The Director, IA - II Division
Ministry Of Environment, Forest and Climate Change,
Indira Paryavarān Bhawan,
Jor Bagh Road, New Delhi - 110 003

Dear Sir,

Sub: Proposed Expansion of Existing Synthetic Organic Pigments Manufacturing Unit of Navpad Pigments Pvt. Ltd, at Plot No. 1196/1/A & B, Rajpur Village, Ghumasan - Patia Road, Chhatral - Mehsana Highway, Kadi Taluka, Mehsana District, Gujarat _ Submission of reply for EDS dt. 07.12.2018_ Reg.

Ref: 1. F.No. J-11011/151/2017 – IA.II (I) Dated 31.05.2017

2. Essential Details Sought dated 07th Dec 2018

With reference to the above subject, we have received an EDS on 07th Dec 2018 stating that "Carbazole is shown as one of the proposed product (50 TPM), and raw material also to be procured from open market. This needs to be clarified. – Given the quantum of ground water withdrawal, there has to be some in principle commitment or acceptance of the proposal submitted to CGWA"

Please find the below clarification:

Carbazole is produced by two methods:

- A) Natural Route Method
- B) Synthetic Method

At present in our plant we are manufacturing Pigment Violet 23 (3.0 TPM) in which Carbazole is one of the key raw material. Carbazole is being procured from open market, since iNatural route Carbazole is readily available.

Earlier in 2012 there was a situation where natural route Carbazole was not available in market and hence in such situation we would prefer to produce by Synthetic route

method to run our production smoothly. We do not have consent for Carbazole production; hence we have included Carbazole also in our proposed products for 50 TPM to produce in our plant.

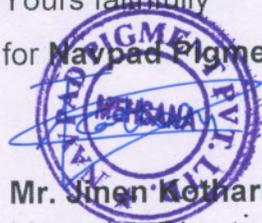

We have received NOC from CGWA for extraction of ground water for our project, the same has been attached.

In view of the above, we request you to consider our proposal to issue Environmental Clearance at the earliest.

Thanking You

Yours faithfully

for Navpad Pigments Pvt. Ltd.
