

**Public Hearing, Rohini OCP, CCL held on 23.12.2008**

S.No	Name and Address	Question Asked by the Villagers	Reply by Company representative
1	Shri Naresh Kumar Yadav (Nawadih)	<p>What are the provisions of cooking fuel for the villagers because CCL has banned the use of coal for the villagers and forest department has banned the use of firewood.</p> <p>There is air pollution due to coal transportation and villagers are affected by many diseases. Management should look into this matter and find a solution for this.</p>	<p>There is no provision of free LPG for the villagers, a high committee will take decision on this matter.</p> <p>Coal transport dumpers will be covered by plastic.</p>
2	Shri Prem Kumar Gupta (Nawadih)	There are over burden hills have been created by the mining and there is no plantation on these over burdens. Company should make this flat and return it back to the original land owners.	Old mines void will be filled by these over burdens.
3	Smt. Etwariya Devi (Tumang)	What are the provision for the livelihood, education, health and electricity for the land looser of the area.	Education will be provided. Necessary Medicine is being distributed through the medical camps two times in a year. Number of medical camps will be increase.
4	Shri Amrit Bhokta (Tumang)	The river and stream has polluted by the mines water. Villagers are using polluted water. Management should clear its stand on this issue.	Mine water will be used as sprinkling on the roads. Silt water will be settled first and then release into the drainage.
5	Shri Baleshwar Bhokta (Purandih)	Mine has gone down below the level of the river damodar hence it is creating the water crisis in village and it is affecting villagers and domestic animals as well.	This question is related to active mines. The closed mine void used as a water harvesting structures to increase the ground water level.

		There is no benefits from the plantation done by company as these trees are not useful for villagers.	To benefit the villagers useful trees will be planted after the coal extraction.
6	Shri Basudeo Thakur (Nawadih)	The management claims to implement environment related issues but fails to implement it.	To mitigate the environmental issue water sprinkling will be done on the roads, modern blasting technique will be adopted and plantation will be done.
7	Shri Jaiprakash Sao (Dakra)	Public hearing meeting should be held in the project affected village so that more people could participate.	Management has already given information through the miking and other means of advertisement.
8	Shri Mannawar Ansari (Dakra)	What are the solution to stop air pollution and vibration due to blasting.	Company will introduce modern blasting technology in this project to minimize the vibration and air pollution.
9	Shri Madan Prasad (Heslog)	<p>What are the provision for the livelihood, education, health and electricity in the nearby villages.</p> <p>There are over burden hills have been created by the mining, company should make this flat and after plantation return it back to the original land owners.</p> <p>Villagers are badly affected by blasting and there are cracks in houses and it becomes dangerous to live.</p>	<p>Necessary action will be taken for health, education, electricity and livelihood.</p> <p>Old mines void will be filled by these over burdens and plantation will be done with the help of forest department and villagers.</p> <p>modern blasting technology will be introduced in this project to minimize the vibration.</p>
10	Shri Rajkumar Pahan	There is delay in getting compensation and job even after many years.	Due to lack of necessary papers delay has happened. file has already send to the head

	(Nawadih)		quarters. This matter will be resolved soon.
11	Shri Rohit Mahato (Nawadih)	There is no development in nearby villages of the project. What are the provision for the water, electricity and health centers for the villagers .	Necessary action will be taken for health, education, electricity and livelihood.
