

Existing Water requirement is met through bore wells and rainwater harvesting system located within the plant premises. The existing water requirement for domestic use (housekeeping and toilets) would be 4KLD (Domestic Water). For existing Industrial use (floor washing & bottling shed) approx 4 kld is required. During construction activities 10 KLD approx water would be required. Considering operation of proposed plant activities (3 NO of 300 MT MSV), additional Water is not required Hence No Fresh Water envisaged. 10 KLD ETP is installed in Existing plant premises.

Table Error! No text of specified style in document..1:Total Water Requirement

	Usage		
Particulars	Existing	Proposed	Total
Domestic	4 KLD	-	4 KLD
Industrial	4 KLD	-	4 KLD
