

Revised FORM – 1

By

'NRT ICON'

**ANDHRA PRADESH NON-RESIDENT TELUGU SOCIETY
(Residential cum Office cum Retail Complex)**

**Sy No. # 310, 311, 330, 331, 332 & 343,
Rayapudi village,
Tullur mandal,
Guntur district,
Andhra Pradesh**

Prepared by

Accreditation No. NABET / EIA / 1619 / RA 026

APPENDIX I
(See paragraph – 6)
FORM – 1

S. No		
(I)	Basic Information	
1	Name of the project	'NRT ICON' Andhra Pradesh Non-Resident Telugu Society (Residential cum Office cum Retail Complex)
2	S. No. in the schedule	8(a)
3	Proposed capacity / area / length / tonnage to be handled / command area / lease area/number of wells to be drilled	Total Built up area – 1,16,064.45 Sq.m (which includes building with 2 basements + ground floor + 33 upper floors + terrace)
4	New / Expansion / Modernization	New
5	Existing capacity/Area etc.	No
6	Category of project i.e. 'A' or 'B'.	B
7	Does it attract the general condition? If yes, please specify.	No
8	Does it attract the specific condition? If yes, please specify.	No
9	Location	
	Plot/Survey / Khasra No.	310, 311, 330, 331, 332 & 343
	Village	Rayapudi Village
	Tehsil / Mandal	Tullur mandal,
	District	Guntur
	State	Andhra Pradesh
10	Nearest railway station/airport along with distance in kms.	Nearest Railway station: Rayanapadu – 8.5 Kms. Nearest Airport – Gannavaram airport – 32 Kms
11	Nearest Town, city, District Headquarters along with distance in kms	Nearest town: Vijayawada District Head quarter: Vijayawada
12	Village Panchayats,Zilla Parishad, Municipal corporation, Local body(complete postal addresses with telephone no.s to be given)	A. P. Capital Region Development Authority
13	Name of the applicant	Andhra Pradesh Non-Resident Telugu Society
14	Registered Address	APNRT Society, Infosight Building, 4th Floor, S.No.78/2, NH 16, Service Road, Near Pathuru Road Junction, Tadepalli, Guntur District,

S. No		
		Andhra Pradesh, 522501
15.	Address for correspondence:	
	Name	Dr. RAVI KUMAR P VEMURU
	Designation(owner/partner/CEO)	President
	Address	APNRT Society, Infosight Building, 4th Floor, S.No.78/2, NH # 16, Service Road, Near Pathuru Road Junction, Tadepalli, Guntur District, Andhra Pradesh, 522501
	Pin code	522501
	E-Mail	ravi@apnrt.com
	Telephone No.	0863-2340678
	Fax No.	
16.	Details of Alternative sites examined, if any. Location of these sites should be shown on a topo sheet	No alternate sites are considered
17.	Interlinked Projects	No
18.	Whether separate application of interlinked project has been submitted?	No
19.	If yes, date of submission	Not applicable
20.	If no, reason	Not applicable
21.	Whether the proposal involves approval/clearance under; if yes, details of the same and their status to be given. (a) The Forest (conservation)Act,1980 (b) The Wildlife(protection)Act,1972 (c) The C.R.Z Notification,1991?	No
22.	Whether there is any a government order/policy relevant/relating to the site?	No
23.	Forest land involved(hectares)	No
24.	Whether there is any litigation pending against the project and/or land in which the project is propose to be set up? (a)Name of the court (b)Case No. (c) Orders/directions of the court, if	No

S. No		
	any and its relevance with the proposed project.	

(II) ACTIVITY

1. **Construction, operation or decommissioning of the Project involving actions, which will cause physical changes in the locality (topography, land use, changes in water bodies, etc.)**

S.No.	Information/Checklist confirmation	Yes/No	Details thereof (with approximate quantities /rates, wherever possible) with source of information data
1.1	Permanent or temporary change in land use, land cover or topography including increase in intensity of land use (with respect to local land use plan)	Yes	The site of the proposed project falls under A. P. Capital Region Development Authority. As per the master plan issued by APCRDA the site falls under mixed land use zone. Presently no activity is being carried out in the site premises. Greenbelt / greenery will be developed with in the premises as per the norms. Hence there will not be any adverse impact due to the change in land use pattern due to the proposed project.
1.2	Clearance of existing land, vegetation and buildings?	Yes	Sparse vegetation consisting of Thorny and shrubs exists in the site earmarked for the proposed project. However good Greenbelt / greenery will be developed with in the premises as per the norms. Hence there will not be any adverse impact due clearance of vegetation due to the proposed project.
1.3	Creation of new land uses?	No	No other land use other than commercial cum residential will be created in the site premises.
1.4	Pre-construction investigations e.g. bore houses, soil testing?	No	Investigations will be carried out for soil and water at the site.
1.5	Construction works?	No	No construction work will be taken-up without obtaining the Prior Environmental clearance from SEIAA and Consent For

S.No.	Information/Checklist confirmation	Yes/No	Details thereof (with approximate quantities /rates, wherever possible) with source of information data
			Establishment from APPCB.
1.6	Demolition works?	No	Not applicable as there will not be demolition works in the proposed project.
1.7	Temporary sites used for construction works or housing of construction workers?	Yes	Construction workers will be from local area only. Temporary housing is proposed for construction workers.
1.8	Above ground buildings, structures or earthworks including linear structures, cut and fill or excavations	Yes	Most of the structures will be above the ground. However excavations will be involved for foundations and basements purpose. The excavation will be stacked properly at site. Part of the excavated soil will be used for backfilling, greenery and landscaping and balance quantity will be sent to the sites where land filling is required
1.9	Underground works including mining or tunneling?	No	No mining and tunneling will be involved in the proposed activity.
1.10	Reclamation works?	No	No reclamation works are envisaged in proposed project.
1.11	Dredging?	No	No dredging activity will be involved.
1.12	Offshore structures?	No	No offshore structures are envisaged in the proposed project.
1.13	Production and manufacturing processes?	No	Not applicable as proposed project involves construction of Residential cum Office cum retail complex.
1.14	Facilities for storage of goods or materials?	Yes	Raw materials will be stored as per norms. The raw materials like Cement, Sand, Bricks, Steel, Wood, Paint & aggregates will be stored at site only. Cement & Paint will be stored at indoors & remaining will be at outdoors.
1.15	Facilities for treatment or disposal of solid waste or liquid effluents?	Yes	Wastewater generated during the operation of the project will be treated in sewage treatment plant. Treated wastewater will be utilized for non-potable purposes like Toilet flushing, HVAC & Greenbelt

S.No.	Information/Checklist confirmation	Yes/No	Details thereof (with approximate quantities /rates, wherever possible) with source of information data
			development. Treatment and disposal of wastewater & solid waste will be in accordance with the CPCB / APPCB norms.
1.16	Facilities for long term housing of operational workers?	No	No permanent housing will be provided for the construction workers.
1.17	New road, rail or sea traffic during construction or operation?	Yes	There will be a slight increase in traffic volume during construction and operation of the proposed project. The site of the proposed project is well connected by NH # 65 (earlier NH # 9). New roads will be laid by APCRDA from NH # 65. Hence there will not be any adverse impact on road traffic / rail traffic / sea traffic due to the proposed project.
1.18	New road, rail, air waterborne or other transport infrastructure including new or altered routes and stations, ports, airports etc?	Yes	New roads will be laid by APCRDA from NH # 65 up to the project site.
1.19	Closure or diversion of existing transport routes or infrastructure leading to changes in traffic movements?	Yes	Closure or diversion of existing transport routes will be done by APCRDA
1.20	New or diverted transmission lines or pipelines?	Yes	Water required for the proposed project will be sourced from Municipal supply.
1.21	Impoundment, damming, culverting, realignment or other changes to the hydrology of watercourses or aquifers?	Yes	Culverting, realignment will be done APCRDA. There will not be any changes to the hydrology of watercourses or aquifers.
1.22	Stream crossings?	No	No stream crossing is involved
1.23	Abstraction or transfers of water form ground or surface waters?	Yes	Water required for the proposed project will be sourced from Municipal supply.
1.24	Changes in water bodies or the land surface affecting drainage or run-	No	No changes in water bodies, drainage and land surface are

S.No.	Information/Checklist confirmation	Yes/No	Details thereof (with approximate quantities /rates, wherever possible) with source of information data
	off?		anticipated as the site is more or less flat without many undulations. Separate storm water drains will be provided.
1.25	Transport of personnel or materials for construction, operation or decommissioning?	Yes	There will be a slight increase in traffic volume during construction and operation of the proposed project. The site of the proposed project is well connected by NH # 65. New roads will be laid by APCRDA from NH # 65. Hence there will not be any adverse impact on road traffic / rail traffic / sea traffic due to the proposed project.
1.26	Long-term dismantling or decommissioning or restoration works?	No	No such works are envisaged
1.27	Ongoing activity during decommissioning which could have an impact on the environment?	No	No such works are envisaged
1.28	Influx of people to the area either temporarily or permanently?	No	Temporary labour required for the construction activity will be met from the local places.
1.29	Introduction of alien species?	No	No such activity is envisaged
1.30	Loss of native species or genetic diversity?	No	As a part of greenbelt/greenery development plan native species that are suitable to that soil condition will be developed.
1.31	Any other actions?	No	Nil

2. Use of Natural resources for construction or operation of the Project (such as land, water, materials or energy, especially any resources which are non-renewable or in short supply)

S.No.	Information/checklist confirmation	Yes/No	Details thereof (with approximate quantities /rates, wherever possible) with source of information data
2.1	Land especially undeveloped or agricultural land (ha)	Yes	The site of the proposed project falls under A. P. Capital Region Development Authority. As per the master plan issued by APCRDA the site falls under mixed land use zone. Presently no activity is being carried out in the site premises. Greenbelt / greenery will be developed with in the premises as per the norms. Total land acquired for proposed project is 5 acres (20,234.36 Sq.m).
2.2	Water (expected source & competing users) unit: KLD	Yes	Water required for the proposed project will be sourced through Municipal supply during operation of the Project and through Ground water during construction of the Project. Total water demand is about 10 KLD during Construction of complex & 227 KLD during operation of the project.
2.3	Minerals (MT)	Yes	Manufactured sand – 25,000 MT
2.4	Construction material – stone, aggregates, sand / soil (expected source – MT)	Yes	All construction materials such as Ready mix Concrete, Cement, Sand, Aggregate, Aerated Auto clave, Concrete Brick (nos.), Reinforcement Steel, Wood material, Painting material, Flooring Material, Sanitary Material, Electrical Material, Plumbing material are available locally.
2.5	Forests and timber (source – MT)	No	Wood material required for Windows & Doors of Imported Quality will be procured locally.
2.6	Energy including electricity and fuels	Yes	The total energy requirement for

S.No.	Information/checklist confirmation	Yes/No	Details thereof (with approximate quantities /rates, wherever possible) with source of information data
	(source, competing users) Unit: fuel (MT), energy (MW)		the proposed project is 7500 kVA (Maximum peak demand). It will be taken from APCPDCL. However 4 x 1500 KVA & 2 x 650 KVA DG sets will be provided for emergency Backup Power Supply.
2.7	Any other natural resources (use appropriate standard units)	No	Not applicable

3. Use, storage, transport, handling or production of substances or materials, which could be harmful to human health or the environment or raise concerns about actual or perceived risks to human health

S.No.	Information/Checklist confirmation	Yes/No	Details thereof (with approximate quantities/rates, wherever possible) with source of information data
3.1	Use of substances or materials, which are hazardous (as per MSIHC rules) to human health or the environment (flora, fauna, and water supplies)	Yes	The hazardous wastes like empty containers of paints, petroleum products, thinners, adhesives will be given to authorized recyclers. All the hazardous materials will be stored as per HWM rules.
3.2	Changes in occurrence of disease or affect disease vectors (e.g. insect or water borne diseases)	No	Not Applicable
3.3	Affect the welfare of people e.g. by changing living conditions?	No	Not Applicable as the proposed project will create direct / indirect employment opportunities in the area and thereby contributing in the improvement of socio-economic status of people in the area. Land prices will increase substantially.
3.4	Vulnerable groups of people who could be affected by the project e.g. hospital patients, children, the elderly etc.,	No	<ul style="list-style-type: none"> • Approach roads to the complex will be paved • Speed of the vehicles will be reduced • Greenbelt will be developed By following the above the dust generation will be minimized. The Solid waste in the form of garbage will be segregated at each section distinguishing wet and dry waste. Dry waste will be taken away

S.No.	Information/Checklist confirmation	Yes/No	Details thereof (with approximate quantities/rates, wherever possible) with source of information data
			by Municipal Corporation. Kitchen and food waste will be composted within the complex premises only. Wastewater generated from the complex will be treated in sewage treatment plant and treated waste water will be utilized for non-potable purposes like flushing, HVAC and Green belt development plan Hence there will not be any adverse impact on vulnerable groups.
3.5	Any other causes	No	Not Applicable

4. Production of solid wastes during construction or operation or decommissioning (MT/month)

S.No.	Information/Checklist confirmation	Yes/No	Details thereof (with approximate quantities/rates, wherever possible) with source of information data
4.1	Spoil, overburden or mine wastes	Yes	The excavation will be stacked properly at site. Part of the excavated soil will be used for backfilling, greenery and landscaping and balance quantity will be sent to the site where land filling is required.
4.2	Municipal waste (domestic and or Residential wastes)	Yes	Municipal solid waste generated during construction phase of the project will be given to the Municipal Corporation. The Solid waste generated during operation phase will be mainly in the form of garbage, paper waste, plastic waste and e-waste from the complex. The garbage will be segregated at each section distinguishing wet and dry waste. Kitchen and food waste will be composted within the complex premises only.
4.3	Hazardous wastes (as per Hazardous Waste Management Rules)	Yes	Used batteries & Waste oil will be given to APPCB approved vendors
4.4	Other industrial process wastes	No	Not Applicable as there will not be any industrial operations in the Complex
4.5	Surplus product	Yes	Surplus raw materials after construction will be given to the suppliers.
4.6	Sewage sludge or other sludge from effluent treatment	Yes	Sewage sludge generated will be stored in HDPE bags and will be used as manure.
4.7	Construction or demolition wastes	Yes	At the time of construction of the proposed project, there will be some recyclable material like Steel, metal,

S.No.	Information/Checklist confirmation	Yes/No	Details thereof (with approximate quantities/rates, wherever possible) with source of information data
			Plastic material, Wood etc., will be sent to reuse / recycle and other wastes like Bricks, cement waste will be used for leveling. The disturbed slopes shall be well stabilized before the onset of the monsoon. Demolition wastes if any will be recycled / disposed as per norms.
4.8	Redundant machinery or equipment	No	No redundant machinery will be kept in the premises after construction of the complex
4.9	Contaminated soils or other materials	No	During the construction phase of the Project, all precautionary measures will be taken to prevent the spillage of oil, paints on to the ground to prevent the contamination of soil.
4.10	Agricultural wastes	No	Not applicable
4.11	Other solid wastes	Yes	E-waste generated will be given Authorized recyclers approved by APPCB.

5. Release of pollutants or any hazardous, toxic or noxious substances to air (Kg/hr)

S.No.	Information/Checklist confirmation	Yes/No	Details thereof (with approximate quantities/rates, wherever possible) with source of information data
5.1	Emissions from combustion of fossil fuels from stationary or mobile sources	Yes	<p>During the operation phase of the complex, emissions will be mainly PM, HC, CO and NO_x due to vehicular traffic and from D.G. sets provided for Backup power supply.</p> <ul style="list-style-type: none"> • All the roads leading to the complex and internal roads will be paved. Hence the dust emissions due to the vehicles will be very low • Good greenbelt will be developed in the complex premises which will further help in mitigating the emission levels. • Stack of adequate height will be provided for effective dispersion of gases into the atmosphere. <p>Hence there will not be any much impact on surrounding environment due to the proposed complex.</p>
5.2	Emissions from production processes	No	Not applicable.
5.3	Emissions from materials handling including storage or transport	No	Not applicable as there will not be any storage or transportation of raw materials
5.4	Emissions from construction activities including plant and equipment	Yes	<p>During construction phase, there will be dust emissions during raw material handling and transportation of raw materials. To mitigate the dust emissions</p> <ul style="list-style-type: none"> • Raw materials will be brought to the site through covered trucks / Trolleys. • Minimum water spraying will be done to mitigate the dust

S.No.	Information/Checklist confirmation	Yes/No	Details thereof (with approximate quantities/rates, wherever possible) with source of information data
			<p>emanation</p> <ul style="list-style-type: none"> • All the materials will be properly covered to prevent the dust emissions during high winds • Due to the operation of cranes during raw material handling <p>Hence there will not be any significant dust emissions due to raw material storage & transportation during construction phase of the project.</p>
5.5	Dust or odours from handling of materials including construction materials, sewage and waste	Yes	Adequate precautionary measures will be taken up to control the Odour from the Construction materials like Paint material & Sewage.
5.6	Emissions from incineration of waste	No	Not applicable
5.7	Emissions from burning of waste in open air (e.g. slash materials, construction debris)	No	There will not be any burning of waste in open air during construction and operation of the complex.
5.8	Emissions from any other sources	No	Nil

6.0 Generation of Noise and Vibration, and Emissions of Light and Heat:

S.No.	Information/Checklist confirmation	Yes/No	Details thereof (with approximate quantities/rates, wherever possible) with source of information data with source of information data
6.1	From operation of equipment e.g. engines, ventilation plant, crushers	Yes	<p>Main source of Noise generation will be DG sets and Motor pumps for supply of water.</p> <p>All the D.G. Sets & Motor pumps will be manufactured in accordance with the noise level standards stipulated by MoEF&CC vide notification dated 14-02-2000.</p> <p>Hence there will not be much increase in Noise levels in the surrounding areas.</p>
6.2	From industrial or similar processes	Yes	<p>The sources of noise generation in the proposed project will be DG sets & motor pumps. All machinery will be manufactured as per OSHA / MOEF&CC guidelines. Ambient noise levels will be in accordance with MOEF&CC notification dated 14-02-2000 i.e. noise levels will be <75 dBA during daytime and < 70 dBA during night time.</p>
6.3	From construction or demolition	Yes	<p>Construction equipment will cause some noise. Ear plugs will be provided to construction workers who work near the noise generating equipment.</p>
6.4	From blasting or piling	No	<p>No such operations are involved.</p>
6.5	From construction or operational traffic	Yes	<p>There will be slight increase in traffic noise during construction and operation of the proposed complex.</p> <ul style="list-style-type: none"> • Speed of the vehicles will be reduced • Greenbelt will be developed <p>By following above control measures noise levels will be minimized.</p>

S.No.	Information/Checklist confirmation	Yes/No	Details thereof (with approximate quantities/rates, wherever possible) with source of information data with source of information data
6.6	From lighting or cooling systems	No	Not applicable
6.7	From any other sources	No	Not applicable

7. Risks of contamination of land or water from releases of pollutants into the ground or into sewers, surface waters, groundwater, coastal waters or the sea:

S.No.	Information/Checklist confirmation	Yes/No	Details thereof (with approximate quantities/rates, wherever possible) with source of information data
7.1	From handling, storage, use or spillage of hazardous materials	Yes	Good housekeeping practices will be followed to prevent any spillage of hazardous materials.
7.2	From discharge of sewage or other effluents to water or the land (expected mode and place of discharge)	No	Wastewater generated during the operation of the complex will be treated in sewage treatment plant and treated wastewater will be utilized for non-potable purposes like Toilet flushing, HVAC & Greenbelt development.
7.3	By deposition of pollutants emitted to air into the land or into water	No	<p>During construction phase, there will be dust emissions during raw material handling and transportation of raw materials. To mitigate the dust emissions</p> <ul style="list-style-type: none"> • Raw materials will be brought to the site through covered trucks / Trolleys. • Minimum water spraying will be done to mitigate the dust emanation • All the materials will be properly covered to prevent the dust emissions during high winds • Due to the operation of cranes during raw material handling <p>Hence there will not be any significant dust emissions due to raw material storage & transportation during construction phase of the project.</p> <p>During the operation phase of the complex, emissions will be mainly PM, NMHC, CO and NOx due to vehicular traffic and from D.G. sets provided for Backup power supply.</p> <ul style="list-style-type: none"> • All the roads leading to the

S.No.	Information/Checklist confirmation	Yes/No	Details thereof (with approximate quantities/rates, wherever possible) with source of information data
			<p>complex and internal roads will be paved. Hence the dust emissions due to the vehicles will be very low</p> <ul style="list-style-type: none">• Good greenbelt will be developed in the complex premises which will further help in mitigating the emission levels.• Stack of adequate height will be provided for effective dispersion of gases into the atmosphere. <p>Hence there will not be any much impact on surrounding environment due to the proposed complex.</p>
7.4	From any other sources	No	Not applicable
7.5	Is there a risk of long term build up of pollutants in the environment from these sources?	No	Not applicable

8. Risk of accidents during construction or operation of the Project, which could affect human health or the environment

S.No.	Information/Checklist confirmation	Yes/No	Details thereof (with approximate quantities/rates, wherever possible) with source of information data
8.1	From explosions, spillages, fires etc from storage, handling, use or production of hazardous substances	Yes	<p>Good housekeeping practices will be maintained during Construction and Operation phase of the complex.</p> <p>All precautionary measures will be taken to prevent the spillage of oil, paint etc.</p> <p>D.G sets will be operated during short supply of electricity. Hence storage of Diesel will be very low. Hence the occurrence of explosion due to the storage of Diesel will be low.</p> <p>All the rules and regulations as per the Fire & Safety Department, Andhra Pradesh will be followed strictly to prevent the Fire accidents in the complex</p>
8.2	From any other causes	Yes	Earthquakes & Natural disasters
8.3	Could the project be affected by natural disasters causing environmental damage (e.g. floods, earthquakes, landslides, cloudburst etc)?	No	Not applicable

9. Factors which should be considered (such as consequential development) which could lead to environmental effects or the potential for cumulative impacts with other existing or planned activities in the locality

S. No.	Information/Checklist confirmation	Yes/No	Details thereof (with approximate quantities/rates, wherever possible) with source of information data
9.1	Lead to development of supporting utilities, ancillary development or development stimulated by the project which could have impact on the environment e.g.: <ul style="list-style-type: none"> • Supporting infrastructure (roads, power supply, waste or waste water treatment, etc.) • housing development • extractive industries • supply industries • other 	No	No such activities are envisaged
9.2	Lead to after-use of the site, which could have an impact on the environment	No	Not applicable
9.3	Set a precedent for later developments	Yes	With the improvement in the socio-economic status of the people in the area, later developments are expected.
9.4	Have cumulative effects due to proximity to other existing or planned projects with similar effects	No	Not applicable

(III) Environmental Sensitivity

S.No.	Areas	Name/ Identity	Aerial distance (within 15 km.) Proposed project location boundary
1	Areas protected under international conventions, national or local legislation for their ecological, landscape, cultural or other related value	Yes	Kondapalli fort – 8 Kms
2	Areas which are important or sensitive for ecological reasons - Wetlands, watercourses or other water bodies, coastal zone, biospheres, mountains, forests	Yes	Peddammdduru RF – 9 kms
			Karlapudi RF – 9.5 Kms
			Kondapalli RF – 6.1 kms
			Navepotavaram RF – 10 Kms
			Kotturu RF - 9
3	Areas used by protected, important or sensitive species of flora or fauna for breeding, nesting, foraging, resting, over wintering, migration	No	Nil within 15 Km radius
			Nil within 15 Km radius
4	Inland, coastal, marine or underground waters	Yes	Underground water available at the site
5	State, National boundaries	----	No inter-state boundary, No international boundary.
6	Routes or facilities used by the public for access to recreation or other tourist, pilgrim areas	Yes	NH # 65 – 5.2 Kms
7	Defence installations	No	Nil within 15 Km radius
8	Densely populated or built-up area	Yes	Project proposed comes under A.P capital Region Development Authority
9	Areas occupied by sensitive man-made land uses (<i>hospitals, schools, places of worship, community facilities</i>)	Yes	Many schools & Hospitals exits
10	Areas containing important, high quality or scarce resources (<i>ground water resources, surface resources, forestry, agriculture, fisheries, tourism, minerals</i>)	Yes	Krishna river – 0.95 Kms and other tributary canals
11	Areas already subjected to pollution or environmental damage. (<i>those where existing legal environmental standards</i>)	---	Not applicable

S.No.	Areas	Name/ Identity	Aerial distance (within 15 km.) Proposed project location boundary
	<i>are exceeded)</i>		
12	Areas susceptible to natural hazard which could cause the project to present environmental problems (<i>earthquakes, subsidence, landslides, erosion, flooding or extreme or adverse climatic conditions</i>)	---	Based on the historical data, the site is not likely to prone to earthquakes, floods, etc.

(IV). PROPOSED TERMS OF REFERENCE FOR EIA STUDIES

As the proposed project is a construction project with built up area is below 1,50,000 Sq.m. No terms of reference for EIA studies is proposed. However we are here with enclosing Environmental Management Plan for your kind reference. The EMP consists the following

- Air emission management
- Effluent treatment & disposal
- Solid waste generation, storage & disposal
- Greenbelt development plan
- Rain water harvesting

"I hereby given undertaking that the data and information given in the application and enclosures are true to the best of my knowledge and belief and I am aware that if any part of the data and information submitted is found to be false or misleading at any stage, the project will be rejected and clearance give, if any to the project will be revoked at our risk and cost.

Date: **11-09-2018**

Place: **Vijayawada**

Yours faithfully,

Dr. RAVI KUMAR P VEMURU
PRESIDENT, APNRT SOCIETY
