BVB Girish
OFFICE OF THE
T.S. Pollution Control Board
Regional Office-I, Sangareddy

At the outset, the Smt. N. Vijayalakshmi, Asst. Environmental Engineer, TSPCB, Sangareddy in her welcome address requested the people gathered at the venue including public representatives and other officials to participate in the environmental public hearing. She has also invited the District Collector, Sangareddy District, the Joint Collector, Sangareddy District, the Environmental Engineer, Regional Office-I, TSPCB, Sangareddy to conduct the public hearing in accordance with the procedure laid down in the Environment Impact Assessment Notification (EIA), 2006 issued by the Ministry of Environment, Forests and Climate Change, Government of India. While explaining the salient features of the EIA Notification, 2006 S. O. (E) No.1533, dated 14-09-2006, she stated that the public hearing is a mandatory process for setting up or expansion of manufacturing capacity of any industry listed in Schedule of the EIA Notification, 2006. Accordingly the present public hearing is scheduled to be held on 08.06.2018 at 11.00 AM at the project premises of M/s AVR Organics Pvt. Ltd., for their proposed expansion project of Active Pharmaceuticals Ingredients (APIs) with R&D facility. The press notifications regarding Environmental Public Hearing were published in two local news papers having wide circulation viz., The Indian Express in English and Andhra Jyothi in Telugu (vernacular language) on 07.05.2018. The environmental public hearing is being held to elicit the views, opinion, suggestions and objections if any, on the proposed project. She then requested the Collector, Sangareddy District to conduct the proceedings of Public hearing.

The District Collector, Sangareddy District while welcoming the public, informed that the industry applied for expansion project for manufacture of Active Pharmaceutical Ingredients (APIs) in Maddikunta village. They have prepared Environment Impact Assessment (EIA) Report. However, for the establishment of the project or its expansion, conducting public hearing is compulsory. It is mandated in the Rules. For the purpose, the villagers of Maddikunta & other surrounding villagers were invited. A news paper advertisement was also

published. The District Collector informed that the public can come and express their opinions frankly and without any prejudice, about the existing unit, expansion unit and its impact, by informing their name, village name & details, which will be recorded. The District Collector further informed that the present meeting is only for the purpose of soliciting the opinions of the public about the proposed project and not a clearance to the project. Hence, the District Collector requested the public to express their opinions frankly. The District Collector requested the resource person of the industry to brief about the details of the project.

Sri J. Thirumalesh, Technical Director, M/s. KKB Envirocare Consultants Pvt. Ltd, explained the project details and measures proposed to control pollution as follows:

The industry proposed expansion of production capacity of Active Pharmaceutical Ingredients or Bulk Drugs & their intermediates with R&D facility to a proposed capacity of 1728 TPA in two phases i.e., 60% in first phase and balance 40% in second phase. Accordingly, the industry applied to MoEF&CC, Govt. of India and as per the Terms of Reference (TORs) granted by the Ministry, draft EIA report was prepared and submitted to the State Pollution Control Board. Accordingly, the present public hearing is being held. Due to the proposed project, the employment opportunities in the area will improve. Direct employment will be provided to 1000 people and indirect employment will be provided to 500 people. As a part of Corporate Responsibility an amount of Rs.625 Lakhs will be spent in phased manner in the surrounding villages in the coming 5 years for different development programmes. Green belt will be provided in an area of 33% of the total area i.e., 13.89 Ha. The environmental conditions in the area will improve due to the development of green belt. As per the TORs issued by the MoEF&CC, the environmental conditions like air quality, noise etc., in an area of 10 KM radius from the site were studied. The industry

B. B. Girish
OFFICE OF THE
T.S. Pollution Control Board
Regional Office-1, Sangareddy

Page 3 of 12

uses 863 KLD of water for different purposes. From the same, a quantity of 348 KLD of effluents will be generated. The effluents will be segregated based on TDS and will be stored in above ground level tanks. The effluents will be evaporated in Multiple Effect Evaporators, treated in ETP and then will be passed through RO system. Thus by implementation of ZLD the treated effluents will be reused. In case of maintenance of pollution control systems, the effluents will be stored in guard tanks. Standby pumps and other systems will be maintained. The tanks used for effluents will be installed 1 mtr. above ground level. The tanks will be RCC and leak proof.

Emissions will be generated from the boilers, thermic fluid heaters, diesel generators and the process. The industry is proposing to install 2 X 6 TPH coal fired boilers, 1 X 10 TPH coal fired boiler, 4 Lakh K.Cal/Hr coal fired thermic fluid heater & HSD fired 2 Lakh K.Cal thermic fluid heater in addition to existing 3 TPH coal fired boiler in the proposed expansion. The industry is proposing to install multi cyclone followed by bag filters for controlling air pollution from the boilers. A chimney of height 40 mtrs/30 mtrs will be provided. To control the process emissions double stage scrubbers will be provided. DG sets of capacities 2 X 1000 KVA & 2 X 500 KVA will be provided for the purpose of standby power supply. The industry proposes to generate 38 TPD of hazardous waste and they will be scientifically segregated and stored in HDPE bags on elevated platform. The hazardous waste will be disposed to either TSDF or PCB permitted cement industries. The flyash from the boilers will be disposed to brick manufacturers. The industry proposes to develop greenbelt in 33% of the area of 42 Ha of total area which is 13.8 ha or about 34 acres. The industry proposes to use 175 KLD of water for development of green belt. For the purpose of conservation, minimum natural resources will utilized and for conservation of water rain water harvesting pits will be provided. It was informed that the industry will discuss with the villagers and help them under Entrepreneur Responsibility. He requested the people to co-operate with the project.

OFFICE OF THE
T.S. Pollution Control Board
Regional Office-I, Sangareddy

Page 4 of 12

The District Collector, Sangareddy District requested the public gathered at the venue of public hearing to offer their opinion, suggestions and views on the proposed project.

The following persons expressed their views as stated below:

1. Sri K. Badreesh, Sangareddy: He informed that he is the Founder Chairman of the District Environment Protection Committee. He informed that the industry is proposed to be expanded from 8 Acres to 102 Acres. He informed that he does not know the present status of the industry as he has come from far. He informed that due to establishment of industry there will be employment to the youth. However, in the disguise of employment there cannot be any damage. If the industry is run in accordance with environmental norms, there will not be any problems. For the last 20 years, due to the chemical industries there has been lot of damage caused in the district. There was no drinking water for the people and cattle. Lot of problems were being faced due to the industries. He informed that he is not against the industry. Industries have to be established and employment has to be provided. Number of youth are on the roads by holding the degrees without employment. However, the lands have to be protected. He opined that there is no objection to the industry, if it is run in accordance with the norms and by controlling pollution.
2. Sri S. Chandrasekhar, Hyderabad: He informed that he is supporting the industry expansion from the Right Way Global Organization. There is lot of requirement for establishment of industries in the state. Through the same development will take place. Hence he expressed that he is supporting the expansion of the industry. Further he made certain suggestions. He informed that in the pharma industry, there is possibility of sound pollution and

OFFICE OF THE
T.S. Pollution Control Board
Regional Office-I, Sangareddy

Page 5 of 12

environmental pollution. Hence he suggested to develop green belt in the industry. He further suggested to provide an ETP plant in the industry and provide employment to locals only. By providing the employment to the locals in the affected areas, their standards will be improved. There are educated unemployed youth in the area and a skill development centre shall be provided by the industry to improve the skills of the unemployed youth. With these suggestions he informed that from Right Way Global Organization they are supporting the expansion project and requesting the MoEF to grant the permission.

3. Sri Khaja Nizamuddin, Sarpanch, Maddikunta village: He expressed his happiness over the project coming up in their village. He informed that he is a pharmacy student and as the proposed unit is a pharmacy industry wherein pharmaceutical ingredients will be manufactured. Due to the industry employment will be provided for the pharma students like him and other educated youth. He expressed his happiness over establishment of expansion project.
4. Smt. N. Laxmi, Sarpanch, Siddhapur Village: She informed that no roads were laid to their village, but the industry has co-operated with the village for development. She requested to provide employment in the industry to the youth in their village also.
5. Sri Md. Arifoddin, Maddikunta village: He welcomed the establishment of the industry in their village. However, he informed that the industry shall follow the conditions of the Pollution Control Board and shall not cause any damage to the village. In such case there is no objection to the industry. With regard to providing employment, he requested to provide employment to the local villagers of Rechintal, Kambalapalli, Maddikunta & Siddhapur on top priority.

OFFICE OF THE
T.S. Pollution Control Board
Regional Office-I, Sangareddy

6. Sri M.Vidyasagar Reddy, Siddhapur village: He informed that he was Sarpanch of the village from 2006 to 2011. There is no problem from the company and they are cooperating with the villagers. He requested to provide employment to the local villagers.
7. L. Chandra Shekar, NGO, Nalgonda: He informed that on behalf of their Organization, the MoEF shall grant the Environmental Clearance to the industry unconditionally. He requested that the industry shall provide employment to the locals only. He requested that the surrounding 10 villages shall be provided with protected drinking water supply facilities from the CSR funds of the industry. Further medical camps shall be conducted to conduct eye tests and other health tests, which will help the people.
8. V. Sunanda Reddy, Environmentalist: He informed that 80% of the chemical industries in the state are polluting. Only 20% are operating as non-polluting. He wished that the industry management to be first in the 20% non-polluting category. He informed that he is working for the past 30 years in the field of environment. If the pharma industries are not encouraged, medicines have to be imported from other countries with huge cost. The country will lose foreign exchange. Healthcare will not be available to the common people due to huge cost. Hence, he requested the panel committee to recommend to the Ministry to grant clearance unconditionally. He made certain suggestions on environmental protection. He informed that the relation of human being with air, water & land is defined as environment. He informed that he has belief that the industry will provide ETP and other facilities and control air pollution. As per the rainfall details in the area the industry will receive 32 crore litres of rainwater annually in the proposed area of 102 acres. Out of these about 15 crore litres of water will go as ground water. The industry's requirement is about 300 crores litres of water out of which 105 crores litres will be recycled. There is still requirement of 200 crore litres of water annually. He suggested that the industry shall provide water harvesting

OFFICE OF THE
T.S. Pollution Control Board
Regional Office-I, Sangareddy

structures not only in their land but also in the surrounding village lands, so that there will not be any water scarcity in the area in future. The local farmers cannot compete with the industry as the industry will continuously require water. Though the Government is proposing to provide water, till the project is completed, the industry shall take up water harvesting not only in their area but also in the surrounding area with the help of the Government by spending additional funds under CSR. He will provide free technical assistance in this regard. He informed that it is mandated that for having environmental sustainability we should have 33% forest cover. Unfortunately we are having only 20% forest cover. He suggested that the industry should not restrict to 33% of the area in providing green belt and should go for 50% to 60% of the green cover so as to achieve environmental sustainability. By implementing this suggestion the company can become an ideal to other industries. He suggested that a co-ordination committee with local public representatives & government officials shall be created and the budget under CSR shall be expended in consultation with co-ordination committee, on emergency local requirements. Thus company can gain the support of the locals. With respect to providing employment he appreciated the industry for proposing to providing employment 1000 people. He informed that the indirect employment will not be 500 as mentioned it will be much more than that, to the tune of 20,000 to 25,000 which we may not know. However, he informed that there are number of youth lacking skill in the area. Hence he requested the industry to provide skill development to the local youth so that they can work not only in the company but also outside. He wished that the company should develop at the same time environment shall be protected and the industry shall become part of development of the state.

B. V. Girish
OFFICE OF THE
T.S. Pollution Control Board
Regional Office-1, Sangareddy

9. G. Vijaya Reddy: He informed that the people are seeking money rather than long life. Earlier, the people were living with long life. Earlier, there used to be good green belt in the area. At that time, the human lifespan was long. It got reduced with reduction in green cover area. He stressed that the people have to think about environment protection on 100% basis. He informed that industries should be established for the growth of GDP. However, for the purpose of having environmental sustainability, he proposed three suggestions to MoEF&CC. While permitting the industries, the impact on agriculture has to be studied. The second point is that the impact on animal husbandry in the area has to be studied. The third point is that, the impact on human life has also to be studied as human being is dependent on the surrounding environment. The lifespan of human being before & after establishment of industries has to be studied and incorporated in the reports. He suggested that these studies have to be insisted by MoEF&CC atleast in the coming up industries. The industry is proposed in 104 Acres of land which is agricultural land. This land is being converted to non-agriculture. The impact of this conversion has to be studied. In the proposed area of the industry, there is deficit between the ground water recharge by rain fall which is only 10% when compared to industry's water requirement. He questioned the industry on how they are going to full fill the deficit of about 1.7 Lakh KL of water. He requested the industry to clarify on the issue. He further questioned that the industry has not made mention of the CSR budget details as per the 2013 Companies Act Amendment in the report. He further submitted that, he will submit a detailed representation on the EIA report submitted by the industry.
10. Y. Chennakesava Reddy, Social Activist: He informed that he is a social activist and informed that he is endorsing to MoEF&CC for grant of clearance to M/s AVR Organics Pvt. Ltd. He informed that due to the establishment of the industry, there will be employment to the locals.

B. B. Girish
OFFICE OF THE
T.S. Pollution Control Board
Regional Office-I, Sangareddy

However, he suggested that as per the Directions of the Hon'ble Supreme Court of India, the industry shall install effluent treatment plant for treatment of effluents. The industry shall follow all Rules stipulated by CPCB with respect to development of 33% green belt, expenditure of CSR funds etc. The employment shall be provided for the locals only. It is observed that in most of the industries employment is not provided to the locals. Employment shall be provided not only to the skilled but also unskilled like SSC passed and Intermediate passed candidates. Generally in pharma industries only pharma qualified candidates will be preferred. It is suggested to provide employment in office jobs also. Preference shall be given to people who have given the lands and the poor. Preference shall be given to SC & ST candidates and the reservation implemented in the Government shall also be implemented here. He concluded that the employment shall be provided only to the locals and recommended the project for clearance to MoEF&CC.

- 11.H. Madhubabu, Social Activist: He informed that, he proposed to furnish certain suggestions in the public hearing of the proposed project. Development has to take place due to establishment of industries. This should not lead to damage to the surroundings. He informed that the Government should act strictly against any industry which is causing damage to the environment. The world countries are entering into competition particularly the developed countries are acting in such a way that the industrial expansion is leading to environmental pollution. He suggested that the industry should operate and give employment but at the same time they should care about the surrounding environment particularly about the global warming which has become a world wide phenomena.
- 12.A. Venkateswarlu, BC Organization, State General Secretary: He informed that on behalf of the organization they have taken up many environmental activities. He further informed that industries are required for development at the same time environment is also important. The Government is

Bubgiri
OFFICE OF THE
T.S. Pollution Control Board
Regional Office-I, Sengareddy

encouraging the industries through TS-iPASS for providing employment. At the same time the Government is also striving towards environment protection with programs like 'Haritha Haram'. The industries in rural areas have to provide employment to the local youth. He expressed that the industries in Telangana State are providing employment to outsiders. The industries have to give priority to SCs, STs & BCs in providing employment. As the industry is using the land in the area, they have to provide employment to the local SCs, STs & BCs. If the candidate has technical qualification, technical job shall be provided. Study circles shall be established for training the local villagers of 10-20 villages in the 10 Kms radius of the industry, so as to improve the skills for obtaining jobs. The green belt shall be provided with local fruit bearing trees. The CSR funds of the industry shall be expended in the surrounding 10 villages and shall not be expended elsewhere. He requested the MoEF&CC to grant clearance to the project.

13. Mr. Prithvi Raj, Editor, Sama Samajam Magazine, Rangareddy District: He informed that the industry has not mentioned the details of CSR budget and its expenditure, details of tree plantation etc. He requested the industry to provide these details so that the people will know about the activities taken up by the industry.

The District Collector requested the project proponent to respond on the suggestions, views & objections raised by the speakers.

Sri S. Kondal Reddy, Director, M/s. AVR Organics Pvt. Ltd.: He informed that the company was started in the year 2006. He informed that they have taken up many social activities from the company side, though they have not publicized the details. They have provided water plants, voluntary service, laying

BVB Gireish
OFFICE OF THE
T.S. Pollution Control Board
Regional Office-1, Sangareddy

of borewells in the villages etc. With respect to skill development they have taken up training of 610 students for Group-II services along with food facility at Vikarabad. They have selected students from the mandals of Sangareddy, Zaheerabad, Kohir & Narayankhed with 70% of them belonging to SC, ST & Minority communities. The balance 30% are OBC community. The training has been going on since 90 days. 60% of the students are from Sangareddy District. An amount of Rs. 40.0 Lakhs is being spent on this training. He further informed that they will follow all the suggestions made in the public hearing and try to provide green belt in an area of 40% as they have sufficient land. He informed that they proposed to expand the industry in phased manner. He assured that the employment will be provided to 90% of the local people. He also assured that they will provide the details of CSR fund expenditure. They will conduct medical camps and participate in all other possible activities as per the advice of the villagers. He clarified that the Government has assured them to provide water which was incorporated in the report while submitting for TORs. He further assured that they will co-operate with the villagers in all aspects.

The District Collector, Sangareddy District, while summarizing the proceedings has informed that the minutes of the meeting & video were recorded and will be forwarded to the Government for taking further necessary action.

The public hearing concluded with a positive note and vote of thanks by the Environmental Engineer, RO-I, Sangareddy, Telangana State Pollution Control Board.

Sub : Informing about our support for the collection of the People's opinion on 31/3/2018 in M/s. AVR Organics Pvt. Ltd. at Yuvapur village, Sadasivapet Mandal, and knowing the environmental issues to the Industry Management.

●●●

Sir,

The Management of M/s.AVR organics has over 30 years vast experience in these industries. In the issue of industrial capacity building the Management should take up necessary actions. Mainly for eradication of air pollution (1) Malabar Neem, (2) country neem (maddi) (4) Neredu (Ravi) trees should be grown. Cleanse the drainage water by cloud water treatment plant and should be utilized for internal needs of industry. Take measures for promoting of greenery. Through CSR fund we hope that you will lend a supporting hand for the development of local villages internally.

The above mentioned activities have been fully done by M/s. A.V.R. Organics, we are extending our full support for the peoples opinion gathering programme.

Yours faithfully,

శ్రీయత గౌరవనీయులైన పర్యావరణ ఇంజనీరు,
పరిశోధనా రాష్ట్ర కాలనీ వియోజన మండలి,
రెవెన్యూ అండ్ సెలక్షన్, సంగారెడ్డి జిల్లా, తెలంగాణ రాష్ట్రం,
ఆంధ్రప్రదేశ్

తేది: 13-03-2018

విషయము:- ముప్పర్ల ఎ.వి.ఆర్. ఆర్గనిక్స్ ప్రైవేట్ లిమిటెడ్ పర్యావరణ ఇంజనీరుల
మంజూరి గురించి విజ్ఞప్తి.

నేను పి.వి. సుధాకర్ రావు, సీనియర్ జర్నలిస్టు మరియు పర్యావరణ కార్యకర్త. పూర్వజాతీ, తెలంగాణ
రాష్ట్రం అభివృద్ధికి పోరాడతూ ఉన్న రంగాలు కృంగిపోయాయి. దానిలో పాల్గొనిన రంగంగా ఉన్న
ఆ రంగాలు, అలాగే పనిచేసే యువతకు ఉపాధి, ఉద్యోగా, వెనకబడిన సంగారెడ్డి జిల్లా అభివృద్ధి బయట
ఉంటుంది. కేంద్ర, రాష్ట్ర సంయుక్త కృషి వల్ల ఎన్ని ప్రాజెక్టులు రాష్ట్రానికి అభివృద్ధిని తెచ్చిపెట్టాయి. ఈ
నేపథ్యంలో సంగారెడ్డి జిల్లా, సదాశివపేట మండలం, యాదాద్రి గ్రామపంచిత్ర ప్రకారం "ముప్పర్ల ఎ.వి.
ఆర్. ఆర్గనిక్స్ ప్రైవేట్ లిమిటెడ్" వారు విస్తరణకు రావడం ప్రారంభమైంది.

పరిశోధన రంగంలో పాల్గొనిన కుటుంబ అభివృద్ధి మరియు, ఇలాంటి ప్రాజెక్టులు రావల్సిన అవసరం ఉంది.
ఇలాంటి ప్రాజెక్టుల వల్ల సంగారెడ్డి జిల్లా అభివృద్ధి రంగంలోనే కాక, ఈ ప్రాంత నిరుద్యోగ యువతకు ఉపాధి అవ
కాలు పెరుగుతాయి.

తెలంగాణ రాష్ట్ర కాలనీ వియోజన మండలి నియమ నిబంధనలను తు.చ. ఉల్లంఘించి ఈ ప్రాజెక్టు
అమలు చేయబడుతున్నట్లు తెలుస్తున్నాయి. ఈ ప్రాజెక్టును చేపట్టే మేనేజ్మెంటు వారిని ఈ.వి. ఆర్గనిక్స్ తయారు
చేసిన కేంద్ర ఎన్నికల కమిషన్ వారిని అభినందిస్తున్నాము.

పర్యావరణ కాలనీ వియోజనకు కొన్ని సూచనలు:

- 1) గ్రీన్ బెల్టుకు 33 శాతం ఉంటే చట్టం తీసుకోవాలి.
- 2) ఈ చట్టం పెంపొందించిన నాటిను దగ్గర్నుంచి పెట్టిన అయ్యేదాకా ప్రత్యేక సిబ్బందితో నీరు, సంరక్షణ
చూడాలి.
- 3) ఈ ప్రాంత నిరుద్యోగ యువత కోసం "ప్రత్యేక పాల్గొనిన కృషి - స్పెషల్ ట్రైనింగ్ పోర్నాంట్" చేపట్టాలి.
ఈ ప్రాజెక్టుకు, కేంద్ర ప్రభుత్వం, పర్యావరణ, ఆదివా, దాతావరణ మార్పుల కాలనీ మండి అమలు
చేయవలసివచ్చినదిగా సూచిస్తున్నాము.

(పి.వి.సుధాకర్ రావు)

The Respected Environmental Engineer
Regional office-1
Sangareddy.

13-03-2018

Sir,

Sub : M/s. A.V.R. Organics Pvt. Ltd., sanction of Environmental
permissions - request - regarding.

I am P.V. Subba Rao, Senior Journalist and Environmental Activist.
Hyderabad, state that the State of Telangana being backward, many sectors
have recessed drastically. Among them, the Industrial sector also is the one. If
that sector is doing well, the unemployed youth will get employment. Hence, the
Sangareddy district is getting developed. With the collective struggle by centre
and state so many projects coming is a happiest circumstance. Based on this
M/s. A.V.R. Organics Pvt. Ltd. coming forward for development is welcomed.

In the Industrial Sector, requirement of Pharma company is very much.
There is a need for coming of this type of companies. With this type of industries,
not only in the financial sector of Sangareddy District, the opportunities for
unemployed will also increase.

We hope that this project shall definitely fulfill the Telangana State
Pollution control Rules and regulations. We appreciate the Management and the
K.K.BB. Enviro Consultant who have prepared this report

Some suggestions for Environmental Pollution Control:

1. Should take actions for 33 percent of Green Belt
2. From the planting of these trees till they grow big, should get maintained
by specialized staff and ensure their protection.
3. For the unemployed youth "Specialized Industrial Training - skill training
should be conducted. We suggest that recommendations can be made to
get the permissions to this project from the central government,
Environment, Forest department, and weather department respectively.

Yours faithfully,

The Telangana Pollution Control Board
Regional office-1
Sangareddy.

Sub : Gathering of Public opinion to be held on 31/3/2018 at Yavapur & Maddikunta Villages, Sadasivapet Mandal, Sanga Reddy District Telangana State, on the proposal of setting up manufacturing unit of M/s. AVR Organics Pvt. Ltd. Active Pharmaceutical Ingredients Manufacturing Unit (1728d TPA).

Sir,

I am known as Vutkuri Sunanda Reddy is the first environmental activist to support the industries in the country. My best wishes for the Management of M/s. A.V.R. Organics Pvt. Ltd. for gathering People's opinion. Usually, the Environmental activists will oppose the proposal of the expansion of existing Bulk Drug & Intermediates manufacturing industry and its propel for establishment, but I, in view of the new state development, in the perspective of approx. 40 crores of youth between age group of 15 to 35 years are waiting employment opportunities and the employment opportunities to be facilitated to them and in the extent of the world India is of 2 percent area, and in the world population having 17 percent of population and as there is a need to encourage the manufacturing of medicines that heal the diseases, as an Environmental Activist I am supporting fully the proposed unit of M/s. A.V.R. Organics Pvt. Ltd.

M/s. A.V.R. Organics Pvt. Ltd., as a part in the expansion of proposed manufacturing unit in the act of production, by practicing the following instructions by protecting the Environmental balance and ensuring there should not be pollution its being advised to progress in the developmental direction.

- 1) In the E.I.A. report prepared by you, regarding Air, Water, land have done baseline survey. This is satisfactory. If it is convenient to you along with these if you could obtain the details of their health status of people, details of harvest of crops and the status reports of underground water within the radius of 10 kms., it will be useful in future as environmental balance scale.

I hope that you may kindly gather these details and include in the final report.

2. For your industry a land of 104 acres is there. In this the rain water will accumulate approx. 31 crores ltrs. In this the amount of water converting to underground waters shall be approx. 6 crores ltrs. You have to use 20 crore ltrs of water per annum, for your industry. Due to such variation, there will be effect on underground waters in future. To reduce this effect, in the land you have to store the rain water should erect water harvesting structures, if the rain water is stored, the effect on underground waters will be less.
3. Therefore, for removal of this and to make use of rain water as much as possible and to store the rain water, and to convert the rain water into underground water it is suggested that you should arrange water pots.
4. In the land area held by you, your proposal to grow 33% of trees is appreciated. As an Environmental activist, my suggestion is that in the country the natural resources are limited. But the population is increasing additionally at 10% for every 10 years the pressure on natural resources is more. Therefore if it is possible, I suggest to have a proposal to grow the trees from 45% to 50%.
5. It is desired that your industry to take up tree plantation in surrounding villages and promote greenery.
6. In the same way it is requested to arrange avenue plantation on the road side of your surrounding villages.
7. In the tree plantation taken up by you, not only the ordinary trees but fruit bearing plants, and medicinal value plants planting should be given priority.
8. In your industry give much preference to the local people in the village and facilitate employment opportunities to them.

9. If the unemployed youth in the adjacent villages are inducted skill development training, they will work in your industry supportively. The remaining people for taking up the training shall get employment in other industries. With this the villagers will get more confidence on the management of your industries and shall be grateful to you.
10. To expend the CSR funds, the Villagers and government authorities and together with the Management of the company will put a committee and through that committee not selecting the target oriented works instead select the demand oriented works through that committee spend the CSR funds partially as per the request of the public as suggested.
11. By your industry ensuring the protection of environment is it is prone to pollution, and expecting it to grow as a role model.

Significantly, the Management of M/s. A.V.R. Organics Pvt. Ltd., as an industry should develop day by day, protecting the environmental balance, providing the eligible candidates employment opportunities as far as possible, be helpful for the development of villages and state as well to the welfare of the people desiring to move forward.

I would appreciate the consultants for preparing the descriptive E.I.A report concerning to this industry.

For your industry I humbly request the Public Opinion gathering panel committee to recommend to M.O.E.F. for unconditional sanctions, appealing so, I am expressing my thanks.

Yours faithfully,

The honourable officer at Sangareddy Pollution Control Board
Regional Office
Sangareddy 1.

Sub : our opinion regarding sanctioning of Environmental permissions to
M/s. A.V.R. organics

Sangareddy, Sadasivapet Mandal Yavapur Revenue Villages limits located A.V.R. Organics Industry has been established and continuing production and as a social responsibility in the surrounding villages for facilitating the basic amenities the C.S.R. have expended much funds and taking up the developmental activities with an intention of Development.

The A.V.R. Organic Industry Management for the environmental protection is spending many funds at a high level. By following the central Pollution control council rules taking up the pollution control measures at all levels.

The Management of A.V.R. Organic industry through the development of industry is facilitating the employment opportunities for the technically experienced youth in the district by inducting them with the training.

As the people of local villages are totally in favour of A.V.R. Organics Management, in view of public benefit, it is requested to sanction permissions for the expansion.

Yours faithfully,

Sangareddy-1

Sub : Gathering of Public opinion on 31/3/2018 on M/s. AVR Organics Pvt. Ltd. at Yuvapur village, Maddikunta Village, Sadasivapet Mandal, Sangareddy District.

I, S. Chandrasekhar, Activist of Right Way Global Organization, am welcoming the gathering of Public Opinion. This Public opinion is being conducted on increasing of the products by the said company. So, their produces, the organic matter used in the manufacture of medicines and R & D, through these there is an opportunity of pollution of water, air, underground fertilizers, therefore as a lover of environment I am giving some suggestions and instructions to the said company's management:

- 1) In order to eradicate the pollution, the company's management people should increase greenery extensively.
- 2) E.T.P. plants should be installed in the premises so as to ensure that the ground water should not become polluted.
- 3) The employment opportunities should be made available only to the locals
- 4) To the surrounding villages, drinking water and road facility should be provided
- 5) The C.S.R. funds should be utilized in effective areas only.
- 6) Those who are unemployed to them if Technical Education is imparted and skills are developed they can get employment opportunities at other places also.

The company management should continue their activities and develop without causing danger to the cattle, birds and should be helpful for the development of village, district, and state and recommend the Central Environmental and Weather Changes Department to grant permissions.

// Thanking you //

Yours faithfully,

Regd. No. 1702/2007

TO,
THE ENVIRONMENTAL ENGINEER,
Sangareddy - Regional office,
Sangareddy Dist. TSPCB.

Yavapur,
Date: 08.06.2018

RESPECTED SIR,

SUB:- Review of public hearing of M/s AVR Organics Pvt Ltd. proposed to expand their Active Pharmaceutical Ingredients (API's) Manufacturing unit capacity of 1728 TPA with R & D facility in 304 Acres with 285 Crores, from power of 1500 at Yavapur & Madhuvanagar (Villages) Sadevrapeta (Mandali) Sangareddy (Dist) Telangana.

I, H. Madhuhabu, Environment Volunteer (REEHAS, Rural Environment Education and Health Awareness Society) R/O of Hyderabad, Most Respectfully Submit That:

In this regard as a Environment Volunteer I am giving few suggestions to the proponent. So Please Kindly Consider the Below Points.

All Environmentalists are opposing the Industries but I am supporting the Industries why because, in the time of independence our country population is 30 crores but now it increased to 120 crores, every year 50 lakhs Graduates are coming for Employment but Government giving employment to only 5 lakhs people, others are getting job opportunities in private sector so we must welcome to the industries.

All are discussing about pollution... pollution... but main pollution of our country is unemployment is the most dangerous pollution to all.

1. The Proponent of M/s AVR Organics Pvt Ltd. proposed to expand Their Active Pharma Ingredients (API's) with R & D facilities as mentioned above.
2. The Environment consultant M/s KKB Envirocare consultants Pvt Ltd. of this project study area covered 10 km radius around the proposed Project area, they studied locations of air ambient quality, noise levels recorded, water samples collected, soil samples also collected these all are in norms of CPCB. This is satisfactory.
3. The consultant please take health status of village people in 10 km radius around is must, why because it is very useful in future.
4. Please take Crop production details from near Agriculture lands also.
5. For operation of the project water requirement is 868 KLd. It is taking from ground water. in summer season chance to down fall water level so please arrange rain water harvesting system.

SH.

Rural Environment Education and Health Awareness Society

Regd. No. 1702/2007

6. Please utilize waste water to plantation, sprinkling on roads. It controls Dust Pollution when your vehicles transport time.
7. Your taking 13.89 HA(33%) plantation for Green belt is good, it is CPCB norms, but I am requesting to increase 50% if any possible.
8. You take avenue plantation to near villages, road side, it is useful to save environment. Plant fruit bearing and medicinal value trees.
9. Please give employment opportunities to local people first, And conduct skilled programs for local youth like ITI, Diploma. They will get job opportunities other industries also.
10. Give medical facilities to near villages, Conduct Medical Camps Regularly.
11. Give drinking water facility to near villages.
12. Give good education to near village children.
13. Develop all main roads and street roads of near villages.
14. The project will contribute additional revenue to the State & Central Govt.
15. For using of CSR budget please form a Co-ordination committee with village people, Govt. officials and company people, and find necessary works for villages not target oriented works.

I am recommending authorities of pollution control panel of MOEF & CC for grant a permission to the above Proponent.

Thanking you.

Yours faithfully,

Sub : Y. Keshav Reddy, Social Activist request is that the A.V.R. Industries Pvt. Ltd. for grant of Environment permissions I am recommending to MOEF & CC as this area is developing and employment opportunities are coming

...

Suggestions and indications :

- 1) CSR funds should be given to local people
- 2) Should grow trees upto 33%
- 3) Should provide jobs to the local people
- 4) Should arrange ETF plants

Requesting so

Yours faithfully

Regd. No: 1702/2007

TO,
THE ENVIRONMENTAL ENGINEER,
Sangareddy-2 Regional Office,
Sangareddy Dist. TS/PCB.

Yavogudi,
Date: 08.06.2018.

RESPECTED SIR,

SUB: Review of public hearing of M/s AVR Organics Pvt Ltd. proposed to expand their Active Pharmaceutical Ingredients (APIs) manufacturing unit capacity of 1728 TPA with R & D facility in 164 Acres with 285 Crores, Man power of 1500 at Yavogudi & Maddur (Villages) Sadaivarepetta (Mandal) Sangareddy (Dist) Telangana.

I, H. Madhubabu, Environment Volunteer (REEHAS, Rural Environment Education and Health Awareness Society) R/O of Hyderabad, Most Respectfully submit that:

In this regard as a Environment Volunteer I am giving few suggestions to the proponent. So Please Kindly Consider the below Points

All Environmentists are opposing the industries that I am supporting the industries why because, in the time of independence our country population is 30 crores but now it increased to 120 crores, every year 50 lakhs Graduates are coming for employment but Government giving employment to only 5 lakhs people, others are getting job opportunities in private sector so we must welcome to the industries.

All are discussing about pollution ... pollution... but main pollution of our country is unemployment is the most dangerous pollution to all.

1. The Proponent of M/S AVR Organics Pvt Ltd. proposed to Expand Their Active Pharma Ingredients (APIs) with R & D Facility as mentioned above.
2. The Environment consultant M/s KKB Envirocare consultants Pvt Ltd. of this project study area covered 10 Km radius around the proposed Project area, they studied locations of air ambient quality, noise levels recorded, water samples collected, soil samples also collected these all are in norms of CPCB. This is satisfactory.
3. The consultant please take health status of village people in 10 km radius around is must, why because it is very useful in future.
4. Please take Crop production details from near Agriculture lands also.
5. For operation of the project water requirement is 863 KL/D it is taking from ground water, in summer season chance to down the water level so please arrange rain water harvesting system.

Regd. No: 1702/2007

6. Please utilize waste water to plantation, sprinkling on roads. It controls Dust Pollution when your vehicles transport time.
7. Your taking 13.89 HA(33%) plantation for Green belt is good, it is CPCB norms, but I am requesting to increase 50% if any possible.
8. You take avenue plantation to near villages, road side, it is useful to save environment. Plant fruit bearing and medicinal value trees.
9. Please give employment opportunities to local people first. And conduct skilled programs for local youth like ITI, Diploma. They will get job opportunities other industries also.
10. Give medical facilities to near villages, Conduct Medical Camps Regularly.
11. Give drinking water facility to near villages.
12. Give good education to near village children.
13. Develop all main roads and street roads of near villages.
14. The project will contribute additional revenue to the State & Central Govt.
15. For using of CSR budget please form a Co-ordination committee with village people, Govt. officials and company people, and find necessary works for villages not target oriented works.

I am recommending authorities of pollution control panel of MOEF & CC for grant a permission to the above Proponent.

Thanking you.

Yours faithfully,

H. Madhubabu

The Hon'ble Environmental Engineer
Regional Office, T.S.P.C.B.
Sangareddy-1

Sub : 08-06-2018 for gathering of the public opinion being held at M/s. A.V.R. Organics Pvt. Ltd., Yavapur, Maddikunta Village, Sadas vapet Mandal, Sangareddy District.

I, S. Chendrasekhar, Activist of Right Way Global Organization, am welcoming the gathering of Public Opinion. This Public opinion is being conducted on increasing of the products by the said company. So, their produces, the organic matter used in the manufacture of medicines and R & D, through these there is an opportunity of pollution of water, air, underground fertilizers, therefore as a lover of environment I am giving some suggestions and instructions to the said company's management:

- 7) In order to eradicate the pollution, the company's management people should increase greenery extensively.
- 8) E.T.P. plants should be installed in the premises so as to ensure that the ground water should not become polluted.
- 9) The employment opportunities should be made available only to the locals
- 10) To the surrounding villages, drinking water and road facility should be provided
- 11) The C.S.R. funds should be utilized in effective areas only.
- 12) Those who are unemployed to them if Technical Education is imparted and skills are developed they can get employment opportunities at other places also.

The company management should continue their activities and develop without causing danger to the cattle, birds and should be helpful for the development of village, district, and state and recommend the Central Environmental and Weather Changes Department to grant permissions.

// Thanking you //

Yours faithfully,

Sub : Extending support for the produce of M/s. A.V.R. Organics Pvt. Ltd.-
regarding.

Ref. : 08-06-2018 Environmental Public Opinion gathering – regd.

With reference to the above this is to request you that the Management of M/s. A.V.R. Organics Pvt. Ltd., at Sangareddy District, Sadavasivapet Mandal, Yavapur Maddikunta village limits, have in 104 Acres of land with present investment of Rs.35 crores totaling to Rs.285 crores for the proposed expansion of production capacity is welcomed and extending our support.

In view of world population and cattle resources welfare, and in protection of health, the significance of medicines is there. M/s. A.V.R. Organics Pvt. Ltd. coming forward with their expansion proposals is very much appreciated.

A few of the suggestions for the Management

- M/s. A.V.R. Organics Pvt. Ltd. in the proposed land and in the surrounding villages people, to the unemployed youth should facilitate the employment opportunities on preferential basis.
- The industry should adopt the neighboring villages along with Education, Medical and Health Protection programmes for the protection of environment should arrange a special department, modernize and monitor.
- For all those who are working in the industry should be provided safety kit, medical services
- The budget allocated as a part of unanimous social responsibility, should be spent in surrounding villages only.

Requesting that M/s. A.V.R. Organics Pvt. Ltd. and its management should abide by all the points mentioned in E.I.A. Report and for the expansion of Industrial products for the grant of permissions by Central Environment, Forest and Climatic changes department is recommended and requested.

Yours faithfully,
Sd/- (A.Mattaiah)

7.a.6: Project Proponent Response to Public Hearing Issues with action plan and time frame with financial budget

AVR ORGANICS Pvt. Ltd., Yawapur and Maddikunta (V), Sadasivpet (M), Sangareddy District, Telangana State

Public supported the existing unit going for setting up of API manufacturing unit (expansion project) with suggestions. 13 persons have spoken and 17 representations received and all are supported. Following is the Industry response to the Public Hearing issues. We noted down all their suggestions and observations raised by them.

Time Frame with Financial Budget: Expansion investment is Rs.250 Crores excluding the existing investment of Rs. 35 Crores (Total Rs. 285 Crores); Total capital cost allocated towards environmental pollution control measures is Rs.26.05 Crores including existing cost and 20.5 Crore per annum towards the recurring cost (operation & maintenance). Time frame for EMP is prior to operation i.e., 2 – 3 years. Enterprise Social Commitment (ESC) Budget of Rs. 138 lakhs has been earmarked @ 2.5 % of the proposed capital investment (Rs. 250 Crores) as per approved ToR. Time frame for the allocated ESC Budget mentioned above is 5 years. This will be in addition to the ESC allocation based on Net Profits per annum by Ministry of Corporate Affairs.

Sl. No.	Suggestions / Objections during Public Hearing	Response From Project Proponent	Action Plan
1.	<p>Sri K. Badreesh, Sangareddy:</p> <p>He informed that he is the Founder chairman of the District Environment Protection committee. He informed that the industry is proposed to be expanded from 8 acres to 102 acres. He informed that he does not know the present status of the industry as he has came from far. He informed that due to establishment of industry that there will be employment to the youth. However, in the disguise of employment there cannot be any damage. If the industry is run in accordance with environmental norms, there will not be any problems. For the last 20 years, due to chemical industries there has been lot of damage caused in the district. There was no drinking water for the people and cattle. Lot</p>	<p>We welcome his observation and suggestion.</p> <p>Existing industry is operating with all necessary pollution control equipment. We regularly ensure to comply with the consent conditions issued by TSPCB.</p> <p>An additional amount of Rs. 2605 lakhs are earmarked in our expansion proposal towards Environmental Management Plan with an estimated recurring cost of Rs. 2050 lakhs.</p> <p>We will ensure to operate all required pollution control equipment and reduce the pollution within the regulatory standards.</p> <p>We are also proposing 10m width</p>	<p>We have already planted 4000 nos. of trees in existing and expansion area during “Harita Haram” conducted by Telangana Government in 2017.</p> <p>In this rainy season we have started plantation in the greenbelt area all around the expansion boundary with 10 m width and other greenbelt areas in the expansion project.</p> <p>We will install best pollution control equipment for Air, Water on obtaining the CFE from TSPCB. After installation only we will obtain the Consent for Operation from TSPCB for expansion project.</p> <p>We will install online monitoring systems on the exhaust of Boiler flue gas and ETP-ZLD outlet to know the status of treatment within the standards.</p> <p>Also will install the online VOC monitor at ware houses,</p>

Sl. No.	Suggestions / Objections during Public Hearing	Response From Project Proponent	Action Plan
	<p>of problems were being faced due to the industries. He informed that he is not against the industry. Industries have to be established and employment has to be provided. Number of youth are on the roads by holding the degrees without employment. However, the lands have to be protected. He opined that there is no objection to the industry, if it is run in accordance with the norms and by controlling pollution</p>	<p>greenbelt all around the industry boundary wall for further reducing the pollution if any.</p> <p>As we are already providing employment to the educated and un-educated local people and it will be continued after expansion of the project also.</p>	<p>production block and at the entrance and these online monitoring systems will be connected to TSPCB and CPCB as per guidelines.</p> <p>We will submit the 6 monthly status of Environmental Clearance conditions to MoEFCC (online) on obtaining the EC from MOEFCC.</p> <p>In first year we will provide the RO drinking water facility and Rain Water harvesting pits and tanks at the surrounding villages in consultation with local villages.</p> <p>On obtaining CFE from TSPCB, we will discuss with the local village people and start the HR process for employment opportunities in our expansion project for various positions with required qualification and experience required for construction, erection and commissioning etc.,.</p> <p>The ESC activities will be strengthened focusing on Drinking water, Rain water harvesting, skill development, Education, Health and Improvement of basic amenities. An amount of Rs.190 lakhs (0.75%) earmarked for the following ESC activities for the surrounding villages as per New MoEFCC OM dated 1-05-2018 and its amendment on 19-06-2018 regarding the Corporate Environment Responsibility (CER).</p>
2.	<p>Sri S. Chandrasekhar, Hyderabad:</p> <p>He informed that he is supporting the industry expansion from the Right Way Global Organization. There is lot of</p>	<p>We welcome his observation and suggestion.</p> <p>We are proposing to install D.G. sets with acoustic enclosures only to reduce</p>	<p>In addition to the above,</p> <p>D.G sets will be procured with Built-in Acoustic enclosures. Further will regularly monitoring the Noise to ensure within the SPCB limits.</p>

	from the CSR funds of the industry. Further medical camps shall be conducted to conduct eye tests and other health tests, which will help the people.	and medical camps to the surrounding villages.	earmarked for the following ESC activities for the surrounding villages as per New MoEFCC OM dated 1-05-2018 and its amendment on 19-06-2018 regarding the Corporate Environment Responsibility (CER).
8.	<p>V. Sunanda Reddy, Environmentalist</p> <p>Environmentalist: He informed that 80% of the chemical industries in the state are polluting. Only 20% are operating as non-polluting. He wished that the industry management to be first in the 20% non-polluting category. He informed that he is working for the past 30 years in the field of environment. If the pharma industries are not encouraged, medicines have to be imported from other countries with huge cost. The country will lose foreign exchange. Healthcare will not available to the common people due to huge cost. Hence, he requested the panel committee to recommend to the Ministry to grant clearance unconditionally. He made certain suggestions on environmental protection. He informed that relation of the human being with air, water & land is defined as environment. He informed that he has belief that the industry will provide ETP and other facilities and control air pollution. As per the rainfall details in the area the industry will</p>	<p>All the points suggested by Mr.Sunanda Reddy have already been covered in the EIA Report.</p> <p>An additional amount of Rs. 2605 lakhs are earmarked in our expansion proposal towards Environmental Management Plan for Pollution control with an estimated recurring cost of Rs. 2050 lakhs.</p> <p>We will ensure to operate all required pollution control equipment to water, air, noise, soil etc., and reduce the pollution within the regulatory standards.</p> <p>Total Quantity of Rainfall per annum in industry from 42 Ha (104 acres) will be 35.22 Crore liters. Out of which quantity of Runoff will be 14.17 Crore liters which will be collected in proposed 3 nos. of Rainwater harvesting tanks of each 25 lakh liters ie., total capacity of 75 lakh liters. This water will be used back in industry after necessary treatment.</p>	<p>We will install best pollution control equipment for Air, Water on obtaining the CFE from TSPCB. After installation only we will obtain the Consent for Operation from TSPCB for expansion project.</p> <p>We will install online monitoring systems on the exhaust of Boiler flue gas and ETP-ZLD outlet to know the status of treatment within the standards.</p> <p>Also will install the online VOC monitor at ware houses, production block and at the entrance and these online monitoring systems will be connected to TSPCB and CPCB as per guidelines.</p> <p>We will submit the 6 monthly status of Environmental Clearance conditions to MoEFCC (online) on obtaining the EC from MOEFCC.</p> <p>On obtaining CFE from TSPCB, we will discuss with the local village people and start the HR process for employment opportunities in our expansion project for various positions with required qualification and experience required for construction, erection and commissioning etc.,.</p> <p>The ESC activities will be strengthened focusing on</p>

	<p>receive 32 crore litres of rainwater annually in the proposed area of 102 acres. Out of these about 15 crore litres of water will go as ground water. The industry's requirement is about 300 crores litres of water out of which 105 crores litres will be recycled. There is still requirement of 200 crore litres of water annually. He suggested that the industry shall provide water harvesting structures not only in their land but also in the surrounding village lands, So that there will not be any water scarcity in the area in the future. The local farmers cannot compete with the industry as the industry will continuously require water. Though the Government is proposing to provide water, till the project is completed, the industry shall take up water harvesting not only in their area but also in the surrounding area with the help of the government by spending additional funds under CSR. He will provide free technical assistance in this regard. He informed that it is mandated that for having environmental sustainability we should have 33% forest cover. Unfortunately we are having only 20% forest cover. He suggested that the industry should not restrict to 33% of the area in providing green belt and should go for 50% to 60% of the green cover so as to achieve</p>	<p>We are also proposing Rain water harvesting pits in the expansion area to improve the ground water level. Details are given in the EIA report chapter-10, Table 10.1.</p>	<p>Drinking water, Rain water harvesting, skill development, Education, Health and Improvement of basic amenities. An amount of Rs.190 lakhs (0.75%) earmarked for the following ESC activities for the surrounding villages as per New MoEFCC OM dated 1-05-2018 and its amendment on 19-06-2018 regarding the Corporate Environment Responsibility (CER).</p>

	<p>environmental sustainability. By implementing this suggestion the company can become an ideal to other industries. He suggested that a co-ordination committee with local public representatives & government officials shall be created and the budget under CSR shall expended in consultation with co-ordination committee, on emergency local requirements. Thus company can gain the support of the locals. With respect to providing employment he appreciated the industry for proposing to providing employment 1000 people. He informed that the indirect employment will not be 500 as mentioned it will be much more than that, to the tune of 20,000 to 25,000 which we may not know. However, he informed that there are number of youth lacking skill in the area. Hence he requested the industry to provide skill development to the local youth so that they can work not only in the company but also outside. He wished that the company should develop at the same time environment shall be protected and the industry shall become part of development of the state.</p>		
9.	<p>G. Vijaya Reddy: He informed that the people are seeking</p>	<p>We welcome his observation and suggestion.</p>	<p>We will install best pollution control equipment for Air, Water on obtaining the CFE from TSPCB. After installation only we will obtain the Consent for Operation</p>

Sl. No.	Suggestions / Objections during Public Hearing	Response From Project Proponent	Action Plan
	<p>money rather than long life. Earlier, the people were living with long life. Earlier, there used to be good green belt in the area. At that time, the human lifespan was long. It got reduced with reduction in green cover area. He stressed that the people have to think about environmental protection on 100% basis. He informed that the industries should be established for the growth of GDP. However, for the purpose of having environmental sustainability, he proposed three suggestions to MoEF&CC. While permitting the industries, the impact on agriculture has to be studied. The second point is that the impact on animal husbandry in the area has to be studied. The third point is that, the impact on human life has also to be studied as human being is dependent on the surrounding environment. The life span of human being before & after establishment of industries has to be studied and incorporated in the reports. He suggested that these studies have to be insisted by MoEF&CC atleast in coming up industries. The industry is proposed in 104 acres of land which is agricultural land. This land is being converted to non-agricultural. The impact of this conversion has to be studied. In the proposed area of the industry, there is deficit between</p>	<p>All the suggestions given by Mr.Vijaya Reddy are well covered in the EIA Report.</p> <p>An additional amount of Rs. 2605 lakhs are earmarked in our expansion proposal towards Environmental Management Plan for Pollution control with an estimated recurring cost of Rs. 2050 lakhs.</p> <p>We will ensure to operate all required pollution control equipments to water, air, noise, soil etc., and reduce the pollution within the regulatory standards.</p> <p>We are also proposing 10m width greenbelt all around the industry boundary wall for further reducing the pollution if any.</p> <p>We are proposing about 34.3 acres out of 104 acres exclusively for greenbelt. i.e., 33%.</p> <p>Hence our proposed industry will not effect on surrounding agriculture, animal husbandry and habitation.</p>	<p>from TSPCB for expansion project.</p> <p>We will install online monitoring systems on the exhaust of Boiler flue gas and ETP-ZLD outlet to know the status of treatment within the standards.</p> <p>Also will install the online VOC monitor at ware houses, production block and at the entrance and these online monitoring systems will be connected to TSPCB and CPCB as per guidelines.</p> <p>We will submit the 6 monthly status of Environmental Clearance conditions to MoEFCC (online) on obtaining the EC from MOEFCC.</p> <p>We have already planted 4000 nos. of trees in existing and expansion area during “Harita Haram” conducted by Telangana Government in 2017.</p> <p>In this rainy season we have started plantation in the greenbelt area all around the expansion boundary with 10 m width and other greenbelt areas in the expansion project.</p> <p>The ESC activities will be strengthened focusing on Drinking water, Rain water harvesting, skill development, Education, Health and Improvement of basic amenities. An amount of Rs.190 lakhs (0.75%) earmarked for the following ESC activities for the surrounding villages as per New MoEFCC OM dated 1-05-2018 and its amendment on 19-06-2018 regarding the Corporate Environment Responsibility (CER).</p>
