

Proceedings of the 326th SEAC Meeting held on 15th March- 2025

Members present in the meeting

| | | |
|----|---------------------------|------------------|
| 1. | Shri Mahesh A.N. | Chairman |
| 2. | Shri Ravi Kumar Yadav, | Member |
| 3. | Dr. Balakrishna S, | Member |
| 4. | Shri Shivappa Naik, | Member |
| 5. | Shri K H Nagaraj, | Member |
| 6. | Shri Sadiq Ahmed, | Member |
| 7. | Dr. Sangamesh Kolliyavar, | Member |
| 8. | Shri Dhruva Kumara B Y, | Member |
| 9. | Dr. C T Puttaswamy | Member Secretary |

326.2.1 Residential and Commercial Development Project at Sadahalli Village, Kasaba Hobli, Devanahalli Taluk, Bengaluru Rural District by M/s. SRK Infra Projects Pvt. Ltd. – Online Proposal No.SIA/KA/INFRA2/520566/2025 (SEIAA 69 CON 2024)

About the Project:

| Sl.No | Particulars | Information Provided by Proponent |
|-------|--|--|
| 1. | Name & Address of the Project Proponent | Mr. Kancharla Chaitanya Krishna C/o M/s. SRK Infra Projects Pvt. Ltd. Vista pixel, 5th floor unit no 9B, Byatarayanapura, Bellary main road, Bengaluru - 560 092. |
| 2. | Name & Location of the Project | Residential and Commercial Development at Sy Nos. 107, 108/1 & 110/1 of Sadahalli Village, Kasaba Hobli, Devanahalli Taluk, Bengaluru Rural District |
| 3. | Type of Development | |
| a. | Residential Apartment/Villas/Row Houses /Vertical Development /Office /IT/ITES/ Mall/ Hotel/ Hospital/ other | Residential row houses and 1 commercial Block Cat 8(a) |
| b. | Residential Township/ Area Development Projects | -- |
| c. | Zoning Classification | As per Master plan 2021 of BIAAPA the proposed project comes under Residential Zone. The land has been converted from Agriculture to Non-Agricultural Residential purpose and also uses permitted for commercial purpose under residential zone of BIAAPA zoning regulation. |
| 4. | New/Expansion/Modification/ Renewal | New |
| 5. | Water Bodies/ Nalas in the vicinity of project site | As per the village map on the western side of the project site there is a nala which is adjacent to the site and a buffer of 9m has been provided as per BIAAPA zoning regulations. |
| 6. | Plot Area (Sqm) | 22,173.76 Sqmt |
| 7. | Built Up area (Sqm) | 60,789.44 Sqmt |
| 8. | FAR <ul style="list-style-type: none">• Permissible• Proposed | 2 1.93 |
| 9. | Building Configuration [Number of Blocks / Towers / Wings etc., with Numbers of Basements and | <ul style="list-style-type: none">• Residential Buildings: (Block 2, 3A, 3B, 3C, 3D, 3E, 3F, 4, 5A, 5B, 6, 7A, 7B, 7C, 7D) with configuration of 2B+GF+3UF |

| | | |
|-----|--|---|
| | Upper Floors] | • Commercial Building: Block 1 (2B+GF+3UF) |
| 10. | Number of units/plots in case of Construction / Residential Township / Area Development Projects | The proposed project comprises of 100 Nos. of residential units in 15 Nos. of Buildings and 1 Commercial Building |
| 11. | Height Clearance | Maximum height is 12 m |
| 12. | Project Cost (Rs. In Crores) | INR 131 Crores |
| 13. | Quantity excavated earth & its management | Total Excavated Earth – 13,023 Cum • Back filling in foundation – 4,558 Cum (35.0 %) • For landscaping – 3,907 Cum (30.0 %) • For roads & walkways – 1,302 Cum (10.0 %) • For site formation – 1,302 Cum (10.0 %) • Low laying level – 1,953.441 Cum (15.0%) |
| 14. | Details of Land Use (Sqm) | |
| a. | Ground Coverage Area | 8,653.46Sqm |
| b. | Kharab Land | -- |
| c. | Total Green belt on Mother Earth | 7,153.05Sqm |
| d. | Internal Roads | 3,851.65Sqm |
| e. | Paved area | -- |
| f. | Others Specify | Civic Amenities – 1,109 Sqmt Visitors parking area – 1,109 Sqmt Road widening area – 297.6 Sqmt |
| g. | Parks and Open space in case of Residential Township/ Area Development Projects | -- |
| h. | Total | 22,173.76Sqm |
| 15. | Water | |
| I. | Construction Phase | |
| a. | Source of water | Mobile STP tertiary treated water will be used for construction. |
| b. | Quantity of water for Construction in KLD | 11 KLD |
| c. | Quantity of water for Domestic Purpose in KLD | 2 KLD |
| d. | Waste water generation in KLD | 1.8 KLD |
| e. | Treatment facility proposed and scheme of disposal of treated water | Sewage generated from construction site will be collected in collection tank & will be lifted to nearby sewage treatment plant for further treatment. |
| II. | Operational Phase | |
| a. | Total Requirement of Water in KLD | Fresh 67 KLD |
| | | Recycled 34KLD |
| | | Total 101 KLD |
| b. | Source of water | Borewells |
| c. | Waste water generation in KLD | 91 KLD |
| d. | STP capacity & Area required | 100 KLD Area required: 100Sqm |
| e. | Technology employed for Treatment | SBR Technology |
| f. | Scheme of disposal of excess treated water if any | Total treated water of 82 KLD; 34 KLD will be used for flushing, 48 KLD will be used for landscaping. |
| 16. | Infrastructure for Rain water harvesting | |

| | | |
|-----|---|---|
| a. | Capacity of sump tank to store Roof run off | 60 Cum |
| b. | No's of Ground water recharge pits | Recharge pits of 21 Nos. |
| 17. | Storm water management plan | The roof runoff will be collected in two days roof rain water collection tank of capacity 60 Cum and will be used for secondary purposes after pre-treatment. The run-off from the softscape will be routed to recharge pits of 21 Nos.to recharge the ground water. |
| 18. | Waste Management | |
| I. | Construction Phase | |
| a. | Quantity of Construction & Demolition waste and its management. | The project is a greenfield project and hence there are no any demolition work involved;however, the construction has not yet started at site. During construction the generated construction debris of 608 Cum will be reused within the site. |
| b. | Quantity of Solid waste generation and mode of Disposal as per norms | Estimated to be 13 kg/day(5kg is organic and 8kg is inorganic) the organic solid waste generated will be collected manually and will be handed over to piggery feeding or will be processed within the site by proposing vermicomposting. The inorganic waste will be given to recyclers. |
| II. | Operational Phase | |
| a. | Quantity of Biodegradable waste generation and mode of Disposal as per norms | Quantity:0.05 MT /day Mode of Disposal: Biodegradable wastes will be segregated at the source and will be Processed in Organic Waste Converter within Project site and used as manure for landscaping Capacity of facility:50kg/day Area required: (for storage and processing): 40 m ² |
| b. | Quantity of Non-Biodegradable waste generation and mode of Disposal as per norms | Quantity: 0.076 MT/day Mode of Disposal: Non-biodegradable Wastes will be given to the waste recyclers. Area required: 20 m ² |
| c. | Quantity of Hazardous Waste generation and mode of Disposal as per norms | Quantity:0.486 L/hr Mode of Disposal: Hazardous wastes like waste oil from DG sets, used batteries etc. will be handed over to the authorized hazardous waste recyclers. Area required: 20 m ² |
| d. | Quantity of E waste generation and mode of Disposal as per norms | E-Wastes will be collected separately & it will be handed over to authorized E-waste recyclers for further processing. Area required: 20 m ² |
| 19. | POWER | |
| a. | Total Power Requirement - Operational Phase | 1080kW |
| b. | Numbers of DG set and capacity in KVA for Standby Power Supply | 500 kVA X 2 Nos. |
| c. | Details of Fuel used for DG Set | 209.52 L/hr |
| d. | Energy conservation plan and Percentage of savings including plan for utilization of solar energy | <ul style="list-style-type: none"> ➤ Solar Heater, Solar Lighting ➤ Cu wound transformer ➤ LED |

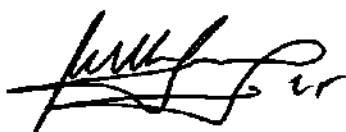

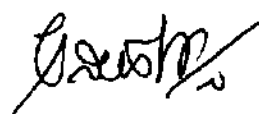

| | | |
|-----|---|--|
| | as per ECBC 2007 | Energy Savings: 10% |
| 20. | PARKING | |
| a. | Parking Requirement as per norms (ECS) | 100 ECS |
| b. | Internal Road width (RoW) | 8 m |
| 21. | CER Activities | <ul style="list-style-type: none"> • Infrastructure creation for the government school located near to the project site – Tables, chairs, RO plant, toilets, smart classrooms, solar lights and rainwater harvesting facility • Providing required necessary equipment for the government hospital. • Identifying and recharging of community bore wells in surrounding area. |
| 22. | EMP (Details and capital cost & recurring cost) | <u>During Construction:</u> Capital investment – 9.4 lakhs Recurring Cost – 10.4lakhs/ annum <u>During Operation:</u> Capital investment – 43 lakhs Recurring Cost – 16.6 lakhs/ annum |

The proposal is for construction of residential & commercial building in an area earmarked for residential use as pr BIAAPA zoning regulations.

The Committee during appraisal sought details regarding drain & foot kharab as per village map, source of water during operational phase and provisions made for harvesting rainwater in the proposed area. The Proponent informed the Committee that for the primary drain in west, 9mtr buffer from edge of drain is proposed and the foot kharab inside the site area is rerouted as per DC Order dated 19.08.2019 and provided free public access. Regarding the source of water during operation that Proponent informed that they have conducted hydrogeology study by CGWA accredited consultant M Muthukannan, informing that the total water requirement is 101 KLD out of which about 67 KLD of fresh water requirement would be met from 4 proposed borewells in the proposed project area, only after obtaining NoC from KGWA for digging and extraction of ground water. In addition, they have proposed sufficient rainwater harvesting structures to utilize the rainfall within the site area justifying that drawing 67 KLD of ground water will not have significant impact on ground water. Regarding harvesting rainwater, the Proponent has informed the Committee that they have proposed rainwater storage structures of 60Cum for runoff from rooftop, hardscape and landscape areas along with 21 recharge pits within the site area. Further the Proponent requested the Committee to consider 2 number of 500KVA DGs against single 500KVA DG in the proposed project. The Committee noted the details.

Further the Committee informed the Proponent to incorporate tertiary treatment facility to treat waste water to urban re-use standards, energy efficient plumbing system for individual units to conserve water, to utilize minimum of 50% of roof area for solar power generation, to use sustainable building materials in the proposed project and to harvest excess rainwater in the project site, to which the Proponent agreed.

The Proponent agreed to grow 280 trees in the project site area. The Proponent has collected baseline data of air, water, soil and noise and informed that all were within the permissible limits. The Proponent committed to take precautionary measures during and after construction to maintain the environmental parameters within permissible limits in the proposed project and agreed to comply with

the ECBC and NBC guidelines for the proposed construction and adhere to the by-laws stipulated by the governing authority for buffers and setbacks.

The Committee noted that the baseline parameters were found to be within permissible limits and informed the Proponent to leave buffers/setbacks as per zoning regulations and to harvest maximum rainwater in the proposed project area.

The Committee after appraisal decided to recommend the proposal to SEIAA for issue of EC with following considerations,

1. The source of water during operation phase should be as specified in the CGWA hydrogeology report and to provide tertiary treatment to the wastewater to bring it to urban re-use standards. Provide the additional final filtration & collection tank to facilitate frequent cleaning the tank, in order to avoid the deposition of residual & colloidal organic matters in treated water.
2. To utilize minimum of 50% of roof area for solar power generation.
3. To provide minimum 20% of total parking with e-vehicle charging facility.
4. To provide rainwater storage structure of 60 cum and 21 recharge pits.
5. To grow 280 trees in the early stage before taking up of construction.
6. To carry out community recharge of bore wells in the vicinity of the site.
7. To construct lead of drains till the nearest natural drains/water body for handling excess water.
8. To incorporate catalytic converter for DG sets with dual fuel option.
9. To install energy efficient plumbing system for individual units to conserve water,
10. To provide bell mouth entry/exist from the approach road
11. To consider the CER activity submitted by proponent with a recommendation to write to the concerned recipient about the CER activity.

Action: Member Secretary, SEAC to forward the proposal to SEIAA for further necessary action.

326.2.2 Validity Extension of Building Stone Quarry Project at Chikkanayakanahalli Village, Malur Taluk, Kolar District (4-00 Acres) by Sri M. Venkatesh – Online Proposal No.SIA/KA/MIN/516183/2025 (SEIAA 358 MIN 2019)

| | 3 rd | Avenue plantation either side of the approach road near Quarry site & Repair of road with drainages |
| | 4 th | Conducting E-waste drive campaigns in GHPS at Chikkanayakanahalli Village, Malur Taluk, Kolar District |
| | 5 th | Health camp to the GHPS school at Chikkanayakanahalli Village, Malur Taluk, Kolar District |
| 10 | Forest NoC | 26.06.2014 |
| 11 | Audit Report | 25.10.2024 |
| 12 | AQP | 29.11.2024 |

The Committee initially sought clarification regarding the proposed activity in the default ESZ of Kamasandra WLS. The Proponent informed the Committee that, as per Hon'ble SC directions in WP 202 of 1995 dated 03.06.2022, the Hon'ble SC had directed the following,

"44....(b) In the event, however, the ESZ is already prescribed as per law that goes beyond one kilometre buffer zone, the wider margin as ESZ shall prevail. If such wider buffer zone beyond one kilometre is proposed under any statutory instrument for a particular national park or wildlife sanctuary awaiting final decision in that regard, then till such final decision is taken, the ESZ covering the area beyond one kilometre as proposed shall be maintained.

...(h) In respect of sanctuaries or national parks for which the proposal of a State or Union Territory has not been given, the 10 kilometres buffer zone as ESZ, as indicated in the order passed by this Court on 4th December 2006 in the case of Goa Foundation (supra) and also contained in the Guidelines of 9th February 2011 shall be implemented. Within that area, the entire set of restrictions concerning an ESZ shall operate till a final decision in that regard is arrived at."

With reference to the Hon'ble SC directions, Proponent in the present case informed that the proposal of the State is sent to MoEF&CC on 01.03.2024 for issuing draft notification, wherein it is informed that the Eco-Sensitive Zone around the Kamasandra Wildlife Sanctuary extends from 1 km to 2.6 km and the default 10km buffer zone as ESZ do not apply to the current project area as the proposal of the State is sent to MoEF&CC on 01.03.2024 and as per the co-ordinates provided in the draft ESZ notification of Kamasandra WLS, the proposed project area is at a nearest distance of 3.9 Km outside ESZ of Kamasandra WLS and at a distance of 5.2 km from Kamasandra WLS. Further, the Proponent requested the Committee to consider the proposal in similar grounds of M/S. MARWA MINING COMPANY with file number SEIAA 655 MIN 2021 for grant of EC. The Committee noted the details and appraised the project with a condition to abide by the final outcome of Hon'ble SC directions in WP 202 of 1995 and final notification of MoEF&CC regarding Kamasandra WLS, for which the Proponent agreed.

The proposal is for extension of validity for the EC issued earlier by SEIAA on 03.07.2019 for a period of 5 years. The Proponent has submitted audit report till 2023-24 certified by DMG vide letter date 25.10.2024 and a copy of recently issued self certified compliance report regarding complying with all the EC conditions and requested the Committee to issue validity extension.

The Committee as per the approved quarry plan considering the proved mineable reserve of 15,35,885 Tonns(including waste) estimated the life of mine to be 9 years by considering maximum annual production of 1,73,576 tonns/annum (including waste).

The Committee as per the provision in MOEF&CC OM dated 13.12.2022, after discussion decided to recommend the proposal to SEIAA to grant extension of validity of EC for 30 years from 03.07.2019 or till the validity of lease which ever is earlier andwith all other conditions remaining same as per the EC issued by SEIAA on 03.07.2019, with following consideration,

1. To grow trees all along the approach road & buffer zone during the first year of operation.
2. To carry out regular health checkup for the workers in the nearby Hospital.
3. To provide metal sheet berricade to an height of minimum 3 mtrs around the working area.
4. To take necessary measures to arrest noise and vibration from the quarry area.
5. To maintain buffer all round the lease area.
6. EC is subject to the final out come of Hon'ble SC directions in WP 202 of 1995 and final notification of MoEF&CC regarding Kamasandra WLS.
7. To maintain buffer area all round the lease area as per the DMG approved mining plan.

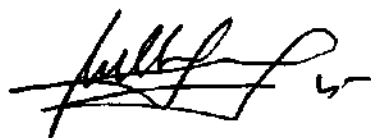

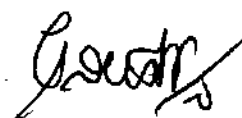

Action: Member Secretary, SEAC to forward the proposal to SEIAA for further necessary action.

326.2.3 Validity Extension of Building Stone Quarry Project at Bandarlhalli Village, Malur Taluk, Kolar District (8-00 Acres) by Sri M. Srinivas – Online Proposal No.SIA/KA/MIN/515353/2025 (SEIAA 360 MIN 2019)

| | AQP | 29.11.2024 |

The Committee initially sought clarification regarding the proposed activity in the default ESZ of Kamasandra WLS. The Proponent informed the Committee that, as per Hon'ble SC directions in WP 202 of 1995 dated 03.06.2022, the Hon'ble SC had directed the following,

"44....(b) In the event, however, the ESZ is already prescribed as per law that goes beyond one kilometre buffer zone, the wider margin as ESZ shall prevail. If such wider buffer zone beyond one kilometre is proposed under any statutory instrument for a particular national park or wildlife sanctuary awaiting final decision in that regard, then till such final decision is taken, the ESZ covering the area beyond one kilometre as proposed shall be maintained.

...(h) In respect of sanctuaries or national parks for which the proposal of a State or Union Territory has not been given, the 10 kilometres buffer zone as ESZ, as indicated in the order passed by this Court on 4th December 2006 in the case of Goa Foundation (supra) and also contained in the Guidelines of 9th February 2011 shall be implemented. Within that area, the entire set of restrictions concerning an ESZ shall operate till a final decision in that regard is arrived at."

With reference to the Hon'ble SC directions, Proponent in the present case informed that the proposal of the State is sent to MoEF&CC on 01.03.2024 for issuing draft notification, wherein it is informed that the Eco-Sensitive Zone around the Kamasandra Wildlife Sanctuary extends from 1 km to 2.6 km and the default 10km buffer zone as ESZ do not apply to the current project area as the proposal of the State is sent to MoEF&CC on 01.03.2024 and as per the co-ordinates provided in the draft ESZ notification of Kamasandra WLS, the proposed project area is at a nearest distance of 5.1 Km out side ESZ of Kamasandra WLS and at a distance of 6.2 km from Kamasandra WLS. Further, the Proponent requested the Committee to consider the proposal in similar grounds of M/S. MARWA MINING COMPANY with file number SEIAA 655 MIN 2021 for grant of EC. The Committee noted the details and appraised the project with a condition to abide by the final outcome of Hon'ble SC directions in WP 202 of 1995 and final notification of MoEF&CC regarding Kamasandra WLS, for which the Proponent agreed.

The proposal is for extension of validity for the EC issued earlier by SEIAA on 22.08.2019 for a period of 5 years. The Proponent has submitted audit report till 2023-24 certified by DMG vide letter

date 25.10.2024 and a copy of recently issued self certified compliance report regarding complying with all the EC conditions and requested the Committee to issue validity extension.

The Committee as per the approved quarry plan considering the proved mineable reserve of 15,73,000 Tonns(including waste) estimated the life of mine to be 10 years by considering maximum annual production of 3,21,902 tonns/annum (including waste).

The Committee as per the provision in MOEF&CC OM dated 13.12.2022, after discussion decided to recommend the proposal to SEIAA to grant extension of validity of EC for 30years from 22.08.2019 or till the validity of lease which ever is earlier andwith all other conditions remaining same as per the EC issued by SEIAA on 25.10.2024, with following consideration,

1. To grow trees all along the approach road & buffer zone during the first year of operation.
2. To carry out regular health checkup for the workers in the nearby Hospital.
3. To provide metal sheet berricade to an height of minimum 3 mtrs around the working area.
4. To take necessary measures to arrest noise and vibration from the quarry area.
5. To maintain buffer all round the lease area.
6. EC is subject to the final out come of Hon'ble SC directions in WP 202 of 1995 and final notification of MoEF&CC regarding Kamasandra WLS.
7. To maintain buffer area all round the lease area as per the DMG approved mining plan.

Action: Member Secretary, SEAC to forward the proposal to SEIAA for further necessary action.

326.2.4 Validity Extension of Building Stone Quarry Project at Chikkanayakanahalli Village, Malur Taluk, Kolar District (4-00 Acres) by Sri. Chowda Reddy - Online Proposal No.SIA/KA/MIN/516760/2025 (SEIAA 403 MIN 2019)

| CER ACTIVITIES:- | | |
|------------------|--|------------|
| Year | CER | |
| 1 st | Providing solar power panels to the GHPS at Chikkanayakanahalli Village, Malur Taluk, Kolar District | |
| 2 nd | Rain water harvesting pits to Chikkanayakanahalli Village, Malur Taluk, Kolar District | |
| 3 rd | Avenue plantation either side of the approach road near Quarry site & Repair of road with drainages | |
| 4 th | Conducting E-waste drive campaigns in GHPS at Chikkanayakanahalli Village, Malur Taluk, Kolar District | |
| 5 th | Health camp to the GHPS school at Chikkanayakanahalli Village, Malur Taluk, Kolar District | |
| 10 | Forest NoC | 02.02.2016 |
| 11 | Audit Report | 03.12.2024 |
| 12 | Cluser Certificate | 26.12.2024 |

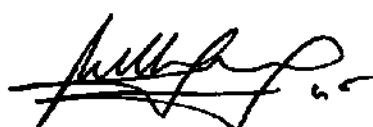

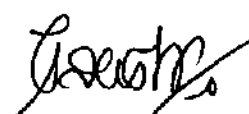

The Committee initially sought clarification regarding the proposed activity in the default ESZ of Kamasandra WLS. The Proponent informed the Committee that, as per Hon'ble SC directions in WP 202 of 1995 dated 03.06.2022, the Hon'ble SC had directed the following,

"44....(b) In the event, however, the ESZ is already prescribed as per law that goes beyond one kilometre buffer zone, the wider margin as ESZ shall prevail. If such wider buffer zone beyond one kilometre is proposed under any statutory instrument for a particular national park or wildlife sanctuary awaiting final decision in that regard, then till such final decision is taken, the ESZ covering the area beyond one kilometre as proposed shall be maintained.

...(h) In respect of sanctuaries or national parks for which the proposal of a State or Union Territory has not been given, the 10 kilometres buffer zone as ESZ, as indicated in the order passed by this Court on 4th December 2006 in the case of Goa Foundation (supra) and also contained in the Guidelines of 9th February 2011 shall be implemented. Within that area, the entire set of restrictions concerning an ESZ shall operate till a final decision in that regard is arrived at."

With reference to the Hon'ble SC directions, Proponent in the present case informed that the proposal of the State is sent to MoEF&CC on 01.03.2024 for issuing draft notification, wherein it is informed that the Eco-Sensitive Zone around the Kamasandra Wildlife Sanctuary extends from 1 km to 2.6 km and the default 10km buffer zone as ESZ do not apply to the current project area as the proposal of the State is sent to MoEF&CC on 01.03.2024 and as per the co-ordinates provided in the draft ESZ notification of Kamasandra WLS, the proposed project area is at a nearest distance of 4.46 Km outside ESZ of Kamasandra WLS and at a distance of 5.57 km from Kamasandra WLS. Further, the Proponent requested the Committee to consider the proposal in similar grounds of M/S. MARWA MINING COMPANY with file number SEIAA 655 MIN 2021 for grant of EC. The Committee noted the details and appraised the project with a condition to abide by the final outcome of Hon'ble SC directions in WP 202 of 1995 and final notification of MoEF&CC regarding Kamasandra WLS, for which the Proponent agreed.

The proposal is for extension of validity for the EC issued earlier by SEIAA on 08.08.2019 for a period of 5 years. The Proponent has submitted audit report till 2023-24 certified by DMG vide letter date 03.12.2024 and a copy of recently issued self certified compliance report regarding complying with all the EC conditions and requested the Committee to issue validity extension.

The Committee as per the approved quarry plan considering the proved mineable reserve of 6,11,943 Tonns (including waste) estimated the life of mine to be 6 years by considering maximum annual production of 1,07,575 tonns/annum (including waste).

The Committee as per the provision in MOEF&CC OM dated 13.12.2022, after discussion decided to recommend the proposal to SEIAA to grant extension of validity of EC for 30 years from 08.08.2019 or till the validity of lease which ever is earlier andwith all other conditions remaining same as per the EC issued by SEIAA on 08.08.2019, with following consideration,

1. To grow trees all along the approach road & buffer zone during the first year of operation.
2. To carry out regular health checkup for the workers in the nearby Hospital.
3. To provide metal sheet berricade to an height of minimum 3 mtrs around the working area.
4. To take necessary measures to arrest noise and vibration from the quarry area.
5. To maintain buffer all round the lease area.
6. EC is subject to the final out come of Hon'ble SC directions in WP 202 of 1995 and final notification of MoEF&CC regarding Kamasandra WLS.
7. To maintain buffer area all round the lease area as per the DMG approved mining plan.

Action: Member Secretary, SEAC to forward the proposal to SEIAA for further necessary action.

326.2.5 Residential Apartment and Club House Project at Choodasandra Village, SarjapuraHobli, Anekal Taluk, Bengaluru Urban District by M/s. GRC Infra – Online Proposal No.SIA/KA/INFRA2/518940/2025 (SEIAA 61 CON 2025)

About the Project:

| | c. | Internal Road width (RoW) | 9.3 m wide MJ nagar Road | | |
| 21 | CER Activities | | Plantation and providing lightings around Choodasandra lake | | |
| 22 | EMP (Details and capital cost & recurring cost)with detail cost of EMP. | | Construction Phase: Capital Investment – 15.00Lakh Construction – 76.65 Lakh Operation Phase: Capital investment – 320.8 Lakh Operation Investment – 23.96Lakh/annum | | |

The Committee initially sought details regarding present site condition as per KML. Proponent informed the Committee that there is old building which will be demolished and debris of about 5tons to be utilized within the site area and no construction work has been started by Proponent and the Committee noted the clarification.

The proposal is for construction of residential apartment project in an area earmarked for industrial use as per BDA of RMP 2015, for which Proponent informed that they have obtained conversion of land to residential use from DC.

The Committee during appraisal sought details regarding water body as per village map, source of water during operational phase and provisions made for harvesting rainwater in the proposed area. The Proponent informed the Committee that the water body in North West is at a distance of 39.6mtr to the project site area and outside the buffer zone. Regarding source of water during operation they have conducted hydrogeology study by CGWA accredited consultant Dr. K R Sooryanarayan,

informing that the total water requirement is 105 KLD out of which about 70 KLD of fresh water requirement would be met from 1 existing borewell and 2 proposed borewells in the proposed project area, only after obtaining NoC from KGWA for digging & extraction of ground water. In addition, they have proposed sufficient rainwater harvesting structures to utilize the rainfall within the site area justifying that drawing 70 KLD of ground water will not have adverse impact on ground water. Regarding harvesting rainwater, the Proponent informed the Committee that they have proposed rainwater storage structures of 400 cum for runoff from rooftop and 80 cum tank for runoff from hardscape and landscape areas along with 16 recharge pits within the site area. The Committee noted the same.

Further the Committee informed the Proponent to incorporate tertiary treatment facility to treat waste water to urban re-use standards, energy efficient plumbing system for individual units to conserve water, to utilize minimum of 50% of roof area for solar power generation, to use sustainable building materials in the proposed project and to harvest excess rainwater in the project site, to which the Proponent agreed.

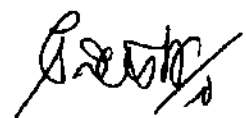

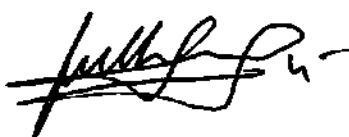

The Proponent agreed to grow 140 trees in the project site area. The Proponent has collected baseline data of air, water, soil and noise and informed that all were within the permissible limits. The Proponent committed to take precautionary measures during and after construction to maintain the environmental parameters within permissible limits in the proposed project and agreed to comply with the ECBC and NBC guidelines for the proposed construction and adhere to the by-laws stipulated by the governing authority for buffers and setbacks.

The Committee noted that the baseline parameters were found to be within permissible limits and informed the Proponent to leave buffers/setbacks as per zoning regulations and to harvest maximum rainwater in the proposed project area.

The Committee after appraisal decided to recommend the proposal to SEIAA for issue of EC with following considerations,

1. The source of water during operation phase should be as specified in the CGWA hydrogeology report and to provide tertiary treatment to the wastewater to bring it to urban re-use standards. Provide the additional final filtration & collection tank to facilitate frequent cleaning the tank, in order to avoid the deposition of residual & colloidal organic matters in treated water.
2. To utilize minimum of 50% of roof area for solar power generation.
3. To provide minimum 20% of total parking with e-vehicle charging facility.
4. To provide rainwater storage structure of 400 cum, 80 cum and 16 recharge pits.
5. To grow 140 trees in the early stage before taking up of construction.
6. To carry out community recharge of bore wells in the vicinity of the site.
7. To construct lead of drains till the nearest natural drains/water body for handling excess water.
8. To incorporate catalytic converter for DG sets with dual fuel option.
9. To install energy efficient plumbing system for individual units to conserve water,
10. To incorporate additional dust control measures during construction.
11. To provide bell mouth entry/exist from the approach road
12. Excess treated water should be utilized within the site area.
13. To consider the CER activity submitted by proponent with a recommendation to write to the concerned recipient about the CER activity.

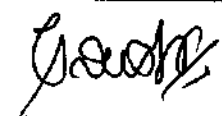

Action: Member Secretary, SEAC to forward the proposal to SEIAA for further necessary action.

326.2.6 Residential Apartment with Amenities Building area project at Shree Opp Government Hospital, Vartur Hobli, Bangalore East Taluk, Bengaluru Urban District by M/s. Disha Habitat Shelter LLP (Represented by its designated Partner) M/r. Raja Sekhar Kamisetty – Online Proposal No.SIA/KA/INFRA2/517911/2025 (SEIAA 62 CON 2025)

| 22 | EMP (Details and capital cost & recurring cost) | | Construction phase: 84.0 Lakhs Operation phase: 335.0 Lakhs | |

The Committee initially sought details regarding present site condition as per KML. Proponent informed the Committee that the proposed area is a vacant land with a temporary marketing office & security shed which will be removed and no construction work has been started by Proponent and the Committee noted the clarification.

The proposal is for construction of a residential apartment project in an area demarcated as residential use as per RMP of BDA 2015.

The Committee during appraisal sought details regarding cart track as per village map and provisions made for harvesting rainwater in the proposed area. The Proponent informed the Committee that the cart track in south is the existing public road and approach road to the project site area. Regarding harvesting rainwater, the Proponent informed the Committee that they have proposed rainwater storage structure of 70 cum capacity for runoff from rooftop, hardscape and landscape areas and 10 recharge pits within the site area. The Committee noted the same.

Further the Committee informed the Proponent to incorporate tertiary treatment facility to treat waste water to urban re-use standards, to install aerators for individual units for conservation of water, to utilize minimum of 50% of roof area for solar power generation, to use sustainable building materials in the proposed project and to harvest excess rainwater in the project site, to which the Proponent agreed.

The Proponent agreed to grow 100 trees in the project site area. The Proponent has collected baseline data of air, water, soil and noise and informed that all were within the permissible limits. The Proponent committed to take precautionary measures during and after construction to maintain the environmental parameters within permissible limits in the proposed project and agreed to comply with the ECBC and NBC guidelines for the proposed construction and adhere to the by-laws stipulated by the governing authority for buffers and setbacks.

The Committee noted that the baseline parameters were found to be within permissible limits and informed the Proponent to leave buffers/setbacks as per zoning regulations and to harvest maximum rainwater in the proposed project area.

The Committee after appraisal decided to recommend the proposal to SEIAA for issue of EC with following consideration,

1. To provide tertiary treatment to the waste water to bring it to potable standards. Provide the additional final filtration & collection tank to facilitate frequent cleaning the tank, in order to avoid the deposition of residual & colloidal organic matters in treated water.
2. To utilize minimum of 50% of roof area for solar power generation.
3. To provide minimum 20% of total parking with e-vehicle charging facility.
4. To provide recharge tank of capacity 70 cum & 10 recharge pits.
5. To grow 100 trees in the early stage before taking up of construction.
6. To provide bell mouth entry and exit in the proposed project.
7. To incorporate catalytic converter for DG sets with dual fuel option.
8. To carry out community recharge of bore wells in the vicinity of the site.
9. To construct lead of drains till the nearest natural drains/water body for handling excess water.
10. To consider the CER activity submitted by proponent with a recommendation to write to the concerned recipient about the CER activity.
11. To install energy efficient plumbing system for individual units to conserve water,

Action: Member Secretary, SEAC to forward the proposal to SEIAA for further necessary action

326.2.7 Validity Extension of Building Stone Quarry Project at Makarahalli Village, Malur Taluk & Kolar District (4-20 Acres) by Smt. Kanthamma- Online Proposal No.SIA/KA/MIN/515316/2025 (SEIAA 432 MIN 2019)

| 12 | Audit Report | 03.12.2024 |
| 13 | AQP | 30.11.2024 |

The Committee initially sought clarification regarding the proposed activity in the default ESZ of Kamasandra WLS. The Proponent informed the Committee that, as per Hon'ble SC directions in WP 202 of 1995 dated 03.06.2022, the Hon'ble SC had directed the following,

"44....(b) In the event, however, the ESZ is already prescribed as per law that goes beyond one kilometre buffer zone, the wider margin as ESZ shall prevail. If such wider buffer zone beyond one kilometre is proposed under any statutory instrument for a particular national park or wildlife sanctuary awaiting final decision in that regard, then till such final decision is taken, the ESZ covering the area beyond one kilometre as proposed shall be maintained.

... (h) In respect of sanctuaries or national parks for which the proposal of a State or Union Territory has not been given, the 10 kilometres buffer zone as ESZ, as indicated in the order passed by this Court on 4th December 2006 in the case of Goa Foundation (supra) and also contained in the Guidelines of 9th February 2011 shall be implemented. Within that area, the entire set of restrictions concerning an ESZ shall operate till a final decision in that regard is arrived at."

With reference to the Hon'ble SC directions, Proponent in the present case informed that the proposal of the State is sent to MoEF&CC on 01.03.2024 for issuing draft notification, wherein it is informed that the Eco-Sensitive Zone around the Kamasandra Wildlife Sanctuary extends from 1 km to 2.6 km and the default 10km buffer zone as ESZ do not apply to the current project area as the proposal of the State is sent to MoEF&CC on 01.03.2024 and as per the co-ordinates provided in the draft ESZ notification of Kamasandra WLS, the proposed project area is at a nearest distance of 9.07 Km outside ESZ of Kamasandra WLS and at a distance of 10.18 km from Kamasandra WLS. Further, the Proponent requested the Committee to consider the proposal in similar grounds of M/S. MARWA MINING COMPANY with file number SEIAA 655 MIN 2021 for grant of EC. The Committee noted the details and appraised the project with a condition to abide by the final outcome of Hon'ble SC

directions in WP 202 of 1995 and final notification of MoEF&CC regarding Kamasandra WLS, for which the Proponent agreed.

The proposal is for extension of validity for the EC issued earlier by SEIAA on 08.08.2019 for a period of 5 years. The Proponent has submitted audit report till 2023-24 certified by DMG vide letter date 03.12.2024 and a copy of recently issued self certified compliance report regarding complying with all the EC conditions and requested the Committee to issue validity extension.

The Committee as per the approved quarry plan considering the proved mineable reserve of 14,07,998 Tonns (including waste) estimated the life of mine to 8 years by considering maximum annual production of 1,93,922 tonns/annum (including waste).

The Committee as per the provision in MOEF&CC OM dated 13.12.2022, after discussion decided to recommend the proposal to SEIAA to grant extension of validity of EC for 30 years from 08.08.2019 or till the validity of lease which ever is earlier andwith all other conditions remaining same as per the EC issued by SEIAA on 08.08.2019, with following consideration,

1. To grow trees all along the approach road & buffer zone during the first year of operation.
2. To carry out regular health checkup for the workers in the nearby Hospital.
3. To provide metal sheet berricade to an height of minimum 3 mtrs around the working area.
4. To take necessary measures to arrest noise and vibration from the quarry area.
5. To maintain buffer all round the lease area.
6. EC is subject to the final out come of Hon'ble SC directions in WP 202 of 1995 and final notification of MoEF&CC regarding Kamasandra WLS.
7. To maintain buffer area all round the lease area as per the DMG approved mining plan.

Action: Member Secretary, SEAC to forward the proposal to SEIAA for further necessary action.

326.2.8 Validity Extension of Building Stone Quarry Project at Animittanahalli Village, Malur Taluk, Kolar District (3-00 Acres) by Sri. Chalapathi R – Online Proposal No.SIA/KA/MIN/516172/2025 (SEIAA 460 MIN 2019)

The Committee initially sought clarification regarding the proposed activity in the default ESZ of Kamasandra WLS. The Proponent informed the Committee that, as per Hon'ble SC directions in WP 202 of 1995 dated 03.06.2022, the Hon'ble SC had directed the following,

"44....(b) In the event, however, the ESZ is already prescribed as per law that goes beyond one kilometre buffer zone, the wider margin as ESZ shall prevail. If such wider buffer zone beyond one kilometre is proposed under any statutory instrument for a particular national park or wildlife sanctuary awaiting final decision in that regard, then till such final decision is taken, the ESZ covering the area beyond one kilometre as proposed shall be maintained.

...(h) In respect of sanctuaries or national parks for which the proposal of a State or Union Territory has not been given, the 10 kilometres buffer zone as ESZ, as indicated in the order passed by this Court on 4th December 2006 in the case of Goa Foundation (supra) and also contained in the Guidelines of 9th February 2011 shall be implemented. Within that area, the entire set of restrictions concerning an ESZ shall operate till a final decision in that regard is arrived at."

With reference to the Hon'ble SC directions, Proponent in the present case informed that the proposal of the State is sent to MoEF&CC on 01.03.2024 for issuing draft notification, wherein it is informed that the Eco-Sensitive Zone around the Kamasandra Wildlife Sanctuary extends from 1 km to 2.6 km and the default 10km buffer zone as ESZ do not apply to the current project area as the proposal of the State is sent to MoEF&CC on 01.03.2024 and as per the co-ordinates provided in the draft ESZ notification of Kamasandra WLS, the proposed project area is at a nearest distance of 5.03 Km outside ESZ of Kamasandra WLS and at a distance of 6.13 km from Kamasandra WLS. Further, the Proponent requested the Committee to consider the proposal in similar grounds of M/S. MARWA MINING COMPANY with file number SEIAA 655 MIN 2021 for grant of EC. The Committee noted the details and appraised the project with a condition to abide by the final outcome of Hon'ble SC directions in WP 202 of 1995 and final notification of MoEF&CC regarding Kamasandra WLS, for which the Proponent agreed.

The proposal is for extension of validity for the EC issued earlier by SEIAA on 08.08.2019 for a period of 5 years. The Proponent has submitted audit report till 2023-24 certified by DMG vide letter date 09.10.2024 and a copy of recently issued self-certified compliance report regarding complying with all the EC conditions and requested the Committee to issue validity extension. Proponent has obtained transfer of EC from SEIAA on 15.10.2022.

The Committee as per the approved quarry plan considering the proved mineable reserve of 8,90,165 Tonnes (including waste) estimated the life of mine to be 11 years by considering maximum annual production of 81,648 tonnes/annum (including waste).

The Committee as per the provision in MOEF&CC OM dated 13.12.2022, after discussion decided to recommend the proposal to SEIAA to grant extension of validity of EC for 30 years from

08.08.2019 or till the validity of lease which ever is earlier andwith all other conditions remaining same as per the EC issued by SEIAA on 08.08.2019, with following consideration,

1. To grow trees all along the approach road & buffer zone during the first year of operation.
2. To carry out regular health checkup for the workers in the nearby Hospital.
3. To provide metal sheet berricade to an height of minimum 3 mtrs around the working area.
4. To take necessary measures to arrest noise and vibration from the quarry area.
5. To maintain buffer all round the lease area.
6. EC is subject to the final out come of Hon'ble SC directions in WP 202 of 1995 and final notification of MoEF&CC regarding Kamasandra WLS.
7. To maintain buffer area all round the lease area as per the DMG approved mining plan.

Action: Member Secretary, SEAC to forward the proposal to SEIAA for further necessary action.

326.2.9 Residential Apartment Project at Thirumenahalli Village, Yelahanka Hobli, Bengaluru North Taluk, Bengaluru Urban District by M/s. Ramky Estates & Farms Ltd. – Online Proposal No.SIA/KA/INFRA2/503334/2025 (SEIAA 63 CON 2025)

| | a. Ground Coverage Area | 2557.80Sqm | |
| | b. Kharab Land | - | |
| | c. Total Green belt on Mother Earth | 5169.54Sqm | |
| | d. Internal Roads | 4143.02Sqm | |
| | e. Paved area | | |
| | f. Others Specify | - | |
| | g. Parks and Open space in case of Residential Township/ Area Development Projects | - | |
| | h. Total | 11,870.36Sqm | |
| 15 | WATER | | |
| | I. Construction Phase | | |
| | a. Source of water | CGWA Approved Tankers | |
| | b. Quantity of water for Construction in KLD | 14 KLD | |
| | c. Quantity of water for Domestic Purpose in KLD | 2.7 KLD | |
| | d. Waste water generation in KLD | 2.16 KLD | |
| | e. Treatment facility proposed and scheme of disposal of treated water | The total domestic wastewater generated during construction phase will be treated in mobile STP and the treated water will be used for periphery landscaping developing the area. | |
| | II. Operational Phase | | |
| | a. Total Requirement of Water in KLD | Net fresh water requirement | 100 KLD |
| | | Recycled water for flushing | 51 KLD |
| | | Total water requirement | 151 KLD |
| | b. Source of water | BWSSB and Rainwater harvesting | |
| | c. Wastewater generation in KLD | 121 KLD | |
| | d. STP capacity and Area required | 150 KLD | |

| | | |
|-----|---|---|
| e. | Technology employed for Treatment | Sequencing Batch Reactor (SBR) |
| f. | Scheme of disposal of excess treated water if any | The sewage generated during the operation phase will be treated in Sewage Treatment Plant (STP) of capacity 150KLD. The entire (95%) treated sewage from STP, 51 KLD will be recycled/ reused for toilet flushing, 12 KLD for internal driveway and Pavement maintenance, 20 KLD for Common & floor area maintenance, 6 KLD for Car washing and 26 KLD landscaping within the project site. |
| 16 | Infrastructure for Rain water harvesting | |
| a. | Capacity of sump/tank to store Roof & Hardscape/soft scape run off | Provided roof rainwater sump capacity is 100 Cum |
| b. | No's of Ground water recharge pits | 3 Nos. of recharge pits are proposed to harvest paved area runoff of 1.2 m Dia & 2.4 m Depth. 4 Nos. of recharge pits are proposed to harvest runoff from landscape of 1.2 m Dia & 2.4 m Depth. |
| 17 | Storm water management plan | Carrying capacity of internal drain=0.215 m ³ /sec. So carrying capacity of internal garland drain is adequate i.e., greater than 0.109 m ³ /sec so design is safe. |
| 18 | WASTE MANAGEMENT | |
| I. | Construction Phase | |
| a. | Quantity of Construction & Demolition waster and its management. | Demolition Waste: - NA Construction Waste: 1128MT Sand Gravels of 464 MT, Brick with Masonry-280 MT, Concrete- 308 MT has been utilized in the formation of Pavement/ walking path area and Landscape area. The metal and wood scrap of 76 MT utilized for the formation of landscape area. |
| b. | Quantity of Solid waste generation and mode of Disposal other than C&D. | 6 Kg/day Handed over to authorized vendors. |
| II. | Operational Phase | |
| a. | Quantity of Biodegradable waste generation and mode of Disposal as per norms (Capacity of OWC & Area required) | Quantity: 315kg/day Mode of Disposal: Composting by using organic waste Converter (OWC) converted as manure & used for landscaping within the project site Capacity of facility: 320 kg/day Area required: 20 Sqm |
| b. | Quantity of Non- Biodegradable waste generation and mode of Disposal as per norms | Quantity: 206.7 kg/day Mode of Disposal: Hand over to Authorized Recyclers for further process Area required: 8 Sqm |
| c. | Quantity of Hazardous Waste generation and mode of Disposal as per norms | Quantity: 0.1KLPA Mode of Disposal: Disposed as per the Hazardous & other waste (Management & Transboundary) movement rules 2016. Hand over to KSPCB Authorized Hazardous Waste Recyclers for further process Area required: 6 Sqm |

| | | lakhs/ annum, Total 39 Lakhs |
|--|--|------------------------------|

The Committee initially sought details regarding present site condition as per KML. Proponent informed the Committee that the proposed area is a vacant land and no construction work has been started by Proponent and the Committee noted the clarification.

The proposal is for construction of a residential apartment project in an area demarcated as residential use as per RMP of BDA 2015.

The Committee during appraisal sought details regarding provisions made for harvesting rainwater in the proposed area. The Proponent informed the Committee that for harvesting rainwater, they have proposed rainwater storage structure of 100 cum capacity for runoff from rooftop, hardscape and landscape areas and 03 recharge pits within the site area. The Committee noted the same.

Further the Committee informed the Proponent to incorporate tertiary treatment facility to treat waste water to urban re-use standards, to install aerators for individual units for conservation of water, to utilize minimum of 50% of roof area for solar power generation, to use sustainable building materials in the proposed project and to harvest excess rainwater in the project site, to which the Proponent agreed.

The Proponent agreed to grow 150 trees in the project site area. The Proponent has collected baseline data of air, water, soil and noise and informed that all were within the permissible limits. The Proponent committed to take precautionary measures during and after construction to maintain the environmental parameters within permissible limits in the proposed project and agreed to comply with the ECBC and NBC guidelines for the proposed construction and adhere to the by-laws stipulated by the governing authority for buffers and setbacks.

The Committee noted that the baseline parameters were found to be within permissible limits and informed the Proponent to leave buffers/setbacks as per zoning regulations and to harvest maximum rainwater in the proposed project area.

The Committee after appraisal decided to recommend the proposal to SEIAA for issue of EC with following consideration,

1. To provide tertiary treatment to the waste water to bring it to potable standards. Provide the additional final filtration & collection tank to facilitate frequent cleaning the tank, in order to avoid the deposition of residual & colloidal organic matters in treated water.
2. To utilize minimum of 50% of roof area for solar power generation.
3. To provide minimum 20% of total parking with e-vehicle charging facility.
4. To provide recharge tank of capacity 100 cum & 3 recharge pits.
5. To grow 150 trees in the early stage before taking up of construction.
6. To provide bell mouth entry and exit in the proposed project.
7. To incorporate catalytic converter for DG sets with dual fuel option.
8. To carry out community recharge of bore wells in the vicinity of the site.

9. To construct lead of drains till the nearest natural drains/water body for handling excess water.
 10. To consider the CER activity submitted by proponent with a recommendation to write to the concerned recipient about the CER activity.
 11. To install energy efficient plumbing system for individual units to conserve water,
- Action: Member Secretary, SEAC to forward the proposal to SEIAA for further necessary action**

326.2.10 Black Granite Quarry Project at Kuderu Village, Chamarajanagara Taluk, Chamarajanagara District (4-35 Acres) by Sri Nagendramurthy P – Online Proposal No.SIA/KA/MIN/519404/2025 (SEIAA 78 MIN 2025)

| 13 | Quarry plan | 15.01.2015 |
| 14 | Revenue NOC | 17.10.2023 |
| 15 | Forest NoC | 29.02.2024 |
| 16 | Cluster Certificate | 15.01.2025 |
| 17 | DTF | 19.07.2024 |
| 18 | Notification | 03.01.2024 |
| 19 | Wild life certificate | 15.06.2022 |

The Committee sought clarification with respect to the present site condition based on the KML submitted by Proponent. The Proponent informed the Committee that the proposed area is fresh land and no mining has been carried out by Proponent and informed that the project does not attract violation. The Committee noted the clarification of Proponent as per KML and appraised the project.

As per the cluster sketch there is one other lease in radius of 500 mtr from the said lease and the lease is exempted from cluster as lease was granted prior to 09.09.2013 and the total area of the applied lease is 4-35 Acres and hence the project is categorized as B2.

Considering the existing cart track road to a length of 210 meters connecting lease area to the all-weather black topped road, the Committee informed that the quarrying operation needs to be commenced after asphaltting the approach road to the quarry as per IRC standard norms and should grow trees all along the approach road in first year of operation, for which the Proponent agreed.

The Proponent has collected baseline data of air, water, soil and noise which are all within the permissible limits. The Proponent informed that all mitigative measures will be taken to ensure that the parameters will be maintained within the permissible limits.

The Committee noted that the baseline parameters are found to be within permissible limits and agreed with the approved quarry plan, with proved mineable reserve of 4,68,780 Cum (including waste) and estimated the life of mine to be co-terminous with lease period.

The Committee after discussion decided to recommend the proposal to SEIAA for issue of Environmental Clearance for an annual production of 15,000 Cum/annum (including waste), with following consideration,

1. To asphalt the approach road to the quarry as per IRC norms.
2. To grow trees all along the approach road & buffer zone during the first year of operation.
3. To carry out regular health checkup for the workers mainly for audiometry & spirometry from the nearby Hospital.
4. To take necessary measures to minimise noise and air pollution from the quarry area.
5. To provide metal sheet berricade to an height of minimum 3 mtrs around the working area.
6. To consider the CER activity submitted by Proponent with a recommendation to write to the concerned recipient about the CER activity.
7. To maintain buffer area allround the lease area as per the DMG approved mining plan.

Action: Member Secretary, SEAC to forward the proposal to SEIAA for further necessary action.

326.2.11 Building Stone Quarry Project located at Vaderahalli in Kadur Taluk, Chikkamagalur District (5-26 Acres) by M/s. Shree Mallikarjuna Stone Crusher – Online Proposal No.SIA/KA/MIN/525719/2025 (SEIAA 79 MIN 2025)

| 16 | Cluster Certificate | 06.02.2025 | | | | | | | | | | |
| 17 | Notification | 27.01.2025 | | | | | | | | | | |

The Committee initially sought clarification with respect to the present site condition based on the KML submitted by Proponent. The Proponent informed the Committee as per the S report of DMG, in a part of the applied lease area there were old leases between 2009-2014 and presently the area is newly notified on 27.01.2024 and no working has been carried out by Proponent till date. The Committee noted the clarification given by the Proponent. Further, Proponent informed that DMG vide letter dated 10.03.2025 had given clarification regarding forest noc 28.06.2024 for the present proposal, where in it was mentioned that the Proponent had submitted application under Rule 31-ZC prior to the applicant under Rule 3F of KMMCR.

As per the cluster sketch there are four leases in radius of 500 mtr from the said lease and the total area of the leases including the applied lease is 10-06 Acres and hence the project is categorized as B2.

Considering the existing cart track road to a length of 2,500 meters connecting lease area to the all-weather black topped road, the Committee informed that the quarrying operation needs to be commenced after asphaltting the approach road to the quarry and road connecting crusher as per IRC standard norms and should grow trees all along the approach road in first year of operation, for which the Proponent agreed.

The Proponent has collected baseline data of air, water, soil and noise which are all within the permissible limits. The Proponent informed that all mitigative measures will be taken to ensure that the parameters will be maintained within the permissible limits.

The Committee noted that the baseline parameters are found to be within permissible limits and agreed with the approved quarry plan, with proved mineable reserve of 18,50,205 Tonns (including waste) and estimated the life of mine to be 12 years.

The Committee after discussion decided to recommend the proposal to SEIAA for issue of Environmental Clearance for an annual production of 1,63,297 Tonns/annum (including waste), with following consideration,

1. To asphalt the approach road to the quarry as per IRC norms.
2. To grow trees all along the approach road & buffer zone during the first year of operation.
3. To carry out regular health checkup for the workers mainly for audiometry & spirometry from the nearby Hospital.
4. To take necessary measures to minimise noise and air pollution from the quarry area.
5. To provide metal sheet berricade to an height of minimum 3 mtrs around the working area.
6. To consider the CER activity submitted by Proponent with a recommendation to write to the concerned recipient about the CER activity.
7. To maintain buffer area allround the lease area as per the DMG approved mining plan.

Action: Member Secretary, SEAC to forward the proposal to SEIAA for further necessary action.

326.2.12 Ornamental Grey Granite Quarry Project at Purabyrenahalli Village, Shidlaghatta Taluk, Chikkaballapur District (8-20 Acres) by Smt. J G Kavitha – Online Proposal No.SIA/KA/MIN/527284/2025 (SEIAA 290 MIN 2024)

| Year | Corporate Environmental Responsibility (CER) | | | | | | | | | | | | | |
| 1st | Providing solar power panels to GLPS school at Purabyrenahalli village. | | | | | | | | | | | | | |
| 2nd | The proponent proposes to distribute nursery plants at Purabyrenahalli Villages & Strengthening of approach road. | | | | | | | | | | | | | |
| 3rd | Conducting E-waste drive campaigns at Purabyrenahalli village. | | | | | | | | | | | | | |
| 4th | Health camp in the GLPS school at Purabyrenahalli village | | | | | | | | | | | | | |
| 5th | Scientific support and awareness to local farmers to increase yield of crop and fodder | | | | | | | | | | | | | |
| 12 | EMP Budget | Rs. 1.70Crores (Capital Cost) & Rs.60.45 lakhs (Recurring cost) | | | | | | | | | | | | |
| 13 | Quarry plan | 02.07.2024 | | | | | | | | | | | | |
| 14 | CCR from MoEF | 21.09.2024 | | | | | | | | | | | | |
| 15 | Forest NoC | 15.01.2019 | | | | | | | | | | | | |
| 16 | Cluster Certificate | 02.07.2024 | | | | | | | | | | | | |
| 17 | Audit Report | 02.07.2024 | | | | | | | | | | | | |
| 18 | Notification | 10.06.2024 | | | | | | | | | | | | |

The proposal is applied under 7(ii) of EIA Notification. The Proponent informed the Committee that they earlier had obtained EC from SEIAA on 17.05.2022 for building stone and lease was granted on 27.07.2022 with QL no. 286 and now had proposed grey granite along with building stone and accordingly had submitted CCR from MoEF&CC dated 21.09.2024 and audit report till 2023-24 issued by DMG on 02.07.2024 and had submitted EIA report as per the ToR issued by SEIAA on 01.02.2025. The Committee noted the details and appraised the project.

Considering the existing cart track road to a length of 1,968 meters connecting lease area to the all-weather black topped road, the Committee informed that the quarrying operation needs to be commenced after asphaltting the approach road to the quarry and road connecting crusher as per IRC standard norms and should grow trees all along the approach road in first year of operation, for which the Proponent agreed.

The Proponent has collected baseline data of air, water, soil and noise which are all within the permissible limits. The Proponent informed that all mitigative measures will be taken to ensure that the parameters will be maintained within the permissible limits.

The Committee noted that the baseline parameters are found to be within permissible limits and agreed with the approved quarry plan, with proved mineable reserve of 20,25,540 tons (including waste) and estimated the life of mine to be coterminous with lease period.

The Committee after discussion decided to recommend the proposal to SEIAA for issue of Environmental Clearance for an annual production of 61,560 ton/annum (including waste), with following consideration,

1. To asphalt the approach road to the quarry as per IRC norms.
2. To grow trees all along the approach road & buffer zone during the first year of operation.
3. To carry out regular health checkup for the workers mainly for audiometry & spirometry from the nearby Hospital.
4. To take necessary measures to minimise noise and air pollution from the quarry area.
5. To provide metal sheet barricade to an height of minimum 3 mtrs around the working area.
6. To consider the CER activity submitted by Proponent with a recommendation to write to the concerned recipient about the CER activity.
7. To comply with the observations in CCR issued by MoEF&CC.

8. To maintain buffer area allround the lease area as per the DMG approved mining plan.

Action: Member Secretary, SEAC to forward the proposal to SEIAA for further necessary action.

326.2.13 Ornamental Grey Granite Quarry Project at Purabyrenahalli Village, Shidlaghatta Taluk, Chikkaballapura District (7-35 Acres) by Sri D. Srinivasa S/o. Dasappa – Online Proposal No.SIA/KA/MIN/527304/2025 (SEIAA 292 MIN 2024)

| 13 | AQP | 02.07.2024 | |
| 14 | Cluster Certificate | 02.07.2024 | |
| 15 | Notification | 10.06.2024 | |

The proposal is for issue of amendment to the EC issued by SEIAA considering the DMG Notification dated 10.06.2024. The Proponent informed the Committee that they earlier had obtained EC from SEIAA on 19.08.2019 for building stone and lease was granted on 19.02.2021 with QL no. 273 and now had proposed grey granite along with buiding stone and accordingly had submitted audit report till 2023-24 issued by DMG on 02.07.2024. The Committee noted the details.

The Committee as per the approved quarry plan considering the proved mineable reserve of 13,52,700 tons (including waste) estimated the life of mine to be 15 years by considering maximum annual production of 92,367 tons/annum (including waste) (55,420 tons – granite, 27,710 tons – Building Stone & 9,237 tons - Waste)

The Committee after discussion decided to recommend the proposal to SEIAA to issue amendment of EC with all other conditions remaining same as per the EC issued by SEIAA on 19.08.2019, with following consideration,

1. To grow trees all along the approach road & buffer zone during the first year of operation.
2. To carry out regular health checkup for the workers in the nearby Hospital.

3. To provide metal sheet berricade to an height of minimum 3 mtrs around the working area.
4. To take necessary measures to arrest noise and vibration from the quarry area.
5. To maintain buffer all round the lease area.

Action: Member Secretary, SEAC to forward the proposal to SEIAA for further necessary action.

326.2.15 Development of Residential Tower with Civic Amenities at Sy.Nos.35/1 & 35/2 of Doddakannalli Village, VarthuruHobli, Bengaluru South Taluk, Bengaluru Urban District by M/s. Max Global Developers – Online Proposal No.SIA/KA/INFRA2/449857/2023(SEIAA 64 CON 2025)

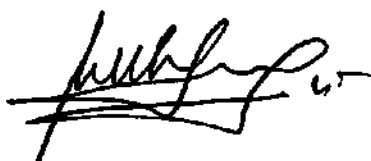

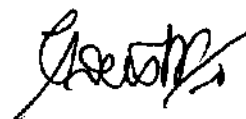

The Proponent remained absent without intimation and hence the Committee after discussion decided to defer the Project.

Action: Member Secretary, SEAC to put up before SEAC in upcoming meetings.

326.2.16 Expansion of Ornamental Grey Granite Quarry Project at Purabyrenahalli Village, Shidlaghatta Taluk, Chikkaballapur District (8-36 Acres) by M/s. Krishna & Company – Online Proposal No.SIA/KA/MIN/527270/2025(SEIAA 289 MIN 2024)

| 18 | Forest NOC | 13.02.2019 |
| 19 | Notification | 10.06.2024 |

The proposal is applied under 7(ii) of EIA Notification. The Proponent informed the Committee that they earlier had obtained EC from SEIAA on 17.05.2022 for building stone and lease was granted on 27.07.2022 with QL no. 283 and now had proposed grey granite along with buiding stone and accordingly had submitted CCR from MoEF&CC dated 21.09.2024 and audit report till 2023-24 issued by DMG on 02.07.2024 and had submitted EIA report as per the ToR issued by SEIAA on 01.02.2025. The Committee noted the details and appraised the project.

Considering the existing cart track road to a length of 1,968 meters connecting lease area to the all-weather black topped road, the Committee informed that the quarrying operation needs to be commenced after asphaltting the approach road to the quarryas per IRC standard norms and should grow trees all along the approach road in first year of operation, for which the Proponent agreed.

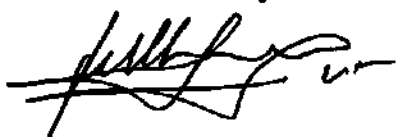

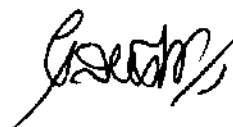

The Proponent has collected baseline data of air, water, soil and noise which are all within the permissible limits. The Proponent informed that all mitigative measures will be taken to ensure that the parameters will be maintained within the permissible limits.

The Committee noted that the baseline parameters are found to be within permissible limits and agreed with the approved quarry plan, with proved mineable reserve of 11,83,006 tons (including waste) and estimated the life of mine to be 16 years.

The Committee after discussion decided to recommend the proposal to SEIAA for issue of Environmental Clearance for an annual production of 76,410 tons/annum (including waste), with following consideration,

1. To asphalt the approach road to the quarry as per IRC norms.
2. To grow trees all along the approach road & buffer zone during the first year of operation.
3. To carry out regular health checkup for the workers mainly for audiometry & spirometry from the nearby Hospital.
4. To take necessary measures to minimise noise and air pollution from the quarry area.
5. To provide metal sheet berricade to an height of minimum 3 mtrs around the working area.
6. To consider the CER activity submitted by Proponent with a recommendation to write to the concerned recipient about the CER activity.
7. To comply with the observations in CCR issued by MoEF&CC.
8. To maintain buffer area allround the lease area as per the DMG approved mining plan.

Action: Member Secretary, SEAC to forward the proposal to SEIAA for further necessary action.

326.2.17 Proposed Modification and Expansion of Residential Development with Club House project at Municipal No. 14/01, 14/2, 14/03, 173, 181 & 182, 1st Block, Jayanagar, Municipal Ward No 62, Hombegowda Nagar, Bengaluru by M/s. Prestige Southcity Holdings Bengaluru– Online Proposal No.SIA/KA/INFRA2/507145/2024(SEIAA 65 CON 2025)

The Proponent remained absent without intimation and hence the Committee after discussion decided to defer the Project.

Action: Member Secretary, SEAC to put up before SEAC in upcoming meetings.

| 22 | EMP (Details and capital cost & recurring cost) | Construction phase:118.2Lakhs Operation phase:960.0 Lakhs |

The proposal is for construction of residential apartment project in an area earmarked for agriculture use as per STRRPA, for which the Proponent informed that they have obtained conversion of land to residential use. The Committee noted the details.

The Committee during appraisal sought details regarding water body & drain as per village map, source of water during operational phase and provisions made for harvesting rainwater in the proposed area. The Proponent informed the Committee that for the water body in south west, 30mtr buffer is proposed from the edge of water body and for the primary drain in north east and inside the site area, buffer of 9mtrs on either sides from the edge of drain is proposed. Regarding source of water during operation, Proponent informed that they have conducted hydrogeology study by CGWA accredited consultant Dr. K R Sooryanarayan, informing that the total water requirement is 146 KLD out of which about 96 KLD of fresh water requirement would be met from 3 existing borewells in the proposed project area, only after obtaining NoC from KGWA for extraction of ground water. In addition, they have proposed sufficient rainwater harvesting structures to utilize the rainfall within the site area justifying that drawing 96 KLD of ground water will not have adverse impact on ground water. Regarding harvesting rainwater, the Proponent informed the Committee that they have proposed rainwater storage structures of 640 cum for runoff from rooftop, hardscape and landscape areas along with 15 recharge pits within the site area. The Committee noted the same.

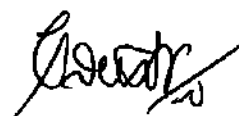

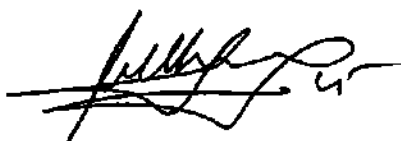

Further the Committee informed the Proponent to incorporate tertiary treatment facility to treat waste water to urban re-use standards, energy efficient plumbing system for individual units to conserve water, to utilize minimum of 50% of roof area for solar power generation, to use sustainable building materials in the proposed project and to harvest excess rainwater in the project site, to which the Proponent agreed.

The Proponent agreed to grow 685 trees in the project site area. The Proponent has collected baseline data of air, water, soil and noise and informed that all were within the permissible limits. The Proponent committed to take precautionary measures during and after construction to maintain the environmental parameters within permissible limits in the proposed project and agreed to comply with the ECBC and NBC guidelines for the proposed construction and adhere to the by-laws stipulated by the governing authority for buffers and setbacks.

The Committee noted that the baseline parameters were found to be within permissible limits and informed the Proponent to leave buffers/setbacks as per zoning regulations and to harvest maximum rainwater in the proposed project area.

The Committee after appraisal decided to recommend the proposal to SEIAA for issue of EC with following considerations,

1. The source of water during operation phase should be as specified in the CGWA hydrogeology report and to provide tertiary treatment to the wastewater to bring it to urban re-use standards. Provide the additional final filtration & collection tank to facilitate frequent cleaning the tank, in order to avoid the deposition of residual & colloidal organic matters in treated water.
2. To utilize minimum of 50% of roof area for solar power generation.
3. To provide minimum 20% of total parking with e-vehicle charging facility.
4. To provide rainwater storage structure of 640 cum and 15 recharge pits.
5. To grow 685 trees in the early stage before taking up of construction.
6. To carry out community recharge of bore wells in the vicinity of the site.
7. To construct lead of drains till the nearest natural drains/water body for handling excess water.
8. To incorporate catalytic converter for DG sets with dual fuel option.
9. To install energy efficient plumbing system for individual units to conserve water,
10. To provide bell mouth entry/exist from the approach road
11. Excess treated water should be utilized within the site area.
12. To relocate STP away from drain.

13. To consider the CER activity submitted by proponent with a recommendation to write to the concerned recipient about the CER activity.

Action: Member Secretary, SEAC to forward the proposal to SEIAA for further necessary action.

326.2.19 Validity Extension of Building Stone Quarry Project at Kanivenarayannapura Village, Chikkabalapur Taluk, Chikkabalapur District (9-00 Acres) by M/s. Dolch Enterprises / Sri Preetish Puttaraj- Online Proposal No.SIA/KA/MIN/514343/2025 (SEIAA 89 MIN 2019)

| 3 | Type Of Mineral | Building Stone Quarry | |
| 4 | New/Expansion/Modification/ Renewal | Extension of Validity E.C. | |
| 5 | Type of Land [Forest, Government Revenue, Gomal, Private/Patta, Other] | Government | |
| 6 | Area in Acres | 9-00 Acres | |
| 7 | Annual Production (Metric Ton/Cum) Per Annum | 5,68,421 Tons/annum(including waste) | |
| 8 | Proved Quantity of mine/Quarry-Cu.m/Ton | 30,67,454 Tones (including waste) | |
| 9 | Permitted Quantity Per Annum Cu.m/Ton | 5,40,000 Tones / Annum (excluding waste) | |
| 10 | CER Activities:- | | |
| | Year | CER | |
| | 1 st | Providing solar power panels to the GLPS at Kanivenarayannapura Village, Chikkabalapur Taluk, Chikkabalapur District | |
| | 2 nd | The proponent proposes to distribute nursery plants at Koira Village & Strengthening of approach road | |
| | 3 rd | Rain water harvesting pits to the GHPS school at Kanivenarayannapura Village, Chikkabalapur Taluk, Chikkabalapur District | |
| | 4 th | Avenue plantation either side of the approach road near Quarry site & Repair of road with drainages | |
| | 5 th | Health camp in GLPS school at Kanivenarayannapura Village, Chikkabalapur Taluk, Chikkabalapur District | |
| 11 | Forest NoC | 08.07.2005 | |
| 12 | Audit Report | 07.12.2024 | |
| 13 | AQP | 23.04.2024 | |

The proposal is for extension of validity for the EC issued earlier by SEIAA on 11.06.2019 for a period of 5 years. The Proponent has submitted audit report till 2023-24 certified by DMG dated 07.12.2024 and a copy of recently issued self certified compliance report regarding complying with all

the EC conditions and requested the Committee to issue validity extension. The Proponent had obtained transfer of EC from SEIAA on 31.08.2021.

Further, the Proponent regarding deemed forest, informed that the proposed area already had obtained EC and as per forest noc dated 08.07.2005, the nearest forest is at a distance of 100mtrs from the applied area and the proposed area is not a forest area. The Committee noted the details.

The Committee as per the approved quarry plan considering the proved mineable reserve of 30,67,454 Tonnes (including waste) estimated the life of mine to be 6 years by considering maximum annual production of 5,68,421 Tonnes/Annum (including waste).

The Committee as per the provision in MOEF&CC OM dated 13.12.2022, after discussion decided to recommend the proposal to SEIAA to grant extension of validity of EC, till 24.05.2049 or till the validity of lease which ever is earlier with all other conditions remaining same as per the EC issued by SEIAA on 11.06.2019, with following consideration,

1. To grow trees all along the approach road & buffer zone during the first year of operation.
2. To carry out regular health checkup for the workers in the nearby Hospital.
3. To provide metal sheet berricade to an height of minimum 3 mtrs around the working area.
4. To take necessary measures to arrest noise and vibration from the quarry area.
5. To consider the CER activity submitted by Proponent with a recommendation to write to the concerned recipient about the CER activity.

Action: Member Secretary, SEAC to forward the proposal to SEIAA for further necessary action.

326.2.20 Building Stone Quarry Project at Chikkanagavalli Village in Chikkaballapura Taluk & District (3-00 Acres) by Sri S. Kishore Shantamurthy – Online Proposal No.SIA/KA/MIN/519482/2025 (SEIAA 81 MIN 2025)

| | | |
|----|--|---|
| 11 | CER Activities: Propose take up 300 No. of additional plantation on either side of the approachroad from quarry location to Chikkanagavalli Village Road and Govt. School | |
| 12 | EMP Budget | Rs. 13.20 lakhs (Capital Cost) & Rs. 4.40 lakhs (Recurring cost) |
| 13 | Quarry plan | 23.05.2023 |
| 14 | Cluster certificate | 12.12.2024 |
| 15 | Audit Report | 10.03.2025 |
| 16 | CCR from MoEF | 11.06.2024 |

The proposal is for expansion of building stone quarry for which earlier E.C. was issued by SEIAA on 13.07.2015 and lease is in effect from 21.01.2016 with QL 241. The Proponent submitted CCR from MoEF&CC dated 11.06.2024 and audit report till 2023-24 certified by DMG dated 10.03.2025.

As per the cluster sketch there are another 20 leases in a radius of 500 mtr from the said lease, out of which 18 leases are exempted from cluster as there leases were granted prior to 09.09.2013 and the total area of the remaning leases including the applied lease is 6-18 Acres and hence the project is categorized as B2.

There is an existing cart track road to a length of 1,940 meters connecting the lease area to the all-weather black topped road. The Committee informed that the mining operation should be commenced after asphaltting the approach road to the quarry and road leading to crusher as per IRC norms and to grow trees all along the approach road during the first year of operation, for which the Proponent agreed.

The Proponent has collected baseline data of air, water, soil and noise which are all within the permissible limits. The Proponent informed that all mitigative measures will be taken to ensure that the parameters will be maintained within the permissible limits.

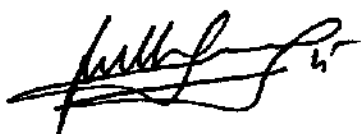

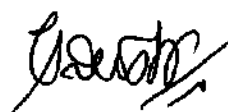

The Committee noted that the baseline parameters are found to be within permissible limits and agreed with the approved quarry plan with proved mineable reserve of 9,06,666 Tonns (including waste) and estimated the life of the quarry to be 8 years.

The Committee after discussion decided to recommend the proposal to SEIAA for issue of Environmental Clearance for an annual production of 1,22,449 tonns/year (including waste), with following consideration,

1. To asphalt the approach road to the quarry & road connecting crusher as per IRC norms.
2. To grow trees all along the approach road & buffer zone during the first year of operation.
3. To carry out regular health checkup for the workers in the nearby Hospital.
4. To provide metal sheet berricade to an height of minimum 3 mtrs around the working area.
5. To take necessary measures to arrest noise and vibration from the quarry area.
6. To consider the CER activity submitted by proponent with a recommendation to write to the concerned recipient about the CER activity.
7. To comply with the observation in CCR issued by MoEF&CC.
8. To maintain buffer of 7.5mtr from lease boundary.
9. To maintain buffer area allround the lease area as per the DMG approved mining plan.

Action: Member Secretary, SEAC to forward the proposal to SEIAA for further necessary action.

326.2.21 Mixed-use Development (Senior Living apartment and Commercial Building) 'Mango Meadows' Project located at RS - 668, CTS No. 1681, Anagol Village, Goa Road, Belagavi Taluk & District by Mr. Deepak Appasaheb Patil – Online Proposal No.SIA/KA/INFRA2/518931/2025 (SEIAA 68 CON 2025)

The Proponent remained absent with intimation and hence the Committee after discussion decided to defer the Project.

Action: Member Secretary, SEAC to put up before SEAC in upcoming meetings.

326.2.22 Amendment in Residential Apartment Project at Margondanahalli Village, Jigani Hobli, Anekal Taluk, Bangalore Urban District by M/s Ramky Estates and Farms Ltd. – Online Proposal No.SIA/KA/INFRA2/499253/2024 (SEIAA 36 CON 2014)

About the project:-

| | h. | Total 29,541.80Sqm |
| 15 | WATER | |
| | I. | Construction Phase |
| | a. | Source of water CGWA Approved Tankers |
| | b. | Quantity of water for Construction in KLD 10 KLD |
| | c. | Quantity of water for Domestic Purpose in KLD 2.7 KLD |
| | d. | Waste water generation in KLD 2.16 KLD |
| | e. | Treatment facility proposed and scheme of disposal of treated water The total domestic wastewater generated during construction phase will be treated in mobile STP and the treated water will be used for periphery landscaping developing the area. |
| | II. | Operational Phase |
| | a. | Total Requirement of Water in KLD |
| | | Net fresh water requirement 246 KLD |
| | | Recycled water for flushing 124KLD |
| | | Total water requirement 370 KLD |
| | b. | Source of water Local Body/Bore welland Rainwater harvesting |
| | c. | Wastewater generation in KLD 296 KLD |
| | d. | STP capacity and Area required 180 KLD X 2 Nos |
| | e. | Technology employed for Treatment Sequencing Batch Reactor (SBR) |
| | f. | Scheme of disposal of excess treated water if any The sewage generated during the operation phase will be treated in Sewage Treatment Plant (STP) of capacity 180 KLD X 2 Nos. The entire (95%) treated |

| | | | |
|----|--|--|---|
| | | | sewage from STP, 124 KLD will be recycled/ reused for toilet flushing, 33 KLD for internal driveway and Pavement maintenance, 45 KLD for Common & floor area maintenance, 10 KLD for Car washing and 69 KLD landscaping within the project site. |
| 16 | Infrastructure for Rain water harvesting | | |
| | a. | Capacity of sump/tank to store Roof & Hardscape/soft scape run off | Provided roof rainwater sump capacity is 100 Cum |
| | b. | No's of Ground water recharge pits | 15 Nos. of recharge pits are proposed to harvest paved area runoff of 1.0 m Dia&1.5 m Depth. 16 Nos. of recharge pits are proposed to harvest runoff from landscape of 1.0 m Dia& 1.5 m Depth. |
| 17 | Storm water management plan | | Carrying capacity of internal drain = 1.39 m ³ /sec. So carrying capacity of internal garland drain is adequate i.e., greater than 0.27 m ³ /sec so design is safe. |
| 18 | WASTE MANAGEMENT | | |
| | I. | Construction Phase | |
| | a. | Quantity of Construction & Demolition waster and its management. | Demolition Waste: - NA Construction Waste:1356.13MT Sand Gravels of 492.13 MT, Brick with Masonry-380 MT, Concrete-408 MT has been utilized in the formation of Pavement/ walking path area and Landscape area. The metal and wood scrap of 76 MT utilized for the formation of landscape area. |
| | b. | Quantity of Solid waste generation and mode of Disposal other than C&D. | 6 Kg/day Handed over to authorized vendors. |
| | II. | Operational Phase | |
| | a. | Quantity of Biodegradable waste generation and mode of Disposal as per norms (Capacity of OWC & Area required) | Quantity:772.3kg/day Mode of Disposal:Composting by using organic waste Converter (OWC) converted as manure& used for landscaping within the project site Capacity of facility: 780 kg/day Area required: 40 Sqm |
| | b. | Quantity of Non- Biodegradable waste generation and mode of Disposal as per norms | Quantity:509.1kg/day Mode of Disposal: Hand over to Authorized Recyclers for further process Area required: 10 Sqm |
| | c. | Quantity of Hazardous Waste generation and mode of Disposal as per norms | Quantity: 0.1KLPA Mode of Disposal: Disposed as per the Hazardous & other waste (Management & Transboundary) movement rules 2016. Hand over to KSPCB Authorized Hazardous Waste Recyclers for further process Area required: 6 Sqm |
| | d. | Quantity of E waste generation and mode of Disposal as per norms | Quantity: 0.06 MTPA Mode of Disposal: Hand over to KSPCB Authorized e waste recycler for further process |

| | | | |
|----|----|--|--|
| | | | Area required: 5 Sqm |

The proposal is for issue of amendment to EC, issued by SEIAA on 19.02.2016. The Proponent informed that due their internal issues, they had applied for amendment and all the environmental

attributes decreases due to decrease in the total built up area & number of flats from the earlier issued Environmental clearance and accordingly. For the existing construction Proponent had obtained CFE from KSPCB dated 07.09.2018 and plan approval from BDA dated 11.11.2019 and submitted self certified compliance report and as per architect certificate dated 18.11.2024, BUA of 32,014.86 Sqm was completed in building 1 and 70% of the construction was completed in building 2 and requested the Committee to issue an amendment with the following changes,

| Parameters | As per SEIAA 36 CON 2014 dated 19.02.2016 | As per EC Amendment (Now Applying) | Remarks |
|-------------------------------------|--|---|----------------------------|
| Total Plot Area | | 29,035.95 Sqm | Decreased by 12,111.68 Sqm |
| Total Built up area | 1,06,029.52 Sqm | 67,806.5 Sqm | Decreased by 38,223.02 Sqm |
| No of units | | 230 Units | Decreased by 134 Units |
| Building Configuration | 12 Towers having building configuration of Tower -1, 2, 3, 7, 8, 9, 10, 11 and 12 consists of Basement + Ground floor + 14 Upper floors, Tower -4 with Basement + Ground floor + 12 Upper floors, Tower -5, 6 with Basement + Ground floor + 13 Upper floors and a club house with Basement + Ground floor + 2 Upper floors. | 2 buildings having building configuration with building 1 (wing A,B,C) B+G+14 UF and building 2 (wing D,E,F) B+G+14 UF a Club House with GF + 2 UF. | |
| Water Consumption | | 270 KLD | Decreased by 48 KLD |
| Waste water generation | 326 KLD | 296 KLD | Decreased by 30 KLD |
| STP Capacity | 326 KLD | 296 KLD (Area) | |
| Total solid wastes | 1861.35 kg/Day | 1281.4 kg/Day | Decreased by 579.95 kg/day |
| Organic waste | 514.5 kg/day | 77.5 kg/day | Decreased by 436.9 kg/day |
| Inorganic waste | 739.95 kg/day | 509.1 kg/day | Decreased by 230.85 kg/day |
| STP sludge | | 12 kg/day | Decreased by 12 kg/day |
| DG Set Capacity | 1 No X 500 KVA 1 No X 380 KVA 2 No's X 250 KVA 1 No X 180 KVA | 4 No's X 160 KVA | |
| Rain water harvesting Sump capacity | | 100 cum | No Change |
| Number of Recharge Pits | 31 Nos | 15 Nos of 1.0 m Dia & 1.5 m Depth proposed to harvest paved area runoff and 16 Nos of pits to harvest hardscape runoff | No Change |

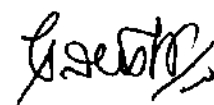

The Committee noted the changes requested by Proponent for the amendment and after discussion decided to recommend the proposal to SEIAA for issue of amendment to EC with a condition that and all other conditions remain same and unchanged for the EC issued by SEIAA on 19.02.2016.

Action: Member Secretary, SEAC to forward the proposal to SEIAA for further necessary action.

326.2.23 Residential Apartment with Clubhouse Project at Kudlu Village, Sarjapura Hobli, Anekal Taluk, Bengaluru Urban, District and Parappana Agrahara Village, Begur Hobli, Bengaluru South Taluk, Bengaluru Urban District by M/s. APG Community Development Pvt. Ltd. – Online Proposal No.SIA/KA/INFRA2/493684/2024(SEIAA 67 CON 2025)

About the project:

| Sl.No | Particulars | Information Provided by PP |
|-------|-------------|----------------------------|
|-------|-------------|----------------------------|

| | | |
|----|---|---|
| 1 | Name & Address of the Project Proponent | M/s. APG Community Development Pvt Ltd, Assetz House, No. 30, Crescent Road, Bengaluru - 560 001 |
| 2 | Name & Location of the Project | Residential Apartments with ClubHouse Sy. No. 5/4 (Old 5/2), 5/5, 173/1, 173/2, 175, 176, 177/1, 177/2, 178, 179/1, 179/2, 180/1, 180/2, 180/3, 187/1, 203 of Kudlu Village, Sarjapura Hobli, Anekal Taluk, Bengaluru Urban, and 5/1 (Old No. - 5), 6, 7, 8/1, 8/4, 8/5 Parappana Agrahara Village, Begur Hobli, Bengaluru South Taluk, Bengaluru. |
| 3 | Type of Development | |
| | a. Residential Apartment/Villas/Row Houses/Vertical Development/Office/IT/ITES/Mall/Hotel/ Hospital /other | Residential Apartments Cat 8(a) |
| | b. Residential Township/ Area Development Projects | -- |
| | c. Zoning Classification | The Land Use as per BDA RMP 2015 is Residential. The Land Use is converted for Residential Purpose by the Landowner |
| 4 | New/ Expansion/Modification/Renewal | New |
| 5 | Water Bodies/ Nalas in the vicinity of project site | As per the Kudlu and Parappana Agrahara Village Map, Nalacuts through the proposed project site along the Village Boundaries. 25m Nala buffer from the centre of the nala as per BDA Zoning regulations is earmarked as No Development Zone and shall be maintained as per norms. From the village maps. It can be seen that the proposed project site is abutting a Lake (Kudlu Dodda Kere) towards the East of the project boundary. 30m Lake buffer is earmarked as per the BDA Zonal Regulations and shall be maintained as per norms. Form the Parappana Agrahara Village Map it be seen that a Kalu Dhari (Pathway) is passing through Sy. No. 6 and 7. The same will be rerouted along the boundary of the project site. |
| 6 | Plot Area (Sqm) | 1,03,776.627Sqm |
| 7 | Built Up area (Sqm) | 1,15,446.78Sqm |
| 8 | FAR • Permissible • Proposed | 2.25 0.6659 |
| 9 | Building Configuration [Number of Blocks / Towers / Wings etc., with Numbers of Basements and Upper Floors] | Tower A1 – Tower A5 with maximum No. of Floors of 1 Basement Floor + Ground Floor + 23 Upper Floors + Terrace Floor |
| 10 | Number of units/plots in case of Construction/Residential Township /Area Development Projects | 336 Dwelling Units |
| 11 | Height Clearance | 72.375m |
| 12 | Project Cost (Rs. In Crores) | 221 Cores |
| 13 | Quantity excavated earth& its management | It is estimated that about 62,955cum of earth shall be excavated using latest hi-tech earth moving machinery. Top earth of about 20,250 cum shall be |

| | | |
|----|---|---|
| | | stored and used for landscaping. About 22,050 cum of excavated soil will be used for Roads and walkways. About 15,400cum will be used for backfilling and remaining 5,255cum shall be used for manufacturing soil stabilized cement blocks which will used within the project for construction of non-load bearing walls, compound walls, curbstone, pavers, etc. No excavated earth shall be taken out of the project site for disposal. |
| 14 | Details of Land Use (Sq.m) | |
| | a. Ground Coverage Area | 6,200.0Sq.m |
| | b. Kharab Land | -- |
| | c. Total Green belt on Mother Earth for projects under 8(a) of the schedule of the EIA notification, 2006 | 10,233.42Sq.m |
| | d. Internal Roads | 85,900.86Sq.m (Including Future Development Area) |
| | e. Paved area | |
| | f. Others Specify – Kharab Land and land not in possession | 2,059.22Sq.m |
| | g. Parks and Open space in case of Residential Township/ Area Development Projects | -- |
| | h. Total | 1,03,776.627Sq.m |
| 15 | WATER | |
| | I. Construction Phase | |
| | a. Source of water | Treated water from STP set-up for Labour camp at or near Project site |
| | b. Quantity of water for Construction in KLD | 10KLD |
| | c. Quantity of water for Domestic Purpose in KLD | 20KLD |
| | d. Waste water generation in KLD | 17KLD |
| | e. Treatment facility proposed and scheme of disposal of treated water | 20KLD STP |
| | II. Operational Phase | |
| | a. Total Requirement of Water in KLD | Fresh 193.175 |
| | | Recycled 98.14 |
| | | Total 291.315 |
| | b. Source of water | Bengaluru Water Supply and Sewage Board (BWSSB), Rooftop Rainwater & Treated Water |
| | c. Waste water generation in KLD | 233KLD |
| | d. STP capacity& Area required | 280KLD STP |
| | e. Technology employed for Treatment | Sequencing Batch Reactor Technology |
| | f. Scheme of disposal of excess treated water if any | Treated water will be used for toilet flushing, landscaping, etc. |
| 16 | Infrastructure for Rain water harvesting | |
| | a. Capacity of sump tank to store Roof run off | 390cum |
| | b. No's of Ground water recharge pits | 21 |
| 17 | Storm water management plan | Garland drains with 21 recharge pits are proposed. |
| 18 | WASTE MANAGEMENT | |

| | | |
|------------------------------|---|---|
| I. Construction Phase | | |
| a. | Quantity of Construction & Demolition waste and its management. | 40kg/m ² of construction waste is expected to be generated, quantifying the total construction waste to 4,569Tones. Waste during construction activity relates to excessive cement mix or concrete left after work is over, rejection caused due to change in design or wrong workmanship etc, concrete appears in two forms in the waste. Structural elements of building have reinforced concrete, while foundations have mass non-reinforced concrete. The construction waste shall be segregated at the project site into recyclable and non-recyclable waste. The recyclable waste shall be sold to local recyclers and the non-recyclable waste shall be disposed to authorized disposal sites identified as per the Construction and Demolition Waste Management Rules 2016. Other miscellaneous material during construction that arise as waste includes, glass, plastic material, general refuse, scrap metal, cardboard, plastics etc. will be segregated and disposed to authorized recyclers. |
| b. | Quantity of Solid waste generation and mode of Disposal other than C&D. | 20kg/day of solid waste shall be disposed through MCC waste management contractors |
| II. Operational Phase | | |
| a. | Quantity of Biodegradable waste generation and mode of Disposal as per norms (Capacity of OWC & Area required) | Quantity: 467kg/day Mode of Disposal: Composed within the project campus Capacity of facility: 500kg/day Area required: 60Sq.m |
| b. | Quantity of Non- Biodegradable waste generation and mode of Disposal as per norms | Quantity: 701kg/day Mode of Disposal: segregated and sold to Local Authorized Recyclers Capacity of facility: 710kg/day Area required: 35Sq.m |
| c. | Quantity of Hazardous Waste generation and mode of Disposal as per norms | Quantity: 500 kg/annum Mode of Disposal: Will be handed over to KSPCB Authorized Agencies Area required: 5Sq.m |
| d. | Quantity of E waste generation and mode of Disposal as per norms | Quantity: 50 kg/annum Mode of Disposal: Will be handed over to KSPCB Authorized Agencies Area required: 5Sq.m |
| 19 POWER | | |
| a. | Total Power Requirement - Operational Phase | 2,681KVA |
| b. | Numbers of DG set and capacity in KVA for Standby Power Supply | 500 KVA x 3 Nos. + 625 KVA x 1No. |
| c. | Details of Fuel used for DG Set | High Speed Diesel (HSD) |
| d. | Energy conservation plan and Percentage of savings including plan for utilization of solar energy as per | a.Timer based External Lights b.BEE Star rated electromechanical systems shall be used in the development. |

| | | | |
|----|----|--|--|
| | | ECBC 2007 | c.Solar Water Heating systems for top 2 floor dwelling units d.Use of HF ballast for lighting e.Use of LED light fittings f.Building Orientation; Cross Ventilation. Total Savings – 23.8% |
| 20 | | PARKING | |
| | a. | Parking Requirement as per norms | 923 Nos. |
| | b. | Level of Service (LOS) of the connecting Roads as per the Traffic Study Report | Towards Hosur Road - B Towards Sarjapur Road-B |
| | c. | Internal Road width (RoW) | 8m |
| 21 | | CER Activities | Implementation of EMP Tree Plantation in the Lake Area |
| 22 | | EMP (Details and capital cost & recurring cost) | Construction Phase: Capital Investment – 80.75 Lakhs Recurring Cost – 7.5 Lakhs/ Annum Operation Phase: Capital Investment – 178.15 Lakhs Recurring Cost – 48.25 Lakhs/ Annum |

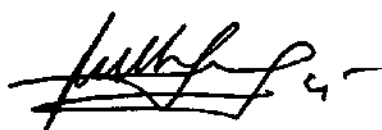

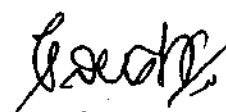

The Committee initially sought details regarding present site condition as per KML. Proponent informed the Committee that the proposed area is a vacant land with a temporary marketing office & security shed which will be removed and no construction work has been started by Proponent and the Committee noted the clarification.

The proposal is for construction of a residential apartment project in an area demarcated as residential use as per RMP of BDA 2015.

The Committee during appraisal sought details regarding water body, foot kharab and drains as per village map, HT line and provisions made for harvesting rainwater in the proposed area. The Proponent informed the Committee that for the water body in east, 30mtr buffer is proposed from the edge of water body and for the secondary drain in southern & northern sides, 25mtr buffer is proposed from the center of drain and for the tertiary drain, they have obtained reroute order from DC vide order dated 17.01.2025 and has proposed 15mtr buffer from center to the rerouted drain and had obtained reroute order from DC on 15.01.2025 for reroute of foot kharab and accordingly had proposed reroute of foot kharab with free public access. Regarding HT line Proponent informed that they had proposed buffer of 17.5mtr on either sides. Regarding harvesting rainwater, the Proponent informed the Committee that they have proposed rainwater storage structure of 390 cum capacity for runoff from rooftop, hardscape and landscape areas and 21 recharge pits within the site area. The Committee noted the same.

Further the Committee informed the Proponent to incorporate tertiary treatment facility to treat waste water to urban re-use standards, to install aerators for individual units for conservation of water, to utilize minimum of 50% of roof area for solar power generation, to use sustainable building materials in the proposed project and to harvest excess rainwater in the project site, to which the Proponent agreed.

The Proponent agreed to grow 1300 trees in the project site area. The Proponent has collected baseline data of air, water, soil and noise and informed that all were within the permissible limits. The Proponent committed to take precautionary measures during and after construction to maintain the environmental parameters within permissible limits in the proposed project and agreed to comply with the ECBC and NBC guidelines for the proposed construction and adhere to the by-laws stipulated by the governing authority for buffers and setbacks.

The Committee noted that the baseline parameters were found to be within permissible limits and informed the Proponent to leave buffers/setbacks as per zoning regulations and to harvest maximum rainwater in the proposed project area.

The Committee after appraisal decided to recommend the proposal to SEIAA for issue of EC with following consideration,

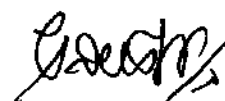

1. To provide tertiary treatment to the waste water to bring it to potable standards. Provide the additional final filtration & collection tank to facilitate frequent cleaning the tank, in order to avoid the deposition of residual & colloidal organic matters in treated water.
2. To utilize minimum of 50% of roof area for solar power generation.
3. To provide minimum 20% of total parking with e-vehicle charging facility.
4. To provide recharge tank of capacity 390 cum & 21 recharge pits.
5. To grow 1300 trees in the early stage before taking up of construction.
6. To provide bell mouth entry and exit in the proposed project.
7. To incorporate catalytic converter for DG sets with dual fuel option.
8. To carry out community recharge of bore wells in the vicinity of the site.
9. To construct lead of drains till the nearest natural drains/water body for handling excess water.
10. To consider the CER activity submitted by proponent with a recommendation to write to the concerned recipient about the CER activity.
11. To install energy efficient plumbing system for individual units to conserve water,
12. To obtain necessary permission for construction of culvert/bridge on drain and to provide free public access in foot kharab area.

Action: Member Secretary, SEAC to forward the proposal to SEIAA for further necessary action

326.2.24 Residential Development Project at Singanayakanahalli Village, Yelahanka Hobli, Bengaluru North Taluk, Bengaluru Urban District by M/s.CKPC Residences Pvt. Ltd. – Online Proposal No.SIA/KA/INFRA2/525440/2025(SEIAA 70 CON 2025)

The proposal is for construction of residential & commercial building in an area earmarked for agriculture use as per BIAAPA zoning regulations, for which the Proponent informed that they have obtained change of land use to residential from BIAAPA on 20.02.2025.

The Committee during appraisal sought details regarding drain as per village map, source of water during operational phase and provisions made for harvesting rainwater in the proposed area. The

Proponent informed the Committee that for the tertiary drain in west, 15mtr buffer from center on either sides of drain is proposed. Regarding the source of water during operation that Proponent informed that they have conducted hydrogeology study by NABET accredited consultant V R Madhusudhan, informing that the total water requirement is 346 KLD out of which about 230 KLD of fresh water requirement would be met from 4 proposed borewells in the proposed project area, only after obtaining NoC from KGWA for digging and extraction of ground water. In addition, they have proposed sufficient rainwater harvesting structures to utilize the rainfall within the site area justifying that drawing 230 KLD of ground water will not have significant impact on ground water. Regarding harvesting rainwater, the Proponent has informed the Committee that they have proposed rainwater storage structures with total capacity of 570 Cum for runoff from rooftop, hardscape and landscape areas along with 31 recharge pits within the site area.

Further the Committee informed the Proponent to incorporate tertiary treatment facility to treat waste water to urban re-use standards, energy efficient plumbing system for individual units to conserve water, to utilize minimum of 50% of roof area for solar power generation, to use sustainable building materials in the proposed project and to harvest excess rainwater in the project site, to which the Proponent agreed.

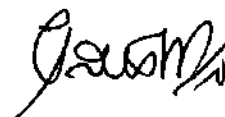

The Proponent agreed to grow 385 trees in the project site area. The Proponent has collected baseline data of air, water, soil and noise and informed that all were within the permissible limits. The Proponent committed to take precautionary measures during and after construction to maintain the environmental parameters within permissible limits in the proposed project and agreed to comply with the ECBC and NBC guidelines for the proposed construction and adhere to the by-laws stipulated by the governing authority for buffers and setbacks.

The Committee noted that the baseline parameters were found to be within permissible limits and informed the Proponent to leave buffers/setbacks as per zoning regulations and to harvest maximum rainwater in the proposed project area.

The Committee after appraisal decided to recommend the proposal to SEIAA for issue of EC with following considerations,

1. The source of water during operation phase should be as specified in the CGWA hydrogeology report and to provide tertiary treatment to the wastewater to bring it to urban re-use standards. Provide the additional final filtration & collection tank to facilitate frequent cleaning the tank, in order to avoid the deposition of residual & colloidal organic matters in treated water.
2. To utilize minimum of 50% of roof area for solar power generation.
3. To provide minimum 20% of total parking with e-vehicle charging facility.
4. To provide rainwater storage structures with total capacity of 570 cum and 31 recharge pits.
5. To grow 375 trees in the early stage before taking up of construction within the site area and to grow additional 1,000 trees in nearby areas.
6. To carry out community recharge of bore wells in the vicinity of the site.
7. To construct lead of drains till the nearest natural drains/water body for handling excess water.
8. To incorporate catalytic converter for DG sets with dual fuel option.
9. To install energy efficient plumbing system for individual units to conserve water,
10. To provide bell mouth entry/exist from the approach road
11. To consider the CER activity submitted by proponent with a recommendation to write to the concerned recipient about the CER activity.

Action: Member Secretary, SEAC to forward the proposal to SEIAA for further necessary action.

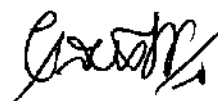

326.2.25 Building Stone Quarry Project at Sy.No.110 of Thylagere village, Devanahalli Taluk, Bangalore Rural District (1-32 Acres) by Sri M. N. Lakshmana Murthy – Online Proposal No.SIA/KA/MIN/439955/2023 (SEIAA 84 MIN 2025)

| 12 | EMP Budget | Rs. 37.24 lakhs (Capital Cost) & Rs. 7.91 lakhs (Recurring cost) | | | | | | | | | | | | |
| 13 | Quarry plan | 24.06.2023 | | | | | | | | | | | | |
| 14 | Cluster certificate | 31.06.2023 | | | | | | | | | | | | |
| 15 | Audit Report | 09.01.2025 | | | | | | | | | | | | |
| 16 | CCR from KSPCB | 04.10.2024 | | | | | | | | | | | | |

The proposal is for expansion of building stone quarry, for which EC was issued earlier by SEIAA on 16.11.2015 and lease is in effect from 17.12.2015 with QL 2683. The Proponent submitted an audit report till 2023-24 certified by DMG dated 09.01.2025 and CCR from KSPCB dated 04.10.2024. The Committee noted that regarding 7.5mtr buffer, KSPCB had informed that the information maybe obtained from DMG, for which Proponent informed that they have obtained common boundary working permission from DGMS vide letter dated 28.03.2023. The Committee noted the details.

As per the cluster sketch there are 17 leases in radius of 500 mtr from the said lease out of which 4 leases are exempted as leases were granted prior to 09.09.2013 and 8 leases are exempted as ECs were issued prior to 15.01.2016 and total area of remaning leases including the applied lease is 10-32 Acres and hence the project is categorized as B2. Further, Proponent informed that the lease area was decrease from 3-00Acres to 1-32Acres due to survey and demarcation by DMG in reference to earlier EC.

There is an existing cart track road to a length of 620meters connecting the lease area to the all-weather black topped road. The Committee informed that the mining operation should be commenced after asphaltting the approach road to the quarry and road connecting crusher as per IRC norms and to grow trees all along the approach road during the first year of operation, for which the Proponent agreed.

The Proponent has collected baseline data of air, water, soil and noise which are all within the permissible limits. The Proponent informed that all mitigative measures will be taken to ensure that the parameters will be maintained within the permissible limits.

The Committee noted that the baseline parameters are found to be within permissible limits and agreed with the approved quarry plan with proved mineable reserve of 15,87,031 tons (including waste) and estimated the life of the quarry to be 13 years.

The Committee after discussion decided to recommend the proposal to SEIAA for issue of Environmental Clearance for an annual production of 1,22,449 tons/ Annum (including waste), with following consideration,

1. To asphalt the approach road to the quarry and the road connecting crusher as per IRC norms.
2. To grow trees all along the approach road & buffer zone during the first year of operation.
3. To carry out regular health checkup for the workers in the nearby Hospital.
4. To provide metal sheet berricade to an height of minimum 3 mtrs around the working area.
5. To take necessary measures to arrest noise and vibration from the quarry area.
6. To consider the CER activity submitted by proponent with a recommendation to write to the concerned recipient about the CER activity.
7. To comply with the observation in CCR issued by KSPCB.
8. To maintain buffer area allround the lease area as per the DMG approved mining plan.

Action: Member Secretary, SEAC to forward the proposal to SEIAA for further necessary action.

326.2.26 Residential Apartment with club house "Prestige Southern Star" Project at Begur Village & Hobli, Bengaluru South Taluk, Bengaluru Urban District by M/s. Prestige Acres Pvt. Ltd. – Online Proposal No.SIA/KA/INFRA2/519768/2025(SEIAA 04 CON 2025)

| 22 | EMP (Details and capital cost & recurring cost) | <p>Construction phase</p> <ul style="list-style-type: none"> • Capital cost: 44.0 lakhs • Recurring cost: 5.1 lakhs <p>Operation phase</p> <ul style="list-style-type: none"> • Capital cost: 1892.7 lakhs • Recurring cost: 148 lakhs |

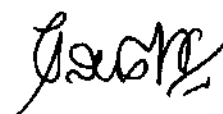

The Committee initially sought details regarding present site condition as per KML. Proponent informed the Committee that the proposed area is a vacant land with a temporary marketing office & security shed which will be removed and no construction work has been started by Proponent and the road seen as per google map is not part of the proposed development and the road area was relinquished to BDA on 11.11.2024. The Committee noted the clarification. For the proposed activity SEAC had issued ToR on 10.01.2025.

The proposal is for construction of a residential apartment project in an area demarcated residential use as per RMP of BDA 2015.

The Committee during appraisal sought details regarding water drain & foot kharab as per village map, road as per RMP of BDA and provisions made for harvesting rainwater in the proposed area. The Proponent informed the Committee that the tertiary drain and foot kharab is rerouted as per DC Order dated 16.09.2023 and for the rerouted tertiary drain buffer of 15mt from the center is proposed and free public access for the rerouted foot kharab area. Regarding road as per zoning map, Proponent informed that the road has been realigned as per GO dated 04.02.2012. Regarding harvesting rainwater, the Proponent informed the Committee that they have proposed rainwater storage structure of 1075 cum capacity for runoff from rooftop, hardscape and landscape areas along with 70 recharge pits & 6 recharge wells within the site area. The Committee noted the same.

Further the Committee informed the Proponent to incorporate tertiary treatment facility to treat waste water to urban re-use standards, to install aerators for individual units for conservation of water, to utilize minimum of 50% of roof area for solar power generation, to use sustainable building materials in the proposed project and to harvest excess rainwater in the project site, to which the Proponent agreed.

The Proponent agreed to grow 3450 trees in the project site area. The Proponent has collected baseline data of air, water, soil and noise and informed that all were within the permissible limits. The Proponent committed to take precautionary measures during and after construction to maintain the environmental parameters within permissible limits in the proposed project and agreed to comply with

the ECBC and NBC guidelines for the proposed construction and adhere to the by-laws stipulated by the governing authority for buffers and setbacks.

The Committee noted that the baseline parameters were found to be within permissible limits and informed the Proponent to leave buffers/setbacks as per zoning regulations and to harvest maximum rainwater in the proposed project area.

The Committee after appraisal decided to recommend the proposal to SEIAA for issue of EC with following consideration,

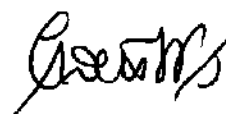

1. To provide tertiary treatment to the waste water to bring it to potable standards. Provide the additional final filtration & collection tank to facilitate frequent cleaning the tank, in order to avoid the deposition of residual & colloidal organic matters in treated water.
2. To utilize minimum of 50% of roof area for solar power generation.
3. To provide minimum 20% of total parking with e-vehicle charging facility.
4. To provide recharge tank of capacity 770x2 cum & 59 deep recharge pits.
5. To grow 3450 trees in the early stage before taking up of construction.
6. To provide bell mouth entry and exit in the proposed project.
7. To incorporate catalytic converter for DG sets with dual fuel option.
8. To consider the CER activity submitted by proponent with a recommendation to write to the concerned recipient about the CER activity.
9. To install energy efficient plumbing system for individual units to conserve water,
12. To construct STP's away from the drains.
13. To provide free public access in kharab area.

Action: Member Secretary, SEAC to forward the proposal to SEIAA for further necessary action.

326.2.27 Residential Apartment Project at Yalachanayakanapura Village, Kasaba Hobli, Hosakote Taluk, Bangalore Rural District by M/s. SSV Developers – Online Proposal No.SIA/KA/INFRA2/521579/2025 (SEIAA 71 CON 2025)

The proposal is for construction of residential apartment project in an area earmarked for residential use as per Hoskote Planning Authority.

The Committee during appraisal sought details regarding cart track & drain as per village map, road as per zoning map, source of water during operational phase and provisions made for harvesting rainwater in the proposed area. The Proponent informed the Committee that they have obtained reroute order from DC on 01.08.2024 and accordingly had rerouted the cart track and the drain in northern side is outside the buffer zone. Regarding the road as per zoning map is left as it is in the proposed plan. Regarding source of water during operation, Proponent informed that they have conducted hydrogeology study by CGWA accredited consultant Dr. K R Sooryanarayan, informing that the total water requirement is 141 KLD out of which about 94 KLD of fresh water requirement would be met from 3 proposed borewells in the proposed project area, only after obtaining NoC from KGWA for digging & extraction of ground water. In addition, they have proposed sufficient rainwater harvesting structures to utilize the rainfall within the site area justifying that drawing 94 KLD of ground water will not have adverse impact on ground water. Regarding harvesting rainwater, the Proponent informed the Committee that they have proposed rainwater storage structures of 2x100 cum for runoff from rooftop, hardscape and landscape areas along with 15 recharge pits within the site area. The Committee noted the same.

Further the Committee informed the Proponent to incorporate tertiary treatment facility to treat waste water to urban re-use standards, energy efficient plumbing system for individual units to conserve water, to utilize minimum of 50% of roof area for solar power generation, to use sustainable building materials in the proposed project and to harvest excess rainwater in the project site, to which the Proponent agreed.

The Proponent agreed to grow 135 trees in the project site area. The Proponent has collected baseline data of air, water, soil and noise and informed that all were within the permissible limits. The Proponent committed to take precautionary measures during and after construction to maintain the environmental parameters within permissible limits in the proposed project and agreed to comply with the ECBC and NBC guidelines for the proposed construction and adhere to the by-laws stipulated by the governing authority for buffers and setbacks.

The Committee noted that the baseline parameters were found to be within permissible limits and informed the Proponent to leave buffers/setbacks as per zoning regulations and to harvest maximum rainwater in the proposed project area.

The Committee after appraisal decided to recommend the proposal to SEIAA for issue of EC with following considerations,

1. The source of water during operation phase should be as specified in the CGWA hydrogeology report and to provide tertiary treatment to the wastewater to bring it to urban re-use standards. Provide the additional final filtration & collection tank to facilitate frequent cleaning the tank, in order to avoid the deposition of residual & colloidal organic matters in treated water.
2. To utilize minimum of 50% of roof area for solar power generation.
3. To provide minimum 20% of total parking with e-vehicle charging facility.
4. To provide rainwater storage structure of 2x100 cum and 15 recharge pits.
5. To grow 135 trees in the early stage before taking up of construction.
6. To carry out community recharge of bore wells in the vicinity of the site.
7. To construct lead of drains till the nearest natural drains/water body for handling excess water.
8. To incorporate catalytic converter for DG sets with dual fuel option.

9. To install energy efficient plumbing system for individual units to conserve water,
10. To incorporate additional dust control measures during construction.
11. To provide bell mouth entry/exist from the approach road
12. Excess treated water should be utilized with in the site area.
13. To consider the CER activity submitted by proponent with a recommendation to write to the concerned recipient about the CER activity.

Action: Member Secretary, SEAC to forward the proposal to SEIAA for further necessary action.

326.2.28 Ordinary Building Stone Quarry Project located at Aneguddi Village, Ramdurg Taluk, Belagavi District (2-00 Acres) by M/s. Bekam Infra Projects Pvt. Ltd. / Atluri Badrinath Chowdari- Online Proposal No.SIA/KA/MIN/522458/2025 (SEIAA 86 MIN 2025)

| 17 | AQP | 09.01.2025 | | | | | | | | | | | | | | |

The Committee sought clarification with respect to the present site condition based on the KML submitted by Proponent. The Proponent informed the Committee that the proposed area is untouched and no mining has been carried out by Proponent. The Committee noted the clarification.

As per the cluster sketch there is no lease in a radius of 500 mtr from the said lease and the total area of the present lease is 2-00 Acres and hence the project is categorized as B2.

Considering the existing cart track road of 1140 meters connecting lease area to the all-weather black topped road, the Committee informed that the quarrying operation needs to be commenced after asphaltting the approach road to the quarry and road connecting crusher as per IRC standard norms and should grow trees all along the approach road in first year of operation, for which the Proponent agreed.

The Proponent has collected baseline data of air, water, soil and noise which are all within the permissible limits. The Proponent informed that all mitigative measures will be taken to ensure that the parameters will be maintained within the permissible limits.

The Committee noted that the baseline parameters are found to be within permissible limits and agreed with the approved quarry plan, with proved mineable reserve of 6,27,147 Tonnes (including waste) and estimated the life of mine to be 15 years.

The Committee after discussion decided to recommend the proposal to SEIAA for issue of Environmental Clearance for an annual production of 41,585 Tons/annum (including waste), with following consideration,

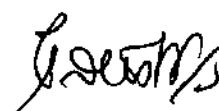

1. To asphalt the approach road to the quarry as per IRC norms.
2. To grow trees all along the approach road & buffer zone during the first year of operation.
3. To carry out regular health checkup for the workers mainly for audiometry & spirometry from the nearby Hospital.
4. To provide metal sheet berricade to an height of minimum 3 mtrs around the working area.
5. To take necessary measures to arrest noise and vibration from the quarry area.
6. To consider the CER activity submitted by Proponent with a recommendation to write to the concerned recipient about the CER activity.
7. To maintain buffer area allround the lease area as per the DMG approved mining plan.

Action: Member Secretary, SEAC to forward the proposal to SEIAA for further necessary action.

326.2.29 Building Stone (M-Sand) Quarry Project at Hulikatti Village, Belagavi Taluk, Belagavi District (8-18 Acres) by M/s. Aaditya Resources / Sri Shegar Raghavan- Online Proposal No.SIA/KA/MIN/517899/2025 (SEIAA 65 MIN 2024)

| 17 | AQP | 19.04.2024 | |
| 18 | PH | 29.11.2024 | |

The Committee initially sought clarification with respect to the present site condition based on the KML submitted by Proponent. The Proponent informed that as per DMG letter dated 29.06.2024, there is a pit in an area of 10G now filled with water and in area of 1Acre soil is removed for agriculture purpose and stocked within the site area and working had been carried out by Proponent. The Committee noted the clarification of Proponent as per KML and appraised the project.

The proposal is for building stone quarry for which SEIAA had issued ToR on 02.09.2024 and public hearing was conducted on 29.11.2024, where opinion/requests of eight people had been recorded in public hearing report.

Considering the existing cart track road to a length of 600 mtrsconnecting lease area to the all-weather black topped road, the Committee informed that the quarrying operation needs to be commenced after asphaltting the approach road to the quarry and road connecting the crusher as per IRC standard norms and should grow trees all along the approach road in first year of operation, for which the Proponent agreed.

The Proponent has collected baseline data of air, water, soil and noise which are all within the permissible limits. The Proponent informed that all mitigative measures will be taken to ensure that the parameters will be maintained within the permissible limits.

The Committee noted that the baseline parameters are found to be within permissible limits and agreed with the approved quarry plan, with proved mineable reserve of 18,42,106 tonnes (including waste) and estimated the life of mine to be 12 years.

The Committee after discussion decided to recommend the proposal to SEIAA for issue of Environmental Clearance for maximum annual production of 1,57,895 Tonnes/Annum (including waste), with following consideration,

1. To asphalt the approach road to the quarry & road connecting the crusher as per IRC norms.
2. To grow trees all along the approach road & buffer zone during the first year of operation.
3. To carry out regular health checkup for the workers in the nearby Hospital.
4. To provide metal sheet berricade to an height of minimum 3 mtrs around the working area.
5. To take necessary measures to arrest noise and vibration from the quarry area.
6. To consider the CER activity submitted by proponent with a recommendation to write to the concerned recipient about the CER activity.
7. To adhere to the compliance given in response to the opinion of public addressed during public hearing.
8. To maintain buffer area allround the lease area as per the DMG approved mining plan.

Action: Member Secretary, SEAC to forward the proposal to SEIAA for further necessary action.

326.2.30 Building Stone Quarry Project at Hulikatti Village, Belagavi Taluk & Belagavi District (3-29 Acres) by M/s. Om Stone Crusher Industries/Sri Mahadev M Muchandi- Online Proposal No.SIA/KA/MIN/517916/2025 (SEIAA 66 MIN 2024)

| 16 | Notification | 06.04.2024 |

The Committee initially sought clarification with respect to the present site condition based on the KML submitted by Proponent. The Proponent informed that as per S report, soil was removed for own agriculture purpose. Further, Proponent informed that no working had been carried out till date. The Committee noted the clarification of Proponent as per KML and appraised the project.

The proposal is for building stone quarry for which SEIAA had issued ToR on 16.08.2024 and public hearing was conducted on 29.11.2024, where opinion/requests of eight people had been recorded in public hearing report.

Considering the existing cart track road to a length of 500 mtrsconnecting lease area to the all-weather black topped road, the Committee informed that the quarrying operation needs to be commenced after asphaltting the approach road to the quarry and road connecting the crusher as per IRC standard norms and should grow trees all along the approach road in first year of operation, for which the Proponent agreed.

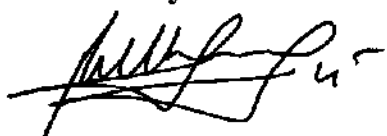

The Proponent has collected baseline data of air, water, soil and noise which are all within the permissible limits. The Proponent informed that all mitigative measures will be taken to ensure that the parameters will be maintained within the permissible limits.

The Committee noted that the baseline parameters are found to be within permissible limits and agreed with the approved quarry plan, with proved mineable reserve of 7,31,579 tonnes (including waste) and estimated the life of mine to be 14 years.

The Committee after discussion decided to recommend the proposal to SEIAA for issue of Environmental Clearance for maximum annual production of 52,668 Tonnes/Annum (including waste), with following consideration,

1. To asphalt the approach road to the quarry & road connecting the crusher as per IRC norms.
2. To grow trees all along the approach road & buffer zone during the first year of operation.
3. To carry out regular health checkup for the workers in the nearby Hospital.
4. To provide metal sheet berricade to an height of minimum 3 mtrs around the working area.
5. To take necessary measures to arrest noise and vibration from the quarry area.
6. To consider the CER activity submitted by proponent with a recommendation to write to the concerned recipient about the CER activity.
7. To adhere to the compliance given in response to the opinion of public addressed during public hearing.
8. To maintain buffer area allround the lease area as per the DMG approved mining plan.

Action: Member Secretary, SEAC to forward the proposal to SEIAA for further necessary action.

326.2.31 Building Stone Quarry Project at Marikatti Village, Bailhongal Taluk & Belagavi District (5-00 Acres) (2.37 Ha) by M/s. Vardhaman Stone Crushing/Sri Rupesh Gundkal – Online Proposal No.SIA/KA/MIN/518210/2025 (SEIAA 85 MIN 2025)

| 17 | AQP | 09.01.2025 | | | | | | | | | | | | | | |

The Committee sought clarification with respect to the present site condition based on the KML submitted by Proponent. The Proponent informed the Committee that in DMG approved quarry plan, it

has mentioned that no mining has been carried out for the applied area. The Committee noted the clarification of Proponent as per KML and appraised the project.

As per the cluster sketch there are two leases in radius of 500 mtr from the said lease and the total area of the leases including the applied lease is 11-34 Acres and hence the project is categorized as B2.

Considering the existing cart track road to a length of 150 meters connecting lease area to the all-weather black topped road, the Committee informed that the quarrying operation needs to be commenced after asphaltting the approach road to the quarry and road connecting crusher as per IRC standard norms and should grow trees all along the approach road in first year of operation, for which the Proponent agreed.

The Proponent has collected baseline data of air, water, soil and noise which are all within the permissible limits. The Proponent informed that all mitigative measures will be taken to ensure that the parameters will be maintained within the permissible limits.

The Committee noted that the baseline parameters are found to be within permissible limits and agreed with the approved quarry plan, with proved mineable reserve of 19,35,552Tonns(including waste) and estimated the life of mine to be 11 years.

The Committee after discussion decided to recommend the proposal to SEIAA for issue of Environmental Clearance for an annual production of 1,78,672 Tonns/annum (including waste), with following consideration,

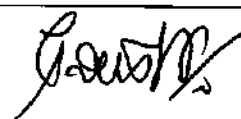

1. To asphalt the approach road to the quarry as per IRC norms.
2. To grow trees all along the approach road & buffer zone during the first year of operation.
3. To carry out regular health checkup for the workers mainly for audiometry & spirometry from the nearby Hospital.
4. To take necessary measures to minimise noise and air pollution from the quarry area.
5. To provide metal sheet berricade to an height of minimum 3 mtrs around the working area.
- 6.To consider the CER activity submitted by Proponent with a recommendation to write to the concerned recipient about the CER activity.
7. To maintain buffer area allround the lease area as per the DMG approved mining plan.

Action: Member Secretary, SEAC to forward the proposal to SEIAA for further necessary action.

326.2.32 Residential Apartment Club House and Commercial Building Project at Kaggalipura Village, Uttarahalli Hobli, Bengaluru South Taluk, Bengaluru Urban District by M/s. Sri Sumeru Realty Pvt. Ltd. – Online Proposal No.SIA/KA/INFRA2/522212/2025 (SEIAA 72 CON 2025)

The proposal is for construction of residential & commercial building in an area earmarked for residential use as per Kanakapura Planning Authority. Regarding the present site condition, Proponent informed that no construction activities have started and the existing old buildings to be demolished and the debris of about 9 tons to be handled within the site area.

The Committee during appraisal sought details regarding drain as per village map, HT line and road as per zoning map, source of water during operational phase and provisions made for harvesting rainwater in the proposed area. The Proponent informed the Committee that for the primary drain in north, 9mtr buffer from edge of drain is proposed. Regarding HT line & road as per zoning map, Proponent informed that they have proposed buffer of 17.5mtrs on either sides of HT line and road area as per zoning map is retained as it is in the proposed plan. Regarding the source of water during operation that Proponent informed that they have conducted hydrogeology study by CGWA accredited consultant Dr. K R Sooryanarayan, informing that the total water requirement is 386 KLD out of which about 256 KLD of fresh water requirement would be met from 9 proposed borewells in the proposed project area, only after obtaining NoC from KGWA for digging and extraction of ground water. In addition, they have proposed sufficient rainwater harvesting structures to utilize the rainfall within the site area justifying that drawing 256 KLD of ground water will not have significant impact on ground water. Regarding harvesting rainwater, the Proponent has informed the Committee that they have proposed rainwater storage structures of 150Cum & 50cum for runoff from rooftop, hardscape and landscape areas along with 50 recharge pits within the site area.

Further the Committee informed the Proponent to incorporate tertiary treatment facility to treat waste water to urban re-use standards, energy efficient plumbing system for individual units to conserve water, to utilize minimum of 50% of roof area for solar power generation, to use sustainable building materials in the proposed project and to harvest excess rainwater in the project site, to which the Proponent agreed.

The Proponent agreed to grow 580 trees in the project site area. The Proponent has collected baseline data of air, water, soil and noise and informed that all were within the permissible limits. The Proponent committed to take precautionary measures during and after construction to maintain the environmental parameters within permissible limits in the proposed project and agreed to comply with

the ECBC and NBC guidelines for the proposed construction and adhere to the by-laws stipulated by the governing authority for buffers and setbacks.

The Committee noted that the baseline parameters were found to be within permissible limits and informed the Proponent to leave buffers/setbacks as per zoning regulations and to harvest maximum rainwater in the proposed project area.

The Committee after appraisal decided to recommend the proposal to SEIAA for issue of EC with following considerations,

1. The source of water during operation phase should be as specified in the CGWA hydrogeology report and to provide tertiary treatment to the wastewater to bring it to urban re-use standards. Provide the additional final filtration & collection tank to facilitate frequent cleaning the tank, in order to avoid the deposition of residual & colloidal organic matters in treated water.
2. To utilize minimum of 50% of roof area for solar power generation.
3. To provide minimum 20% of total parking with e-vehicle charging facility.
4. To provide rainwater storage structure of 150cum, 50cum and 50 recharge pits.
5. To grow 580 trees in the early stage before taking up of construction.
6. To carry out community recharge of bore wells in the vicinity of the site.
7. To construct lead of drains till the nearest natural drains/water body for handling excess water.
8. To incorporate catalytic converter for DG sets with dual fuel option.
9. To install energy efficient plumbing system for individual units to conserve water,
10. To provide bell mouth entry/exist from the approach road
11. To consider the CER activity submitted by proponent with a recommendation to write to the concerned recipient about the CER activity.

Action: Member Secretary, SEAC to forward the proposal to SEIAA for further necessary action.

With Permission of the chair

326.2.33 Ornamental (Grey Granite) and Building Stone Quarry Project at Purabyrenahalli Village, Shidlaghatta Taluk, Chikkaballapura District (2-34 Acres) by Sri Shantha D – Online Proposal No.SIA/KA/MIN/518931/2025 (SEIAA 508 MIN 2019)

| 14 | Notification | 10.06.2024 |

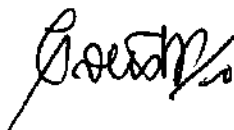

The proposal is for issue of amendment to the EC issued by SEIAA considering the DMG Notification dated 10.06.2024. The Proponent informed the Committee that they earlier had obtained EC from SEIAA on 19.08.2019 for building stone and lease was granted on 19.02.2021 with QL No.274 and now had proposed grey granite along with building stone and accordingly had submitted audit report till 2023-24 issued by DMG on 02.07.2024. The Committee noted the details.

The Committee as per the approved quarry plan considering the proved mineable reserve of 3,02,670 tons (including waste) estimated the life of mine to be 10 years by considering maximum annual production of 33,210 tons/annum (including waste).

The Committee after discussion decided to recommend the proposal to SEIAA to issue amendment of EC with all other conditions remaining same as per the EC issued by SEIAA on 19.08.2019, with following consideration,

1. To grow trees all along the approach road & buffer zone during the first year of operation.
2. To carry out regular health checkup for the workers in the nearby Hospital.
3. To provide metal sheet barricade to an height of minimum 3 mtrs around the working area.
4. To take necessary measures to arrest noise and vibration from the quarry area.
5. To maintain buffer all round the lease area.

Action: Member Secretary, SEAC to forward the proposal to SEIAA for further necessary action.

DEIAA proposals for re-appraisal as per MoEF&CC OM 28.04.2023

326.2.1 Building Stone Quarry Project located at Aikala in Mangalore Taluk, Dakshina Kannada District (1.50 Acres) by Sri Dinesh T – Online Proposal No.SIA/KA/MIN/511397/2025 (SEIAA 80 MIN 2025 (D))

| 5 | Type of Land [Forest, Government Revenue, Gomal, Private / Patta, Other] | Patta | | | | | | | | | | | | | | |
| 6 | Area in Acres | 1.50 Acres | | | | | | | | | | | | | | |
| 7 | Annual Production (Metric Ton/Cum) Per Annum | 12,122 Tonnes/annum (including waste) | | | | | | | | | | | | | | |
| 8 | Project Cost (Rs. In Crores) | Rs. 0.20 Crores (Rs.20 Lakhs) | | | | | | | | | | | | | | |
| 9 | Proved Quantity of mine/ Quarry-Cu.m/Ton | 1,40,718 Tonnes (including waste) | | | | | | | | | | | | | | |
| 10 | Permitted Quantity Per Annum - Cu.m / Ton | 11,880 Tonnes/annum (excluding waste) | | | | | | | | | | | | | | |
| 11 | CER Activities: Propose take up 100 No. of additional plantation on either side of the approach road from quarry location to Aikala Village Road and Govt. School | | | | | | | | | | | | | | | |
| 12 | EMP Budget | Rs. 7.25 lakhs (Capital Cost) & Rs.2.17 lakhs (Recurring cost) | | | | | | | | | | | | | | |
| 13 | Forest NOC | 11.12.2025 | | | | | | | | | | | | | | |
| 14 | Quarry plan | 01.12.2022 | | | | | | | | | | | | | | |
| 15 | Cluster certificate | 30.12.2024 | | | | | | | | | | | | | | |
| 16 | Audit Report | 06.11.2024 | | | | | | | | | | | | | | |

The proposal is for appraisal / re-appraisal of the EC issued by DEIAA as per the directions of Hon'ble NGT in OA 142/2022 and MoEF&CC OM dated 28.04.2023.

The Proponent had submitted compliance to MoEF&CC OM dated 28.04.2023 and stated that the procedure as per MoEF&CC OM with SoP dated 15.01.2024 has been followed.

As there is no change in proposed production & area with reference to EC issued by DEIAA on 09.06.2017, Proponent has submitted self certified compliance to the EC conditions and has submitted DMG certified audit report till 2023-24. The Committee noted the details.

As per the cluster sketch there are 3 leases in radius of 500 mtr from the said lease out of which 1 lease is exempted as lease was granted prior to 09.09.2013 and total area of remaining leases including the applied lease is 7.71 Acres and hence the project is categorized as B2.

Considering the existing cart track road to a length of 1200 meters connecting lease area to the all-weather black topped road, the Committee informed that the quarrying operation needs to be commenced after asphaltting the approach road to the quarry and the road connecting the crusher as per

IRC standard norms and should grow trees all along the approach road in first year of operation, for which the Proponent agreed.

The Proponent has collected baseline data of air, water, soil and noise which are all within the permissible limits. The Proponent informed that all mitigative measures will be taken to ensure that the parameters will be maintained within the permissible limits.

The Committee noted that the baseline parameters are found to be within permissible limits and agreed with the approved quarry plan, with proved mineable reserve of 1,40,718 Tones (including waste) and estimated the life of mine 12 years.

The Committee after discussion decided to recommend the proposal to SEIAA for issue of Environmental Clearance for an annual production of 12,122 Tonnes/annum (including waste), with following consideration,

1. To ensure the motarable approach road to the quarry and the road connecting the crusher and sprinkle water as and when required..
2. To grow trees all along the approach road & buffer zone during the first year of operation.
3. To carry out regular health checkup for the workers mainly for audiometry & spirometry from the nearby Hospital.
4. To take necessary measures to minimise noise and air pollution from the quarry area.
5. To provide metal sheet berricade to an height of minimum 3 mtrs around the working area.
6. To consider the CER activity submitted by Proponent with a recommendation to write to the concerned recipient about the CER activity.
7. To maintain buffer area allround the lease area as per the DMG approved mining plan.

Action: Member Secretary, SEAC to forward the proposal to SEIAA for further necessary action

326.2.2 Building Stone Quarry Project located at Sy.No.121 of Bondanthila Village in Mangalore Taluk, Dakshina Kannada District (1-00 Acre) by Sri Jugul Paul Saldanha – Online Proposal No.SIA/KA/MIN/509695/2025 (SEIAA 82 MIN 2025 (D))

| 15 | Cluster certificate | 28.01.2025 |
| 16 | Audit Report | 28.01.2025 |

The proposal is for appraisal / re-appraisal of the EC issued by DEIAA as per the directions of Hon'ble NGT in OA 142/2022 and MoEF&CC OM dated 28.04.2023.

The Proponent had submitted compliance to MoEF&CC OM dated 28.04.2023 and stated that the procedure as per MoEF&CC OM with SoP dated 15.01.2024 has been followed.

As there is no change in proposed production & area with reference to EC issued by DEIAA on 30.01.2018, Proponent has submitted self certified compliance to the EC conditions and has submitted DMG certified audit report till 2023-24. The Committee noted the details.

As per the cluster sketch there is no lease in a radius of 500 mtr from the said lease and the total area of the present lease is 1-00 Acres and hence the project is categorized as B2.

Considering the existing cart track road to a length of 800 meters connecting lease area to the all-weather black topped road, the Committee informed that the quarrying operation needs to be commenced after asphaltting the approach road to the quarry and the road connecting the crusher as per IRC standard norms and should grow trees all along the approach road in first year of operation, for which the Proponent agreed.

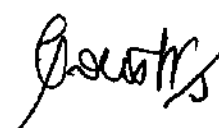

The Proponent has collected baseline data of air, water, soil and noise which are all within the permissible limits. The Proponent informed that all mitigative measures will be taken to ensure that the parameters will be maintained within the permissible limits.

The Committee noted that the baseline parameters are found to be within permissible limits and agreed with the approved quarry plan, with proved mineable reserve of 2,00,025 Tones (including waste) and estimated the life of mine 14 years.

The Committee after discussion decided to recommend the proposal to SEIAA for issue of Environmental Clearance for an annual production of 14,852Tonnes/annum (including waste), with following consideration,

1. To ensure the motarable approach road to the quarry and the road connecting the crusher and sprinkle water as and when required..
2. To grow trees all along the approach road & buffer zone during the first year of operation.
3. To carry out regular health checkup for the workers mainly for audiometry & spirometry from the nearby Hospital.
4. To take necessary measures to minimise noise and air pollution from the quarry area.
5. To provide metal sheet berricade to an height of minimum 3 mtrs around the working area.
6. To consider the CER activity submitted by Proponent with a recommendation to write to the concerned recipient about the CER activity.
7. To maintain buffer area allround the lease area as per the DMG approved mining plan.

Action: Member Secretary, SEAC to forward the proposal to SEIAA for further necessary action.

| 14 | Quarry plan | 17.05.2017 | |
| 15 | Cluster certificate | 04.02.2025 | |

The proposal is for appraisal / re-appraisal of the EC issued by DEIAA as per the directions of Hon'ble NGT in OA 142/2022 and MoEF&CC OM dated 28.04.2023.

The Proponent had submitted compliance to MoEF&CC OM dated 28.04.2023 and stated that the procedure as per MoEF&CC OM with SoP dated 15.01.2024 has been followed.

As there is no change in proposed production & area with reference to EC issued by DEIAA on 30.01.2018, Proponent has submitted self certified compliance to the EC conditions and has submitted DMG certified audit report till 2023-24. The Committee noted the details.

Further, the Committee sought clarification regarding the proposed activity in the default ESZ of Kappathgudda WLS. The Proponent informed the Committee that, as per Hon'ble SC directions in WP 202 of 1995 dated 03.06.2022, the Hon'ble SC had directed the following,

"44....(b) In the event, however, the ESZ is already prescribed as per law that goes beyond one kilometre buffer zone, the wider margin as ESZ shall prevail. If such wider buffer zone beyond one kilometre is proposed under any statutory instrument for a particular national park or wildlife sanctuary awaiting final decision in that regard, then till such final decision is taken, the ESZ covering the area beyond one kilometre as proposed shall be maintained.

...(h) In respect of sanctuaries or national parks for which the proposal of a State or Union Territory has not been given, the 10 kilometres buffer zone as ESZ, as indicated in the order passed by this Court on 4th December 2006 in the case of Goa Foundation (supra) and also contained in the Guidelines of 9th February 2011 shall be implemented. Within that area, the entire set of restrictions concerning an ESZ shall operate till a final decision in that regard is arrived at."

With reference to the Hon'ble SC directions, Proponent in the present case informed that MoEF&CC has issued draft notification on 30.09.2024, wherein it is informed that the Eco-Sensitive Zone around the Kappathagudda Wildlife Sanctuary extends from 1 km to 4.30 km and the default 10km buffer zone as ESZ do not apply to the current project area as the draft notification had already been published by MoEF&CC on 30.09.2024 and as per the co-ordinates provided in the draft ESZ notification of Kappathagudda WLS, the proposed project area is at a nearest distance of 3.02 Km out side ESZ of Kappathagudda WLS and at a distance of 5.06 km from Kappathagudda WLS. Further, the Proponent requested the Committee to consider the proposal in similar grounds of M/S. MARWA MINING COMPANY with file number SEIAA 655 MIN 2021 for grant of EC. The Committee noted the details and appraised the project with a condition to abide by the final outcome of Hon'ble SC directions in WP 202 of 1995 and final notification of MoEF&CC regarding Kappathagudda WLS, for which the Proponent agreed.

As per the cluster sketch there is one lease in a radius of 500 mtr from the said lease and the total area of the leases including the present lease is 4-00 Acres and hence the project is categorized as B2.

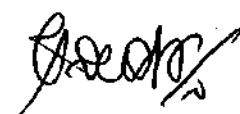

Considering the existing cart track road to a length of 700 meters connecting lease area to the all-weather black topped road, the Committee informed that the quarrying operation needs to be commenced after asphaltting the approach road to the quarry and the road connecting the crusher as per IRC standard norms and should grow trees all along the approach road in first year of operation, for which the Proponent agreed.

The Proponent has collected baseline data of air, water, soil and noise which are all within the permissible limits. The Proponent informed that all mitigative measures will be taken to ensure that the parameters will be maintained within the permissible limits.

The Committee noted that the baseline parameters are found to be within permissible limits and agreed with the approved quarry plan, with proved mineable reserve of 4,77,369 Tones (including waste) and estimated the life of mine 24 years.

The Committee after discussion decided to recommend the proposal to SEIAA for issue of Environmental Clearance for an annual production of 20,445 Tonnes/annum (including waste), with following consideration,

1. To ensure the motarable approach road to the quarry and the road connecting the crusher and sprinkle water as and when required.
2. To grow trees all along the approach road & buffer zone during the first year of operation.
3. To carry out regular health checkup for the workers mainly for audiometry & spirometry from the nearby Hospital.
4. To take necessary measures to minimise noise and air pollution from the quarry area.

5. To provide metal sheet berricade to an height of minimum 3 mtrs around the working area.
- 6.To consider the CER activity submitted by Proponent with a recommendation to write to the concerned recipient about the CER activity.
7. To maintain buffer area allround the lease area as per the DMG approved mining plan.

Action: Member Secretary, SEAC to forward the proposal to SEIAA for further necessary action

| 16 | Notification | 27.01.2022 |
| 17 | AQP | 08.02.2022 |

The Committee initially sought clarification regarding the proposed activity in the default ESZ of Kappathagudda WLS. The Proponent informed the Committee that, as per Hon'ble SC directions in WP 202 of 1995 dated 03.06.2022, the Hon'ble SC had directed the following,

"44....(b) In the event, however, the ESZ is already prescribed as per law that goes beyond one kilometre buffer zone, the wider margin as ESZ shall prevail. If such wider buffer zone beyond one kilometre is proposed under any statutory instrument for a particular national park or wildlife sanctuary awaiting final decision in that regard, then till such final decision is taken, the ESZ covering the area beyond one kilometre as proposed shall be maintained.

...(h) In respect of sanctuaries or national parks for which the proposal of a State or Union Territory has not been given, the 10 kilometres buffer zone as ESZ, as indicated in the order passed by this Court on 4th December 2006 in the case of Goa Foundation (supra) and also contained in the Guidelines of 9th February 2011 shall be implemented. Within that area, the entire set of restrictions concerning an ESZ shall operate till a final decision in that regard is arrived at."

With reference to the Hon'ble SC directions, Proponent in the present case informed that MoEF&CC has issued draft notification on 30.09.2024, wherein it is informed that the Eco-Sensitive Zone around the Kappathagudda Wildlife Sanctuary extends from 1 km to 4.30 km and the default 10km buffer zone as ESZ do not apply to the current project area as the draft notification had already been published by MoEF&CC on 30.09.2024 and as per the co-ordinates provided in the draft ESZ notification of Kappathagudda WLS, the proposed project area is at a nearest distance of 3.18 Km outside ESZ of Kappathagudda WLS and at a distance of 4.05 km from Kappathagudda WLS. Further, the Proponent requested the Committee to consider the proposal in similar grounds of M/S. MARWA MINING COMPANY with file number SELAA 655 MIN 2021 for grant of EC. The Committee noted the details and appraised the project with a condition to abide by the final outcome of Hon'ble SC directions in WP 202 of 1995 and final notification of MoEF&CC regarding Kappathagudda WLS, for which the Proponent agreed.

The Committee sought clarification with respect to the present site condition based on the KML submitted by Proponent. The Proponent informed the Committee that crusher waste was dumped inside the lease area and presently it is been removed and no mining has been carried out by Proponent. The Committee noted the clarification of Proponent and appraised the project.

As per the cluster sketch there are 4 leases in a radius of 500 mtr from the said lease and the total area of the applied leases including the present lease is 11-20 Acres and hence the project is categorized as B2.

Considering the existing cart track road to a length of 362 meters connecting lease area to the all-weather black topped road, the Committee informed that the quarrying operation needs to be commenced after asphaltting the approach road to the quarry and the road connecting the crusher as per IRC standard norms and should grow trees all along the approach road in first year of operation, for which the Proponent agreed.

The Proponent has collected baseline data of air, water, soil and noise which are all within the permissible limits. The Proponent informed that all mitigative measures will be taken to ensure that the parameters will be maintained within the permissible limits.

The Committee noted that the baseline parameters are found to be within permissible limits and agreed with the approved quarry plan, with proved mineable reserve of 16,66,032 Tonns (including waste) and estimated the life of mine to be 11 years.

The Committee after discussion decided to recommend the proposal to SEIAA for issue of Environmental Clearance for an annual production of 1,53,061 Tonns/annum (including waste), with following consideration,

1. To ensure the motarable approach road to the quarry and the road connecting the crusher and sprinkle water as and when required..
2. To grow trees all along the approach road & buffer zone during the first year of operation.
3. To carry out regular health checkup for the workers mainly for audiometry & spirometry from the nearby Hospital.
4. To take necessary measures to minimise noise and air pollution from the quarry area.
5. To provide metal sheet berricade to an height of minimum 3 mtrs around the working area.
6. To consider the CER activity submitted by Proponent with a recommendation to write to the concerned recipient about the CER activity.
7. EC is subject to the final out come of Hon'ble SC directions in WP 202 of 1995 and final notification of MoEF&CC regarding Kappathagudda WLS.
8. To maintain buffer area allround the lease area as per the DMG approved mining plan.

Action: Member Secretary, SEAC to forward the proposal to SEIAA for further necessary action.

326.2.2 Building Stone Quarry Project at Sogiwal Village, Laxmeshwar Taluk, Gadag District (4-10 Acres) by Sri S. M. Patil – Online Proposal No.SIA/KA/MIN/270433/2022 (SEIAA 212 MIN 2022)

| 16 | Notification | 28.02.2022 |
| 17 | AQP | 03.03.2022 |

The Committee initially sought clarification regarding the proposed activity in the default ESZ of Kappathgudda WLS. The Proponent informed the Committee that, as per Hon'ble SC directions in WP 202 of 1995 dated 03.06.2022, the Hon'ble SC had directed the following,

"44. ... (b) In the event, however, the ESZ is already prescribed as per law that goes beyond one kilometre buffer zone, the wider margin as ESZ shall prevail. If such wider buffer zone beyond one kilometre is proposed under any statutory instrument for a particular national park or wildlife sanctuary awaiting final decision in that regard, then till such final decision is taken, the ESZ covering the area beyond one kilometre as proposed shall be maintained.

... (h) In respect of sanctuaries or national parks for which the proposal of a State or Union Territory has not been given, the 10 kilometres buffer zone as ESZ, as indicated in the order passed by this Court on 4th December 2006 in the case of Goa Foundation (supra) and also contained in the Guidelines of 9th February 2011 shall be implemented. Within that area, the entire set of restrictions concerning an ESZ shall operate till a final decision in that regard is arrived at."

With reference to the Hon'ble SC directions, Proponent in the present case informed that MoEF&CC has issued draft notification on 30.09.2024, wherein it is informed that the Eco-Sensitive Zone around the Kappathagudda Wildlife Sanctuary extends from 1 km to 4.30 km and the default 10km buffer zone as ESZ do not apply to the current project area as the draft notification had already been published by MoEF&CC on 30.09.2024 and as per the co-ordinates provided in the draft ESZ notification of Kappathgudda WLS, the proposed project area is at a nearest distance of 56.08 mtrs outside ESZ of Kappathagudda WLS and at a distance of 3.81 km from Kappathagudda WLS. Further, the Proponent requested the Committee to consider the proposal in similar grounds of M/S. MARWA MINING COMPANY with file number SEIAA 655 MIN 2021 for grant of EC. The Committee noted the details and appraised the project with a condition to abide by the final outcome of Hon'ble SC directions in WP 202 of 1995 and final notification of MoEF&CC regarding Kappathagudda WLS, for which the Proponent agreed.

The Committee sought clarification with respect to the present site condition based on the KML submitted by Proponent and regarding the road seen near to the proposed area. The Proponent informed the Committee that crusher waste was dumped inside the lease area and presently it is been removed and no mining has been carried out by Proponent. Regarding the road, Proponent informed that as per Revenue NoC dated 04.09.2020 there is no public road within 100mtr of proposed area. The Committee noted the clarification of Proponent and appraised the project

As per the cluster sketch there are 3 leases in a radius of 500 mtr from the said lease and the total area of the applied leases including the present lease is 8-30 Acres and hence the project is categorized as B2.

Considering the existing cart track road to a length of 155 meters connecting lease area to the all-weather black topped road, the Committee informed that the quarrying operation needs to be commenced after asphaltting the approach road to the quarry and the road connecting the crusher as per IRC standard norms and should grow trees all along the approach road in first year of operation, for which the Proponent agreed.

The Proponent has collected baseline data of air, water, soil and noise which are all within the permissible limits. The Proponent informed that all mitigative measures will be taken to ensure that the parameters will be maintained within the permissible limits.

The Committee noted that the baseline parameters are found to be within permissible limits and agreed with the approved quarry plan, with proved mineable reserve of 16,49,023 Tonns (including waste) and estimated the life of mine to be 27 years.

The Committee after discussion decided to recommend the proposal to SEIAA for issue of Environmental Clearance for an annual production of 63,158 Tonns/annum (including waste), with following consideration,

1. To ensure the motarable approach road to the quarry and the road connecting the crusher and sprinkle water as and when required..
2. To grow trees all along the approach road & buffer zone during the first year of operation.
3. To carry out regular health checkup for the workers mainly for audiometry & spirometry from the nearby Hospital.
4. To take necessary measures to minimise noise and air pollution from the quarry area.
5. To provide metal sheet berricade to an height of minimum 3 mtrs around the working area.
6. To consider the CER activity submitted by Proponent with a recommendation to write to the concerned recipient about the CER activity.
7. EC is subject to the final out come of Hon'ble SC directions in WP 202 of 1995 and final notification of MoEF&CC regarding Kappathagudda WLS.
8. To maintain buffer of 100mtrs for blasting from public structure/road.

Action: Member Secretary, SEAC to forward the proposal to SEIAA for further necessary action.

326.2.3 Building Stone Quarry Project at Chikkasavanoor Village, Shirahatti Taluk Gadag District (6-00 Acres) by Sri Basaveshwar M-Sand & Stone Crusher – Online Proposal No.SIA/KA/MIN/238669/2021 (SEIAA 622 MIN 2021)

| 17 | AQP | 24.01.2025 | | | | | | | | | | | | | | | | | | | | |

The Committee initially sought clarification regarding the proposed activity in the default ESZ of Kappathgudda WLS. The Proponent informed the Committee that, as per Hon'ble SC directions in WP 202 of 1995 dated 03.06.2022, the Hon'ble SC had directed the following,

"44....(b) In the event, however, the ESZ is already prescribed as per law that goes beyond one kilometre buffer zone, the wider margin as ESZ shall prevail. If such wider buffer zone beyond one kilometre is proposed under any statutory instrument for a particular national park or wildlife sanctuary awaiting final decision in that regard, then till such final decision is taken, the ESZ covering the area beyond one kilometre as proposed shall be maintained.

...(h) In respect of sanctuaries or national parks for which the proposal of a State or Union Territory has not been given, the 10 kilometres buffer zone as ESZ, as indicated in the order passed by this Court on 4th December 2006 in the case of Goa Foundation (supra) and also contained in the Guidelines of 9th February 2011 shall be implemented. Within that area, the entire set of restrictions concerning an ESZ shall operate till a final decision in that regard is arrived at."

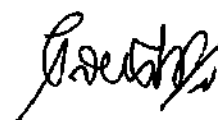

With reference to the Hon'ble SC directions, Proponent in the present case informed that MoEF&CC has issued draft notification on 30.09.2024, wherein it is informed that the Eco-Sensitive Zone around the Kappathagudda Wildlife Sanctuary extends from 1 km to 4.30 km and the default 10km buffer zone as ESZ do not apply to the current project area as the draft notification had already been published by MoEF&CC on 30.09.2024 and as per the co-ordinates provided in the draft ESZ notification of Kappathagudda WLS, the proposed project area is at a nearest distance of 2.51km outside ESZ of Kappathagudda WLS and at a distance of 4.79 km from Kappathagudda WLS. Further, the Proponent requested the Committee to consider the proposal in similar grounds of M/S. MARWA MINING COMPANY with file number SEIAA 655 MIN 2021 for grant of EC. The Committee noted the details and appraised the project with a condition to abide by the final outcome of Hon'ble SC directions in WP 202 of 1995 and final notification of MoEF&CC regarding Kappathagudda WLS, for which the Proponent agreed.

The Committee sought clarification with respect to the present site condition based on the KML submitted by Proponent. The Proponent informed the Committee that as per DMG letter dated 28.01.2025, building stone had been excavated and carried in accordance with Rule 3(A)(A)(4) of KMMCR and as per which total 26,000 tonnes of building stone was excavated from the quarry and corresponding fine of Rs. 1.0 Lakhs has been paid. The Proponent further informed that the building stone obtained during leveling of site, were under the provisions of Rule 3(A)(A)(4) of KMMCR wherein, minor mineral remains, after self consumption for bonafide usage by the land owner from his land and if the land owner intends to sell or dispose excavated mineral, they shall pay an advance royalty, additional payment, contribution to DMF fund with valid mineral dispatch permits which shall not attract violation. The Committee noted the clarification of Proponent and appraised the project.

As per the cluster sketch there are 2 leases in a radius of 500 mtr from the said lease and the total area of the applied leases including the present lease is 10-00 Acres and hence the project is categorized as B2.

Considering the existing cart track road to a length of 400 meters connecting lease area to the all-weather black topped road, the Committee informed that the quarrying operation needs to be commenced after asphaltting the approach road to the quarry and the road connecting the crusher as per IRC standard norms and should grow trees all along the approach road in first year of operation, for which the Proponent agreed.

The Proponent has collected baseline data of air, water, soil and noise which are all within the permissible limits. The Proponent informed that all mitigative measures will be taken to ensure that the parameters will be maintained within the permissible limits.

The Committee noted that the baseline parameters are found to be within permissible limits and agreed with the approved quarry plan, with proved mineable reserve of 26,86,269 Tonns (including waste) and estimated the life of mine to be 11 years.

The Committee after discussion decided to recommend the proposal to SEIAA for issue of Environmental Clearance for an annual production of 2,52,632 Tonns/annum (including waste), with following consideration,

1. To ensure the motarable approach road to the quarry and the road connecting the crusher and sprinkle water as and when required..
2. To grow trees all along the approach road & buffer zone during the first year of operation.
3. To carry out regular health checkup for the workers mainly for audiometry & spirometry from the nearby Hospital.
4. To take necessary measures to minimise noise and air pollution from the quarry area.
5. To provide metal sheet berricade to an height of minimum 3 mtrs around the working area.
6. To consider the CER activity submitted by Proponent with a recommendation to write to the concerned recipient about the CER activity.
7. EC is subject to the final out come of Hon'ble SC directions in WP 202 of 1995 and final notification of MoEF&CC regarding Kappathagudda WLS.
8. To maintain buffer area allround the lease area as per the DMG approved mining plan.

Action: Member Secretary, SEAC to forward the proposal to SEIAA for further necessary action.

326.2.36 Building Stone Quarry Project at Sogival Village, Laxmeshwar Taluk, Gadag District (2-20 Acres) by M/s. Shree Renuka Enterprises – Online Proposal No.SIA/KA/MIN/153365/2020 (SEIAA 147 MIN 2020)

| 15 | Notification | 07.03.2020 |

The proposal was considered in 248th SEAC meeting and the Committee had deferred the proposal informing the following,

"The Proponent and Environment Consultant attended the 248th meeting held on 21-07-2020 to provide clarification/additional information.

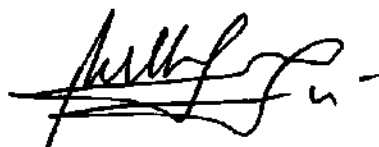

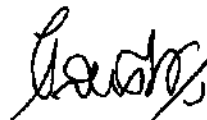

The committee appraised the proposal considering the information provided in the statutory application-Form I, Pre-feasibility report, approved mining plan and clarification/additional information provided during the meeting.

As per the Forest NOC, Kappathagudda Wildlife Sanctuary is at a distance of 4.92 KM from the boundary of the lease area. The ESZ is not yet notified, hence by default ESZ extends up to 10 KM from the boundary of Kappathagudda Wildlife Sanctuary. In view of this project falls under A category, for which the proponent has stated that he will wait for some more time and after the notification of ESZ, he will come back for the appraisal and hence the committee decided to defer the appraisal of the project proposal."

In the present meeting, again the Committee initially sought clarification regarding the proposed activity in the default ESZ of Kappathagudda WLS. The Proponent informed the Committee that, as per Hon'ble SC directions in WP 202 of 1995 dated 03.06.2022, the Hon'ble SC had directed the following,

"44....(b) In the event, however, the ESZ is already prescribed as per law that goes beyond one kilometre buffer zone, the wider margin as ESZ shall prevail. If such wider buffer zone beyond one kilometre is proposed under any statutory instrument for a particular national park or wildlife sanctuary awaiting final decision in that regard, then till such final decision is taken, the ESZ covering the area beyond one kilometre as proposed shall be maintained.

...(h) In respect of sanctuaries or national parks for which the proposal of a State or Union Territory has not been given, the 10 kilometres buffer zone as ESZ, as indicated in the order passed by this Court on 4th December 2006 in the case of Goa Foundation (supra) and also contained in the Guidelines of 9th February 2011 shall be implemented. Within that area, the entire set of restrictions concerning an ESZ shall operate till a final decision in that regard is arrived at."

With reference to the Hon'ble SC directions, Proponent in the present case informed that MoEF&CC has issued draft notification on 30.09.2024, wherein it is informed that the Eco-Sensitive Zone around the Kappathagudda Wildlife Sanctuary extends from 1 km to 4.30 km and the default 10km buffer zone as ESZ do not apply to the current project area as the draft notification had already been published by MoEF&CC on 30.09.2024 and as per the co-ordinates provided in the draft ESZ notification of Kappathagudda WLS, the proposed project area is at a nearest distance of 4.79out side ESZ of Kappathagudda WLS and at a distance of 3.9 km from Kappathagudda WLS. Further, the Proponent requested the Committee to consider the proposal in similar grounds of M/S. MARWA MINING COMPANY with file number SEIAA 655 MIN 2021 for grant of EC. The Committee noted the details and appraised the project with a condition to abide by the final out come of Hon'ble SC directions in WP 202 of 1995 and final notification of MoEF&CC regarding Kappathagudda WLS, for which the Proponent agreed.

The Committee sought clarification with respect to the present site condition based on the KML submitted by Proponent and regarding the road seen near to the proposed area. The Proponent informed the Committee that in reference to google timeline images, workings are prior to 2012 and no working had been carried out by Proponent after that. The Committee noted the clarification of Proponent and appraised the project

As per the cluster sketch there is one lease in a radius of 500 mtr from the said lease and the total area of the applied lease including the present lease is 11-20 Acres and hence the project is categorized as B2.

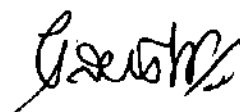

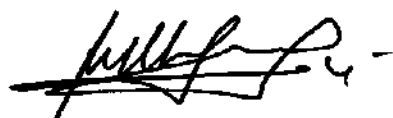

Considering the existing cart track road to a length of 311 meters connecting lease area to the all-weather black topped road, the Committee informed that the quarrying operation needs to be commenced after asphaltting the approach road to the quarry and the road connecting the crusher as per IRC standard norms and should grow trees all along the approach road in first year of operation, for which the Proponent agreed.

The Proponent has collected baseline data of air, water, soil and noise which are all within the permissible limits. The Proponent informed that all mitigative measures will be taken to ensure that the parameters will be maintained within the permissible limits.

The Committee noted that the baseline parameters are found to be within permissible limits and agreed with the approved quarry plan, with proved mineable reserve of 4,21,053 Tonns (including waste) and estimated the life of mine to be 6 years.

The Committee after discussion decided to recommend the proposal to SEIAA for issue of Environmental Clearance for an annual production of 73,684 Tonns/annum (including waste), with following consideration,

1. To ensure the motarable approach road to the quarry and the road connecting the crusher and sprinkle water as and when required..
2. To grow trees all along the approach road & buffer zone during the first year of operation.
3. To carry out regular health checkup for the workers mainly for audiometry & spirometry from the nearby Hospital.
4. To take necessary measures to minimise noise and air pollution from the quarry area.
5. To provide metal sheet berricade to an height of minimum 3 mtrs around the working area.
6. To consider the CER activity submitted by Proponent with a recommendation to write to the concerned recipient about the CER activity.
7. EC is subject to the final out come of Hon'ble SC directions in WP 202 of 1995 and final

notification of MoEF&CC regarding Kappathagudda WLS.

8. To maintain buffer area allround the lease area as per the DMG approved mining plan.

Action: Member Secretary, SEAC to forward the proposal to SEIAA for further necessary action.

The proposal was earlier considered in 323rd SEAC meeting and the Committee after discussion decided to reject the proposal informing the following,

"The subject was discussed in the SEAC meeting held on 16th & 17th January 2025. The Committee has recommended to SEIAA for reject the Proposal and the extract of the proceedings of the Committee meeting is as below:

The proposal was considered in 323rd SEAC meeting and the Proponent remained absent and earlier to it the Committee had deferred the proposal in 254th SEAC meeting informing,

This project is appraised during the meeting 219th meeting held on 27-3-2019 and decided to issue standard TORs along with additional ToRs. Accordingly ToRs was issued on 25.07.2019 and the project proponent submitted the EIA Report on 01.12.2020.

The project proponent and consultant attended the meeting during 254th SEAC meeting held on 07. 01.2020. The committee appraised the proposal considering the information provided in the statutory application Form-I, IA, Conceptual plan, EIA Report and clarification/additional information provided during the meeting.

SEAC has received objection from Brigade Hotel Ventures Limited that Sy.No.47/6 (old Sy.No.67/2) of Udayagiri Village, is owned by Mr. M.R. Jayshankar through registered sale deed. Subsequently Brigade Hotel Ventures has claimed that they have entered into an agreement with Mr. M.R Jayshankar for development of hotel cum commercial building. In response to this the proponent clarified that the proposed project area does not include the said survey number 47/6 (old Sy No 67/2) of Udayagiri Village at all. Hence the committee proceeded with the appraisal.

The Committee took note of the fact that the project area includes 13-13 acres of forest land which was originally diverted under FC Act for New International Airport at Devanahalli Taluk and has remained unutilized for the said purpose. The proponent said that this land is proposed to be maintained as social forest and as part of buffer zone. The proponent further clarified that this proposal has been approved

by Government. The committee felt that the following should be submitted by the proponent:

1. Approval Orders of Government concerning the project.
2. Undertaking that issues regarding the said forest land will be suitably resolved with Forest Department as per applicable legal provisions.
3. Commitment towards managing solid waste, both organic and inorganic within the project area.
4. List of trees to be felled for developing the industrial layout to be submitted.
5. Possibility of creating ponds to capture surface runoff to be explored and details to be submitted

In the present meeting, the Committee initially sought details regarding the forest land involved in the proposed project and clearance for the same. The Proponent informed the Committee that there were few parcels of land falling inside the forest area and informed that they are yet to obtain clearance for the same. The Committee noted the clarification and after discussion decided to reject the proposal and informed the Proponent to apply a fresh application in PARIVESH 2.0 excluding the area falling inside forest land, for which the Proponent agreed."

Further, the Authority in its 263rd meeting refer back the proposal informing the following,

The Authority perused the proposal and took note of the recommendation of SEAC.

Further, Member Secretary draw the attention of the Authority towards letter received from the Principal Secretary to Government, Dept of Ecology and Environment in which Karnataka State Industrial and Infrastructure Development Corporation Ltd. (KSIIDC) vide letter dated 25.02.2025 have requested to Principal Secretary to Government, Dept of Ecology and Environment to reconsider the proposal for issueance of Environment Clearance as the proposed "Bengaluru Signature Business Park is a prestigious project of Government of Karnataka. The project holds significant importance in terms of infrastructure growth, fostering to industrial development. As Environment clearance is a statutory compliance, any further delay in obtaining EC will affect the project cost, timeline disruptions and will have negative impact on revenue generation.

Therefore, it is a kind request to consider proposal no. SIA/KA/MIS/57048/2018 submitted in Parivesh Portal and arrange to issue the Environmental Clearance excluding the forest area.

The Authority after detailed discussion decided to refer back the proposal to SEAC for reappraisal"

In the present meeting, the Proponent submitted following clarification for the observation made in 254th SEAC Meeting,

1. Approval Orders of Government concerning the project.

Reply: Proponent informed that the for BSBP project sanction was obtained from GoK vide letter dated IID 44 DIA 2011 dated 04.12.2017, where government of Karnataka accorded the project to develop "Bengaluru Signature Business Park".

2. *Undertaking that issues regarding the said forest land will be suitably resolved with Forest Department as per applicable legal provisions.*

Reply: The Proponent informed the following,

- The forest land falling within BSBP area was excluded and accordingly they have submitted the revised proposal for obtaining Environmental Clearance.
- Forest land diversion is not anticipated for the project. However, KSIIDC will adhere with the rules and regulations set by forest department for resolve any issues.

3. *Commitment towards managing solid waste, both organic and inorganic within the project area.*

Reply: The Proponent informed that, they (KSIIDC) are committed towards managing solid waste, both organic and inorganic within the project area.

- The proposed master plan has an integral Solid Waste Management System.
- Non-biodegradable Waste generated will be collected, segregated, treated and sold to approved recyclers.
- Solid waste generated will be treated with mechanical composter, and manure will be stored and sold to local farmers in subsidised rates.
- Area allocated for treatment of waste are as below;

| Sr No | Description | Area (Sqm) |
|-------|---|-------------|
| 1 | Raw Waste Storage - (Waste for 3 -5 Days) | 990 |
| 2 | Mechanical Composter – (12 Nos., each of area, To process Wet Waste) | 2650 |
| 3 | Manure Storage (3-5 days) | 425 |
| 4 | Road | 2090 |
| 5 | Truck Parking Area | 485 |
| 6 | Miscellaneous Area | 360 |
| | Grand Total | 7000 |

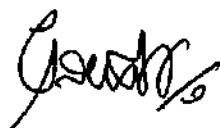

4. *List of trees to be felled for developing the industrial layout to be submitted.*

Reply: The Proponent informed the following,

- Total number of trees to be felled is 329 trees. Out of which, trees within plot area is 256 & avenue trees are 73.
- About 20650 trees are proposed to be grown as part of Compensatory Plantation.

5. *Possibility of creating ponds to capture surface runoff to be explored and details to be submitted*

Reply: The Proponent informed the following,

- a. Remodeling of Water drainage network to be undertaken which involves major Storm Water drains, new road side drains, cross drainage structures, rain water ponds, pond lining, inlet and outlet structures, RWH structures etc.,
- b. As part of the water conservation measures, 4 ponds and 40 ground water recharge pits are proposed. Surface runoff water will be collected through the proposed nalas and storm water drainages let into these artificial ponds and ground water recharge pits to enhance the ground water table. Minimum 3m buffer areas are kept for nalas. Details of ponds Rainwater harvesting measures are given below;
 - a. Total volume of 4 nos. of ponds is 82,932 Cum
 - b. Rain water recharge pits 40nos.

The Committee noted the details and considering the undertaking submitted by Proponent for exclusion of complete forest area of 45.50 Acres and appraised the project for the revised plot area of 361.57 Acres.

The Committee during appraisal sought details regarding drains & water bodies as per village map. The Proponent informed the Committee that for all the drains inside the proposed site area are tertiary drains and accordingly they have proposed buffer of 3mtrs on either sides of drain and for the water body adjacent to the project site area, buffer of 30mtrs is proposed from the edge of water body. The Committee noted the same.

The Proponent agreed to grow 20,650 trees in the project site area. The Proponent has collected baseline data of air, water, soil and noise and informed that all were within the permissible limits. The Proponent committed to take precautionary measures during and after construction to maintain the environmental parameters within permissible limits in the proposed project and agreed to comply with the ECBC and NBC guidelines for the proposed construction and adhere to the by-laws stipulated by the governing authority for buffers and setbacks.

The Committee noted that the baseline parameters were found to be within permissible limits and informed the Proponent to leave buffers/setbacks as per zoning regulations and to harvest maximum rainwater in the proposed project area.

The Committee after appraisal decided to recommend the proposal to SEIAA for issue of EC with following consideration,

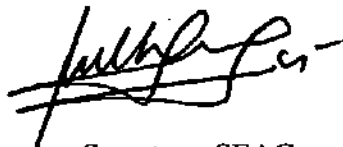

1. To provide minimum 20% of total parking with e-vehicle charging facility.
2. To provide 4 recharge ponds of total capacity 82932cum & 40 recharge pits.
3. To grow 20,650 trees in the early stage before taking up of construction.
4. To provide bell mouth entry and exit in the proposed project.
5. To incorporate catalytic converter for DG sets with dual fuel option.
6. To carry out community recharge of bore wells in the vicinity of the site.
7. To construct lead of drains till the nearest natural drains/water body for handling excess water.
8. To install energy efficient plumbing system to conserve water,

201

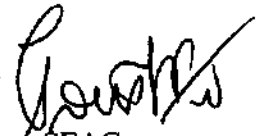

9. To consider the CER activity submitted by proponent with a recommendation to write to the concerned recipient about the CER activity.
10. To Provide the additional final filtration & collection tank to facilitate frequent cleaning the tank, in order to avoid the deposition of residual & colloidal organic matters in treated water.
11. PP to include a condition while allotting the land for the individual clients/developers, to obtain the Environmental Clearance if the project is covered under EIA Notification 14th Sept. 2006 & its subsequent amendments.
12. PP are mandated to provide all the required facilities such as portable water, modular waste water treatment plant, scientific solid waste management facility & electricity supply as and when required by the individual clients.

Action: Member Secretary, SEAC to forward the proposal to SEIAA for further necessary action

Meeting Concluded with vote of thanks to all.

Member Secretary, SEAC
