

## PUBLIC HEARING MINUTES

### COMPLIANCE STATEMENT

3<sup>rd</sup> July, 2019. 11.00 AM

#### MANALLUR INDUSTRIAL PARK GUMMIDIPOONDI TALUK, THIRUVALLUR DISTRICT

S.No	Public Concern- with name of the person	Compliance
1	<p><b>Thiru Ravi. Soorapoondi</b></p> <p>It informed that no forest land is available in the vicinity of the proposed site but forest land is available. Whether the Manallur Industrial Park was started or yet to be started by the SIPCOT. The Industries such as A/s. ARS Power &amp; Kevin Steel located in the vicinity have made bore well for a depth up to 1000 feet. But in the proposed site is reported that the bore well by the individual unit is refused. How the water will come in the Madharpakkam area. What is the necessity of the SIPCOT in this area? It should be established based on the public's need. Already one SIPCOT is existing in the Gummidipoondi then what is the necessity of the one more SIPCOT in this area. It is informed that the biomedical waste will be dumped below the ground but it will be released during raining day and it will affect the health and livelihood of the nearby public. Hence we no need the Manallur Industrial Park</p>	<p>No notified forest land is involved in the proposed land mass for the Industrial Park. The locations of the Reserve Forests in the 10Km radius area around the proposed IP is shown in Fig 4.2 Chapter IV.</p> <p>No Bore well will be permitted in the proposed IP.</p> <p>He was in informed that no dumping of biomedical or any solid waste will be permitted. The disposal of Solid Waste, including biomedical waste, if any will be sent to Common Facilities, as explained in the EMP; Chapter IX.</p>
2	<p><b>Mrs. Vettriselvi, Manallur</b></p>	

	<p>My residence is located adjacent to this SIPCOT. Development of SIPCOT in the healthy &amp; wealthy village is not acceptable. Large area of agricultural land is available in the vicinity of the proposed site. Agriculture will be affected due to the Industries. Already Gummidipoondi SIPCOT is available within a distance of 30 km. for that red alert has been given. The proposed SIPCOT is located adjacent to their agriculture land and it will affect the three season harvesting in that area. Air pollution is caused due to heavy lorry transportation and in the evening after 5 PM and night hours the transport gets affected due to this smoke. It is informed that employment opportunity will be available due to the development of SIPCOT, but opportunities are given only to the other state people. Due to industrial development groundwater is over exploited and also gets contaminated and affects the children's health. Hence we no need the Manallur Industrial Park.</p>	<p>The proposed type of industries are not characterized air polluting industries. As presented in EMP, every member industry will have APC measures in the Stack and it will be connected to Continuous Monitoring system of Tamilnadu Pollution Control Board for continuous monitoring to prevent any undue air pollution due to the proposed IP.</p> <p>Ground water will not be sourced as water will come from the centralized offsite facilities of Metro Water through dedicated pipelines, as presented in EMP.</p>
3	<p><b>Thiru. Gunasekar, Manallur</b></p> <p>The industries which are not affected the surrounding environment can be acceptable, but the surrounding environments already get polluted due to the operation of the existing industries. Due to heavy air pollution, white washed wall gets blackened within a week. Due to air pollution, public gets affected by the disease like cancer, typhoid etc. it is informed that employment opportunity will be available due to the development of SIPCOT, but only security &amp; scavengers posts only given to the few local people. There is no possibility of developing Non Polluting Industries in</p>	<p>The proposed type or classified industries will not be permitted to pollute the surrounding environment of the proposed IP.</p>

	<p>this Manallur SIPCOT, Hence we no need the Manallur Industrial Park in our area.</p>	
4	<p><b>Thiru.Prem, Pathirivedu</b></p> <p>It reported that the animal and forest will not be affected but there is no protection to the human. Also the industries proposed in this area will be Chemical Industries only and it will affect the environment. The Great Thiruvalluvar said that there is no world without water, but we are suffering due to contamination of water. Hence we no need the Manallur Industrial Park.</p>	<p>It was assured to the member that member industries will operate Zero Liquid Discharge Plant, unlike the existing industries of the area and hence, there will not be any wastewater disposal.</p>
5	<p><b>Thiru.Chittibabu, Pathirivedu</b></p> <p>There is no adequate announcement will in advance regarding the “Manallur Industrial Park” proposed to be developed by SIPCOT and the conduction of public hearing in this regard. No awareness has been given to the public in this regard. It was reported that Public Notice was given in the Daily News Papers. But necessary local announcement by way of “Dom, Dom”, in the public hearing meeting without hearing the public views, it is reported that SIPCOT is being developed. The conduction of public hearing meeting is not known to many of the people in the surroundings. After 7 PM vision of root gets affected due to air pollution. Agriculture gets affected. The duty of the Government is to protect the public, instead of that the government affect the livelihood of the people in the name of industrial development. Hence we no need the Manallur Industrial Park.</p>	<p>Public Notice was given in the Daily News Papers and necessary local announcement made through Auto with loud speaker system.</p>

<p>6</p>	<p><b>Thiru.E.Sambath, Manallur</b></p> <p>There is no adequate announcement well in advance regarding the “Manallur Industrial Park” proposed to be developed by SIPCOT and the conduction of public hearing, women has not able to participated in the public hearing Programme. It is not correct to discuss about the development of SIPCOT without having adequate toilet facilities and without solving the discrepancy in the 100 day employment scheme.</p> <p>The District Environmental Engineer has intervened and requested to speak only about this project.</p> <p>There is no action taken on the resolution passed in the Village Saba regarding pollution due to M/s Kevin Steel. It is a rice bowl and setting up the SIPCOT by sacrificing the Agriculture is not acceptable one. There is lot of Palm &amp; Cashew tree and it is proposed to setting up the SIPCOT by destroying the above trees. There are 5000 Nos of cattle are available in this area and there will not be sufficient land for grazing. There is no solution for water problems but this public hearing is being conducted for establishing new SIPCOT. Agriculture gets affected due to industrialization. The desilting work has not been done in the two lakes located within the proposed site. Due to heavy harvesting of paddy the village is named as Manallur. There is no adequate land allotment for burial ground &amp; disposal of Municipal Solid Waste instead of that all the Prombok land are allotted for this proposal. Instead of developing the SIPCOT importance may be given to agriculture. Already enough numbers</p>	<p>Public Notice was given in the Daily News Papers and necessary local announcement made through Auto with loud speaker system.</p> <p>It was also mentioned that for solid waste management, 5% of the allot able land, 10 Ha has been allotted exclusively, as presented in the land use pattern, Table 2.1 Chapter II.</p>
----------	---	--

	of SIPCOT are available in this area there is no need of that Manallur Industrial Park.	
7	<p><b>Thiru.Nalan, Madharpakkam</b></p> <p>The Govt has to provide all the basic amenities for the living things. This proposal will not affect the mankind. There is lot of SIPCOT are available in this area and what are the development was made for the development of this people?. Most of the families were shifted from this area, since there is no basic amenities and transport available even this 2019. Already we are suffered by lot, from existing SIPCOT. Hence we no need the Manallur Industrial Park.</p>	SIPCOT will have Corporate Social Responsibility (CSR) plan to address such issues and it was mentioned to the participant that such issues will be addressed with the guidance of district administration to the extent possible under CSR.
8	<p><b>Thiru.Jagankumar, Manallur</b></p> <p>As per EIA Notification 2006, this “Manallur Industrial Park” is categorized as category “A” type. The category “A” type is dangerous &amp; poisonous. It is proposed to develop Synthetic Organic Industries in this area. The waste generated cannot be recycled. There are more nos. of SIPCOT, SIDCO &amp; CRZ prone area. Water and food materials are supplied by this area to Thiruvallur District. Tanjore is a rice bowl of Tamilnadu like that Manallur is the rice bowl of Thiruvallur District. There is no welfare of the nearby public in this project. The cost invested in the project can be utilized for public for better development of agriculture and thereby increasing the groundwater table. This project cost may be spent on development of green belt in that project area. Hence we no need the Manallur Industrial Park.</p>	The present proposal is for industrial development and the member was told that GoTN also execute exclusive projects for agricultural projects with grants.

9	<p><b>Thiru.Vadivel, Manallur</b></p> <p>It is reported that the details of industries to be located within the proposed site not able to be furnished right now, but the air pollution is reported as 52%. It is also reported that values is within the standard prescribed by the Govt. after industrializations whether the above 52% can be increased or not. What is the assurance for that? It is informed that employment opportunity will be available due to the development of SIPCOT, but opportunities are given only to the other state people. More than 5000 people have registered in the employment exchange office. If the proposed land is given to the public, we will develop the agriculture and give employment to more people and develop our livelihood. Hence we no need the Manallur Industrial Park.</p>	<p>The incremental increase in air pollution will be ascertain once the establishment of industries are started to take place. In the absence specific activities as no member industry is known for its activity, it cannot be assured now.</p> <p>SIPCOT assured that the member industries will be encouraged to provide employment opportunity to locals using the activities if Environment Cell of the proposed IP.</p>
10	<p><b>Thiru.Sukumar, Manallur</b></p> <p>Agriculture is the backbone of the Country. Development of agriculture is the development of nation. The proposed area is the catchment area for the Bootheri lake. If the Industrial park is developed, how the water will comes to the lake. It is reported that the approval has been obtained from MoEF&amp;CC in 2015, but there is no adequate announcement will in advance regarding the “Manallur Industrial Park” proposed to be developed by SIPCOT and the conduction of public hearing. Already three lakes and one water harvesting pond is located within the proposed site and green belt also developed in some area. But it is reported that no water bodies within the proposed site. How the water will come to this</p>	<p>The participant was told that no water source in the project area will be sourced for water requirement of the proposed IP.</p>

	area. Hence we no need the Manallur Industrial Park.	
11	<p><b>Thiru.Karthik, Nagarajkandigai</b></p> <p>It is reported in the assembly that 12 places were highly polluted. Gummidipoondi is one among that. In the Gummidipoondi area lot of emission after 6 PM and heavy pollution. It can be tolerated by the adult that can't by children. Since the over exploitation of groundwater, by the industries there is a possibilities of sea water instruction. <b>Hence we are strongly objecting this proposal, which will affect the public livelihood.</b></p>	<p>The participant was told on the characteristic of the proposed member industries and APC measures and mandates for Continuous Emission Monitoring Systems of TNPCB.</p>
12	<p><b>Thiru.Anandharaj, New Gummidipoondi</b></p> <p>Already air get polluted in the Gummidipoondi area due to the operation of Industries such as KTV Oil, Chirahoot Steel. Due to air pollution Physical exercise such as walking, running result in casualty. Groundwater gets polluted. 12 people death happened due to this air pollution. Many people get affected by the disease like vomiting , faint etc, Pollution happened more than 3-4 times the standard prescribed by the Govt. <b>Hence we no need the Manallur Industrial Park which will affect the public livelihood.</b></p>	<p>The participant was told on the characteristic of the proposed member industries and APC measures and mandates for Continuous Emission Monitoring Systems of TNPCB.</p>
13	<p><b>Thiru.Srinivasan, Manallur</b></p> <p>There is no way to burial ground, due to the development of SIPCOT what kind of development can be happened to the public. What is the assurance for that?</p>	<p>Member was informed that this concern will be taken care by the district administration.</p>
