

ENVIRONMENT CLEARANCE **APPLICATION**

[FORM I]

FOR
EXPANSION OF SATYAWADI RAJA HARISH
CHANDRA GOVERNMENT HOSPITAL

AT
SECTOR-A7, NARELA, NEW DELHI

DEVELOPED BY
PUBLIC WORKS DEPARTMENT (HEALTH)
GOVT. OF NCT DELHI

Contents

I. Basic information.....	3
II. Activity.....	6
1) Construction, operation or decommissioning of the Project involving actions, which will cause physical changes in the locality (topography, land use, changes in water bodies, etc.).....	6
2) Use of Natural resources for construction or operation of the Project (such as land, water, materials or energy, especially any resources which are non-renewable or in short supply):.....	11
3) Use, storage, transport, handling or production of substances or materials, which could be harmful to human health or the environment or raise concerns about actual or perceived risks to human health.	12
4) Production of solid wastes during construction or operation or decommissioning (MT/month).....	13
5) Release of pollutants or any hazardous, toxic or noxious substances to air (Kg/hr).....	15
6) Generation of Noise and Vibration, and Emissions of Light and Heat:	16
7) Risk Risks of contamination of land or water from releases of pollutants into the ground or into sewers, surface waters, groundwater, coastal waters or the sea:	17
8) Risk of accidents during construction or operation of the Project, which could affect human health or the environment.	18
9) Factors which should be considered (such as consequential development) which could lead to environmental effects or the potential for cumulative impacts with other existing or planned activities in the locality.....	19
III. Environmental Sensitivity	20
IV. Terms of Reference for EIA studies.....	21

FORM I

Appendix I (See Paragraph-6)

I. Basic information

S.No.	Items	Details
1.	Name of the project/s	Expansion of Satyawadi Raja Harish Chandra Government Hospital by Public works Department (Health) Govt. of NCT Delhi
2.	S. No. in the schedule	Sr. No. 8 (a) [Schedule 8 : Building/Construction projects/Area Development Projects and Townships, of EIA Notification 2006]
3.	Proposed capacity/area/length/tonnage to be handled/command area/lease area/number of wells to be drilled	Plot Area -36,630 m ² Proposed Built Up Area- 73,285.55m ²
4.	New/Expansion/Modernization	Expansion
5.	Existing Capacity/Area etc.	
6.	Category of Project i.e. 'A' or 'B'	As per the EIA Notification 2006, Project falls under Category B
7.	Does it attract the general condition? If yes, please specify.	No
8.	Does it attract the specific condition? If yes, please specify.	No
9.	Location	
	Plot/Survey/Khasra No.	Sector-A7, Narela, New Delhi
	Village	
	Tehsil	
	District	
	State	

10.	Nearest railway station/airport along with distance in kms.	Nearest Railway Station: Narela Railway station – 1.84 km Nearest Airport: Indira Gandhi International Airport – 31.50 km (Source of information:- Google Earth Pro)
11.	Nearest Town, city, District Headquarters along with distance in kms.	Project site is near to urban Narela which is approx. 5 km from the site.
12.	Village Panchayats, Zilla Parishad, Municipal Corporation, Local body (complete postal addresses with telephone nos. to be given)	North Delhi Municipal Corporation North Zone.
13.	Name of applicant	G.S. Kohli
14.	Registered Address	Executive Engineer Health Maintenance Division, Dr. B.S.A. Hospital Complex, Sector –A1, Rohini, Delhi - 110085
15.	Address for correspondence : Name Designation (Owner/Partner/CEO) Address Pin Code Telephone No. Fax No. E-mail	G.S. Kohli Executive Engineer Health Maintenance Division, Dr. B.S.A. Hospital Complex, Sector –A1, Rohini, Delhi - 110085 eepwddelhihmdn@gmail.com
16.	Details of Alternative Sites examined, if any. Location of these sites should be shown on a toposheet.	No
17.	Interlinked Projects	No
18.	Whether separate application of interlinked project has been submitted?	No
19.	If yes, date of submission	-
20.	If No, reason	-

21.	Whether the proposal involves approval/ clearance under: if yes, details of the same and their status to be given. (a)The forest (Conservation) act, 1980? (b) The wildlife (Protection) act, 1972? (C) The C.R.Z Notification, 1991?	Proposal involves approval/ clearance under : (a)The forest (Conservation) act, 1980: NA (b) The wildlife (Protection) act, 1972: NA (C) The C.R.Z Notification, 1991:NA
22.	Whether there is any Government Order/Policy relevant/relating to the site?	The following Govt. Orders / Policies are to be followed to the project :- <ul style="list-style-type: none"> • National Building Code (NBC) of India for construction of building 2016. • Unified Building Bye Laws Delhi 2016 • Bureau of Energy Efficiency • Rules & Regulations issued by Airports Authority of India • Water Pollution (Prevention & Control) Act, 1974 • Air Pollution (Prevention & Control) Act, 1981 • Environment Protection Act, 1986 • Municipal Solid Waste Rules, 2016 • Hazardous Waste Management & Handling Rules,2008 • Biomedical Waste Management & Handling Rules,2016 • EIA Notification, 2006 • Manual on norms and standards for environment clearance of large construction projects issued by MoEF.
23.	Forest land involved (hectares)	No

24.	Whether there is any litigation pending against the project and /or land in which the project is propose to be set up? (a) Name of the Court (b) Case No. (c) Orders/directions of the Court, if any and its relevance with the proposed project.	No
-----	--	----

II. Activity

1) Construction, operation or decommissioning of the Project involving actions, which will cause physical changes in the locality (topography, land use, changes in water bodies, etc.)

S.No.	Information/Checklist	Yes/No	Details thereof (with approximate quantities /rates, wherever possible) with source of information data
1.1	Permanent or temporary change in land use, land cover or topography including increase in intensity of land use (with respect to local land use plan)	No	Land was allotted for construction of Hospital Building by DDA. The expansion area of the site does not have any constructed structure So, No Permanent or temporary change in land use, land cover or topography including increase in intensity of land use.
1.2	Clearance of existing land, vegetation and buildings?	Yes	As the expansion of the site is being planned, So clearance of existing vegetation will take place, Clearance of vegetation will take place after obtain proper permission.
1.3	Creation of new land uses?	No	There will be no creation of new land will occur as the site is already marked for Medical facility for Public by Delhi Development authority.
1.4	Pre-construction investigations e.g.bore houses, soil testing?	Yes	Geo technical investigation has been done to find the suitability of soil for providing for adequate foundations for the proposed structure.
1.5	Construction works?	Yes	All construction activities of area will be confined within the project premises; there will be no physical changes outside the project boundary.

			Construction of building will be done systematically, with economy of materials and with due care on environmental protection.
1.6	Demolition works?	No	The project site has no pre-existing structures in area So demolition is not required.
1.7	Temporary sites used for construction works or housing of construction workers?	Yes	All the construction activity including stocking of raw materials will be confined within the project site only. Inside the proposed site, a small area will be utilized temporarily for construction of sheds for the labor. Local labors from nearby area will be hired. Sanitation facilities will be developed at site.
1.8	Above ground buildings, structures or earthworks including linear structures, cut and fill or excavations	Yes	Excavation will be carried out for foundation of building and basement. The total excavated quantity of earth material for site area will be approx. 31,933.89m ³ . The excavated soil will be re used in backfilling and other area development activities.
1.9	Underground works including mining or tunnelling?	No	No underground works including mining/ tunnelling is required except excavation of earth.
1.10	Reclamation works?	No	No reclamation work required.
1.11	Dredging?	No	No dredging required.
1.12	Offshore structures?	No	No offshore structures required.
1.13	Production and manufacturing processes?	No	No production/manufacturing process involved as it is building construction project.
1.14	Facilities for storage of goods or materials?	Yes	During construction stage, the following raw material handling methods are being adopted: <ul style="list-style-type: none"> • Cement shall be separately stored under cover in bales

			<ul style="list-style-type: none"> • Sand & aggregates shall be stacked neatly under tarpaulin cover • Bricks and steel shall be laid in open • Finishing materials like tiles, sanitary fixtures, etc shall be stored in closed rooms. <p>Material storage yard has been storage of construction materials.</p>
1.15	Facilities for treatment or disposal of solid waste or liquid effluents?	Yes	<p>Solid Waste: The solid waste generated from the project will be in the form of:</p> <p>Construction Waste: Left over cement and mortars, cement concrete blocks, aggregate, sand and other inorganic material will be recycled and reused as granular sub-base (GSB) layer of pavement. Earth rendered surplus from the excavation will be utilized in the embankment works.</p> <p>Operational Phase: The solid waste generated from expansion project will be mainly hospital, and domestic in nature and the quantity of the waste from expansion will be 1,874.30 kg/day. Solid wastes generated will be segregated into Bio-Medical waste, biodegradable (waste vegetables and foods etc.) and non-biodegradable (papers, cartons, thermocol, plastics, glass etc.) components and collected in separate bins. The biodegradable organic wastes will be treated inside the premises. Recyclable and non-recyclable wastes will be disposed</p>

			through Govt. approved agency. <u>Liquid effluents:</u> During construction phase, sewage will be treated and disposed through septic tanks with soak pits. However during operational stage, in house ETP and STP shall be placed inside premises to treat wastewater from the site, The treated sewage will be reused for toilet flushing, cooling and horticulture. Dewatered/dried sludge generated from the STP plant will be used as manure for green belt development.
1.16	Facilities for long term housing of operational workers?	No	Local labourers will be hired from nearby areas during construction phase. So, there will be no need to create permanent facilities for long-term housing of operational workers.
1.17	New road, rail or sea traffic during construction or operation?	No	Project site is adjacent to the artery road (Sector-A1, Sector-A7 Road). Only internal roads; paths will be developed for vehicular movements for transportation of construction material during construction phase whereas internal tracks and paths will be developed for traffic circulation (to avoid any congestion) during operational phase.
1.18	New road, rail, air waterborne or other transport infrastructure including new or altered routes and stations, ports, airports etc?	No	Project site is adjacent to the artery road (Sector-A1, Sector-A7 Road). And near to Samaypur badli metro station.
1.19	Closure or diversion of existing transport routes or infrastructure leading to	No	Since the site has good connectivity to sector road. Site has low traffic density; there will be no need for diversion or

	changes in traffic movements?		closure of existing traffic routes.
1.20	New or diverted transmission lines or pipelines?	No	There will not be any new/diverted transmission lines or pipelines around the hospital facility.
1.21	Impoundment, damming, culverting, realignment or other changes to the hydrology of watercourses or aquifers?	No	No impoundment, damming, culverting, realignment or other changes to the hydrology of surface watercourses is proposed.
1.22	Stream crossings?	No	There are no streams running across the site.
1.23	Abstraction or transfers of water form ground or surface waters?	Yes	<p>Construction Phase : During the construction phase the water requirement (approx. 2,022.97 ML) will be met from Private water or treated water from nearby CSTP. No ground water will be extracted. Hence, there will be no impacts on ground water environment during construction phase.</p> <p>Operational Phase : Total water requirement for hospital shall be approx. 537 KLD. The fresh water will be obtained from water supply department of DJB. Detail of water requirements for various uses is given conceptual plan. Efficient dual flushing fixtures will be provided for conservation of fresh water.</p>
1.24	Changes in water bodies or the land surface affecting drainage or run-off?	Yes	Runoff will increase due to increased paved surface. However, increased runoff will be managed by well-designed rainwater harvesting system and storm water management plan.
1.25	Transport of personnel or materials for construction, operation or decommissioning?	Yes	During the construction phase, about 15-20 trucks are estimated per week. Adequate parking space within the project site for loading and unloading of materials will be provided.

			Adequate parking space (641ECS) will be provided in operational phase.
1.26	Long-term dismantling or decommissioning or restoration works?	No	No Long term dismantling or decommissioning or restoration works will be involved.
1.27	Ongoing activity during decommissioning which could have an impact on the environment?	No	None
1.28	Influx of people to an area in either temporarily or permanently?	No	Local laborers from nearby area will be employed during the construction phase. In the operation phase, most of the expected occupants will be from the surrounding areas. Hence, the project will lead to a redistribution of occupants within the city. Thus, no significant influx of people is envisaged.
1.29	Introduction of alien species?	No	The landscaping will be carried out with mainly local species with a few ornamental varieties of flora that are well suited to the local conditions like Bottle Palm(<i>Hyophorbelagenicaulis</i>)andAshoka (<i>Saraca asoca</i>) etc.
1.30	Loss of native species or genetic diversity?	No	There will be no significant impact on the native species or genetic diversity.
1.31	Any other actions?	No	Not Applicable.

2) Use of Natural resources for construction or operation of the Project (such as land, water, materials or energy, especially any resources which are non-renewable or in short supply):

S. No.	Information/checklist confirmation	Yes/No	Details thereof (with approximate quantities/rates, wherever possible) with source of information data
2.1	Land especially undeveloped or agricultural land (ha)	No	No undeveloped or agricultural land is present.
2.2	Water (expected source & competing users) unit: KLD	Yes	During construction phase approx.2, 022.97 ML amount of water will be

			required which will be provided by Private tanker supplier. During operation phase, water supply will be provided through Municipal/DJB. Total water requirement for the proposed area is 537 KLD
2.3	Minerals (MT)	Yes	Minerals such as sand and aggregates will be required during the construction phase.
2.4	Construction material – stone, aggregates, sand / soil (expected source – MT)	Yes	All materials for construction will be arranged through select suppliers.
2.5	Forests and timber (source – MT)	Yes	All material forests and timber will be provided by selected suppliers. However steel frames etc shall be used to minimize the use of timber.
2.6	Energy including electricity and fuels (source, competing users) Unit: fuel (MT), energy (MW)	Yes	The power shall be supplied by BSES Delhi. The total connected load for 4,656 KW. Power shall be supplied by transformers of total 2000 capacity (2*1000 kVA)Transformers (Existing) + 3*1600 KVA Transformers-(2W+1S) New proposed In case of power failure, DG sets of total capacity of 4,030 KVA (3*1500 kVA)will be provided as power back-up for building
2.7	Any other natural resources (use appropriate standard units)	No	Not Applicable

3) Use , storage, transport, handling or production of substances or materials, which could be harmful to human health or the environment or raise concerns about actual or perceived risks to human health.

S. No.	Information/checklist confirmation	Yes/No	Details thereof (with approximate quantities/rates, wherever possible) with source of information data
3.1	Use of substances or materials, which are hazardous (as per	Yes	Diesel for DG sets will be stored in drums in earmarked locations. It shall

	MSIHC rules) to human health or the environment (flora, fauna, and water supplies)		also be handled as per The Manufacture, Storage and Import of Hazardous Chemical Rules, 1989 and Material Safety Data Sheet.
3.2	Changes in occurrence of disease or affect disease vectors (e.g. insect or water borne diseases)	No	Suitable drainage and waste management measures (with frequent spray of insecticides etc.) will be adopted in both the construction and operational phase such that there will be no stagnation of water or accumulation of waste. This will effectively restrict the reproduction and growth of disease vectors.
3.3	Affect the welfare of people e.g. by changing living conditions?	Yes	This is hospital project availed by Govt. of NCT Delhi for the public service.
3.4	Vulnerable groups of people who could be affected by the project e.g. hospital patients, children, the elderly etc.	No	Impacts of this type are not expected as it is hospital project.
3.5	Any other causes	No	Not Applicable

4) Production of solid wastes during construction or operation or decommissioning (MT/month)

S. No.	Information/Checklist confirmation	Yes/No	Details thereof (with approximate quantities/rates, wherever possible) with source of information data
4.1	Spoil, overburden or mine wastes	No	No such spoil, overburden or mine wastes will be generated.
4.2	Municipal waste (domestic and or commercial wastes)	Yes	

For the Proposed facility

Category	Counts (heads)	Waste Generated (kg/ day)
Patient	432 @ 1.5 kg/day	648
Regular staff • Doctors/Administrative Staff/Nurses/Ward Attendants/ &Engineering Staff Boys/ Housekeeping	1,728 @ 0.25 kg/day	432
OPD	1,728@ 0.15 kg/day	259.2
Visitors	3,564@0.15kg/day	534.6
Landscape waste (2.51 acre)	@0.2 kg/acre	0.502
Total Waste Generated		1,874.30kg/ day

The quantum of waste generated in India is estimated to be 1-2 kg per bed per day in a hospital

According to WHO 85% of hospital waste is non-hazardous, 10%infective and remaining 5% non-infective but hazardous.

Total hospital waste generation	648kg/ day
Non-hazardous in Nature	approx. 550.8kg/ day
Infectious in Nature	approx. 64.8kg/ day
Non-Infectious but hazardous in nature	approx.32.4 kg/ day
Total Municipal Waste generation	1,226.3 kg/ day
Biodegradable waste	approx. 735.78 kg/ day
Non-Bio degradable waste	approx. 367.89 kg/ day
Inert waste	approx. 122.63 kg/ day

4.3	Hazardous wastes (as per Hazardous Waste Management Rules)	Yes	The hazardous wastes along with other wastes in the project will be used oil from DG sets, which is classified as per The Hazardous Waste Category 5.1 as per The Hazardous Wastes (Management & Handling) Rules, 1989. Used oil from DG sets will be stored in
-----	--	------------	--

			HDPE drums in isolated covered facility. This used oil will be sold to authorized recyclers. Suitable care will be taken so that spills/leaks of used oil from storage are avoided.
4.4	Other industrial process wastes	No	Not applicable
4.5	Surplus product	No	Not applicable
4.6	Sewage sludge or other sludge from effluent treatment	Yes	Sludge generated from the STP plant will be dried and later will be used as manure for green belt development.
4.7	Construction or demolition wastes	Yes	The construction waste will consist of excess earth and construction debris along with cement bags, steel in bits and pieces, insulating and packaging materials etc. Recyclable waste construction materials will be sold to recyclers. Unusable and excess construction debris will be disposed at designated places in tune with the local norms.
4.8	Redundant machinery or equipment	No	Redundant machinery will not be generated.
4.9	Contaminated soils or other materials	No	Contaminated soils or other materials will not be generated.
4.10	Agricultural wastes	Yes	Landscape wastes of 1.018 kg/day will be generated.
4.11	Other solid wastes	No	No other solids will be produced.

5) Release of pollutants or any hazardous, toxic or noxious substances to air (Kg/hr).

S. No.	Information/Checklist confirmation	Yes/No	Details thereof (with approximate quantities/rates, wherever possible) with source of information data
5.1	Emissions from combustion of fossil fuels from stationary or mobile sources	Yes	The project does not envisage any major air pollution sources except operation of DG sets during power failure and vehicular traffic.

5.2	Emissions from production processes	No	No production processes involved. Hence, there will be no such emissions.
5.3	Emissions from materials handling including storage or transport	Yes	Small quantities of fugitive emissions are envisaged during transport and handling of construction materials. Such emissions will be temporary and controlled by the use of sprinkling and other viable techniques like covering of loose material.
5.4	Emissions from construction activities including plant and equipment	Yes	This will be restricted to the construction phase and the construction site only.
5.5	Dust or odours from handling of materials including construction materials, sewage and waste	Yes	Dust is anticipated during loading and unloading of construction material and excavation of upper earth surface. These will however be temporary in nature, which will be controlled by providing water sprinklers. Tarpaulin cover will be provided on stored loose materials to reduce the dust emission.
5.6	Emissions from incineration of waste	No	No incineration of wastes is proposed.
5.7	Emissions from burning of waste in open air (e.g. slash materials, construction debris)	No	Open burning of biomass/other material will be prohibited on site.
5.8	Emissions from any other sources	No	Not Applicable

6) Generation of Noise and Vibration, and Emissions of Light and Heat:

S. No.	Information/Checklist confirmation	Yes/ No	Details thereof (with approximate quantities/ rates, wherever possible) with source of information data
6.1	From operation of equipment e.g. engines, ventilation plant, crushers	Yes	Source of noise in the operational phase will be from backup DG sets (which will be in operation only during power failure) and pumps & motors. All the machinery will be of highest standard of reputed make and will comply with standard i.e. The DG set

			room will be provided with acoustic enclosure to have minimum 25 dB (A) insertion loss or for meeting the ambient noise standard whichever is on higher side as per E (P) Act, GSR 371 (E) and its amendments. Therefore, no significant impact due to operation of machinery is anticipated.
6.2	From industrial or similar processes	No	No industrial processes will be carried out in the Hospital project.
6.3	From construction or demolition	Yes	Due to various construction activities, there will be short-term noise impacts in the immediate vicinity of the project site. The construction activities will include the following noise generating activities: <ul style="list-style-type: none"> • Concreting, mixing & operation of DG sets. • Construction plant and heavy vehicle movement.
6.4	From blasting or piling	No	No blasting or mechanized piling will be done.
6.5	From construction or operational traffic	Yes	Some noise will be generated from vehicular movement in the construction and operational phase but that will be mitigated with green belt.
6.6	From lighting or cooling systems	No	No significant noise impact will result from lighting or cooling systems.
6.7	From any other sources	No	Not Applicable

7) Risk Risks of contamination of land or water from releases of pollutants into the ground or into sewers, surface waters, groundwater, coastal waters or the sea:

S.No.	Information/Checklist confirmation	Yes/No	Details thereof (with approximate quantities/rates, wherever possible) with source of information data
7.1	From handling, storage, use or spillage of hazardous materials	No	The used oil from DG sets will be carefully stored in HDPE drums at isolated storage, and periodically sold to authorized recyclers. All precautions will

			be taken to avoid spillage from storage as per The Hazardous Wastes (Management & Handling) Rules, 1989.
7.2	From discharge of sewage or other effluents to water or the land (expected mode and place of Discharge)	No	There will be no risk to the water or land from the wastewater discharge from the site because no raw wastewater shall be discharge, All the sewage coming from the site shall be treated in house STP of capacities, 300 KLD based on MBBR technology, 80 KLD of SBR technology along with ETP of 58 KLD, After proper treatment, surplus treated water shall be discharge , if any
7.3	By deposition of pollutants emitted to air into the land or into water	No	The DG Sets will be provided with stacks of adequate height. Hence dispersion will be achieved and avoid deposition of pollutants in significant concentrations at any single location.
7.4	From any other sources	No	Not Applicable
7.5	Is there a risk of long term buildup of pollutants in the environment from these sources?	No	Not Applicable

8) Risk of accidents during construction or operation of the Project, which could affect human health or the environment.

S.No.	Information/Checklist confirmation	Yes/No	Details thereof (with approximate quantities/rates, wherever possible) with source of information data
8.1	From explosions, spillages, fires, etc. from storage, handling, use or production of hazardous substances	Yes	To deal with any fire related accident, firefighting facility of single handed hydrant valve, long hose reel, and portable fire extinguisher shall be provided.
8.2	From any other causes	No	Not Applicable
8.3	Could the project be affected by natural disasters causing	No	The project falls under seismic active Zone IV indicating high damage risk

environmental damage? (E.g. floods, earthquakes, landslides, cloudburst etc.)	zone. The buildings will be designed as earthquake resistant and comply with the required IS specifications.
---	--

9) Factors which should be considered (such as consequential development) which could lead to environmental effects or the potential for cumulative impacts with other existing or planned activities in the locality

S.No.	Information/Checklist confirmation	Yes/No	Details thereof (with approximate quantities/rates, wherever possible) with source of information data
9.1	Lead to development of supporting utilities, ancillary development or development stimulated by the project which could have impact on the environment e.g.: <ul style="list-style-type: none"> Supporting infrastructure (roads, power supply, waste or waste water treatment, etc.) Housing development Extractive industries Supply industries Other 	Yes Yes No No No Yes	Appropriate infrastructure like roads, power supply, waste management and waste water treatment will be developed within the project site. - A medical facility is being provided and will be given to the people.
9.2	Lead to after-use of the site, which could have an impact on the environment.	No	Not Anticipated
9.3	Set a precedent for later developments	Yes	The project will provide good health facilities to the people and better life style and will set an example for later developments in the areas.
9.4	Have cumulative effects due to proximity to other existing or planned projects with similar effects	No	Not Applicable

III. Environmental Sensitivity

S.No.	Areas	Name/ Identity	Aerial distance (within 15 km) Proposed project location boundary
1.	Areas protected under international conventions, national or local legislation for their ecological, landscape, cultural or other related value	None	No areas protected under international conventions, national or local legislation for their ecological, landscape, cultural or other related value falls within 15 km from project boundary
2.	Areas which are important or sensitive for ecological reasons - Wetlands, watercourses or other water bodies, coastal zone, biospheres, mountains, forests	Yamuna River Nazafgarh drain	10.21Km 2.82Km
3.	Areas used by protected, important or sensitive species of flora or fauna for breeding, nesting, foraging, resting, over wintering, migration	None	No such areas present within 15 km from project boundary
4.	Inland, coastal, marine or underground waters	Ground water	Groundwater present at approx. 12-14 mbgl
5.	State, National boundaries	Delhi-HR State	Approx. 6.13 km from the project site
6.	Routes or facilities used by the public for access to recreation or other tourist, pilgrim areas	Alipur Road Bawana Road NH-1 Grand trunk Road	Nearby to the site in
7.	Defense installations	None	There are no such areas.
8.	Densely populated or built-up area	Anadan Prabat	20.64 km

9.	Areas occupied by sensitive man-made land uses (<i>hospitals, schools, places of worship, community facilities</i>)	Lala Hans Raj Gupta ITI Kasturi Ram College of Higher Education HMR Institute of Technolog y and Manageme nt	1.91km 1.20Km 4.70Km
10.	Areas containing important, high quality or scarce resources. (<i>ground water resources, surface resources, forestry, agriculture, fisheries, tourism, minerals</i>)	Nazafgarh drain	2.82km from the site-
11.	Areas already subjected to pollution or environmental damage. (<i>those where existing legal environmental standards are exceeded</i>)	None	
12.	Areas susceptible to natural hazard which could cause the project to present environmental problems (<i>earthquakes, subsidence, landslides, erosion, flooding or extreme or adverse climatic conditions</i>)	Earthquake s	The site falls under the zone IV as per the Seismic Zone Map of India. Adequate measures will be taken during the construction of the proposed project.

IV. Terms of Reference for EIA studies

Not applicable for 8(a) Schedule of Building Construction Projects.
