➤ **Recommendation of the SEAC : 10.02.2015**

The Representative of proponent attended the meeting. He informed that there is no mine within 1 km from the proposed mine as such it does not attract cluster provisions. The proponent submitted the case in the previous meeting. During previous meeting the following recommendation was made.

“Representative of the proponent attended the meeting. The committee noted that the proponent had been directed by department of Mines & Geology to clear off the dumping area to open the mine. But there was no mention of suitable dump management plan falling in line with recommendation of director of mines and geology. Hence the committee recommended that the proponent should submit corrected Form-I, incorporating the necessary dump management plan along with other suitable requirements”.

The proponent has re-submitted the Form-I for the following.

1. Clearing of 50% of the dumped waste material in phase-I
2. Clearing the remaining 50% of the dumped waste plus handling of generated waste from mining, and mining of black galaxy granite in 1.8hectares in phase-II

**MINUTES OF THE 63rd MEETING OF THE STATE LEVEL ENVIRONMENT IMPACT

3. Mining of remaining 1.943 hectares of land in phase-III along with 1.8 hectares of phase-I.
4. During full scale production it is envisaged to produce 1920 cum per annum .

After detailed discussion the committee recommended to issue of EC to the project by stipulating the following conditions.

- a. The proponent shall start mining only after clearing 50% of the existing dump.
- b. The proponent shall leave adequate distance between the moving front of the waste dump and moving front of the working face of quarry.
- c. The issue of EC shall not be taken as precedence to the order of any court case or litigation in the court of law, involving the present site.
- d. The proponent shall clear either 50% of the dump volume or clear 50% of the floor area of the dump whichever is higher before starting mining activity.
- e. The proponent shall dispose the granite waste as crusher feed for road metal and earth for filling purposes as committed.
