

- The Deputy Commissioner's Office, Dibrugarh District, Assam.
- The Deputy Commissioner's Office, Tinsukia District, Assam.
- Ministry of Environment & Forests, Govt of India, Regional Office, Shillong
- Regional Office and Head Office of the Pollution Control Board at Dibrugarh, Guwahati

The Draft Environment Impact Assessment (EIA) and its Executive Summary in Assamese was also made available at Pollution Control Board Website at <http://www.pcbassam.org>.

Panitola is located centrally in the Khagarijan Oil and Gas block. So Public Hearing was conducted within the premises of the Panitola Block Development Office (Chabua) near CRPF Camp in Dibrugarh District.

On 26th December, 2016, public hearing was chaired by Additional District Commissioner, Mr. P. K. Das. The panel was also represented by Mr. B. K. Baruah, Additional Chief Engineer, Pollution Control Board, Assam.

In the introductory session, Mr. B. K. Baruah, Additional Chief Engineer, Pollution Control Board, explained the purpose of the meeting and public consultation process. He further explained that the "Pollution Control Board of Assam" (PCB) is not the nodal agency to grant Environmental Clearance". PCB arranges Public hearing to create an opportunity for the general public to express their concerns and outlook of the project. PCB convey the same to the nodal agency "Ministry of Environment, Forest and Climate Change (MoEFCC)". MoEFCC appraises the outcome of EIA study, public concerns and outlook of "Public Hearing" and feedback of State PCB.

On behalf of OIL, a detailed power point presentation was presented to the public as well as district administration on large screen by Dr. B.N. Sahu, OIL's Chief of Safety and Environment. During the presentation, the project activity along with baseline environmental condition of the Khagarijan oil and gas block was described in brief. It was followed by brief discussion about the probable environmental and health and safety risk associated with the project and technological control and mitigation measures planned or adopted to mitigate the impact.

After the presentation the forum was opened for discussion. Minutes of public hearing recorded by Assam State Pollution Control Board is attached as **Annex-1.1**.

The concerns received during the public hearing and response provided by the project proponent are summarized below:

Effluent Treatment: Concern were raised regarding effectiveness of mobile Effluent Treatment Plant (ETP) and its ability to treat effluent.

Mobile ETP is efficient enough to treat the type and volume of waste water in drill site and efficient enough to bring down the water parameters to permissible limit (permissible by CPCB guidelines) before releasing treated water to natural water body.

Drilling is a temporary process so setting up permanent ETP is not ideal, because after drilling is over in a particular site, the ETP is required to be shifted along with drilling rig and other equipment's to the new drilling site.

CSR Activity: Issue as raised by multiple speakers regarding the consistency of CSR funding and formulation of an effective action plan for smooth execution of CSR plan.

Giving something back to the community was long in the corporate culture of OIL, in the form of CSR, even before CSR was a legal compliance. It is generally done in the form of Mobile Dispensary, Scholarship for meritorious student, skill development programme. Other small scale development project in Rural Areas are also carried out with the help of district administration. There are already few CSR programme running in the Khagarijan oil and gas block area and new scope of CSR programme are already being appraised.

Disaster Management & Preparedness: OIL has always considered Health and Safety very seriously and have strong and proven "Disaster Management Plan" and regular safety procedures. The primary objective of the DMP is to provide a safe, timely, effective and coordinated response by the onsite Emergency Response Team (ERT), along with the other local and government agencies/departments to prevent or minimize any major emergencies that may arise from possible failures/risks viz. blow outs, oil spill, fire & explosion etc. associated with drilling.

The Emergency Response/Crisis Management Team (ERT) responds to fire, blow-out, spills, accidents and technical emergencies. These teams will be made up from operations personnel, who can be called upon 24 hours a day, supported by senior management field personnel as and when required. The emergency response teams will receive specific training for their roles and exercise on a regular basis. Regular drills and training are being carried out as part of disaster preparedness.

Flaring of Gas: Issue was raised regarding flaring of gases and scope of commercial harvesting of such gas instead of flaring. Flaring provides means of safe disposal of vapor streams from its facilities; by burning them under controlled conditions such that adjacent equipment or personnel are not exposed to hazards. OIL's conformance with CPCB Flaring Guidelines, the impact is envisaged to be of low significance. Previously 10% of the

produced gas was flared. OIL informed that flaring has reduced from 10% to 1.5%. With further development of technology there is a scope of further reduction of flaring.

Handling Solid Waste: It is estimated that nearly about 290 m³ of drill cuttings and 6.2 m³/day of drilling wastewater and 5 m³/day waste mud are likely to be generated from each well during drilling operation. With the project design planning taking into account construction of HDPE lined impervious pits of capacity 800 m³ each for temporary storage of drill cuttings and 3200 m³ drilling fluid respectively and their disposal in accordance with “CPCB Oil & Extraction Industry Standard – Guidelines for Disposal of Solid Wastes” no significant impact to this regard is envisaged. Further with the proponent catering to the use of water based mud the drill cuttings and waste drilling mud generated are likely to be non-hazardous in nature.

Tea Production: As some oil and gas drill locations are located within the tea garden, concern was raised about hampering tea production.

Though some oil and gas drill locations are located within tea garden, in comparison to the vast extent of tea garden in Khagarijan oil & gas block, negligible portion of tea garden will be used for oil & gas drilling activity. So oil and gas activity is not going to have any impact on the overall tea production or quality in Khagarijan Block.

Photograph of Public Hearing for Proposed Exploratory Drilling (30 wells) in Khagarijan Oil Gas Field, Dibrugarh & Tinsukia District, at Panitola Dev. Block Auditorium (Chabua) on 26th December, 2017

All stakeholder concerns raised during Public Hearing have been addressed along with necessary commitments:

Participant Details	Comments/Concerns Raised During Public Hearing	Response of OIL
<p>Speaker 1</p> <p>Mr. Parthat Chetia [Local Resident & Engineering Student]</p>	Whether Mobile Effluent Treatment Plant (ETP) will be effective in treating the waste water generated within the drill site	Mobile ETP will be effective to treat waste water in drill site and efficient enough to bring down the water parameters to permissible limit before releasing to natural water body. Moreover drilling is a temporary activity, so mobile ETP is necessary because it is required to be moved from one rig to another rig.
<p>Speaker 2</p> <p>Mr. Bhaskar Chetia [Member of “Yuva Mancha”, (local youth organization)]</p>	Expressed concern about the smooth release of CSR fund supposed to be created for the project.	OIL informed that the culture of giving something back to the community runs deep in the corporate culture of OIL. CSR was carried out by OIL even before CSR was made mandatory by law. OIL had been practicing it in the form of Mobile Dispensary, Scholarship for meritorious student, skill development and small scale development project in Rural Areas.
	Pointed out that PCB must identify necessary steps to help OIL handle waste produced from the drill sites.	Solid waste will be handled following Central Pollution Control Board’s guideline, “CPCB Oil & Extraction Industry Standard – Guidelines for Disposal of Solid Wastes”
<p>Speaker 3</p> <p>Mr. Deepak Borpatra Gohain [member of “Panitola Pothar Porisalona Samiti”]</p>	Expressed grievance over his past experience of misbehavior and misconduct from OIL’s subcontractor working close to his village and using road within his village.	OIL will look into the matter and take the necessary measures
	Enquired about any action plan or initiative for the development of the block area.	Will be addressed through CSR plan

Participant Details	Comments/Concerns Raised During Public Hearing	Response of OIL
<p>Speaker 4</p> <p>Mr. Rasid Das [President of BJP Tea Workers Union]</p>	<p>Over all welcomed the project, but as few well locations are falling within the tea garden area, was concerned about hampering tea production. If there is any risk, inquired about mitigation measures.</p>	<p>In comparison to the total extent of tea garden within the Block area, small portion of tea garden may be used for drilling activity. So overall tea production is not going to be hampered.</p>
<p>Speaker 5</p> <p>Mr. Munin Dutta [Member of “Prastuti” an NGO]</p>	<p>Overall welcomed the project, but sighting recent examples, raised question regarding the preparedness of OIL and administration in handling emergency situation like onsite fire.</p>	<p>OIL has always considered Health and Safety very seriously and have strong and proven Disaster Management Plan and regular safety procedures.</p>
	<p>He also raised concern about flaring of gas and was inquisitive whether the gas can be used commercially instead of flaring.</p>	<p>OIL informed that flaring has reduced from 10% to 1.5%. With further development of technology there is a scope of further reduction of flaring.</p>
<p>Speaker 6</p> <p>Mr. Suren Murmo [President, Gram Panchayat]</p>	<p>Requested OIL to fulfill the promise of CSR and early release of CSR fund, prior to establishment of rigs.</p>	<p>CSR will be carried out with the assistance of District administration</p>
<p>Speaker 7</p> <p>Mr. Haresh Gogoi [a resident of Kharjan area]</p>	<p>Inquired about measures taken to compensated for tree cutting (if required)</p>	<p>OIL has taken initiative for large scale afforestation program. For that they will collaborate with forest department.</p>
	<p>Feasibility of small scale gas based power plant for generation of electricity for local people.</p>	<p>OIL have partnered with other companies in generating Hydro as well as Wind Power. And in future considering the feasibility of Gas based small power plants.</p>
<p>Speaker 8</p> <p>Mr. Lohit Phukan [Member of “All Assam Motok Students Union]</p>	<p>Have proposed OIL to increase scope of scholarship and grants for higher education and more measures for development of local community</p>	<p>Will considered under CSR.</p>

Sub: Public Hearing for proposed exploratory Drilling (30 wells) in Khagorijan Oil Gas field,
Dist-Dibrugarh & Tinsukia, Assam by M/s Oil India Ltd., P.O.: Duliajan, Dist -
Dibrugarh.

Ref.: Public Hearing held on 26.12.2016

Sir,

As per directive of Member Secretary,, Pollution Control Board, Assam, the Public Hearing for proposed exploratory Drilling (30 wells) in Khagorijan Oil Gas field was successfully conducted on 26.12.2016 at Panitola Development Block Auditorium, Chabua.

The following documents of Public Hearing are enclosed herewith for your kind necessary action:

- Minutes of Public Hearing (2 copies - 1 in English and 1 in local language i.e., Assamese)
- Attendance register copies
- 1 no. DVD & 1 no. CD of Public Hearing
- Copy of notice published for Public Hearing

We request you to kindly consider the matter & grant EC to OIL at the earliest.

Thanking you,

With regards,

Yours faithfully

OIL INDIA LIMITED

Public Hearing Minutes

Minute Register

This register contains 59 pages and used for recording minutes in English for Public Hearing for proposed Exploratory drilling (30 well in Khagarijan Oil & Gas Field Dist. Dibrugarh and Tinsukia (Assam) by M/s OIL India Date 26th December 2016 .
Venue: Panitola Dev Block (Chahua) near CRPF camp Dibrugarh Area

26/12/2016

Executive Engineer
Pollution Control Board, Assam
Regional Office, Dibrugarh

Public Hearing for Proposed Exploratory Drilling (30 wells) in Khagarijan Oil Gas field, Dist. Dibrugarh & Tinsukia, Assam by M/s Oil India Ltd (OIL) Buliagan Assam on 26 December 2016 at (12.00 Noon) at Panitola Dev. Block, (Chebua) Near CRPF Camp Dibrugarh. Hearing is chaired by Mr. P. K Das Addl. Deputy Commissioner, Dibrugarh.

The Panel Members present in the meeting are Mr. Hassan Ali, ACS, Addl. Deputy Commissioner, Karbi Anglong District, Diphu and Mr. B. K. Baruah, Addl. Chief Engineer, Pollution Control Board, Assam and various members of Oil India Ltd and Pollution Control Board, Assam and the public of nearby areas.

The purpose of the meeting is explained by Mr. B. K. Baruah, Addl. Chief Engineer, Pollution Control Board, Assam and seek the cooperation of the public.

Mr. B. N. Shaha, Oil India Chief of Safety and Env. demonstrated a presentation on the Environmental effect of this project. The environmental ^{impact} assessment is as per with the Ministry of Forestry and Environment he explained in his project presentation.

Control Board, Assam but by the ^{EIA} Expert in New Delhi but the grievances or the problems of the environment as will be accessed by the local bodies will be considered.

Mr. Parthab Chetia, a local resident, ^{Engineering} has asked the authorities if the mobile effluent Treatment plant has will be effective in treatment of the chemical

Dr. BN Sahu has explained that the Mobile ETP will be effective and it has to be moved from one rig to another rig. Therefore State ETP will be less effective as even the water in the ETP thus produced is been reused

Mr. Bhaskar Chetia, a member of Yuva Ankya Manch, has wanted to know if the CSR fund allowance which is to be released for the development of the local bodies will be (hampereed or) smoothly released. He stressed if the Pollution Control Board, Assam has taken necessary steps to the dumping of the waste which are to be produced in these project. He further hoped that a certain amount percentage of fund royalty thus generated in these project should be spend for the development of the local areas and human

Mr. Dilip Kr. Bar of OIL, CSR department, has replied to the query of Mr. Bhaskar Chetia.

2

While dispensary projects, setting up of Institutes, Scholarship facilities, Communication and development projects in rural areas, their 'Swabalambhan' mission etc.

Mr. Deepak Borpatra Gohain, Panikla Pothar Pansalona Samiti, has cited an incident when few sub-contractors misbehaved in their village where in the road leads to the project. He doubted if the written complaint which has been sent to the oil authorities been has reached them as the representatives of the oil who came to deal with the incident were not satisfactory to them. He again wanted to know if oil has taken any initiatives for the development of the farm areas. He further wanted to know if the project presentation which is demonstrated can be taken in Pen Drive.

Mr. B. K. Baruah responded to the queries and told oil to take necessary measures to development.

Mr. Rasid Das, President of BJP Tea Muncha wanted to know if there will be any effect to the production of the tea Estate and in its as these projects fall in the Garden Area. If so, what measures has been taken to counter it. He welcomed the project but requested the authorities to undergo developmental activities in tea garden area.

Mr. B. K. Baruah thanked the oil authorities.

Mr. Munir Datta, a member of Prastuti NGO, has asked the authorities if they are ready to handle situations instantly, like that of Bikom or other big mishaps. He hoped that the road leading to the projects should be constructed at the earlier. However he welcomed the project.

Mr. B.K. replied to the queries but stressed to the public that the discussion should be limited to environmental issues though these matters too requires explanation.

Mr. BN Sahu expressed that oil has been always concern to any kind of mishaps as they already have disaster management plans. He further looked forward for the co-operation of the public for implementation of the same. He also said that the gas for flaring has been reduced to 1.5% from 10%, which too will be further reduced with technology development.

Mr. Suren Murmo, President, Anchalik gram panchayat has requested the oil authorities to fulfill the promises made by the company prior to the establishment of the Rigs. Moreover he also wanted the CSR fund to be released in the earliest for the welfare of the local residents.

Mr. Harash Gogoi, a resident Khagarijan

3

if the flares can be converted to produce for generation of electricity for the local people.

Mr. Joy Kr. Acharya GM, etc has replied to the queries of Mr. Harsh gogoi that they have various ties with other Hydro companies for electricity for Belp and also to nearby localities And also we have taken extensive steps to plantation and afforestation in the past and has plan in future.

Mr. Rohit Purbani, All Assam Mutch Students Union, Central Body has proposed the authorities to take more initiative for Scholarship grants, takes steps to provide free higher education, and also requested to take enough measures of development for community welfare.

In his presidential speech regarding the Environmental Impact and Assessment of the 30 Wells considering the various ecological and environmental aspects and keeping in view the various points of views of the public and the point presentation of the Mr. Mr. Shobha Kumar Das. From his chair and expressed his Satisfaction. He requested our authorities to keep up with their promises to the public and work for the development of the local community. Thanking everyone present in the hearing he announced an end to the meeting.
