**Sub: JPGPL 2x300 MW (Phase-I) Project at Ghanmukh (Bijora), Tal. Mahagaon, Dist. Yavatmal, Maharashtra – Issue of Corrigendum to Environmental Clearance – Regarding**

**Ref: Environmental Clearance no. J-13012/158/2010-IA.II(T) dated 30.07.2012**

Sir,

Ministry of Environment & Forest has accorded Environment Clearance to our 2x300 MW (Phase-I) Power project located at Ghanmukh (Bijora), Tal. Mahagaon, Dist. Yavatmal, Maharashtra vide above cited EC which was received in the month of July, 2012.

Subsequently, based on the acquisition of balance land, there are revisions/extensions in the co-ordinates of the land. The locations of project related utilities such as additional raw water reservoir, rail marshalling yard, township / colony, guest house, Plantations etc. are finalized and now incorporated in this revised submission. Accordingly, the project land co-ordinates are revised /extended.

The co-ordinates offered in our initial application and subsequent presentation were basically for the main plant BTG area and hence covered small portion. Inadvertently, the co-ordinates for other project utilities were not submitted at that time. Based on our previous submission of the Land coordinates, the MOEF granted their approval for those co-ordinates and mentioned the same in the copy of Environment Clearance. Since, the balance project land has been acquired fully, we are hereby once again approaching the Ministry to seek their further approval for the revised co-ordinates which now covers all the project utilities. The purpose to approach the Ministry once again is narrated below.

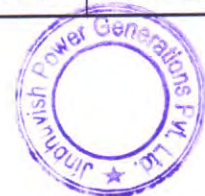

1. The co-ordinates mentioned in Environment Clearance covered only @150 acres of land where main BTG Island were proposed.
2. Hence, in order to accommodate all the other utilities, the co-ordinates are required to be extended as mentioned in this letter.
3. The approved Ash pond location as per Environment Clearance is located in village Ningnur.

4. The water for the project will be sourced from river Penganga which is not a perennial river due to recent construction of some barrages upstream of our water drawl point. Hence, in order to mitigate water shortages during lean period and as suggested by Water Resources Department, Maharashtra, we are proposing raw water storage in village Ningnur for Lean period requirement.
5. The location of township / colony and Guest house is now finalized and is proposed in the area mentioned in this letter.
6. The Following table indicates the co-ordinates furnished in the copy of Environment Clearance and also the co-ordinates of sites acquired by the company.

Co-ordinates	Co-ordinates as per EC		Revised co-ordinates	
Main Plant Site Village : Ghanmukh (Bijora)		Latitude	Longitude	
	From	19°42'23.58"N	77°43'57.80"E	NW 19°43'5.21"N 77°43'58.13"E

			19°40'13.63"N	77°49'42.79"E

**Reasons for changes in co-ordinates:**

- ❖ Coordinates given earlier were for main plant BTG area only.-  
**Proponent had to alter the co-ordinates after procurement of balance Land which was under process of acquisition. The main plant area Coordinates are extended.**
  
- ❖ Only one location was proposed in Village Ningnur i.e. for Ash Pond/Dyke.  
**Other co-ordinates for ash Pond/dyke had to be change for the same reason i.e. after completion of land acquisition.**
  
- ❖ **Water availability had to be ensured during lean season as suggested by Water Resource Dept, Govt. Of Maharashtra for which land the co-ordinates are given.**

We are also enclosing the copy of topo-sheet indicating areas covered under the coordinates given in Environment Clearance and the coordinates requested for change as Annexure A. The project areas indicated in the Environment Clearance are marked in **Red** while the proposed revised project areas are marked in dark **Pink** for better clarity.

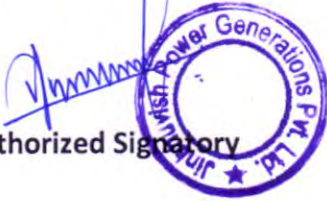

You are therefore requested to issue above Corrigendum to the Environment Clearance.

Thanking you.

Yours faithfully,

For **Jinhuvish Power Generations Pvt. Ltd.**
