1.	B1, EC	Industry-1	SIA/OR/IND/29765/2018	M/S Chhetinad Cement Corporation Ltd.	Proposed 2 X 1.0 MTPA Cement Grinding Unit At-Kalinganagar Industrial Complex, Tehsil: Dangadi, District: Jajpur	27.09.2019	Under examination of SEIAA after SEAC	The proposal was placed in 60 th SEIAA meeting and it was decided as follows: "Await SEAC response." The appraisal	This is a proposal of cement grinding unit under Category 'B1' and the applicant has submitted the proposal for EC. The appraisal report of SEAC has been received. Note on the Proposal: 1. The proposal is for setting up a Cement Grinding Unit of production capacity 2 x 1.0 MTPA for production of PPC, PSC, OPC & GGBS cement located at- Kalinganagar Industrial Complex, Tahasil - Danagadi, District- Jajpur by M/s Chettinad Cement Corporation Pvt. Ltd . 2. The project area is 77.50 acres(revised area after reduction of 5.50 acres) and area under greenbelt development is 30 acres (38.70%) of the total project area. 3. Total water requirement for the project is 100 KLD and will be sourced from IDCO water supply from nearby Brahmani River.	Let us ask the PP to concretise the action points envisaged by them to address all issues raised in public hearing and the issues of air pollution (SPM), Water intake, forest land in lease area, and waste water disposal.

report of SEAC has been received and the SEAC have recommended for grant of EC for the project.

4. Raw materials required for the proposed project are Clinker, Slag, Gypsum & Fly ash. Clinker is proposed to be sourced from CCCPL's units established at Ariyalur, Ariyalur District, Tamil Nadu. Fly ash from nearby Thermal power plants. Gypsum will be procured from Pardeep Phosphate / IFFCO (110 Kms.) and slag would be procured from Jindal Stainless Limited, Tata Steel, Neelachal Ispat Ltd. Kalinganagar. Transportation of raw material and product (cement) would be done by road and railway.
 5. The entire treated waste water will be recycled for various purposes inside the plant. Waste water generated from plant will be treated in the existing STP. The treated water from STP will be used for dust suppression & green belt development. Zero liquid discharge concept from plant operation shall be adopted.
 6. High efficient bag filters will be installed to maintain particulate matter emissions within permissible limit. Dust collected from various pollution control equipment will be recycled back into the process.
 7. The PP has submitted the EIA and EMP report complying the ToR issued for the project. Public Hearing was conducted on 06.03.2021. The main issues raised by the public were on environment, employment, education, health, greenbelt development & local development, etc. The public hearing proceedings enclosed by PP shows that the maximum public have not supported the project in regard to pollution of environment & R & R settlement policy. There were few who supported the project.
 8. The SEAC in its meeting held on 08.11.2021 have recommended for grant of EC for the project.
