❖ **REFER BACK CASES FROM SEIAA Vide SEIAA meeting dated 26.04.2022:**

S. N.	Name and address of the project	Proposal no.	Reasons for Refer back
20.	Gobarsinh Cheharsinh Solanki (Lease Area: 4.6 Ha) S. No. Banas river bed, Vil. Kamboi, Ta. Kankrej, Dist. Banaskantha.	70390	<p>I. It is seen that in most of the cases of riverbed sand mining proposal submitted to SEIAA it is seen that average output of riverbed sand is 15 to 20 thousand tons per hectare, whereas in this case ROM is shown to be disproportionately higher, when the ROM is restricted up to depth of 1 m it should be re-examined whether it is consistent with any bench mark of output available from the department of geology and mining or comparable standard. SEAC should obtain standard bench mark of riverbed sand output per hectare so as to avoid the large discrepancy.</p> <p>II. The set back distance should be clarified as per the NGT order and sustainable sand mining guideline.</p>
