**Re.: Environmental Clearance of Thakurani Iron Ore Mine**

Further to our letter Ref no.PK/045/012 dated 28.05.2012, enclosing a letter from Jharkhand Pollution Control Board, we wish to add the following:

- 1.0 We have already sent, alongwith our letter refered above, the actions already taken and proposed actions to be under taken for control of air pollution. You must have observed from the windrose diagram that the prominent wind direction is from BadaJamda towards mines and hence any impact due to our mining activities at BadaJamda is not possible.
- 2.0 Further the pollution level at the mine as shown in our recent monitoring, has shown a downward trend, as summarized below:

Period	Location	PM <sub>10</sub> Value
Dec 2011	Mine working	72.00
March 2012(Max)	Mine Working	44.60

Even the monitoring report of JPCB near the mine shows RSPM within limit. As a matter of fact, it is higher at the mine office (although within limit) than at mine pits, as it is impacted mainly due to traffic and other activities near by. The RSPM in the mine is much below the permissible limit..

MINE OWNER • P.O. CHAIBASA, Dist.- West Singhbhum (Jharkhand) 833201

TIN : 20851200747

Ref. No. : PK/...../.....

Chaibasa.....

In view of the above, may we request you to please award the Environmental Clearance.

Thanking you,

Yours faithfully,
