7. PUBLIC CONSULTATION

7.0 Introduction

The Ministry of Environment, Forest and Climate Change, (MoEFCC) Government of India issued Environmental Impact Assessment notification S.O. 1533 dated September 16, 2006 mandating prior environmental clearance for Synthetic Organic Chemicals (Bulk drugs and intermediates) under category A for projects located outside notified industrial area/estate. The proposed expansion project of M/s. SVR Laboratories (P) Ltd. is located at Sy No. 238 (Part), 239/A and 240/E, Dothigudem village, Pochampally Mandal, Nalgonda District, Telangana. The proponent obtained the terms of reference vide letter no. F.No. J-11011/7/2013-IA II (I) dated 29.04.2013 and obtained extension of TOR vide letter no. F.No. J-11011/7/2013-IA II (I) dated 24.06.2016, from the MoEFCC, which mandated public consultation. Accordingly the draft Environmental Impact Assessment was submitted to Regional Officer, Telangana State Pollution Control Board, Nalgonda District for conducting public hearing. The public hearing for the proposed expansion was conducted on 27.08.2016 at 11.00 AM at project site. The public hearing was chaired by Sri Ravi Gugulothu, District Revenue Officer & Additional District Magistrate, Nalgonda District and the member convenor was Sri G. Hanumantha Reddy, Environmental Engineer, Telangana Pollution Control Board, Regional office, Nalgonda.

7.1 Advertisement

Press notification regarding the date, time and venue of the Environmental public hearing for the proposed expansion project was issued in Andhra Jyothi (Telugu daily) and The Hindu (English daily) newspapers on 14.06.2016. Copy of the advertisement is enclosed.

7.2 Minutes of the meeting

The minutes of the public hearing is enclosed along with attendance sheet. Concerns expressed by speakers during public hearing and responses of the proponent are presented in table 7.1. Response to written representations is presented in table 7.2.

7.3 Concerns expressed by public

Table 7.1 Concerns Raised in Public Hearing and Responses

S. No	Issue raised by	Issue	Proponent's Response
1.	Sri Balam Mallesh Yadav, Sarpanch, Dhotigudem (V)	<p>He stated that this public hearing was held in connection with the expansion of M/s. SVR Laboratories Limited. There are 7 other chemical units operating in this village. Since public hearing was held here, he would like to know the quantum of compensation payable to the affected people. Secondly, he wanted to know the contribution of the industry to the development of the village. Local people should be accorded priority in respect of employment. Due to the establishment of industries, the ground water that was there for 100 years got polluted. The village is facing acute shortage of drinking water. Whenever, they contact the industries for supply of water, the companies were not responding and there is no value for supply for Sarpanch. Water was supplied for two months through water tankers. So far compensation was paid to some farmers only after interference from local police. In the previous public hearing held in connection with M/s. VJ Sai chem., they assured to pay compensation. It was not known whether it was paid or not. Some farmers said to have received the compensation from M/s. SVR Laboratories. He requested cooperation for the sought development of the village. As the expansion depends not on the decision of the village, he sought development of the area. He sought supply of ground water to Dhotigudem and Jiblakapally villages. The other industry prepared to pay wages to education volunteers. Sri Ravi Kumar prepared to bear the expenditure of cook and construction of room for preparation of non meal. He sought written affidavit with a condition that pollution levels should not increase</p>	<p>The proponent informed that presently 67% of the employees in the plant are natives of surrounding villages from to to bottom levels. Proponent assured that he would maintain the same tempo and will enhance the quantum of jobs from the local people.</p> <p>Proponent assured that the Management has earmarked about 2% of the profits to be spent on welfare activities in surrounding villages, in consultation with local public representatives and revenue authorities.</p> <p>Proponent assured that industry will adopt latest pollution control equipment like two stage scrubbing system, double condensor system, closed transfer of raw materials/solvents to mitigate odor nuisance, bag filters to mitigate particulate emissions from boilers.</p> <p>Proponent assured that they will adopt "Zero Liquid Discharge" based effluent treatment system and treated effluent will be reused in cooling towers.</p>

		further. He complained that the villages continued to face the pollution problem especially in the evening. If any villager complained about the problem, they alleged that they demanded money. While extending full cooperation for the proposal of expansion, he has categorically stated that he never opposed the expansion of industries.	
2.	Surkanti Janga Reddy, MPTC Member, Dhotigudem	He alleged that the villages in surrounding areas were subjected to pollution due to establishment of industries. The farmers, who were dependent on agriculture for their living, could not carry out their activities on account of pollution problem. He sought compensation to the farmers who were affected due to pollution and employment to the villagers affected. Some basic infrastructure existed and sought water supply to surrounding 4 villages for drinking and agriculture. The industries were welcome, if they operate without causing pollution. There were allegations with regard to dumping of wastes in forests, canals and Musi river. The local companies allege that this was reported by the industries from outside. Local industries should take up the responsibility in this aspect, otherwise they would be considered as suspected source of pollution. He extended full cooperation to the expansion of industry subject to the condition that they should not pollute the area.	<p>Proponent assured that they will adopt "Zero Liquid Discharge" based effluent treatment system and treated effluent will be reused in cooling towers.</p> <p>Proponent assured that the Industry shall follow the standards prescribed by Ministry of Environment, Forest and Climate Change (MoEF&CC) with respect to emissions, effluents, solid waste.</p>
3.	Sri Guram Madhav Reddy, Ex-Sarpanch, Dhotigudem	He alleged that officers were visiting only when public hearing was held. It was the intention of Government not to allow the industries without public hearing, and wondered whether there was law empowering in the case of closure of industries. Two months back a public hearing was held and the industry assured compensation. The compensation was not paid to the affected farmers but to others nominated by the political parties. Local employment should be provided. He wanted 20 % of the CSR fund which worked out to Rs.18, 00,000/- and	<p>The proponent informed that presently 67% of the employees in the plant are natives of surrounding villages from to to bottom levels. Proponent assured that he would maintain the same tempo and will enhance the quantum of jobs fro the local people.</p> <p>Proponent assured that the Management has earmarked about 2% of the profits and</p>

		wanted to know how they were going to develop the village with CSR fund. The industry should be able to tell about the components such as roads, drinking water, irrigation water, health and hospital facilities and education. He alleged that there was no clarity on utilization of the CSR fund and 2 % of the profits of industries. He complained about air pollution which was ejected after 7'O'Clock in the evening. No industry is taking responsibility for these acts and road users also felt the problem. He wanted that industries should run their plants without causing pollution and assured that the villagers would extend full cooperation.	5% of the capital cost to be spent on welfare activities in surrounding villages, in consultation with local public representatives and revenue authorities. Proponent assured that industry will adopt latest pollution control equipment like two stage scrubbing system, double condensor system, closed transfer of raw materials/solvents to mitigate odor nuisance.
4.	Sri Pagilla Ram Reddy, ex-Sarpanch, Dothigudem(V)	He alleged that the officials from PCB were coming only on the day of public hearing. Air and water got polluted and enquiries were coming only at the time of the public hearing. Nobody bothered about pollution and they were not aware of monitoring of pollution levels by the officials of PCB and alleged connivance of the officials. Now the situation became problematic and wanted to know the AE concerned with the affairs of Pochampally. He requested for action against the concerned against causing pollution. Now the industries are spending on welfare activities, which were not done earlier. If the industries manage the individuals, they will face the trouble in future and anything done under CSR should be routed through local Sarpanch or MPTC. The benefit and adverse effect ratio remained at the same level and he wanted that the industries should take steps to curb pollution. He expected that the officials should take necessary steps to ensure pollution free environment to human beings as well to cattle in order to avoid external dependency for their needs as well as the needs of the industry. He welcomed the expansion of the industry to the condition of curbing the water pollution.	Proponent assured that they will adopt "Zero Liquid Discharge" based effluent treatment system and treated effluent will be reused in cooling towers. Proponent assured that the Industry shall follow the standards prescribed by Ministry of Environment, Forest and Climate Change (MoEF&CC) with respect to emissions, effluents, solid waste. Proponent assured that the Management has earmarked about 2% of the profits and 5% of the capital cost to be spent on welfare activities in surrounding villages, in consultation with local public representatives and revenue authorities.

5.	Smt.Sara Saraswathi Balaiah Goud, President, MPP, Pochampally(V)	She stated that this was the first public hearing attended by her in the span of 2 years after becoming MPP. Some people could express their opinion and other could not do so, but people are aware of the things happening here. There is nothing equivalent to the health in this world. Even the passersby could not bear the problem of pollution, but complimented the people who could withstand the same. Some higher officials gave permission and the locals are facing the problems. Officials from PCB were invited to the Mandal Parishad meetings, but nobody attended so far. No official ever bothered even the samples of water were given as compliment to them. Employment should be provided to the local people and expected the industries to adopt better technologies to address the problem of pollution. It is painful to know that the people are experiencing the severe problems in this area. She questioned the veracity of development activities undertaken by them. By undertaking small welfare activities at the time of public hearing, the industry can not absolve itself from the responsibility and the same cannot be said openly. Every year welfare activities should be taken up by the local industries. There were more police personnel than people. If the industry maintains good liaison with the people, there would be no need of others and the people will definitely extend their cooperation.	<p>The proponent informed that presently 67% of the employees in the plant are natives of surrounding villages. Proponent assured that he would maintain the same tempo and will enhance the quantum of jobs fro the local people.</p> <p>Proponent assured that the Industry shall follow the standards prescribed by Ministry of Environment, Forest and Climate Change (MoEF&CC) with respect to emissions, effluents, solid waste.</p> <p>Proponent assured that the Management has earmarked about 2% of the profits and 5% of the capital cost to be spent on welfare activities in surrounding villages, in consultation with local public representatives and revenue authorities.</p>
6.	Sri Arla Venkatesh Yadav, Sarpanch, Jiblakpally(V)	He stated that there were 7 industries established 10 years and above. The farmers owning small holdings were unable to reap harvest on account of pollution. Government extended Cooperation was with an intention to provide employment for local people to improve their living conditions. It is regretted that the people were moving in search of employment to other places on account of pollution and lost their living means. He	The proponent informed that presently 67% of the employees in the plant are natives of surrounding villages from to to bottom levels. Proponent assured that he would maintain the same tempo and will enhance the quantum of jobs fro the local people.

		<p>demand compensation at the rate of value of yield of wet land or dry land and officials should see that the farmers were compensated adequately. As stated, the industries should implement the development activities. It was felt that Rs.20-25 lakh should be contributed towards CSR, if the sum contributed by the industry would be around Rs.1.50 Crores, which could be utilized for making the villages green. The industries could construct canal to fill the village tank by arranging 11ft from the local stream to meet the drinking as well agriculture needs of the people. The industries are not taking any responsibility and are not implementing any welfare activities. People from Andhra area were employed with factious Aadhar cards. The villagers have no objection, if they engage people from surrounding villages. The people are ready to cooperate with the industry, but the industry failed to supply drinking water with tankers. Plantation helps in controlling the pollution levels and the industry should take responsibility of raising plantations. There will not be any objection if the industries following the conditions stipulated in the orders issued by the Government. The industry should not see the drama of politicians but try to wipe out the tears of the common people. The industry should take up the distribution of medicines to the needy people and requested them to implement welfare activities and offered to cooperate for the expansion.</p>	<p>Proponent assured that the Management has earmarked about 2% of the profits and 5% of the capital cost to be spent on welfare activities in surrounding villages, in consultation with local public representatives and revenue authorities. Propoenet assured that proposed expansion will develop greenbelt in an area of 2 acres.</p>
7.	Sri Gurram Channa Reddy, Dhotigudem(V)	<p>He urged the people to cooperate with the industry in conducting the public hearing. He expected that the NGOs who were here should asses the loss to the area and extends necessary cooperation in securing the permissions required by the industry. The value of the land in 2001 was Rs.30,000/- now the value of the land would be around Rs.30 lakhs per acre. People should think about the positive change. There was only one industry prior to</p>	<p>Proponent assured that the Industry shall follow the standards prescribed by Ministry of Environment, Forest and Climate Change (MoEF&CC) with respect to emissions, effluents, solid waste. Proponent assured that the Management has earmarked about 2% of the profits and 5% of the capital cost to be spent on</p>

		the year 2000. At that time, the Sarpanch post was auctioned for Rs.15,000/-to Rs.50,000/- and now it is around Rs.10 lakhs to get elected for the same Sarpanch position. The industry should compensate the losses of farmers. Necessary cooperation for the development of Jiblakapally should be extended to secure clearances to the industry.	welfare activities in surrounding villages, in consultation with local public representatives and revenue authorities.
8.	Sri P. Dasaratha, Dhotigudem(V)	He stated that the water in the village was polluted and the affected should be compensated. Bills should be paid to tractor owners. Vector problem was arising on account of pollution. He demanded that the managements of all companies should pool their resources to connect the canal to the Dhotigudem tank; this step would ensure development of Anthammagudem and Jiblakapally villages. He extended support for expansion and urged the people not to politicize the issue. Even youth associations are prepared to extend their support subject to the necessary assistance from the industry.	Proponent assured that they will adopt "Zero Liquid Discharge" based effluent treatment system and treated effluent will be reused in cooling towers. Proponent assured that the Management has earmarked about 2% of the profits and 5% of the capital cost to be spent on welfare activities in surrounding villages, in consultation with local public representatives and revenue authorities.
9.	Sri Kandi Janga Reddy, Dhotigudem(V)	He contended by quoting the phrase that farmers were backbone of the country and stated that the efforts were on to break the backbone. This kind of attitude should end and the industries should ensure that the welfare of the farmers. Several times complaints were filed in PCB, but without any action. He appealed to the industries to extend assistance to the development of area and compensate the damage caused to the farmers. The amount under CSR should be spent locally by the industry to garner the support of the people.	Proponent assured that the Management has earmarked about 2% of the profits and 5% of the capital cost to be spent on welfare activities in surrounding villages, in consultation with local public representatives and revenue authorities.
10	Sri Narsimha, Anthammagudem(V)	He stated that the Pillaipally canal was redesigned. Public hearings were attending and going back. The impact of air pollution is more on the health of people than water pollution. He contended that the value of dollar is going up on account of establishment of drug industry and also the value of land rose up to Rs.30/- lakhs per acre. But the	Proponent assured that industry will adopt latest pollution control equipment like two stage scrubbing system, double condensor system, closed transfer of raw materials/solvents to mitigate odor

		<p>value of land would have been more than Rs.1crore. The borewell existed since 10 years was dosed on account of pollution. Even if the bore well brought back to operation, it should be closed again. No new permissions should be accorded and area under forest cover is less in Nalgonda. The Hon'ble Chief Minister initiated the "Haritha Haram" program from Nalgonda. He alleged that the meeting was held under the aegis of police escort and people were not coming out freely to air their views. Even the Hon'ble CM was not provided with this type of protection. He sought that people should be allowed to speak to air their views freely.</p>	<p>nuisance.</p> <p>Proponent assured that they will adopt "Zero Liquid Discharge" based effluent treatment system and treated effluent will be reused in cooling towers.</p>
11.	Sri Muddam Sathyam, Dhotigudem(V)	<p>He questioned why permission should not be accorded to the industries and industrial development is the agenda of the Government itself. Permissions should be accorded so that the opportunities would be there to provide employment to youth. But the water was polluted and no further permissions should be accorded. He stated that the present level of pollution was not due to this also other industries were equally responsible. He questioned the persons responsible to pay the compensation to the farmers. It was known that compensations were paid to 20 farmers. This situation would not have occurred had the compensation was also paid on similar fashion by other industries. He demanded that the compensations to the affected farmers should be paid by Monday otherwise the industries would face the closure due to agitations as were taken place earlier, Employment should be provided to all unemployed youth and urge the industry to extend financial assistance to the economically poor. He also demanded 10% more salary to the local people than others and coverage of insurance facilities and concluded his speech with a request that the polluters should be dealt under WALTA Act.</p>	<p>Proponent assured that they will adopt "Zero Liquid Discharge" based effluent treatment system and treated effluent will be reused in cooling towers.</p> <p>The proponent informed that presently 67% of the employees in the plant are natives of surrounding villages from to to bottom levels. Proponent assured that he would maintain the same tempo and will enhance the quantum of jobs fro the local people.</p> <p>Proponent assured that the Management has earmarked about 2% of the profits and 5% of the capital cost to be spent on welfare activities in surrounding villages, in consultation with local public representatives and revenue authorities.</p>

12.	Sri S. Nagasena Reddy, Environmental Nalgonda	He stated that the public hearing was being conducted as part of expansion of the existing unit. He hoped that the CSR activities would increase with the expansion of production. He stated that a mega medical camp was conducted in Jiblakapally village and medicines were distributed to the needy people He requested that M/s. SVR Laboratories would take up similar activities and extend their cooperation for the all-round development of the villages.	Proponent assured that the Management has earmarked about 2% of the profits and 5% of the capital cost to be spent on welfare activities in surrounding villages, in consultation with local public representatives and revenue authorities.
13.	Sri Sukanti Venkat Reddy, Environmental, Choutuppal(M)	He stated that industrialization would invariably require for survival and to eradicate unemployment as enunciated by the Hon'ble CM. He offered two advices to the industry. He requested that the CSR funds should be utilized for diversion of the Pillaipally Canal which is at a distance of 2.50 Km and issue environmental clearance to the proposed expansion.	<p>The proponent informed that presently 67% of the employees in the plant are natives of surrounding villages from to to bottom levels. Proponent assured that he would maintain the same tempo and will enhance the quantum of jobs fro the local people.</p> <p>Proponent assured that the Management has earmarked about 2% of the profits and 5% of the capital cost to be spent on welfare activities in surrounding villages, in consultation with local public representatives and revenue authorities.</p>
14.	Sri Pannala Ravinder Reddy, Dhotigudem(V)	He requested the authorities to permit them to express their problem arising out of public limited companies to the public since 13 years, as they are the permanent residents of that place. He alleged that there were no crops since 13 years due to polluted ground water. It is unbelievable that PCB officials are unaware of the problems and held that PCB is responsible as there is no officer in this area even though 7 industries are functioning here. Industries are responsible for pollution of water resources. Industries are paying compensation to	<p>Proponent assured that industry will adopt latest pollution control equipment like two stage scrubbing system, double condensor system, closed transfer of raw materials/solvents to mitigate odor nuisance.</p> <p>Proponent assured that the Industry shall follow the standards prescribed by Ministry of Environment, Forest and</p>

		<p>the farmers but the question of survival of entire family remains as it was. He wanted that industries should not be established at the cost of lives of people. It was stated that funds were earmarked for local development and industries should state the way the funds were utilized by them. Definitely people would have extended full cooperation, if they did any worthwhile work. The people of the village were not able to live with the obnoxious odor, even the people passing through the village were questioning about habitability of the area. He blamed the Government for the present state of affairs instead of industries. Since Government did not bother about the people, the state of affairs is like this. He wanted that the people should be told about the method of rendering justice to the farmers who lost their livelihood and requested the PCB officials to enforce the pollution laws effectively.</p>	<p>Climate Change (MoEF&CC) with respect to emissions, effluents, solid waste.</p> <p>Proponent assured that they will adopt "Zero Liquid Discharge" based effluent treatment system and treated effluent will be reused in cooling towers.</p>
15	Sri Kommu Sai Kiran, Jiblakpally(V)	<p>He stated that the people were not aware of the public hearing held here. The same could be intimated through open publicity means. The area is subjected to severe pollution and requested stringent action to control the pollution.</p>	<p>Proponent assured that the Industry shall follow the standards prescribed by Ministry of Environment, Forest and Climate Change (MoEF&CC) with respect to emissions, effluents, solid waste.</p>
16	Sri Choppari Pandu, Dhotigudem(V)	<p>He complained that water was contaminated and water was not available despite deep drilling of bore wells. In case of bore wells where water was struck, the water found to be polluted. It is welcome that the value of land has gone up. Even though there is a well read statement of enhanced employment opportunities, the same is not true. Employment is not offered to B.A and B.Com graduates, only B. Sc., degree graduates are preferred by the industry. People from other places were provided jobs ignoring the claim of local people. He appealed to the industry to extend their cooperation to the villages so that the people also will reciprocate the same.</p>	<p>Proponent assured that they will adopt "Zero Liquid Discharge" based effluent treatment system and treated effluent will be reused in cooling towers.</p> <p>The proponent informed that presently 67% of the employees from top to bottom in the plant are natives of surrounding villages. Proponent assured that he would maintain the same tempo and will enhance the quantum of jobs fro the local people.</p>

17.	Sri Ch. Shankar Yadav, Jiblakapally	He stated that it was a mistake to permit the chemical industries. However, it was permitted thinking that the revenue would go up. The same policy remained till now. PCB is vested with the power to control pollution from industries. They should explain how they were going to contain the pollution.	Proponent assured that the Industry shall follow the standards prescribed by Ministry of Environment, Forest and Climate Change (MoEF&CC) with respect to emissions, effluents, solid waste.
18	Sri Sathyanarayana , R/o Jiblakapally	He stated that he would like to explain the destruction caused by the pollution. Even married people were not blessed with children. Though they were not against industrialization, the national bird peacocks on the adjacent hills became extinct. He contended that the pollution themed to be very high on any day except the day of public hearing. Safety precautions should be implemented and finally informed that they would not oppose the expansion of the unit.	Proponent assured that the Industry shall follow the standards prescribed by Ministry of Environment, Forest and Climate Change (MoEF&CC) with respect to emissions, effluents, solid waste.
19	Sri D.Anil Reddy, R/o Dhotigudem	He stated that public hearing was being conducted here, but the officials should ensure pollution-free environment so that there would be consent from the people. The farmers are backbone of the economy of the country. Only few farmers were compensated, but most of them were yet to be paid and agitation against non-payment of compensation would continue in future till paid. He felt that industry should operate their plant free from pollution so that people would also be prepared to extend their cooperation. It did not mean that there were no objections. He demanded the industry to come out with the package of compensation to the farmers, who were affected.	Proponent assured that the Industry shall follow the standards prescribed by Ministry of Environment, Forest and Climate Change (MoEF&CC) with respect to emissions, effluents, solid waste.
20	Sri Baddham Venkat Reddy, Dhotigudem(V)	He stated that a public hearing was held in respect of other industry, which was opposed by the people and people were unaware of the aspects of public hearing. He contended that a representation was submitted to the official for enquiry into certain matters. It was painful that no enquiry was conducted, which gave rise to credence	Proponent assured that the Industry shall follow the standards prescribed by Ministry of Environment, Forest and Climate Change (MoEF&CC) with respect to emissions, effluents, solid waste.

		that whether there was any governance. The timely action of the officials would have saved the village from pollution. He appealed to conduct an enquiry into the present state of pollution and take action against the responsible. They sought employment for means to live but not the destruction of life security. No new permissions should be accorded except the industries already in operation. He warned that the people would not hesitate to stall the collectorate with the help of people. Government is totally responsible for the present state of affairs and collapse of the system. There is no PCB official in Nalgonda District and there is only one officer for three districts. Permissions were accorded to the industries, even though the people opposed them. It is not out of context to state that time will come that people themed to live here after some time. While concluding his speech, he hoped that such time would not come for ever.	Proponent assured that industry will adopt latest pollution control equipment like two stage scrubbing system, double condensor system, closed transfer of raw materials/solvents to mitigate odor nuisance. Zero Liquid Discharge based effluent treatment plant and complete reuse of treated effluent.
21	Sri Gurram Satyapal Reddy, Dhotigudem	He contended that the farmers were facing severe problems and urged that steps be taken to protect the environment. Plantation was undertaken by the other industry and the plants were dried up for want of water. He requested the take up the responsibility of maintenance of plantations. He stated that there would not be any objection, subject to the implementation of pollution control measures.	Propoenet assured that proposed expansion will develop greenbelt in an area of 2 acres. Proponent assured that the Industry shall follow the standards prescribed by Ministry of Environment, Forest and Climate Change (MoEF&CC) with respect to emissions, effluents, solid waste.
22	Sri M. Shekar, Dhotigudem	He felt that employment was not need of the hour, but provide sustenance. All industries have promised the diversion of Pillaipally canal, which has not taken place so far. Farmers are the losers and the industries contend that they were compensated. The fact is unknown.	Proponent assured that the Management has earmarked about 2% of the profits and 5% of the capital cost to be spent on welfare activities in surrounding villages, in consultation with local public representatives and revenue authorities.
23	Sri Mekala Paramod	He felt that public hearing was conducted for the	Proponent assured that the Industry shall

	Reddy, Youth Congress President, Munugodu Constituency	expansion without considering the pollution caused by the Industries and without taking pollution abatement measures. The lives of the people were endangered due to permissions accorded by PCB to the industries in human settlements. Farmers they are getting affected due to industries and industries informed that scrubbers are adopted to control odor pollution. But it was not known whether the equipment was in place or not. The officials should experience the problem of odor; it would be difficult to stay even for a day here. The officials should understand the problems of the people before according permissions. The people here will continue to face problems, if the issue of clearance is continued. Pollution poses problems to human beings as well as to cattle and trees here. It was said that permissions would not be given without consent of the local people, in fact permissions were accorded. If the new units are set up, their problem will increase. The role of PCB became questionable, unless they act now to benefit the people of the area.	follow the standards prescribed by Ministry of Environment, Forest and Climate Change (MoEF&CC) with respect to emissions, effluents, solid waste. Proponent assured that industry will adopt latest pollution control equipment like two stage scrubbing system, double condensor system, closed transfer of raw materials/solvents to mitigate odor nuisance.
24	Sri V.Sunanda Reddy, Environmentalist	He stated that permission would be accorded for expansion without any positive recommendation to the industry. There is 4,000 acres of land in the village. Usually, the quantum of annual water yield through rain in this area is around 875 Crore liters. There are 650 bore wells in this village and 7 Industries are drawing their requirement from the bore wells. Since they are all depending on bore wells, the ground water becomes polluted and depleted. The loss of ground water table can be contained by diverting the funds available under CSR budget to adopt the facilities required for charging the ground water using the water received during rainy season, otherwise the loss of ground water table will be aggravated further. The village may be a model	Proponent assured that the Management has earmarked about 2% of the profits and 5% of the capital cost to be spent on welfare activities in surrounding villages, in consultation with local public representatives and revenue authorities. Propoenet assured that proposed expansion will develop greenbelt in an area of 2 acres.

		one to adopt water harvesting technology which is cost-effective one. Government has taken up the planting program and the village may take up the planting program on its own. He suggested constituting a committee to render necessary assistance to the affected farmers on account of pollution caused by the 7 industries. He concluded his speech with the above suggestions.	
25	Sri G Janardhan Reddy, Social Worker	He suggested that the industry should implement the promises made by them in their Executive summary. Several people have offered their views and the industry shall keep the views of the people, while operating the plant. There is a task force committee here. The effluent generated from the industries located in other districts is dumped in Mthembi river. Action should be taken against illegal dumping of effluent. He demanded the provision of 80% employment to the local people from the surrounding villages. At present the District collector, allocated 2% of the CSR fund collected in this region to Miryalaguda and Kodada areas and requested the Revenue authorities to rectify this diversion. He has also requested the Revenue authorities to inform the public over the compensation paid to the affected farmers so far.	<p>Proponent assured that the Management has earmarked about 2% of the profits will be spent towards implementing welfare activities of surrounding villages in consultation with the local public representatives and revenue authorities.</p> <p>The proponent informed that presently 67% of the employees from top to bottom in the plant are natives of surrounding villages from top to bottom levels. Proponent assured that he would maintain the same tempo and will enhance the quantum of jobs for the local people</p>
26	Sri E.Venkanna, Journalist	He stated that Agriculture and industrialization should go together to put the country in the forefront of the development. This is not a new industry and is in operation over a decade. He desired that development of Infrastructure, employment and rising of plantations (tree planting) and conducting medical camps to be taken up as part of all round development. He concluded his speech with a request to accord necessary clearance to the industry subject to the operation of the plant as per the norms stipulated by the PCB.	<p>Proponent assured that the Management has earmarked about 2% of the profits and 5% of the capital cost to be spent on welfare activities in surrounding villages, in consultation with local public representatives and revenue authorities.</p> <p>The proponent informed that presently 67% of the employees from top to bottom in the plant are natives of surrounding villages from top to bottom levels. Proponent assured that he would maintain the same</p>

			tempo and will enhance the quantum of jobs fro the local people. Propoenet assured that proposed expansion will develop greenbelt in an area of 2 acres.
27	Sri G.Vijay Reddy, NGO	While inviting the setting up of industries, one should know the realities and it is not important whether the permissions will be accorded or not. Our country adopted the constitution in the year 1950 and framed the rules, no one can stop the operation of the industry and such power is vested with the Government only. The constitution provided some rights to the subjects which should be attained. There was an amendment to CSR rules in 2013 and as per this amendment mandates that 5% of their earnings oh yearly basis shall be spent on CSR activities. The setting up industries is taken up to overcome the seasonal problems faced by the agriculture. Earlier water was potable now it became a bottled item. It is estimated that 5 lakhs people are losing their lives on account of air related pollution and the number is more in India and China. Their rulers made Acts as rights, but failed in their implementation. Consequently, adulteration is taking place in food stuff. He preferred to offer 2 or 3 suggestions for the benefit of the public. The industries should initiate steps to protect the environment to prevent any sort of agitation by the local people and implemented with a plan. Necessary action should be taken accordingly. There should not be any sort pollution from the operation of Chemical industries. Green belt shall be developed on 800 acres of the land. A committee should be constituted to implement the environment management plan. The farmers shall be motivated to take up water harvesting. He concluded his speech with a recommendation to accord necessary clearance from MoEF&CC subject to the adherence to the norms	Proponent assured that the Management has earmarked about 2% of the profits and 5% of the capital cost to be spent on welfare activities in surrounding villages, in consultation with local public representatives and revenue authorities. Proponent assured that the Industry shall follow the standards prescribed by Ministry of Environment, Forest and Climate Change (MoEF&CC) with respect to emissions, effluents, solid waste.

		stipulated In Environmental Acts.	
28	Smt. Sumathamma, R/o Dhotigudem	She complained that most of the speakers dealt on the problems of farmers which were not of any theme. Cultivation became sick and risky due to lack of rain. Bore wells are yielding chemical water. The industries are not responding to provide alternate employment to the people and reluctant. She requested the industries to pay compensation directly to the affected farmers. The people who are supporting the industries are getting the benefit. People should come forward to attend Gramasabha without any fear of political parties. The industry should respond to the needs of farmers. She concluded her speech with a recommendation that clearances maybe issued subject to the operation of the industry to the norms stipulated in the law.	Proponent assured that the Industry shall follow the standards prescribed by Ministry of Environment, Forest and Climate Change (MoEF&CC) with respect to emissions, effluents, solid waste. Proponent assured that the Management has earmarked about 2% of the profits and 5% of the capital cost to be spent on welfare activities in surrounding villages, in consultation with local public representatives and revenue authorities.
29	Sri Prudhvi Raj, Editor, Sama Samajam	He opined that if the problems expressed by the local people were solved there would have been no problems of any sort. He sought employment to the local people and diversion of CSR funds should be curbed and spent in the local area only. The environment can be restored to normal levels and also provision of better health care to the local people. The industries should maintain their accounts properly in a transparent manner with regard to their spending on CSR activities.	Proponent assured that the Management has earmarked about 2% of the profits and 5% of the capital cost to be spent on welfare activities in surrounding villages, in consultation with local public representatives and revenue authorities.
30	Sri Chintala Sailu, NGO, Choutuppal(V)	He stated that the ground water became polluted due to industrialization. He alleged that several other surrounding areas were subjected to air pollution apart from Dhotigudem and Jiblakpally. All the 7 industries should implement Harithaharam program as one unit and the responsibility should be entrusted to women. Libraries to be established in the villages and ambulance should be provided to meet the medical needs of the local people in cases of emergency. He concluded his speech with a request to the Government to establish one Regional	Proponent assured that industry will adopt latest pollution control equipment like two stage scrubbing system, double condensor system, closed transfer of raw materials/solvents to mitigate odor nuisance. Proponent assured that they will adopt "Zero Liquid Discharge" based effluent treatment system and treated effluent will

		Office at Bhongiri to oversee the implementation of pollution abatement measures.	be reused in cooling towers. Proponent assured that the Management has earmarked about 2% of the profits and 5% of the capital cost to be spent on welfare activities in surrounding villages, in consultation with local public representatives and revenue authorities.

MINUTES OF THE ENVIRONMENTAL PUBLIC HEARING HELD IN CONNECTION WITH THE PROPOSED EXPANSION OF M/S SVR LABORATORIES PVT LTD., SY. NO. 238(PART), 239/A & 239/E OF DHOTIGUDEM VILLAGE, POCHAMPALLY MANDAL, NALGONDA DISTRICT, TELANGANA STATE ON 27.08.2016 AT 10.30 AM NEAR THE PROJECT SITE.

The following Public Hearing panel members have attended the meeting:

Sl. No.	Name of the Panel Member	
1.	Sri Ravi Gugulothu District Revenue officer & Additional District Magistrate, Nalgonda.	Representative of the Collector & District Magistrate, Nalgonda District.
2.	Sri G. Hanumantha Reddy, Environmental Engineer (FAC) T.S. Pollution Control Board, Regional Office, Nalgonda.	Representative of the T.S. Pollution Control Board.

The following Government officials were present at the venue:

Sl. No.	Name & Designation
1.	Sri D. Komaralah, Tahsildar, Pochampally (M), Nalgonda District.
3.	Sri P. Suresh Babu, AEE, TSPCB, RO, Nalgonda.
4.	Sri T. Ravindar, Analyst Gr-1, TSPCB, RO, Nalgonda.

The following representatives of M/s SVR Laboratories (P) Ltd. were present

S. No.	Name & Designation
1.	Sri V. Venkata Ravi Kumar, Managing Director
2.	Sri P. Nageswara Rao, Director
3.	Sri G. Venugopal Reddy, M/s Team Labs and consultants, Hyderabad.

At the outset the Environmental Engineer, T.S. Pollution Control Board, Regional office, Nalgonda welcomed the gathering and invited the DRO, Nalgonda on to the dais.

Then EE, TSPCB welcomed the local public representatives and the public gathered for the public hearing and the representatives of the proposed expansion project, press and explained the salient features of the notification S.O. 1533, dated 14-09-2006 Issued by the Ministry of Environment and Forest, Govt. of India under the Environment (Protection) Act, 1986. He stated that the public consultation process has been made mandatory for the projects listed in Schedule -A & B of EIA Notification, 2006 for securing necessary Environmental Clearance from the Ministry of Environment, Forest & Climate Change, Government of India.

He further explained in brief that M/s SVR Laboratories Pvt Ltd located at Dhotigudem village, Pochampally (M), Nalgonda district has proposed to enhance the existing facility to manufacture Bulk Drug & Intermediates and accordingly requested the Board for conducting Environmental Public Hearing for the proposal of expansion.

He further informed that as per the provisions of EIA Notification public opinion regarding the project has been invited in writing from the public by giving a 30-days advance notification in Andhra Jyothi (Telugu daily) & the New Indian Express (English daily) newspapers on 27.07.2016.

The Executive Summaries both in Telugu & English and the EIA report have been displayed for access to the public at the offices as mentioned in the press notification. As part of the hearing, project representative would present the salient features of the proposed expansion project. He added that every person, who is willing to offer his/her views would be given opportunity, for which the project representative would offer clarifications before conclusion of the hearing. He also offered to give written representations in this regard.

The proceedings of the hearing would be prepared conspicuously and the programme was being videographed and the same would be communicated to the MoEF&CC for further course of action. He then requested the District Revenue Officer & Addl. District Magistrate, who is deputed by the Collector & District Magistrate, Nalgonda to preside over the environmental public hearing.

As directed by DRO, the EE, TSPCB requested the environmental consultant of the project to explain, in detail, the salient features of the proposed expansion project and the summary EIA/EMP report.

Sri G. Venugopal Reddy, M/s Team Labs and consultants, Hyderabad gave a detailed account of the technical and environmental components associated with the proposed expansion project.

1. M/s SVR Laboratories Pvt Ltd is presently operating Bulk Drug Intermediates manufacturing facility for the last three years. It has proposed to expand the existing facility to manufacture Synthetic Organic Chemicals (Bulk Drug & Intermediates) at the existing unit in an area of 6.00 acres.
2. The industry has obtained Terms of Reference from the MoEF &CC, Government of India as required to secure prior Environmental Clearance in the year 2013.
3. As per the EIA Notification, this environmental public hearing has been made mandatory for the proposal of expansion. Accordingly, their consultancy firm has carried out the baseline data to generate EIA report in respect of the proposed expansion in line with the approved TOR.
4. An approximate sum of Rs. 9.00 crores will be invested for the expansion activity.
5. Chemical synthesis consists of reaction, separation, purification, and drying. Large volumes of solvents are used during chemical syntheses, extractions, and solvent interchanges.
6. As part of the production process, by-products will also be generated. Earlier, the rejects of production are used to be considered as waste material. Now, technology has been advanced to recover the wastes as by-products, which in turn will be sold in the market.
7. Since the proposal of expansion requires additional steam, the unit has proposed to install additional 5 TPH coal-fired boiler to generate sufficient pressure of steam, while the existing coal-fired boiler of capacity 1.0 TPH will be kept as standby.
8. After expansion, the proposed production capacity of APIs will be 65 Tonnes/month.
9. The total water requirement after expansion is estimated to be 130 KLD for process, washings, cooling tower make up, steam generation, scrubber, DM plant, green belt and domestic usage. It will be met from the ground water sources in addition to reuse of treated wastewater. The

total water requirement will be enhanced from the existing 7.5 KLD to 130 KLD, out of which about 75 KLD will be fresh water and the balance 55 KLD will be the recycled water.

10. Out of the total water requirement 130 KLD, about 60 KLD of waste water will be generated from process, scrubber, cooling tower blow down, rejects from RO/DM plant etc. The effluent management system will be developed to ensure Zero Liquid Discharge. Thus about 55 KLD (i.e. 45 %) of treated water will be reused.
11. The effluents generated in the process, separation techniques and during purification contain organic residues of raw materials, solvents, and products. Some of the raw materials used in the process are also inorganic in nature. Hence the effluents contain both organics and inorganics in various quantities leading to high COD and TDS levels respectively.
12. High TDS effluent will be sent to Stripper followed by Multiple-Effect-Evaporator and Agitated Thin Film Dryer. MEE and ATFD condensate will be sent to Biological Treatment followed by Reverse Osmosis. Out of the total investment of Rs. 9.00 crores, about 1.5 crores will be invested exclusively on wastewater treatment system.
13. The proposed 5-TPH coal-fired boiler will be the source of air pollution from the plant. Bag filters will be provided to control air emissions. The resultant emissions will be within the prescribed standards of the Board.
14. Other low-volume gases like Carbon Dioxide, Nitrogen, Hydrogen Chloride etc emitted from reactions will be scrubbed in a two stage scrubber before letting into the atmosphere, whereas Hydrogen gas will be let into atmosphere through water column to avert odour emissions.
15. Solid wastes will be generated from process, solvent distillation, effluent treatment system and boilers. Coal ash from the boiler will be sold to brick manufacturers. Stripper distillate, process residue and solvent residue will be sent to cement plants for co-incineration based on acceptability. If those wastes are not suitable for co-incineration, it will be sent to TSDF, Dundigal for disposal. As major portion of the solid waste is proposed for co-incineration, the remaining evaporation salts from the ZLD will be sent to TSDF. Hazardous Sludge from the ETP will also be sent to TSDF.
16. About 80 persons are directly employed and about 40 persons are indirectly employed in the existing plant. About 20 per cent hike is expected in terms of the employment on account of the proposed expansion.
17. The management is involved in the growth and upliftment of village as part of social responsibility towards the community. As per the norms, about 2.5 per cent of profits will be spent towards developmental activities.
18. The management has earmarked an amount of Rs. 20.0 lakhs to take up welfare activities in consultation with the local revenue, panchayat members and village elders.

The District Revenue Officer, Nalgonda stated that being an Additional District Magistrate, he was deputed by the Collector & District Magistrate to preside over the environmental public hearing. As per the notification issued by MOEF&CC, Government of India, the present

environmental public hearing was necessitated to secure prior Environmental Clearance from the Ministry in respect of the proposed project. He added that every person who wishes to express opinion would be given an opportunity to offer his/ her views, comments, suggestions and objections, if any, on the proposed expansion as per the slips given. He requested the gathering to offer their views without any fear. He also offered to give written representations in this regard. He exhorted that the public hearing is only meant to elicit the views of the people in respect of the proposed activity as such the panel is not empowered to take any decision on the proposal. The programme was being conducted in a transparent manner as such the minutes of the programme along with the copies of videography would be sent to the Ministry for examining the proposal for Environmental Clearance. He further requested the people not to counter/dispute with the views expressed by the speakers while offering their views.

Then the **DRO** invited the Sarpanch, Dhotigudem to offer his views in respect of the proposed expansion project.

The following participants have offered their views:

1. **Sri Balam Mallesh Yadav, Sarpanch, Dhotigudem:** He stated that this public hearing was held in connection with the expansion of M/s. SVR Laboratories Limited. There are 7 other chemical units operating in this village. Since public hearing was held here, he would like to know the quantum of compensation payable to the affected people. Secondly, he wanted to know the contribution of the industry to the development of the village. Local people should be accorded priority in respect of employment. Due to the establishment of industries, the ground water that was there for 100 years got polluted. The village is facing acute shortage of drinking water. Whenever, they contact the industries for supply of water, the companies were not responding and there is no value for Sarpanch. Water was supplied for two months through water tankers. So far compensation was paid to some farmers only after interference from local police. In the previous public hearing held in connection with M/s. Vijayasal Chem, they assured to pay compensation. It was not known whether it was paid or not. Some farmers said to have received the compensation from M/s. SVR Laboratories. He requested cooperation for the development of the village. As the expansion depends not on the decision of the village, he sought development of the area. He sought supply of ground water to Dhotigudem and Jiblakpally villages. The other industry prepared to pay wages to education volunteers. Sri Ravikumar prepared to bear the expenditure of cook and construction of room for preparation of noon meal. He sought written affidavit with a condition that pollution levels should not increase further. He complained that the villages continued to face the pollution problem especially in the evening. If any villager complained about the problem, they alleged that they demanded money. While extending full cooperation for the proposal of expansion, he has categorically stated that he never opposed the expansion of industries.
2. **Surkanti Janga Reddy, MPTC Member, Dhotigudem:** He alleged that the villages in surrounding areas were subjected to pollution due to establishment of industries. The farmers, who were dependent on agriculture for their living, could not carry out their activities on account of pollution problem. He sought compensation to the farmers who were affected due to pollution and employment to the villagers affected. Some basic infrastructure was existing and sought water supply to surrounding 4 villages for drinking and agriculture. The industries

were welcome, if they operate without causing pollution. There were allegations with regard to dumping of wastes in forests and canals and Musi river. The local companies allege that this was resorted by the Industries from outside. Local Industries should take up the responsibility in this aspect, otherwise they would be considered as suspected source of pollution. He extended full cooperation to the expansion of Industry subject to the condition that they should not pollute the area.

3. **Sri Gurram Madhav Reddy, ex-Sarpanch, Dhotigudem:** He alleged that officers were visiting only when public hearing was held. It was the intention of Government not to allow the Industries without public hearing and wondered whether there was law empowering in the case of closure of Industries. Two months back a public hearing was held and the Industry assured compensation. The compensation was not paid to the affected farmers but to others nominated by the political parties. Local employment should be provided. He wanted 20% CSR fund which worked out to Rs.18,00,000/- and wanted to know how they were going to develop the village with CSR fund. The Industry should be able to tell about the components such as roads, drinking water, irrigation water, health and hospital facilities and education. He alleged that there was no clarity on utilization of the CSR fund and 2% of the profits of Industries. He complained about air pollution which was ejected after 7 'o' clock in the evening. No Industry is taking responsibility for these acts and road users also felt the problem. He wanted that Industries should run their plants without causing pollution and assured that the villagers would extend full cooperation.
4. **Sri Pagilla Ram Reddy, ex-Sarpanch, Dhotigudem:** He alleged that the officials from PCB were coming only on the day of public hearing. Air and water got polluted and enquires were made only at the time of the public hearing. Nobody bothered about pollution and they were not aware of monitoring of pollution levels by the officials of PCB and alleged connivance of the officials. Now the situation became problematic and wanted to know the AE concerned with the affairs of Pochampally. He requested for action against the concerned against causing pollution. Now the Industries are spending on welfare activities, which were not done earlier. If the Industries manage the individuals, they will face the trouble in future and anything done under CSR should be routed through local Sarpanch or MPTC. The Industries contributed Rs.50,00,000/- for the construction of temple. The benefit and adverse effect ratio remained at the same level and he wanted that the Industries should take steps to curb pollution. He expected that the officials should take necessary steps to ensure pollution free environment to human beings as well to cattle in order to avoid external dependency for their needs as well as the needs of the industry. He welcomed the expansion of the industry subject to the condition of curbing the water pollution.
5. **Smt. Sara Saraswathi Balaiah Goud, President, MPP, Pochampally:** She stated that this was the first public hearing attended by her in the span 2 years after becoming MPP. Some people could express their opinion and other could not do so, but people are aware of the things happening here. There is nothing equivalent to the health in this world. Even the passersby could not bear the problem of pollution, but complimented the people who could withstand the same. Some higher officials gave permission and the locals are facing the problems. Officials from PCB were invited to the Mandal Parishad meetings, but nobody attended so far. No official ever bothered even the samples of water were given as compliment

to them. Employment should be provided to the local people and expected the industries to adopt better technologies to address the problem of pollution. It is painful to know that the people are experiencing the severe problems in this area. She questioned the veracity of development activities undertaken by them. By undertaking small welfare activities at the time of public hearing, the industry can not absolve itself from the responsibility and the same cannot be said openly. Every year welfare activities should be taken up by the local industries. There were more police personnel than people. If the industry maintain good liaison with the people, there would be no need of others and the people will definitely extend their cooperation.

6. **Sri Arla Venkatesh Yadav, Sarpanch, Jiblakpalli:** He stated that there were 7 industries established 10 years and above. The farmers owning small holdings were unable to reap harvest on account of pollution. Government extended Cooperation was with an intention to provide employment for local people to improve their living conditions. It is regretted that the people were moving in search of employment to other places on account of pollution and lost their living means. He demanded compensation at the rate of value of yield of wet land or dry land and officials should see that the farmers were compensated adequately. As stated, the industries should implement the development activities. It was felt that Rs.20-25 lakhs should be contributed towards CSR, if the sum contributed by the industry would be around Rs.1.50 crores, which could be utilized for making the villages green. The industries could construct canal to fill the Village tank by arranging lift from the local stream to meet the drinking as well agriculture needs of the people. The industries are not taking any responsibility and are not implementing any welfare activities. People from Andhra area were employed with fictitious Aadhar cards. The villagers have no objection, if they engage people from surrounding villages. The people are ready to cooperate with the industry, but the industry failed to supply drinking water with tankers. Plantation helps in controlling the pollution levels and the industry should take responsibility of raising plantations. There will not any objection if the industries following the conditions stipulated in the orders issued by the Government. The industry should not see the drama of politicians but try to wipe out the tears of the common people. The industry should take up the distribution of medicines to the needy people and requested them to implement welfare activities and offered to cooperate for the expansion.
7. **Sri Gurram Chenna Reddy, R/o Dhotigudem:** He urged the people to cooperate with the industry in conducting the public hearing. He expected that the NGOs who were here should assess the loss to the area and extend necessary cooperation in securing the permissions required by the industry. The value of the land in 2001 was Rs.30,000/- now the value of the land would be around Rs.30 lakhs per acre. People should think about the positive change. There was only one industry prior to the year 2000. At that time, the Sarpanch post was auctioned for Rs.15,000/- to Rs.50,000/- and now it is around Rs.10 lakhs to get elected for the same Sarpanch position. The industry should compensate the losses of farmers. Necessary cooperation for the development of Jiblakpalli should be extended to secure clearances to the industry.
8. **Sri P. Dasaratha, R/o Dhotigudem:** He stated that the water in the village was polluted and the affected should be compensated. Bills should be paid to Tractor owners. Vector problem was arising on account of pollution. He demanded that the managements of all

companies should pool their resources to connect the canal to the Dhotigudem tank, this step would ensure development of Anthammagudem and Jiblakpalli villages. He extended support for expansion and urged the people not to politicize the issue. Even youth associations are prepared to extend their support subject to the necessary assistance from the industry.

9. Sri Kandi Janga Reddy, R/o Dhotigudem: He contended by quoting the phrase that Farmers were backbone of the country and stated that the efforts were on to break the backbone. This kind of attitude should end and the Industries should ensure that the welfare of the farmers. Several times complaints were filed in PCB, but without any action. He appealed to the Industries to extend assistance to the development of area and compensate the damage caused to the farmers. The amount under CSR should be spent locally by the industry to garner the support of the people.

10. Sri Narasimha, R/o Anthammagudem: He stated that the Pillaipally canal was redesigned. Public hearings were conducted and officers were attending and going back. The impact of air pollution is more on the health of people than water pollution. He contended that the value of Dollar is going up on account of establishment of drug industry and also the value of land rose up to Rs.30/- lakhs per acre. But the value of land would have been more than Rs.1 crore. The borewell existed since 10 years was closed on account of pollution. Even if the borewell brought back to operation, it should be closed again. No new permissions should be accorded and area under forest cover is less in Nalgonda. The Hon'ble Chief Minister initiated the "Haritha Haram" programme from Nalgonda. He alleged that the meeting was held under the aegis of police escort and people were not coming out freely to air their views. Even the Hon'ble CM was not provided with this type of protection. He sought that people should be allowed to speak to air their views freely.

11. Sri Muddam Sathyam, R/o Dhotigudem: He questioned why permission should not be accorded to the industries and industrial development is the agenda of the Government itself. Permissions should be accorded so that the opportunities would be there to provide employment to youth. But the water was polluted and no further permissions should be accorded. He stated that the present level of pollution was not due to this industry but also other industries were equally responsible. He questioned the persons responsible to pay the compensation to the farmers. It was known that compensations were paid to 20 farmers. This situation would not have occurred had the compensation was also paid on similar fashion by other industries. He demanded that the compensations to the affected farmers should be paid by Monday otherwise the industries would face the closure due to agitations as were taken place earlier. Employment should be provided to all unemployed youth and urged the industry to extend financial assistance to the economically poor. He also demanded 10% more salary to the local people than others and coverage of insurance facilities and concluded his speech with a request that the polluters should be dealt under WATA Act.

12. Sri S. Nagasena Reddy, Environmentalist, R/o Nalgonda: He stated that the public hearing was being conducted as part of expansion of the existing unit. He hoped that the CSR activities would increase with the expansion of production. He stated that a mega medical camp was conducted in Jiblakpalli village and medicines were distributed to the needy people.

He requested that M/s. SVR Laboratories would take up similar activities and extend their cooperation for the all-round development of the villages.

13.Sri Surkanti Venkat Reddy, Environmentalist, R/o Choutuppall: He stated that Industrialization would invariably require for survival and to eradicate unemployment as enunciated by the Hon'ble CM. He offered two advices to the Industry. He requested that the CSR funds should be utilized for diversion of the Pillalpalli Canal which is at a distance of 2.50 Km and issue environmental clearance to the proposed expansion.

14.Sri Pannala Ravinder Reddy, R/o Dhotigudem: He requested the authorities to permit them to express their problem arising out of public limited companies to the public since 13 years, as they are the permanent residents of that place. He alleged that there were no crops since 13 years due to polluted ground water. It is unbelievable that PCB officials are unaware of the problems and held that PCB is responsible as there is no officer in this area even though 7 Industries are functioning here. Industries are responsible for pollution of water resources. Industries are paying compensation to the farmers but the question of survival of entire family remains as it was. He wanted that Industries should not be established at the cost of lives of people. It was stated that funds were earmarked for local development and Industries should state the way the funds were utilized by them. Definitely people would have extended full cooperation, if they did any worthwhile work. The people of the village were not able to live with the obnoxious odour, even the people passing through the village were questioning about habitability of the area. He blamed the Government for the present state of affairs instead of industries. Since Government did not bother about the people, the state of affairs is like this. He wanted that the people should be told about the method of rendering justice to the farmers who lost their livelihood and requested the PCB officials to enforce the pollution laws effectively.

15.Sri Kommu Sai Kiran, R/o Jiblakpally: He stated that the people were not aware of the public hearing held here. The same could be intimated through open publicity means. The area is subjected to severe pollution and requested stringent action to control the pollution.

16.Sri Choppari Pandu, R/o Dhotigudem: He complained that water was contaminated and water was not available despite deep drilling of bore wells. In case of borewells where water was struck, the water found to be polluted. It is welcome that the value of land has gone up. Even though there is a well-read statement of enhanced employment opportunities, the same is not true. Employment is not offered to B.A and B.Com graduates, only B. Sc., degree graduates are preferred by the Industry. People from other places were provided jobs ignoring the claim of local people. He appealed to the industry to extend their cooperation to the villages so that the people also will reciprocate the same.

17.Sri Ch. Shankar Yadav, R/o Jiblakpally: He stated that it was a mistake to permit the chemical Industries. However, it was permitted thinking that the revenue would go up. The same policy remained till now. PCB is vested with the power to control pollution from Industries. They should explain how they were going to contain the pollution.

18.Sri Sathynarayana, R/o Jiblakpally: He stated that he would like to explain the destruction caused by the pollution. Even married people were not blessed with children. Though they

were not against industrialization, the national bird peacocks on the adjacent hills became extinct. He contended that the pollution used to be very high on any day except the day of public hearing. Safety precautions should be implemented and finally informed that they would not oppose the expansion of the unit.

19. Sri D. Anil Reddy, R/o Dhotigudem: He stated that public hearing was being conducted here, but the officials should ensure pollution-free environment so that there would be consent from the people. The farmers are backbone of the economy of the country. Only few farmers were compensated, but most of them were yet to be paid and agitation against non-payment of compensation would continue in future till paid. He felt that industry should operate their plant free from pollution so that people would also be prepared to extend their cooperation. It did not mean that there were no objections. He demanded the industry to come out with the package of compensation to the farmers, who were affected.

20. Sri Baddham Venkat Reddy, R/o Dhotigudem: He stated that a public hearing was held in respect of other industry, which was opposed by the people and people were unaware of the aspects of public hearing. He contended that a representation was submitted to the official for enquiry into certain matters. It was painful that no enquiry was conducted, which gave rise to credence that whether there was any governance. The timely action of the officials would have saved the village from pollution. He appealed to conduct an enquiry into the present state of pollution and take action against the responsible. They sought employment for means to live but not the destruction of life security. No new permissions should be accorded except the industries already in operation. He warned that the people would not hesitate to stall the Collectorate with the help of people. Government is totally responsible for the present state of affairs and collapse of the system. There is no PCB official in Nalgonda District and there is only one officer for three districts. Permissions were accorded to the industries, even though the people opposed them. It is not out of context to state that time will come that people used to live here after some time. While concluding his speech, he hoped that such time would not come for ever.

21. Sri Gurram Satyapal Reddy, R/o Dhotigudem: He contended that the farmers were facing severe problems and urged that steps be taken to protect the environment. Plantation was undertaken by the other industry and the plants were dried up for want of water. He requested the industry to take up the responsibility of maintenance of plantations. He stated that there would not be any objection, subject to the implementation of pollution control measures.

22. Sri M. Shekhar, R/o Dhotigudem: He felt that employment was not need of the hour, but provide sustenance. All industries have promised the diversion of Pilalipally Canal, which has not taken place so far. Farmers are the losers and the industries contend that they were compensated. The fact is unknown.

23. Sri Mekala Pramod Reddy, Youth Congress President, Munugodu Constituency: He felt that public hearing was conducted for the expansion without considering the pollution caused by the industries and without taking pollution abatement measures. The lives of the people were endangered due to permissions accorded by PCB to the industries in human settlements. Farmers were getting affected due to industries and industries informed that

scrubbers were installed to control odour pollution. But it was not known whether the equipment was in place or not. The officials should experience the problem of odour, it would be difficult to stay even for a day here. The officials should understand the problems of the people before according permissions. The people here will continue to face problems, if the issue of clearance is continued. Pollution poses problems to human beings as well as to cattle and trees here. It was said that permissions would not be given without consent of the local people, in fact permissions were accorded. If the new units are set up, their problem will increase. The role of PCB became questionable, unless they act now to benefit the people of the area.

24. Sri V. Sunanda Reddy, Environmentalist: He stated that permission would be accorded for expansion without any positive recommendation to the industry. There is 4,000 acres of land in the village. Usually, the quantum of annual water yield through rain in this area is around 875 crores liters. There are 650 bore wells in this village and 7 industries are drawing their requirement from the bore wells. Since they are all depending on bore wells, the ground water becomes polluted and depleted. The loss of ground water table can be contained by diverting the funds available under CSR budget to install the facilities required for charging the ground water using the water received during rainy season, otherwise the loss of ground water table will be aggravated further. The village may be a model one to adopt water harvesting technology which is cost-effective one. Government has taken up the planting programme and the village may take up the planting programme on its own. He suggested to constitute a committee to render necessary assistance to the affected farmers on account of pollution caused by the 7 industries. He concluded his speech with the above suggestions.

25. Sri G. Janardhan Reddy, Social Worker: He suggested that the industry should implement the promises made by them in their Executive summary. Several people have offered their views and the industry shall keep the views of the people, while operating the plant. There is a task force committee here. The effluent generated from the industries located in other districts is dumped in Musi River. Action should be taken against illegal dumping of effluent. He demanded the provision of 80% employment to the local people from the surrounding villages. At present the District Collector, allocated 2% of the CSR fund collected in this region to Miryalaguda and Kodada areas and requested the Revenue authorities to rectify this diversion. He has also requested the Revenue authorities to inform the public over the compensation paid to the affected farmers so far.

26. Sri E. Venkanna, Journalist: He stated that Agriculture and Industrialization should go together to put the country in the forefront of the development. This is not a new industry and is in operation over a decade. He desired that development of infrastructure, employment and raising of plantations (tree planting) and conducting medical camps to be taken up as part of all round development. He concluded his speech with a request to accord necessary clearance to the industry subject to the operation of the plant as per the norms stipulated by the PCB.

27. Sri G. Vijay Reddy, NGO: While inviting the setting up of industries, one should know the realities and it is not important whether the permissions will be accorded or not. Our country adopted the constitution in the year 1950 and framed the rules. No one can stop the operation of the industry and such power is vested with the Government only. The constitution provided some rights to the subjects which should be attained. There was an amendment to CSR rules

In 2013 and as per this amendment mandates that 5% of their earnings on yearly basis shall be spent on CSR activities. The setting up Industries is taken up to overcome the seasonal problems faced by the agriculture. Earlier water was potable now it became a bottled item. It is estimated that 5 lakhs people are losing their lives on account of air related pollution and the number is more in India and China. Our rulers made Acts as rights, but failed in their implementation. Consequently, adulteration is taking place in food stuff. He preferred to offer 2 or 3 suggestions for the benefit of the public. The Industries should initiate steps to protect the environment to prevent any sort of agitation by the local people and implemented with a plan. Necessary action should be taken accordingly. There should not be any sort pollution from the operation of Chemical Industries. Green belt shall be developed on 800 acres of the land. A committee should be constituted to implement the environment management plan. The farmers shall be motivated to take up water harvesting. He concluded his speech with a recommendation to accord necessary clearance from MoEF&CC subject to the adherence to the norms stipulated in Environmental Acts.

28.Smt. Sumathamma, R/o Dhotigudem: She complained that most of the speakers dwell on the problems of farmers which were not of any use. Cultivation became sick and risky due to lack of rain. Bore wells are yielding chemical water. The Industries are not responding to provide alternate employment to the people and reluctant. She requested the Industries to pay compensation directly to the affected farmers. The people who are supporting the Industries are getting the benefit. People should come forward to attend Gramasabha without any fear of political parties. The Industry should respond to the needs of farmers. She concluded her speech with a recommendation that clearances may be issued subject to the operation of the Industry to the norms stipulated in the law.

29.Sri Prudhvi Raj, Editor, Sama Samajam: He opined that if the problems expressed by the local people were solved there would have been no problems of any sort. He sought employment to the local people and diversion of CSR funds should be curbed and spent in the local area only. The environment can be restored to normal levels and also provision of better health care to the local people. The Industries should maintain their accounts properly in a transparent manner with regard to their spending on CSR activities.

30.Sri Chintala Sailu, NGO, R/o Choutuppal: He stated that the ground water became polluted due to industrialization. He alleged that several other surrounding areas were subjected to air pollution apart from Dhotigudem and Jilakpally. All the 7 Industries should implement Harithaharam programme as one unit and the responsibility should be entrusted to women. Libraries to be established in the villages and ambulance should be provided to meet the medical needs of the local people in cases of emergency. He concluded his speech with a request to the Government to establish one Regional Office at Bhonglri to oversee the implementation of pollution abatement measures.

At this juncture, the DRO sought to know whether anybody is interested to express views. As no one has turned up, the DRO stated that about 30 persons spoke so far and about 100 representations were also received. Then the DRO requested the management of the proposed project to give clarifications to the issue raised by the speakers.

Sri V. Venkata Ravi Kumar, Managing Director - M/s SVR Laboratories Pvt. Ltd gave replies to three main issues raised by the speakers.

The existing factory is equipped with 67% local employment from top to bottom levels. He made a firm promise that he would maintain the same tempo and will enhance the quantum of jobs for the local people.

Regarding CSR activities, he emphasized that about 2 per cent of profits will be invested towards implementing welfare activities. He assured that they would operate the project as per the norms stipulated by the MoEF&CC. There would not be any sort of environmental pollution as they would adopt appropriate control measures. He firmly stated that he would operate the unit along the expected lines. He sought continued support from the people.

The DRO stated that most of the people gathered at the venue were able to elicit their concern with regard to the proposed unit. The DRO then spoke briefly on the procedure being followed after the public hearing. The public hearing has been conducted in accordance with the provisions of EIA Notification issued by MoEF&CC. About 30 speakers have expressed their opinion/views and about 100 representations have been received on this proposal of expansion. He has categorically stated the entire minutes have been recorded conspicuously reflecting the views of the people gathered at the venue and the entire proceedings have been videographed. Consolidated minutes of the meeting along with the representations received from the people would be communicated to the MoEF&CC, Government of India, for taking further course of action. Regarding the issue of inaction on the part of PCB and other local officials, he would ask the PCB officials to take up a drive against all the industries located in the vicinity and monitor them regularly. He then requested the PCB officials to offer concluding remarks.

AEE, TSPCB proposed vote of thanks and concluded the public hearing programme.

Representations received in this connection are enclosed herewith.

List of the public participated in the public hearing is appended.

Environmental Engineer (FAC)
T.S. Pollution Control Board
Regional Office, Nalgonda.

District Revenue Officer &
Additional District Magistrate,
Nalgonda.

Statement of representations received w.r.to Environmental Public Hearing (EPH) held on 27.08.2016 for proposed expansion of M/s. SVR Laboratories (P) Ltd, Sy.No. 238 (Part), 239/A & 240/E in the existing premises located at Dothigudem (V), Pochampally (M), Nalgonda District.

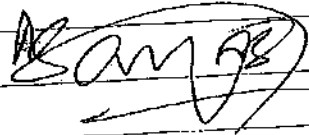

Sl. No	Representation given by	Date of receipt	Content of the representation
1	Sri Balam Mallesh Yadav, Sarpanch, Dothigudem (V), Pochampally (M), Nalgonda District.	27.08.2016	He supported the proposed expansion project.
2	Sri Rikkala Sudhakar Reddy, Sarpanch, Yellagiri (V), Choutuppal (M), Nalgonda District.	27.08.2016	He supported the proposed expansion project as per the norms and he requested to provide jobs for the local villagers & developed greenbelt in surrounding villages under Haritha Haram Programme.
3	Sri Kontham Ram Reddy, Sarpanch, Dharmajigudem (V), Choutuppal (M), Nalgonda District.	27.08.2016	He supported the proposed expansion project and he requested to provide jobs for the local villagers.
4	Sri Macharla Krishna, Sarpanch, Koyyalagudem (V), Choutuppal (M), Nalgonda District.	27.08.2016	He supported the proposed expansion project as per the norms.
5	Sri M. Krishnaiah, S/o. Ramulu, Ward Member, Dothigudem (V), Pochampally (M), Nalgonda District.	27.08.2016	He supported the proposed expansion project.
6	Smt. R. Sandhya, W/o. Srisailem, Ward Member, Dothigudem (V), Pochampally (M), Nalgonda District.	27.08.2016	He supported the proposed expansion project.
7	Sri V. Mallesh, S/o. Yallaiah, Ward Member, Dothigudem (V), Pochampally (M), Nalgonda District.	27.08.2016	He supported the proposed expansion project.
8	Sri P. Yadi Reddy, S/o. Ram Reddy, Ward Member, Dothigudem (V), Pochampally (M), Nalgonda District.	27.08.2016	He supported the proposed expansion project.
9	Smt. Soppari Sujatha, W/o. Sattalah, Ward Member, Dothigudem (V), Pochampally (M), Nalgonda District.	27.08.2016	He supported the proposed expansion project.
10	Smt. Shobha Rani, W/o. Malla Reddy, Ward Member, Anthamma Gudem, Dothigudem (V), Pochampally (M), Nalgonda District.	27.08.2016	He supported the proposed expansion project.
11	Smt. R. Allamma, W/o. Yadaiah, Ward Member, Anthamma Gudem, Dothigudem (V), Pochampally (M), Nalgonda District.	27.08.2016	He supported the proposed expansion project.
12	Smt. A. Sugunamma, W/o. Buchi Reddy, Ward Member, Dothigudem (V), Pochampally (M), Nalgonda District.	27.08.2016	He supported the proposed expansion project.
13	Sri Gurram Amarendar Reddy, S/o. Madhava Reddy, Ward Member, Dothigudem (V), Pochampally (M), Nalgonda District.	27.08.2016	He supported the proposed expansion project.

Sir,

Because of the expansion of SVR Company, hope that it will benefit people, and unemployment in villages will be solved. Not only to this village, but to the surrounding village people there will be employment opportunities. And this company shall support for the development of the village and also shall participate in the Social service programs. This SVR Company shall run as per the Government Rules and regulation, and request with the Government to give the required permissions to this Company. And we do not have any objection for that.

Yours faithfully

Because of this expansion to this village and to the surrounding villages there will be employment opportunities. This will facilitate the development of the village. And shall participate in the Social service. We do not have any problems due to this expansion. This Company shall run as per the Government Rules and regulations. This meeting is informing to give all required permission by the Government to this Company.

Sub: My name is Y. Chenna Keshava Reddy, N.G.O. Hyderabad -
Requesting for permission to SVR Laboratories expansion
and recommending with CPCB - Request - Regarding.

My suggestions, instruction, and objection - Public Opinion
seeking Dt.27.8.2016 was held (Dotigudem village).

To the E.E.

Sir,

1. Requesting not to use underground resources more, and digging of
wholes for Rain water, and not reducing the underground water level.
2. In effected village 33% trees should be planted, and shall plant trees
on road side.
3. Every month in one village (effective villages) Medical Camp shall be
arranged. Shall protect the health of people. And shall provide
medicines free of cost.
4. Shall provide employment opportunities to the unemployed youth.
5. If any crop loss occurs to farmers due to underground resources,
shall give them compensation.

Shall adhere to the Central Government Forest Ministries
Environment rules and provisions.

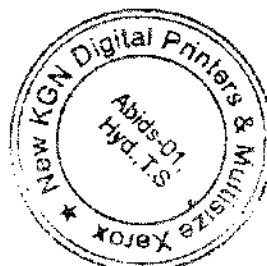

CSR funds shall be used in effected villages compulsorily.

Importantly chemicals, and hazardous substances shall not be left
in underground resources.

As opinion is sought from the village, hence requesting with the
Central Government and recommending to give permission to SVR

in Public Opinion seeking to convey the same – Reg.

Sir,

With reference to above subject, it is to request with you that, we are inviting the expansion project of M/s SVR Laboratories Pvt. Ltd. Who has experience in Chemical field?

For the development of newly formed Telangana State, there is need of such industries. And to some extent unemployment can be reduced.

By adhering to Central Environment Pollution Control Board rules, the Industry shall take expansion work. With the CSR budget locally shall take up in surrounding villages Education, Medical, and Health related programs. And we suggest providing employment to the local unemployed youth.

For the expansion project sanction of M/s SVR Laboratories Pvt. Ltd, we are recommending to the Central Government Environment, Forest, and Meteorology Department.

MCPI (U)
Nalgonda District Committee

Vaskula Mattaiah
District Secretary

Date:27.8.2016

To

The EE
Pollution Board, Nalgonda

Sir,

Sub: To prevent the loss due to M/s SVR Laboratories
Pvt. Ltd. – Regarding.

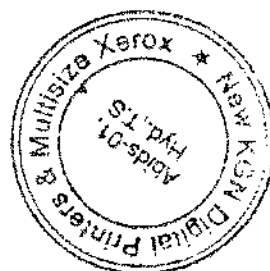

I, i.e. Vaskula Mattaiah, MCPI (U), District Secretary, Nalgonda, would like to state that;

Due to hazard substances from the SVR Factory, which has submerged has damaged underground resources. Because of this, in the surrounding villages the Drinking water Bores, and well are giving hazard water and people are also subjected to problems. In the name of public opinion involving people and without knowing their problems they are cheating. The surround village people are subjected to many health problems due to hazard substances coming from this Factory. All the underground water resources have become hazardous water. Without giving any employment opportunities to the local unemployed youth, they are appointing outsiders. Authorities are also not caring. All the villages of this Region have come under Pollution. In the words of the Sarpanch's, MPTC, MPP how the people are suffering you can understand. This type of hazardous factories should not be given permission in between the residential areas. And also shall not play with the lives of people, we are requesting on behalf of MCPI(U) Nalgonda District Committee.

గోదావరి గోరవనియ్యలైన ఎన్నికలమంబో విజయవాడలో గమనశీలం
అయినది విషయం

విషయం :- S.V.R కంపనీ ఎన్నికలను గుర్తించి

అయ్యింది:

గోదావరి అంబా హిందూ కళా మండలి

అనంతరం ఎన్.ఎ.ఆర్ కంపనీ ఎన్నికల నేను మనస్ఫూర్తి అభ్యసేస్తున్నాను మా అంబా

అయినదిగా ఆ కంపనీవలన చాలామంది నిరుద్యుగులకు ఉపాధి లభిస్తుంది

మా చుట్టూ వీరిని చూడే కొద్దీ ఉత్సాహం పెరుగుతున్నది. కంపనీ

ఎన్నికల సమయంలో మా చాలామంది ఉపాధి లభిస్తుందని నేను భావిస్తున్నాను

అలాగే కంపనీ నుండి ఎన్నికల వ్యయ రిసెయిన్ వలన మాకు వంతుండు

విరామం గుర్తించి చూడవలసి కంపనీ అధికారులను కోరుతున్నాను

Sir,

I, i.e. Pachimatla Paramesh S/o late Yadaiah, ward member of Antammagudem. Because of the SVR Laboratories Industries which is near our village, to us and to the surrounding village people there are employment opportunities. To many unemployed that Company has provided employment. We are wishing for the expansion of SVR Company. And hope that the management will run the Company by adhering to the Government procedures. I request with the Government to give all the required permissions for the expansion of this Company.

Yours faithfully,
Sd/- Paramesh

Sub: Our GP opinion about S.V.R. Expansion.

I, Rikkala Sudhakar Reddy S/o Ram reddy, Yellagiri Sarpanch, Choutuppal Manda, would like to inform to you that, our opinion for the expansion of the Company is that; for the development of Telangana State Industrial role is very important. The Government is also providing earliest permission and facilities to the companies. If the companies develop, the surrounding village youth will get employment opportunities. I request that the company shall support for the social development of the surrounding villages. In the same way without any pollution all the legal actions shall be taken, in case if pollution occurs you can take required action. And as part of Haritha Haram program shall raise shadow giving trees in the company premises and on roads I am requesting with the SVR company. And request to give 80% of jobs to the local people, and inform that I do not have any objection for the expansion of the Company.

Sir,

I, V. Sumati, because of SVR Company there is development work in our village. And also planted trees in the surrounding. And the company shall run preventing the pollution in the surrounding as per the provisions. And also it is providing jobs to the unemployed youth. I request with the Telangana Government to give required permission to the SVR Company, and I do not have any objections for that.

Yours faithfully

Date:24.8.2016

To

The Pollution Control Board Officer,
Nalgonda District,

Sub: Not to sanction the opinion seeking permission to the S.V.R. Laboratories Pvt. Ltd. Industry for additional production permission.

Sir,

The S.V.R. Laboratories Pvt. Ltd. Industry which is in Dhotigudem village, Pochampalli Mandal, Nalgonda District, is continuing their production since some years, but till date the Management is failed in taking steps for the Pollution Treatment and shelling of the waste substance. Even now the surrounding areas of the S.V.R. Industry limits have change as Pollution heaven, and have become waste for the Agricultural purpose and minimum requirements.

Cases in the Courts on the Industries in this Region:

Because of the Pharma Industries in Dhotigudem village limits, the local surrounding village areas have changed completely into Pollution heavens; the Pochampalli Choutupall Mandal in Medak District with Pharma Industries have changed in Pollution heavens, and the Pattencheruvu region have gain record, and we know the how the Pollution is showing effects. And in the pollution effected villages till now also in some villages the Supreme Court in the Public interest litigation judgement has said that the Government shall supply drinking water and the Underground water should not be used.

On the pollution by the Pharma Industries in the limits of Pochampalli, Choutuppal Mandals in High Court and Human Right commission recently the Brindavan Laboratories Industry who held public opinion seeking and which is adjacent o the S.V.R. Industry a Public interest litigation is filed saying not to give Environment Permission for the additional productions.

For NEW KGN
Digital Printers & Multisize Xerox

Translator

Recently, the Industries in this region are polluting heavily, and the complaint by the People and Public Unions was responded and the production has stopped.

Hence, in the limits of Pochampally, Choutuppal Mandals if the Pollution is controlled completely and when the Underground water resources change, after that only based on the public opinion new permissions for the production shall be given.

Even the G.O.62 is implemented in Nalgonda District, and even Pochampally is not Industrial Region, and by going against the provisions the to the Pharma Industries for the public opinion seeking the Notification is being issued against the provisions. As per GO 62 the Industrial SEZs, only in the Industrial areas the permission shall be given to the Pharma Industries based on the Public opinion.

As there is prohibition on the Pharma Industries production in Nalgonda, Rangareddy, Mahaboobnag, Medak districts; after checking the benefits of the people of Pochamapalli, Choutuppal Mandals shall be justified by protection the Article 14, 21 of the Constitution.

The public opinion seeking program is against the provisions. However, as Dhothigudem region has completely changed in Pollution, in this region in the presence circumstances, the additional permissions to the S.V.R. Laboratories Pvt. Limited Industry shall not be given in any circumstances. And shall respect the opinion of the people, otherwise will approach the Court and will take the action by Public Interest Litigation.

Yours faithfully

శ్రీయుత గౌరవనీయులైన నల్లగొండ జిల్లా కాలువ్య
నియంత్రణ మండలి అధికారి గారికి,

తెలంగాణ రాష్ట్ర కాలువ్య నియంత్రణ మండలి, ప్రాంతీయ కార్యాలయం, నల్లగొండ.	24-08-2016
27 AUG 2016	
నెం. 1856	

విషయం: ఎస్.వి.ఆర్. ల్యాబరేటరీస్ ప్రై.లిమిటెడ్ పరిశ్రమకు అదనపు ఉత్పత్తులు అనుమతికై
సంబంధించిన ప్రజాభిప్రాయ సేకరణలో భాగంగా అభిప్రాయ సేకరణ అనుమతులు
మంజూరి చేయకూడదని

ఆర్యా,

నల్లగొండ జిల్లా పోచంపల్లి మండలం దోతిగూడెం గ్రామ పరిధిలో గల ఎస్.వి.ఆర్. ల్యాబరేటరీస్
ప్రై. లిమిటెడ్ పరిశ్రమ యాజమాన్యం గత కొన్నేళ్ళుగా ఉత్పత్తులు కొనసాగిస్తున్నా నేటికి పరిశ్రమలో
కాలువ్య జలాలు ట్రీట్‌మెంట్ ఘనవ్యర్థాల నిర్మూలనకు సంబంధించి నిర్వహణ చేపట్టడంలో పూర్తిగా
యాజమాన్యం విఫలమైంది. ఇప్పటికే ఎస్.వి.ఆర్ పరిశ్రమ పరిధిలో గల పరిసర ప్రాంతాలు పూర్తిగా
కాలువ్య కాసారాలుగా మారి కనీస అవసరాలకు వ్యవసాయానికి పనికి రాకుండా పోవడం జరిగింది.

ఇప్పటికే ఈ ప్రాంతంలో గల పరిశ్రమలపై న్యాయస్థానములో కేసులు:

దోతిగూడెం గ్రామ పరిధిలో గల ఫార్మా పరిశ్రమల వల్ల స్థానిక పరిసర గ్రామాల ప్రాంతాలు పూర్తిగా
కాలువ్య కాసారాలుగా మారినవని పోచంపల్లి చౌటుప్పల్ మండలాలు పూర్తిగా మెదక్ జిల్లాలో ఫార్మా
పరిశ్రమలతో కాలువ్య కాసారాలుగా మారి పటాన్‌చెర్వు ప్రాంతం రికార్డు సాధించినదంటే కాలువ్య ప్రభావం
ఏ స్థాయిలో ప్రభావం చూపుతుందో తెలిసింది కాలువ్య ఖారిన పడిన గ్రామాలకు నేటికి ఆయా గ్రామాలలో
ప్రభుత్వం త్రాగునీరు సరఫరా చేయాలని స్థానిక భూగర్భ జలాలు వినియోగించవద్దని అత్యున్నత న్యాయస్థానం
ప్రజాప్రయోజనాల వాఙ్మయంలో తీర్పులో తెలిపింది.

పోచంపల్లి, చౌటుప్పల్ మండల పరిధిలో గల ఫార్మా పరిశ్రమల కాలువ్యంపై హైకోర్టులో రాష్ట్ర మానవ
హక్కుల సంఘంలో ఇటీవలే ఎస్.వి.ఆర్. పరిశ్రమ ప్రక్కనే గల ఇటీవల ప్రజాభిప్రాయ సేకరణ జరిగిన
బృందావన్ ల్యాబరేటరీస్ పరిశ్రమకు అదనపు ఉత్పత్తులకు పర్యావరణ అనుమతులు ఇవ్వకూడదని
ప్రజాప్రయోజన వాఙ్మయం దాఖలైంది.

ఇటీవల ఇదే ప్రాంతంలోని పరిశ్రమలు విచ్చల విడిగా కాలువ్యం వెదజల్లుతున్నందున ప్రజలు, ప్రజా
సంఘాలు చేసిన ఫిర్యాదుపై స్పందించి ఉత్పత్తులు నిలిపివేయడం జరిగింది.

కావున పోచంపల్లి, చౌటుప్పల్ మండలాల పరిధిలోని పరిశ్రమలు పూర్తి స్థాయిలో కాలువ్య నియంత్రణ
జరిగి భూగర్భ జలాలు మారిన పరిస్థితుల తర్వాత ప్రజాభిప్రాయాన్ని అనుసరించి నూతన ఉత్పత్తులకు
అనుమతుల విషయముపై అనుమతి ఇస్తే బాగుంటుంది.

జి.వో. 62 నల్లగొండ జిల్లాలో అమలులో ఉన్న పోచంపల్లి పారిశ్రామిక ప్రాంతం కాకపోయినా నిబంధనలకు విరుద్ధంగా ఫార్మా పరిశ్రమలకు పర్యావరణ అనుమతుల కొరకు ప్రజాభిప్రాయ సేకరణకు నిబంధనలకు విరుద్ధంగా నోటిఫికేషన్ జారీ చేస్తున్నారు. జివో 62 ప్రకారం పారిశ్రామిక సేజ్లు, పారిశ్రామిక వాడలలో మాత్రమే ఫార్మా పరిశ్రమలకు అదనపు ఉత్పత్తులకు అనుమతులు ప్రజాభిప్రాయ సేకరణ అనుసరించి అనుమతులు ఇవ్వవలసి ఉంటుంది.

నల్లగొండ రంగారెడ్డి మహబూబ్ నగర్ మెదక్ జిల్లాల్లో ఫార్మా పరిశ్రమలపై ఉత్పత్తులపై విషేదం ఉన్నందున పరిశీలించి పోచంపల్లి, చౌటుప్పల్ మండలాల ప్రజల ప్రయోజనాలు, రాజ్యాంగంలోని ఆర్టికల్ 14, 21 ని కాపాడి న్యాయం చేయగలరు.

ప్రజాభిప్రాయ సేకరణ కార్యక్రమము నిర్వహణనే నిబంధనలకు విరుద్ధం. అయినా దోతిగూడెం ప్రాంతం పూర్తిగా కాలుష్యకాసారంగా మారినందున ఈ ప్రాంతంలో ప్రస్తుత పరిస్థితులలో యస్.వి.ఆర్. లేబరేటరీస్ ప్రై.లిమిటెడ్ పరిశ్రమకు అదనపు ఉత్పత్తులకు పర్యావరణ అనుమతులు ఎట్టి పరిస్థితులలో ఇవ్వకూడదని ప్రజాభిప్రాయాన్ని గౌరవించాలని లేని పక్షంలో న్యాయస్థానాన్ని ఆశ్రయించి ప్రజాప్రయోజనాలు కాపాడే చర్యలు చేపడతామని తెలియపరుస్తూ

ఇట్లు

P. L. N. Rao

Sub: Regarding opinion seeking by SVR Company for expansion.

Sir,

I, i.e. Vura Vijay S/o Peddi Raju, because of the SVR company in our village there shall be employment opportunities for the educated people. In the same way the village will develop. I hope that there will be employment for the entire surrounding village educated people. And request that there should be no problem to our villagers. Hence, please give required permission to the SVR Company. We do not have any objection for that.

Yours faithfully

The Environment Engineer
Nalgonda District, Telangana State

Sub: Public Opinion seeking by SVR Company

Sir,

The expansion of SVR Company which is in our village, and regarding its opinion seeking, I could not talk and writing this letter. Because of this company to our village and surrounding village unemployed people are getting employment opportunities. I request the Company to run as per the provision of the Pollution. I hope that, because of expansion of the Company we will get employment opportunities.

Yours faithfully
