The members present declared that there are no conflicts of interest with the projects being considered in this meeting.

The Member Secretary, SEIAA welcomed the Chairman and the Member of SEIAA. After general introductory remarks by the Chairman, SEIAA, the Committee took up items agenda-wise and reviewed the recommendations of State Expert Appraisal Committee (SEAC). After detailed deliberations & discussions on the recommendations of the SEAC, the SEIAA recorded their decisions on case to case basis as under.

Minutes of the SEIAA meeting held on 02.01.2018.

Agenda Item: 01	12.000 Ha. Quartz Mine of Sri. T. Chandra Sekhar Reddy, Sy. No's. 494, Yerraballi (V), Nidamanur (M), Nalgonda District. - Environmental Clearance - Reg.
------------------------	--

Earlier the SEIAA in its meeting held on 21.11.2017 approved the project for issue of EC with a specific condition that the proponent shall carryout mining operations maintainga atleast 400m away from the small Seasonal Tank.

But, the proponent submitted representation vide lr.dt.13.12.2017 informing that the total length of the Quarry lease is 480m. If we leave about 300m under buffer zone, we may loose maximum mineral bearing area under the buffer zone and it may not be viable for the quarry operation as the mineral bearing zone is under the buffer zone and it may be difficult for scientific mining operations. It was further informed that as per the Law of Mines & Minerals under Metalliferous Mines Regulations Act, 1961 under chapter XII, Rule 127(2).b any spot lying within a horizontal distance of 15m from either bank of river or canal or boundary of the lake, tank or other surface reservoir must take special permission and as per the MCDR-1960, Under Form-K of Part III, no mining operations shall be carried within a distance of 50 m from either bank of river or canal boundary of the lake, tank or other survice reservoir. They will submit an affidavit to maintain a setback distance of 50m as a barrier zone within their quarry lease and the same will be developed by greenbelt. However, as an additional measure, they will protect the small dry seasonal tank with dug culvert and a retention wall to avoid flow of silt from their quarry lease in southern direction. Hence, it was requested to consider their request to reduce the buffer area of 400m to 150m and issue EC.

The SEIAA examined the representation submitted by the proponent in detail and approved the above mentioned project for issue of Environmental Clearance with the following specific condition:

- The proponent shall carryout mining operations maintaining atleast 200m (ie., 100m - buffer distance within mine lease area and 100m – outside mine lease area towards seasonal tank) distance from the existing small seasonal tank. The proponent shall also not dump any waste / over burdern in the above buffer area of 200m. They shall also develop and maintain greenbelt in the buffer area left towards the Seasonal tank, in addition to the greenbelt to be developed all along the boundary of the project. They shall take all precautionery measures for not causing any disturbance / damage to the said Seasonal tank.
