The distance of the proposed quarry from Angi River embankment would be around 10 to 40m. As the area is a hilly track, the streams are of 2 <sup>nd</sup> order and their width is very less, it is almost impossible to keep the required safe distance to the sand sources from the said embankments. Keeping this in consideration, the EC may be granted.	The SEAC recommended to reject Environmental Clearance for the proposal for the following reasons: i) The river embankment is around 10 to 40m which does not fulfill the criteria for Sand mining as per MoEF&CC, Govt. of India Sustainable Sand Mining Guidelines, 2016 as well as Enforcement and monitoring guidelines for Sand Mining, 2020 where it is stipulated that the mining area must be demarcated at

 Secretary, SEAC

Proceedings of SEAC meeting (Minor Mineral – Clarification received) held on 20.08.2022

(1) The SEAC in its meeting dated 20-08-2022 recommended for grant of Environmental Clearance for the proposal valid from the date of EC accorded upto the lease period with specific conditions stipulated for sand mine.

(2) Proposal was placed in the meeting of SEIAA held on 30.09.2022 for consideration of EC. The Authority rejected the proposal with opinion that the kml data does not show either the geo-reference of lease area or even the point of the lease area in Parivesh Portal. Accordingly, the application is rejected with request to apply afresh.

(3) The PP has submitted the revised kml and has applied afresh.

(4) The SEAC had already recommended the proposal in SEAC Meeting dated 20-08-2022. Hence, SEAC decided to return this proposal to SEIAA, Odisha as decision will be taken by the SEIAA.
