with a proposed production quantity of Limestone - 12,744 Tons /annum with a condition that the total production during a scheme should be limited to the approved quantity as per Mining scheme/ plan.

The proposed project falls under Item No. 1(a) of the schedule of the EIA Notification 2006 and its amendments thereof - (i). Mining of minerals (<100 ha of mining lease area in respect of non-coal mine lease).

The proponent and their consultant NVSPL Ravi Kanth have attended the meeting. This is new mining project.

As per cluster letter issued by the Asst. Director of Mines & Geology, Guntur, vide Letter No.2160/Q/2019, dated: 05.11.2020, there are five existing quarry areas within the radius of 500 mtrs area.

The project falls under B2 category as per the MoEFCC Notification No. S.O.2269(E),dated 1<sup>st</sup> July, 2016.

Previously the committee recommended for issue of EC with controlled blasting.

The Committee noted that this is refer back case, seeking reasons for controlled blasting. There is railway track nearby. As per NGT order 200 mtrs has to be maintained from habitation. The proponent has submitted revised approved mining plan with 200 mtrs buffer from the railway track. As per NGT order July 2020, the safe distance with out blasting is 100 mtrs and 200 mtrs with blasting. However, as per mine safety rules 500 mtrs is danger Zone. Therefore controlled blasting is stipulated with recommendation to issue Enviromental clearance.
