Answer 5: Company has valid CCA No. AWH-49214 dated 04/09/2012 which is valid up to 01/06/2017.

Answer 6: TOR Meeting for this project was done in August, 2014 and TORs were finalized in 24th reconstituted expert appraisal committee held during 29-30th September 2014 so baseline was done during the months of October-December 2014.

Answer 7: As per TORs given we have selected locations for ambient air, water, soil and noise monitoring w.r.t. pre-dominant wind direction and at least one location in downwind direction.

Answer 8: Date of Ambient Air Monitoring: October, 2014 to December, 2014 Date of Water Sampling & Monitoring: Nov. 24 to 29, 2014 Date of Noise Sampling & Monitoring: Nov. 24 to 27, 2014 Date of Soil Sampling & Monitoring: Nov. 24 to 29, 2014

Answer 9: The levels of TDS and Chloride concentration is observed by us since last 10 years and TDS is always between 900-1100 mg/L and Chloride is between 300-400 mg/L.

Annexure 10: Company have applied to CGWA for ground water withdrawal dated 14/3/15

Annexure 11: Company shall maintain consistency in units in Final EIA Report.

Annexure 12: Domestic water requirement is 20 KL/Day for 260 Manpower (after proposed expansion) considering 80-90 lit/person.

Annexure 13: Domestic water requirement is 20 KL/Day and waste water generation is 15 KL/day.

Annexure 14: Schematic Flow Diagram of Existing and Proposed ETP is shown in EIA Report, Page No. 2-50 & 2-54 of Chapter – 2.

Answer 15: PRECAUTIONS DURING STORAGE AND TRANSPORTATION OF HAZARDOUS CHEMICALS LIQUIDS

- Always use the road tankers having authorization for transporting the said liquids.
- Vendor will be asked to provide MSDS to Tanker Driver.
- Tankers will have clearly marked identification of material being contained with mentioning Safety Card.
- Driver to have concerned Safety Officer's contact details to contact him in case of emergency.
- · Provide muffler on exhaust while entering tanker within premises.
- Ensure Earthing Boss connection before starting any transferring.

- SOP to cover routine checking of Tank farm area to be carried out for checking any spillage / leakage.
- Tanks will be inspected physically daily for having any visual abnormality.
- Readings of Temperature & Pressure will be noted, recorded & reported immediately for abnormality.
- Safety instruments like rupture disc, safety valves will be checked at defined duration for intakeness.
- Scheduled testing of tanks to be done for thickness testing.
- Tanks to be painted on regular interval defined as per laws to protect them from atmospheric corrosion.
- · Barrels to be checked for proper fixing of bungs before sending it outside the premises.
- Barrels to be monitored physically daily for developing any pressure or vacuum within it on long storage.
- Concerned persons will be trained properly to use spill kit in case of observing any spillage inside warehouse.

SOLIDS

- Vendor will be asked to provide MSDS to Truck Driver. **'
- Driver to have concerned Safety Officer's contact details to contact him in case of emergency.
- Provide muffler on exhaust while entering truck within premises.
- SOP to cover routine checking of Bags & Containers for checking any damage.
- Containers to be tested for safe racking & transportation.
- Proper PPE to be used while handling the material & concerned persons to be trained for usage of the same.
- Concerned persons will be trained properly to use spill kit in case of observing any spillage inside warehouse.

The major hazards in the M/s. Alembic Pharmaceuticals Limited (Unit-II) are described below.

- Toxic hazard due to leakage of hazardous chemicals from storage tank.
- Corrosive hazard due to leakage of chemicals from Carboys.
- Electrical hazards due to the electrical major equipment/ machinery, operations, welding, motors, and heavy lift devices, cabling, human intervention (short circuit possibility), maintenance work (due to machinery breakdown etc.), plant lighting related electrical hazards.
- Possibility of human injury due to working with mechanical machines, manual handling etc.
- Possibility of injury during chemicals handled, during operations and due to intoxication.
- Major dropped objects hazard due to large number of physical handling steps / operations involved with crane/ overhead lifting/ hoisting equipment.
- Fires in any part of the plant working areas there is a possibility of rapid escalation if it is not brought under control quickly.

Answer 19: BREAK UP OF DIFFERENT LAND USE OF FACTORY

Total 37,332 m² land area is available at site; out of this 20,194 m² (i.e. approx 54 % of total area) is developed as greenbelt and other forms of greenery.

Good greenery is maintained in and around the site by planting various types of tress and maintaining lawns. 20,194 m² area (approx.) is utilized for tree plantation / development of lawns. A green belt with width of min. 1 meter is developed within the site boundary and across the premises inside roads. Trees like Asopalav, Neem, Gulmohar, Champa, Gauva, Palm Trees, Nariyal, Ghaneri, Shevga, Jangli badam, Sag, Jamun, Mango, Rain tree, etc. are planted in and around the site.

Green Belt to Trap and Absorb Pollutants

A green belt traps and absorbs pollutants without altering-the biogeochemical cycle of water and nutrients. Absorption and trapping capacity of trees depend on height of plant, canopy structure, physiognomy and morphological character of leaf. Once fully developed, such tree plantations can serve as buffer and shock absorber against transient and accidental release of pollutants caused by power, equipment and human failures. Green belt is usually designed in such a way that the first few rows in a green belt have a shorter height and dense canopy. Plants native to an area are generally used to suit the prevailing ecosystem and biogeochemical cycle. Native plants are more tolerant to disease, grow at a faster rate and result in better attenuation of pollutants.

Plantation Details

Actual Status of Plantation/Green Belt

Trees species to be planted at plant are in line with trees species recommended in CPCB's guidelines for developing Greenbelts. For plantation at the plant in future, it is suggested that

1.00

these guidelines should also be followed for selecting pollutants tolerant and absorbent species.

Save Environment : Care for next Generation EPH- ALEMBIC-API-UNIT 2 on of EINEMP re 5.0 The o ved in the pre-I of It . 15 rd of E . EIAEM (OCUNABET) would need to include a ce reports prepared by them and data provided by other Orga their status of approvals etc copy marked to chairman-GPCB- Gujarat, As regards addl ToR -vii, compliance refers on EIA page 17, as 'copy of Hon 'able High Court's Stay order & Extensions attached as Annexure-11. As regards sr . no 5, compliance status is SILENT! OUR COMMENT-We would like to draw the attn. of concerned regulatory authorities, that, under referred ToR, proponent has submitted document OTHER THAN what was desired , i.e. instead of QCI-NABET Accreditation certificate, a high court stay order is submitted under Annexure 11, There may be good reasoning, to submit an alternate document (which is not clarified AS AN OPTION in referred mandatory ToR) (A) We would request MS-GPCB to obtain a written clarification, that whether proponent has any official copy of written circular / memorandum / special letter, issued by MoEF, that proponent is eligible to submit high court stay order in lieu of QCI-NABET QCI ACCREDITATION CERTIFICATE and in absence of such official written circular / memorandum /special letter, we leave it up to regulatory authorities , as like MoEF / GPCB / QCI-NABET, whether AS A SPECIAL CASE FOR PROPONENT, they can deviate their set norms and can accept such ToR, AS A COMPLIANCE eligible to conduct an environment public hearing at schedule date. Moreover, we would like to draw the atth? of all regulatory authorities, on following points file i, is Mr Javadekar's quote to media, is attached for a ready reference file ii, is copy of high court stay orders down loaded from EIA report, is attached for your ready reference. Asked on the EIA done by Salim Ali Centre for Ornithology and Natural History for a Rs. 1,500 crore Neutrino Observatory project in Tamil Nadu, which is not accredited by agencies like Quality Council of India, he said "I will have to check, I do not know the facts, the file has not come to me."

He, however, said the government would take cognisance of ELA done only by recognised institutes, those accredited by the QCL

"Only accredited bodies will do it...many went to court, individuals also," he said, adding that a clarification notification will be issued in this regard.

"We will issue clarificatory (sic) notification to avoid this kind of situation, with proper notification and explanation we will put all facts before court and sooner we will have a system where only accredited agencies will be allowed and there will be more number of accredited agencies which can do EIA," he said.

On marsh lands, he said "it will be protected and nurtured and more migratory birds will come."

ž.

To a query on action against some green NGO's, he said "We are taking all NGOs on board who are on field and there are thousands of them."
