- I. Discrepancy is observed in the Topographical details mentioned in mode of mining Approved Mine Plan (hillock with steep slope) and PFR (sub-surface mining). Looking to the KML file (satellite imagery and elevation) uploaded in the portal for proposed project, prima facie, the proposed lease area seems hilly area which is also highlighted in the approved mining plan. It is also observed that the habitation (Village: Bhaka) is located in the downstream side of lease area. In view of above, SEAC may examine the proposal taking in account of cumulative blasting effect as the cluster having total 8 leases.
