

MINUTES OF THE 259th MEETING OF THE STATE LEVEL EXPERT APPRAISAL COMMITTEE HELD ON 13/10/2015 AT COMMITTEE ROOM, GUJARAT POLLUTION CONTROL BOARD, GANDHINAGAR.

The 259th meeting of the State Level Expert Appraisal Committee (SEAC) was held on 13TH October 2015 at Committee Room, Gujarat Pollution Control Board, Gandhinagar. Following members attended the meeting:

1. Shri T.P. Singh, Chairman, SEAC.
2. Shri V.C.Soni, Vice Chairman, SEAC
3. Shri V. N. Patel, Member, SEAC
4. Shri R.J.Shah, Member, SEAC.
5. Dr. V.K.Jain, Member, SEAC
6. Shri Hardik Shah, Secretary, SEAC

Following officers from the Geology and Mining Department attended the meeting:

1. Shi Santosh Hirpar, Mine Supervisor, Dist: Kutch
2. Shi Mehul B Sheth, Royalty Inspector, Dist: Chotaudepur
3. Shi Chintan A Lavingya, Mine Supervisor, Dist: Kheda
4. Shri Mehul Dave, Asst. Geologist, Dist: Dahod
5. Shri D K patel, Geologist, Dist: Surat.
6. Shri A B Premlani, Geological Assistrant, Dist: Jamnagar
7. Shri K K Vyas, Royalty Inspector, Dist: Sabarkantha
8. Shri Nirav Barot, Asst. Geologist, Dist: Bhavnagar, Botad
9. Shri Ketan Mahavadia, Asst Geologist,, Dist: Rajkot, Amreli, Junagadh
10. Shri Ravi K Mistri, Geological Assistant, Dist: Gir Somnath
11. Shri Akshay Modi, Royalty Inspector, Dist: Navsari
12. Shri Dharmesh R. Aod, Royalty Inspector, Dist: Valsad.
13. Shri M R vala, Asst. geologist, Dist: Surendranagar
14. Sjri T J patel, Geologist, Dist: Porbandar.
15. Shri J K Gor, Geological Asst., Dist: Bharuch
16. Shri J H Vaghela, Geological Assitant, Dist: Tapi
17. Shri A B Oza, Geologist, Dist: Ahemdababd and Gandhinagar
18. Shri Sanghvi, Asst. Geologist, Dist: Mehsana

All 249 proposals of minor minerals which have been received by the Committee through the Office of the Commissioner, Geology and Mining, Gandhinagar were taken up in the meeting. Considering the scale of individual project, all the proposals were categorized as B2 and appraised individually based on the information furnished in the Form-1 and performa endorsed by the district Geologist / Asst. Geologists.

Shri A B Oza, Geologist, District: Ahmedabad informed that proposals at Sr No: 1 and 2 lease are located on river beds of Sabarmati and Khari. For the proposal at Sr No: 2, application is found incomplete (Unsigned Form I) and committee decided to defer the proposal in one of the upcoming SEAC meeting after receipt EC application duly signed by project proponent. For the proposals at Sr No: 1 and 3, Sand excavation will be done only from dry river bed. Sabarmati and Khari rivers are seasonal rivers. He also informed that instream (flowing water) type of mining is not practiced in the above lease area. It was also represented that no any bridge piers / water intake wells / irrigation structures exist within 500 m distance from boundary of any of above lease area. He explained that sand excavation will be done up to maximum 3 m depth or water level,

whichever is less. The committee observed that the lease holder has proposed to leave adequate setback distance from the river bank so as to avoid chances of river bank erosion. Water sprinkling will be done during loading of material. All the transportation vehicles are proposed to be covered to avoid fugitive emission of fine particles.

After discussion and detailed scrutiny of the proposal, considering the mitigation measures proposed by the lease holder, the committee unanimously decided to recommend the proposals at Sr No: 1 and 3 for grant of environmental clearance to SEIAA with stipulation of standard conditions for Sand mining as approved in 232nd SEAC meeting held on 15th April 2015.

ORDINARY SOIL MINING PROJECTS, DIST: AMRELI											
Sr. No.	PROPOSAL DETAILS			LOCATION		PROJECT PROPONENT NAME	AREA IN HECTAARE	ADDRESS/ VILLAGE	Name of river	RATE OF MINING	NEAREST HUMAN HABITATION
1	Proposal No	SIA/GJ/MIN/1399/2015	State	Gujarat	Shri Hamirbhai Dudabhai Makwana	04.90.00 New	Nadi mpat lagu, Rajparda	Zolapari	50,000 TPA	rajpardi 1.6km	
	File No	SIA/GJ/26209/2015	District	Amreli							
	Proposal Name	rajparda ordinary sand	Tehsil	Rajula							

Shri Ketan Mahavadia, Asst Geologist, Dist: Amreli mentioned that the above project does not include blasting and mineral will be removed through open cast mining. It was also noticed that the above project does not involve intersection of ground water table. It was presented that arrangement of water sprinkling will be done during excavation and loading of mineral for transportation. No protected areas/Reserve Forest/Sanctuary exist within 10 Km radius of the proposed lease. In the lease area no vegetation is found. Depth of mining will be restricted to 3 meter or water level whichever is less.

After discussion and detailed scrutiny of the proposal, Committee asked Asst. geologist to submit following details.

1. Setback distance to be maintained from either side of the river bank and remaining width of the lease area for mining leaving set back distance.
2. Permission from the irrigation department to carry out mining as checkdam exists in the near vicinity of the proposed lease.

At the outset, it was decided by the committee that proposal will be considered in one of the upcoming SEAC meeting after submission of the aforesaid details by geologist.

	File No	SIA/GJ/29809/2015	District	Bhavnagar					
	Proposal Name	BABABHAI RUKHADBHAI BHADARKA ORDINARY SAND MINING PROJECT	Tehsil	Talaja					

Shri Nirav Barot, Asst. Geologist, Dist: Bhavnagar informed the committee that proposal at Sr NO:1 has been cancelled due to kararbhag and hence requested to delist the proposal. He further requested to delist proposal at Sr NO: 2 as there is opposition from the local villagers After deliberation, Committee decided to delist the proposals at Sr NO: 1 and 2 and closed the proposals

For the proposal at Sr No: 3, Asst geologist represented that proposal involves open cast mechanized mining involving drilling, blasting, sizing of mineral, etc. Top soil will be stacked separately for green belt development whereas overburden will be removed, stacked and refilled in mined out pits. Proposal does not involve intersection of ground water table. No wastewater generation is envisaged from mining activities. Domestic wastewater will be disposed off through septic tank – soak pit. Arrangement will be done to prevent contamination of surface runoff. Proposed air pollution control measures include use of only controlled blasting, water sprinkling on haul roads, tree plantation in periphery and road sides, etc. It is proposed to convert mined out pits into water reservoirs.

During presentation, viewing the satellite image, location of the proposed lease seems near water bodies and committee decided to ask the Asst. Geologist to submit the No Objection Certificate of irrigation department to carry out mining from the proposed lease at Sr NO 3. Upon submission of the details, committee decided to take up the proposal in one of the upcoming SEAC meeting for further consideration.

It was noticed by the Committee that hard copy of the proposal at Sr No: 4 could not be submitted by the geologist. Hence it was decided by the committee to reconsider the proposal in one of the upcoming SEAC meeting after receipt of signed copies of Environmental Clearance application.

Shri Nirav Barot, Assistant Geologist, District: Botad represented that lease area of proposals at Sr No: 2,12 and 13 are located on river bed of Bhadar river and sand excavation will be done only from dry river bed. Bhadar river is a seasonal river. He also informed that instream (flowing water) type of mining is not practiced in the above lease area. It was also represented that no any bridge piers / water intake wells / irrigation

structures exist within 500 m distance from boundary of any of above lease area. He explained that sand excavation will be done up to maximum 3 m depth or water level, whichever is less. The committee observed that the lease holder has proposed to leave adequate setback distance from the river bank so as to avoid chances of river bank erosion.

After discussion and detailed scrutiny of the proposal, considering the mitigation measures proposed by the lease holder, the committee unanimously decided to recommend the proposals at Sr No: 2,12 and 13 for grant of environmental clearance to SEIAA with stipulation of standard conditions for Sand mining as approved in 232nd SEAC meeting held on 15th April 2015.

For the proposals except at Sr No: 2,12 and 13, hard copies of the application along with Form I could not be submitted by the geologist. Hence it was decided by the committee to reconsider the above proposals in one of the upcoming SEAC meeting after receipt of signed copies of Environmental Clearance applications for appraisal

Hard copies of the proposals at Sr No: 8,9,17,18,21,22,26,27 could not be submitted by the Asst.Geologist. Hence it was decided by the committee to reconsider the above proposals in one of the upcoming SEAC meeting after receipt of signed copies of Environmental Clearance application for appraisal. For the proposals at Sr No: 23 and 24, Asst geologist informed the Committee that lease for these proposals have been cancelled and requested to delist the proposals at Sr No: 23 and 24. After deliberation, committee decided to delist the proposals at Sr NO: 23 and 24 and decided to close these proposals.

For the proposals at Sr NO: 28,29 and 30, Shi Mehul B Sheth,Royal Inspector,Dist: Chotaudepur requested to defer the proposals as presentation for the said proposals are not ready. Committee asked asst. geologist to come prepared for the presentation and decided to defer the proposals at Sr NO: 28,29 and 30 in one of the upcoming SEAC meeting.

Shi Mehul B Sheth,Royal Inspector,Dist: Chotaudepur represented that above leases (Except proposals at Sr NO: 8,9,17,18,21,22,23,24,26 and 27) are located on river beds of Orsang, Bharaj and Hiran and informed that sand excavation will be done only from dry river bed. Orsang, Bharaj and Hiran river are seasonal rivers. He also informed that instream (flowing water) type of mining is not practiced in the above lease area. It was also represented that no any bridge piers / water intake wells / irrigation structures exist within 500 m distance from boundary of any of above lease area.He explained that sand excavation will be done up to maximum 3 m depth or water level, whichever is less. The committee observed that the lease holder has proposed to leave adequate setback distance from the river bank so as to avoid chances of river bank erosion.Transportation of mined material will be made through covered vehicles.

After discussion and detailed scrutiny of the proposal, considering the mitigation measures proposed by the lease holder, the committee unanimously decided to recommend the proposals at Sr No: 1 to 7,10,11,12,13,16,19,20,25 for grant of environmental clearance to SEIAA with stipulation of standard conditions for Sand mining as approved in 232nd SEAC meeting held on 15th April 2015.

Committee observed that proposals at Sr No: 14 and 15 are located very near to the river bank and adequate set back distance is required to be left for mining. Hence committee asked Asst. Geologist, Dist: Chotaudepur to submit details of set back distance to be maintained in order to prevent soil erosion. Upon submission of the said information, committee decided to consider the proposals at Sr NO: 14 and 15 for further decision.

	Proposal Name	SATKEVAL QUARRY WORKS	Tehsil	Jhalod					

Hard copies of the proposals at Sr No: 1 and 2 could not be submitted by the Asst. Geologist. Hence it was decided by the committee to reconsider the above

proposals in one of the upcoming SEAC meeting after receipt of signed copies of Environmental Clearance application for appraisal

Shri Mehul B Sheth, Royal Inspector, Dist: Chotaudepur represented the proposals at Sr No: 3,4 and 5. He informed that the above proposals involve open cast mechanized mining involving drilling, blasting, sizing of mineral, etc. Top soil will be stacked separately for green belt development whereas overburden will be removed, stacked and refilled in mined out pits. None of the proposal involves intersection of ground water table. No wastewater generation is envisaged from mining activities. Domestic wastewater will be disposed off through septic tank – soak pit. Arrangement will be done to prevent contamination of surface runoff. Proposed air pollution control measures include use of only controlled blasting, water sprinkling on haul roads, tree plantation in periphery and road sides, etc. It is proposed to convert mined out pits into water reservoirs. After deliberations on various aspects, considering the proposed mitigation measures by the lease holders, the committee unanimously decided to recommend proposals at Sr. No: 3,4 and 5 for grant of environmental clearance to SEIAA with stipulation of standard conditions for Non sand mining as approved in 232nd SEAC meeting held on 15th April 2015.

BENTONITE MINING PROJECTS, DIST: DEVBHUMI DWARKA									
Sr. No	PROPOSAL DETAILS		LOCATION		PROJECT PROPONENT NAME	AREA IN HECTAARE	ADDRESS/VILLAGE	RATE OF MINING	NEAREST HUMAN HABITATION
1	Proposal No	SIA/GJ/MIN/843/2015	State	Gujarat	TRICHEMIN ASSOCIATES	10.00.00 Existing	Satapar	15000 Mt/M	Satapar 1.1km
	File No	SIA/GJ/10608/2015	District	Devbhumi Dwarka					
	Proposal Name	TRICHEMIN ASSOCIATES	Tehsil	Kalyanpur					

Shri A.B.Premlani, Geological Assistant, Dist: Devbhumi Dwarka presented the above mentioned proposal before the committee. During the meeting, the committee observed that nearest village Satpar is situated beyond 500 m distance from the lease area. Blasting is not required in project of mining of Bentonite. It was further mentioned by the Asst. Geologist that above proposal does not involve intersection of ground water table. Development of green belt and water sprinkling are proposed for control of fugitive emission. Asst Geologist informed that lease is located at about 35 km away from the Marine national Park.

During meeting, considering the proposed mitigation measures, the committee decided to recommend above proposal for grant of environmental clearance to SEIAA with stipulation of standard conditions for non sand mining as approved in 232nd SEAC meeting held on 15th April 2015.

Hard copies of the proposals at Sr No: 7,8 and 9 could not be submitted by the Asst.Geologist. Hence it was decided by the committee to reconsider the above proposals in one of the upcoming SEAC meeting after receipt of signed copies of Environmental Clearance application for appraisal

Shri A B Oza, Geologist, District: Gandhinagar represented for the proposals at Sr NO: 1 to 6 and informed that lease areas are located on river beds of Sabarmati and sand excavation will be done only from dry river bed. Sabarmati river is a seasonal river. He also informed that instream (flowing water) type of mining is not practiced in the above lease areas. It was also represented that no any bridge piers / water intake wells / irrigation structures exist within 500 m distance from boundary of any of above lease area. He explained that sand excavation will be done up to maximum 3 m depth or water level, whichever is less. The committee observed that the lease holder has proposed to leave adequate setback distance from the river bank so as to avoid chances of river bank erosion. Lease holders have proposed to cover the vehicles after loading of the mineral to the vehicles to prevent fugitive emission.

After discussion and detailed scrutiny of the proposal, considering the mitigation measures proposed by the lease holders, the committee unanimously decided to recommend the above proposals at Sr No: 1 to 6 for grant of environmental clearance to SEIAA with stipulation of standard conditions for Sand mining as approved in 232nd SEAC meeting held on 15th April 2015.

BUILDING LIMESTONE MINING PROJECTS,DIST: GIR SOMNATH

SAND STONE MINING PROJECTS, DIST: MORBI									
Sr. No.	PROPOSAL DETAILS		LOCATION		PROJECT PROPONENT NAME	AREA IN HECTAARE	ADDRESS/VILLAGE	RATE OF MINING	NEAREST HUMAN HABITATION
1	Proposal No	SIA/GJ/MIN/1066/2015	State	Gujarat	ARJANBHAI BHOJABHAI MODHA	01.49.71	129/2p Vardusar	35000 TPA	Vardusar 1.67km
	File No	SIA/GJ/15208/2015	District	Morbi					
	Proposal Name	ARJANBHAI BHOJABHAI MODHA	Tehsil	Wankaner					

Shri K N Mahavadia, Asst. Geologist, Dist:Morbi represented that the above lease area is situated beyond 500 m from the nearest habitation. Blasting is not required and sand stone will be removed only with help of cutter machine. It was also noticed that above project does not involve intersection of ground water table. It was presented that arrangement of water sprinkling will be done during cutting of sand stone and during loading of ehicles for control of fugitive emission. During the meeting, considering the proposed mitigation measures, the committee unanimously decided to recommend the above projects for grant of environmental clearance to SEIAA with stipulation of standard conditions for NonSand mining as approved in 232nd SEAC meeting held on 15th April 2015.

2	Proposal No	SIA/GJ/MIN/1328/2015	State	Gujarat	SHREE GANESH STONE QUARRY	01.03.48 NEW	222, Jamenpada	12000 MTPM	jamanpanda 1.2km
	File No	SIA/GJ/21509/2015	District	Navsari					
	Proposal Name	Shree Ganesh Stone Quarry	Tehsil	Chikhli					
3	Proposal No	SIA/GJ/MIN/1408/2015	State	Gujarat	SWETA S RAJPUT	04.87.93 NEW	1865/1p , Degam	1600000 MTPA	Degam 1km
	File No	SIA/GJ/24909/2015	District	Navsari					
	Proposal Name	SWETASINGH S. RAJPUT	Tehsil	Chikhli					

Shri Akshay Modi, Royalty Inspector, District: Navsari represented that all the above proposals involve open cast mechanized mining involving drilling, blasting, sizing of mineral, etc. Top soil will be stacked separately for green belt development whereas overburden will be removed, stacked and refilled in mined out pits. None of the proposal involves intersection of ground water table. No wastewater generation is envisaged from mining activities. Domestic wastewater will be disposed off through septic tank – soak pit. Arrangement will be done to prevent contamination of surface runoff. Proposed air pollution control measures include use of only controlled blasting, water sprinkling on haul roads, tree plantation in periphery and road sides, etc. It is proposed to convert mined out pits into water reservoirs. After deliberations on various aspects, considering the proposed mitigation measures by the lease holders, the committee unanimously decided to recommend the above proposals at Sr No: 1 and 2 for grant of environmental clearance to SEIAA with stipulation of standard conditions for Non sand mining as approved in 232nd SEAC meeting held on 15th April 2015.

Committee observed that large numbers of trees appear in the satellite image in the adjoining area of the proposed lease at Sr No: 3 and hence Shri Akshay Modi, Royalty Inspector was asked by the committee to submit No Objection Certificate of the forest department to carry out mining activities in the proposed lease area at Sr No: 3.

	File No	SIA/GJ/5208/2015	District	Rajkot						
	Proposal Name	Maruti Sand Suppliers	Tehsil	Upleta						

Shri Ketan Mahavadia, Assistant Geologist, District: Rajkot represented that above lease is located on river bed of Bhadar and sand excavation will be done only from dry river bed. Bhadar river is a seasonal river. He also informed that instream (flowing water) type of mining is not practiced in the above lease area. It was also represented that no any bridge piers / water intake wells / irrigation structures exist within 500 m distance from boundary of any of above lease area. He explained that sand excavation will be done up to maximum 3 m depth or water level, whichever is less. The committee observed that the lease holder has proposed to leave adequate setback distance from the river bank so as to avoid chances of river bank erosion.

After discussion and detailed scrutiny of the proposals, considering the mitigation measures proposed by the lease holder, the committee unanimously decided to recommend the above proposals for grant of environmental clearance to SEIAA with stipulation of standard conditions for Sand mining as approved in 232nd SEAC meeting held on 15th April 2015.

Shri K.K.Vyas, Royalty Inspector, District Sabarkantha informed the committee that proposal at Sr No 1 is to be re-auctioned and requested to delist the proposal. For the proposals at Sr No: 2 to 7, he represented that lease areas are located on river beds of Sabarmati and Debhoi and sand excavation will be done only from dry river beds only. Debhoi and Sabarmati rivers are seasonal rivers. He also informed that instream (flowing water) type of mining

is not practiced in the above lease area. It was also represented that no any bridge piers / water intake wells / irrigation structures exist within 500 m distance from boundary of any of above lease area. He explained that sand excavation will be done up to maximum 3 m depth or water level, whichever is less. The committee observed that the lease holder has proposed to leave adequate setback distance from the river bank so as to avoid chances of river bank erosion.

After discussion and detailed scrutiny of the proposal, considering the mitigation measures proposed by the lease holder, the committee unanimously decided to recommend the above proposals at Sr No: 2 to 7 for grant of environmental clearance to SEIAA with stipulation of standard conditions for Sand mining as approved in 232nd SEAC meeting held on 15th April 2015.

RED CLAY MINING PROJECTS, DIST: SABARKANTHA									
1	Proposal No	SIA/GJ/MIN/1273/2015	State	Gujarat	ZAHIRHUSEN SAIYEDALI SAIYED	01.00.00	Dhanapi Vill	650 Mt/m	1.92 km Khedawada
	File No	SIA/GJ/20708/2015	District	Sabar Kantha					
	Proposal Name	Ilol- Other Building Stone Mine,	Tehsil	Himatnagar					

Shri K.K.Vyas, Royalty Inspector, District Sabarkantha presented the above proposal. He informed that the lease area is situated beyond 500 m distance from the nearest villages. No blasting is required and red clay will be removed by open cast excavation and mined out pit will be converted to water reservoir. Top soil will be preserved and later on used for green belt development. No wastewater generation is anticipated from mining activities. Domestic wastewater will be disposed off in septic tank – soak pit. Transportation of clay by covered trucks, construction of well compacted haul road, regular water sprinkling on roads, plantation along haul road and periphery, etc. are proposed as air pollution control measures. Considering the proposed mitigation measures, the committee unanimously decided to recommend above project for grant of environmental clearance to SEIAA with stipulation of standard conditions for Non Sand mining as approved in 232nd SEAC meeting held on 15th April 2015

QUARTZITE MINING PROJECTS, DIST: SABARKANTHA									
1	Proposal No	SIA/GJ/MIN/1243/2015	State	Gujarat	SISODIYA MAHENDRASINH SAJJANSINH	1.00.00 New	225pNani Bebar	81000 TPA	1.56 km Nani bebar

	File No	SIA/GJ/4308/2015	District	Sabar Kantha					
	Proposal Name	Quartzite mine	Tehsil	Idar					

Shri K.K.Vyas, Royalty Inspector, District Sabarkantha presented the above proposals. It was mentioned that the nearest habitation is located at a distance of more than 500 meter from the proposed lease. Top soil will be stacked separately for green belt development whereas overburden will be removed, stacked and refilled in mined out pits. None of the proposal involves intersection of ground water table. No wastewater generation is envisaged from mining activities. Domestic wastewater will be disposed off through septic tank – soak pit. Arrangement will be done to prevent contamination of surface runoff. Proposed air pollution control measures include use of only controlled blasting, water sprinkling on haul roads, tree plantation in periphery and road sides, etc. It is proposed to convert mined out pits into water reservoirs.

After deliberation on various aspects, considering the proposed mitigation measures, the committee unanimously decided to recommend the above proposals for grant of environmental clearance to SEIAA with stipulation of standard conditions for Non Sand mining as approved in 232nd SEAC meeting held on 15th April 2015

Hard copies of the above proposals at Sr No: 1,3,5 and 6 could not be submitted by the Asst.Geologist/Project proponent. Hence it was decided by the committee to reconsider the above proposal in one of the upcoming SEAC meeting after receipt of signed copies of Environmental Clearance application for appraisal

Shri D.K.Patel, Geologist, District: Surat represented that proposals at Sr No: 2,4 and 7. He informed that these proposals involve open cast mechanized mining involving drilling, blasting, sizing of mineral, etc. Top soil will be stacked separately for green belt development whereas overburden will be removed, stacked and refilled in mined out pits. None of the proposal involves intersection of ground water table. No wastewater generation is envisaged from mining activities. Domestic wastewater will be disposed off through septic tank – soak pit. Arrangement will be done to prevent contamination of surface runoff. Proposed air pollution control measures include use of only controlled blasting, water sprinkling on haul roads, tree plantation in periphery and road sides, etc. It is proposed to convert mined out pits into water reservoirs. After deliberations on various aspects, considering the proposed mitigation measures by the lease holders, the committee unanimously decided to recommend the proposal at Sr. No: 2,4 and 7 for grant of environmental clearance to SEIAA with stipulation of standard conditions for Non Sand mining as approved in 232nd SEAC meeting held on 15th April 2015.

1	Proposal No	SIA/GJ/MIN/1108/2015	State	Gujarat	BALUBHAI BHULABHAI HALPATI	2.00.00	S NO: 206,207 Pipliya	1050 Mt/M	pipariya 0.56km	Tapi
	File No	SIA/GJ/18208/2015	District	Surat						
	Proposal Name	Pipariya– Ordinary Sand Mine	Tehsil	Mandvi						

Shri D. K.Patel, Geologist,District: Surat represented that there is no any bridge piers / water intake wells / irrigation structures exist within 500 m distance from boundary of any of above lease area. He explained that sand excavation will be done up to maximum 3 m depth or water level, whichever is less. The committee observed that the lease holder has proposed to leave adequate setback distance from the river bank so as to avoid chances of river bank erosion.After detailed deliberation, committee asked geologist to submit details whether mining will be instream ? or it will be from dry river bed. Geologist, Dist : Surat during meeting submitted written confirmation that above lease is not under water and it is not instream. He further clarified that black trap also exists in the river bed and during monsoon sand is deposited on the base and thus through manual mining, sand is recovered.

After deliberations on various aspects, considering the proposed mitigation measures by the lease holders, the committee unanimously decided to recommend the proposal at Sr. No: 2,4 and 7 for grant of environmental clearance to SEIAA with stipulation of standard conditions for Non Sand mining as approved in 232nd SEAC meeting held on 15th April 2015.

Hard copies of the above proposal nos: 1 to 13 and 20 to 28 could not be submitted by the Asst.Geologist/Project proponent. Hence it was decided by the committee to reconsider the above proposal in one of the upcoming SEAC meeting after receipt of signed copies of Environmental Clearance application for appraisal

Proposals at Sr NO 14 to 19 are represented by the Shri M.R. Vala, Asst. Geologist, Dist: Surendranagar before the committee. He informed that lease areas for the proposals at Sr NO: 14 to 19 are located on river bed of Bhogavo and sand excavation will be done only from dry river bed. Bhogavo river is a seasonal river. He also informed that instream (flowing water) type of mining is not practiced in the above lease area. It was also represented that no any bridge piers / water intake wells / irrigation structures exist within 500 m distance from boundary of any of above lease area. He explained that sand excavation will be done up to maximum 3 m depth or water level, whichever is less. The committee observed that the lease holder has proposed to leave adequate setback distance from the river bank so as to avoid chances of river bank erosion.

After discussion and detailed scrutiny of the proposal, considering the mitigation measures proposed by the lease holder, the committee unanimously decided to recommend the proposal No: 14,15,16,18 and 19 for grant of environmental clearance to SEIAA with stipulation of standard conditions for Sand mining as approved in 232nd SEAC meeting held on 15th April 2015.

Nearest human habitation for the proposal no: 17 is Muli which located at a distance of 0.30 km and since human habitation falls within 500 meter radius of the proposed lease, committee unanimously decided to recommend for the rejection of this proposal to SEIAA.

Hard copies of the above proposal nos: 2 and 9 could not be submitted by the Asst.Geologist/Project proponent. Hence it was decided by the committee to reconsider the above proposal in one of the upcoming SEAC meeting after receipt of signed copies of Environmental Clearance application for appraisal

Shri M.R. Vala, Asst. Geologist, Dist: Surendranagar represented that all the above proposals (Except proposal No: 2 and 9) involve open cast mechanized mining involving drilling, blasting, sizing of mineral, etc. Top soil will be stacked separately for green belt development whereas overburden will be removed, stacked and refilled in mined out pits. None of the proposal involves intersection of ground water table. No

wastewater generation is envisaged from mining activities. Domestic wastewater will be disposed off through septic tank. Arrangement will be done to prevent contamination of surface runoff. Proposed air pollution control measures include use of only controlled blasting, water sprinkling on haul roads, tree plantation in periphery and road sides, etc. It is proposed to convert mined out pits into water reservoirs.

After deliberations on various aspects, considering the proposed mitigation measures by the lease holders, the committee unanimously decided to recommend the above proposals (Except proposals at 2 and 9) for grant of environmental clearance to SEIAA with stipulation of standard conditions for Non Sand mining as approved in 232nd SEAC meeting held on 15th April 2015.

Hard copies of the above proposal nos: 1 and 4 could not be submitted by the Asst.Geologist/Project proponent. Hence it was decided by the committee to reconsider the above proposal in one of the upcoming SEAC meeting after receipt of signed copies of Environmental Clearance application for appraisal

Shri M.R.Vala, Asst. Geologist, Dist: Surendranagar represented that the lease areas for the proposals at Sr No:2,3 and 5 are situated beyond 500 m from the nearest habitation. Blasting is not required and sand stone will be removed only with help of cutter machine. It was also noticed that above projects do not involve intersection of ground water table. It was presented that arrangement of water sprinkling will be done during cutting for control of fugitive emission. During the meeting, considering the proposed mitigation measures, the committee unanimously decided to recommend the proposals at Sr NO; 2,3 and 5 for grant of environmental clearance to SEIAA with stipulation of standard conditions for Non Sand mining as approved in 232nd SEAC meeting held on 15th April 2015.

Hard copies of the above proposals nos: 2 and 3 could not be submitted by the Asst.Geologist/Project proponent. Hence it was decided by the committee to reconsider the above proposal in one of the upcoming SEAC meeting after receipt of signed copies of Environmental Clearance application for appraisal

Shri M.R.Vala,Asst.Geoloigst,Dist: Surendranagar represented for the proposal at Sr No: 1 and informed that no blasting is required and clay will be removed by open cast excavation and mined out pit will be converted to water reservoir. Top soil will be preserved and later on used for greenbelt development. No wastewater generation is

anticipated from mining activities. Domestic wastewater will be disposed off in septic tank – soak pit. Transportation of clay by covered trucks, construction of well compacted haul road, regular water sprinkling on roads, plantation along haul road and periphery, etc. are proposed as air pollution control measures. Considering the proposed mitigation measures, the committee unanimously decided to recommend the proposal at Sr NO:1 to SEIAA for grant of environmental clearance with stipulation of standard conditions for Non Sand mining as approved in 232nd SEAC meeting held on 15th April 2015.

	Proposal Name	SILICA SAND MINE OF HARNARAYAN B. SONI AT KANPAR	Tehsil	Sayla					

Shri M R. Vala, .Asst. Geologist, Dist: Surendranagar represented the above proposal. He mentioned that lease is located more than 500 meters away from the human habitation. Proposals include open cast mining with manual and semi mechanized method. Water sprinkling will be made to curb the fugitive emission due to vehicle movement, material handling, and unloading of stacks. Top soil will be stacked separately for green belt development whereas overburden will be removed, stacked and refilled in mined out pits. Above proposals do not involve intersection of ground water table. No wastewater generation is envisaged from mining activities. Domestic wastewater will be disposed off through septic tank – soak pit. Arrangement will be done to prevent contamination of surface runoff.

After discussion and detailed scrutiny and considering the proposed mitigation measures, Committee unanimously decided to recommend the above proposal for grant of environmental clearance to SEIAA with stipulation of standard conditions for Non sand mining as approved in 232nd SEAC meeting held on 15th April 2015

	File No	SIA/GJ/2908/2015							
	Proposa I Name	NANDANA BAUXITE MINE							

M/s. Saurashtra Calcine Bauxite and Allied Industries (Area 02.44.00 Ha), S.N. 199/P, At: Nandana, Ta: Kalyanpur, District – Devbhumi Dwarka

Project / Activity No.: 1(a)

- Project proponent applied for EC on 27/07/2015. The proposal was scheduled for hearing on 13/10/2015. The project proponent has applied for their bauxite mine located at 199P, Vill: Nandana, Tehsil: Kalyanpur, Dist: Devbhumi Dwarka. The lease was originally issued on 24/04/1981 and expired on 26/04/2001. The lessee has applied for renewal on 26/07/2000. The mine lease area is **02.44.00** Ha and proposed rate of mining is 22,085 TPA. Mining plan along with progressive mine closure plan is approved vide letter No: 682(23) MS 386/2007 dated 16.01.2013.

Project status: Existing lease

Project / Activity Details:

Sr. no.	Product	Rate of Mining
1	Bauxite	22,085 TPA

The project falls under Category B of project activity 1(a) as per the schedule of EIA Notification 2006. Considering the scale of project, project, it is categorized as B2 and appraised in SEAC meeting on 13 October 2015.

The technical presentation of the project included introduction & background of the company, site location, satellite image of site & surrounding, site photographs, details of lease, land use of lease area, reserve, production & life of mine with no blasting, quantity of OB & waste, year wise backfilling and plantation, mining method, working depth and ground water, water requirement, important features surrounding the mine, etc.

- Details of project from the different entities are as below.

S. No.	Entities	Specifics	Distance (km)
1	Village	Nandana	00.76
2	Water body: River/nallah/lake/pond/Reservoir	DADH	09.53
3	National Highway	NH-6E	04.32
4	State Highway	SH-29	00.86
5	Railway Line	Bhatiya	05.46
6	Heritage site	No heritage site within 10 km radius.	
7	National Park/Wildlife Sanctuary/RF/PF	No heritage site within 10 km radius.	

- Project proponent has submitted No Objection certificate of Forest Department.
- Project proponent has submitted land use plan of mine lease area incorporating preoperational, operational and post operational phases.
- Project proponent has submitted approved mining plan including progressive mine closure plan. As per the mine closure plant, it is mentioned that mining will go with drilling and blasting method. During mining plan period, 4500m² additional land will be degraded and 1886m² area will be backfilled. The waste generated during mining plan period will be backfilled in mined out area. The rest part of the degraded land will be used as water reservoir and also 100 number of sapling are planned. The fencing around the plantation and working pit will be made during every year during three years mining plan. There is no permanent surface water body. The water table in the area is 12 m below the ground level as per the mining plan the working depth is 4.5 m. Water table will not be encountered during mining. Mining plan also include the environmental management plan which includes base line information, topography, existing land use pattern, water regime, flora & fauna, quality of air and ambient noise level and water, climatic condition, human settlement, environmental impact and its mitigation measures and programme for plantation.
- As there is absence of any nala/river, mining process will not affect the natural drainage in the nearby area.
- It is mentioned that upper layer of the mine not so hard, mining will go by hammer and excavation machine also proponent has submitted the affidavit for notarised undertaking stating that **no blasting** shall be carried out for entire period of mining.
- For control of fugitive emission, water tanker with suitable sprinkling system will be deployed along haul roads. The vehicles used for transportation will be

covered with tarpaulin and development of green belt /plantation around roads, lease area will be made.

- Drinking, plantation and sprinkling water will be brought by firms own tankers. Water consumption will be 05 KLPD. The water conservation carried out by reuse of domestic water for suppression of dust and for development of greenbelt.
- Project proponent has proposed periodic medical examination of workers, temporary rest shelter for worker constructed at mine site and water tank for drinking purposes.
- Project proponent has set out CSR activities which includes construction of water tank in water scarcity villages near around the lease area, Donate computers to primary school and panchayat, Made gaushala in village.
- Project proponent has submitted environmental management plan with likely impacts of the project activities, mitigation measures of impact and recurring cost/annum embarked for environment pollution control measures. Detailed existing green belt development plan and future green belt development plan including type of species no. of trees budgetary provision are given.
- The company has not any litigation pending in court also the company has not any well laid down environment policy, not any administrative system in the company to deal with environmental issue and not any system for reporting of violence of environment.

Observations/Discussions:

Considering the above project details, committee in the 259th meeting on 13/09/2015 unanimously decided to recommend the above project for grant of environmental clearance to **SEIAA**.

1. Project proponent shall comply all the measures, conditions recommended in the approved mining plan and environment management plan in a letter and spirit.
2. Project proponent shall comply all the conditions mentioned in "The Companies (Corporate Social Responsibility Policy) Rules, 2014 and its amendments from time to time vide notification of ministry of corporate affairs dated 27th February, 2014 in a letter and spirit.

M/s. Saurashtra Calcine Bauxite and Allied Industries (Area 03.12.62 Ha), S.N. 227/P & 228/P, At: Mewasa, Ta: Kalyanpur, District – Devbhumi Dwarka

Project / Activity No.: 1(a)

- Project proponent has applied for EC on 20/08/2015, it was accepted by SEIAA & SEAC and proposal was scheduled for appraisal on 13/10/2015.
- The mine lease was granted to the project proponent for their bauxite mine located at S.N. 227/P & 228/P, Vill: Mewasa, Tehsil: Kalyanpur, Dist: Devbhumi Dwarka vide order No: MCR/1583(S-160)-7938-CHH dated 08/08/1984 and lease was executed on 16.09.1984 for 20 years upto 25.08.2004. Lease holder has applied for lease renewal on 06.09.2003. The mine lease area is **03.12.62** Ha and proposed rate of mining is 20,000 TPA.

Project status: Existing lease

Project / Activity Details:

Sr. no.	Product	Rate of Mining
1	Bauxite	20,000 TPA

The project falls under Category B of project activity 1(a) as per the schedule of EIA Notification 2006. The project falls under Category B of project activity 1(a) as per the schedule of EIA Notification 2006. Considering the scale of project, project, it is categorized as B2 and appraised in SEAC meeting on 13 October 2015

The technical presentation of the project included introduction & background of the company, site location, satellite image of site & surrounding, site photographs, details of lease, land use of lease area, reserve, production & life of mine with no blasting, quantity of OB & waste, year wise backfilling and plantation, mining method, working depth and ground water, water requirement, important features surrounding the mine, etc.

- Details of project from the different entities are as below.

S. No.	Entities	Specifics	Distance (km)
1	Village	Mewasa	02.03
2	Water body: River/nallah/lake/pond/Reservoir	DADH	03.08
3	National Highway	NH-947	08.63

4	State Highway	SH-06	08.40
5	Railway Line	Bhopalka	13.80
6	Heritage site	No heritage site within 10 km radius.	
7	National Park/Wildlife Sanctuary/RF/PF	No heritage site within 10 km radius.	

- Project proponent has submitted land use plan of mine lease area incorporating preoperational, operational and post operational phases.
- Project proponent has submitted approved mining plan including progressive mine closure plan. As per the mine closure plant, it is mentioned that mining will go with drilling and blasting method. During mining plan period, No additional land will be degraded. The waste generated during mining plan period will be backfilled in mined out area. The rest part of the degraded land will be used as water reservoir and also 100 number of sampling are planned. The fencing around the plantation and working pit will be carried out during year of mining scheme period. There is no permanent surface water body. The water table in the area is 12 m below the ground level. Water table will not be encountered during mining. Mining plan also include the environmental management plan which includes base line information, topography, existing land use pattern, water regime, flora & fauna, quality of air and ambient noise level and water, climatic condition, human settlement, environmental impact and its mitigation measures and programme for plantation.
- As there is absence of any nala/river, mining process will not affect the natural drainage in the nearby area.
- It is mentioned that upper layer of the mine not so hard, mining will go by Semi Mechanized open cast method also proponent has submitted the affidavit for notarised undertaking stating that no blasting shall be carried out for entire period of mining.
- For control of fugitive emission, water tanker with suitable sprinkling system will be deployed along haul roads. The vehicles used for transportation will be covered with tarpaulin and development of green belt /plantation around roads, lease area will be made.
- Drinking, plantation and sprinkling water will be brought by firms own tankers. Water consumption will be 05 KLPD. The water conservation carried out by reuse of domestic water for suppression of dust and for development of greenbelt.
- Project proponent has proposed periodic medical examination of workers, temporary rest shelter for worker constructed at mine site and water tank for drinking purposes.
- Project proponent has set out CSR activities which includes construction of water

tank in water scarcity villages near and around the lease area, Donate computers to primary school and panchayat, to make gaushala in village.

- Project proponent has submitted environmental management plan with likely impacts of the project activities, mitigation measures of impact and recurring cost/annum embarked for environment pollution control measures. Detailed existing green belt development plan and future green belt development plan including type of species no. of trees budgetary provision are given.
- The company has not any litigation pending in court also the company has not any well laid down environment policy, not any administrative system in the company to deal with environmental issue and not any system for reporting of violence of environment.

Observations/Discussions:

Considering the above project details, committee in the 259th meeting on **13/10/2015** unanimously decide to recommend for grant of environmental clearance to **SEIAA**.

1. Project proponent shall comply all the measures, conditions suggested in the approved mining plan and environment management plan in a letter and spirit.
2. Project proponent shall comply all the conditions mentioned in “The Companies (Corporate Social Responsibility Policy) Rules, 2014 and its amendments from time to time vide notification of ministry of corporate affairs dated 27th February, 2014 in a letter and spirit.

7	National Park/Wildlife Sanctuary/RF/PF	No heritage site within 10 km radius.	

- Project proponent has submitted land use plan of mine lease area incorporating preoperational, operational and post operational phases.
- Project proponent has submitted approved mining plan including progressive mine closure plan. As per the mine closure plant, it is mentioned that mining will go with drilling and blasting method. During mining plan period, 7082 Square

meter additional land will be degraded and 2038 square meter area will be backfilled. The waste generated during mining plan period will be backfilled in mined out area. The rest part of the degraded land will be used as water reservoir and also proposed to grow 290 number of sapling per hectare. The fencing around the plantation and working pit will be carried out during third, fourth and fifth year of mining scheme period. There is no permanent surface water body. The water table in the area is 12 m below the ground level. Water table will not be encountered during mining. Mining plan also include the environmental management plan which includes base line information, topography, existing land use pattern, water regime, flora & fauna, quality of air and ambient noise level and water, climatic condition, human settlement, environmental impact and its mitigation measures and programme for plantation.

- No blasting is required.
- As there is absence of any nala/river, mining process will not affect the natural drainage in the nearby area.
- It is mentioned that upper layer of the mine not so hard, mining will go by hammer and excavation machine also proponent has submitted the affidavit for notarised undertaking stating that no blasting shall be carried out for entire period of mining.
- For control of fugitive emission, water tanker with suitable sprinkling system will be deployed along haul roads. The vehicles used for transportation will be covered with tarpaulin and development of green belt /plantation around roads, lease area will be made.
- Drinking, plantation and sprinkling water will be brought by firms own tankers. Water consumption will be 03 KLPD. The water conservation carried out by reuse of domestic water for suppression of dust and for development of greenbelt.
- Project proponent has proposed periodic medical examination of workers, temporary rest shelter for worker constructed at mine site and water tank for drinking purposes.
- Project proponent has set out CSR activities which includes construction of water tank in water scarcity villages near around the lease area, arrangement of ambulance, supporting education to the underprivileged children.
- Project proponent has submitted environmental management plan with likely impacts of the project activities, mitigation measures of impact and recurring cost/annum embarked for environment pollution control measures. Detailed existing green belt development plan and future green belt development plan including type of species no. of trees budgetary provision are given.
- The company has not any litigation pending in court also the company has not any well laid down environment policy, not any administrative system in the company to deal with environmental issue and not any system for reporting of violence of environment.

Observations/Discussions:

Considering the above project details, committee in the 259th meeting on **13/10/2015** unanimously decide to recommend for grant of environmental clearance to **SEIAA**.

- 1 Project proponent shall comply all the measures, conditions suggested in the approved mining plan and environment management plan in a letter and spirit.
- 2 Project proponent shall comply all the conditions mentioned in "The Companies (Corporate Social Responsibility Policy) Rules, 2014 and its amendments from time to time vide notification of ministry of corporate affairs dated 27th February, 2014 in a letter and spirit.

M/s. Kherali Limestone Mines(Area 04.25.93 Ha), S.No: 49,Village: Kherali, Ta: Veraval, Dist: Gir Somnath

Project / Activity No.: 1(a)

- Project proponent has applied online for EC on 18/07/2015. The proposal was accepted by SEIAA and SEAC and scheduled for appraisal on 13/10/2015.
- The project proponent has applied for their Lime Stone mine located S.No: 49,Village: Kherali, Ta: Veraval, Dist: Gir Somnath. The lease was originally executed on 28/09/1987 for a period of 20 years and expired on 27.09.2007. Application for lease renewal is made on 21.09.2006 The mine lease area is **04.25.93** Ha and proposed rate of mining is 2,50,000 MTPA.

Project status: Existing lease

Project / Activity Details:

Sr. no.	Product	Rate of Mining
1	Lime Stone	2,50,000 MTPA

The project falls under Category B of project activity 1(a) as per the schedule of EIA Notification 2006. The project falls under Category B of project activity 1(a) as per the schedule of EIA Notification 2006. Considering the scale of project, project, it is categorized as B2 and appraised in SEAC meeting on 13 October 2015

Details of project from the different entities are as below.

S. No.	Entities	Specifics	Distance (km)
1	Village	Kherali	2.0
2	Water body: River/nallah/lake/pond/Reservoir	Umrethi Dam--	5.0
3	National Highway	NH-8E	12.26
4	State Highway	SH26	4.05
5	Railway Line	Talala-Veraval	5.50
6	Heritage site	No heritage site within 10 km radius.	
7	National Park/Wildlife Sanctuary/RF/PF	Sasan Gir Sanctuary	16.50

Blasting is proposed by the project proponent for mining activities. Dust will be generated from drilling, blasting, transportation and sizing which will be minimized by taking preventive measures such as wet drilling, water sprinkling. There is practically no soil cover as well as overburden on limestone, however the undersized which is generated during mining stored on pit bottom and will be taken out before end of mining. There is no O/B or waste material available in the lease or nearby areas. Hence, backfilling is not possible. Used pit will use as water harvesting pond and covered by wire fencing.

Revised mining plan is under preparation, which would cover reclamation plan, post mine land use and progressive green belt development plan along with year wise financial outlay and project proponent informed that it will be submitted after approval of IBM. Water consumption will be 8.5 KLPD and will be brought through tanker from near by villages. The lease area and its surroundings are exposed and comparatively flat terrain of limestone dominated by the milliolitic limestone. The exposed limestone varies in height from 50 m to 51 above MSL. Working Depth will be restricted up to 3.0 meter. Ground water table fluctuates from 30.5 meter-35.5 meter during pre Monsoon to 25 meter-31 meter during post monsoon. Mining activities will not intersect groundwater.

During mining activities, chances to health impact namely tuberculosis and silicosis exist and to overcome, project proponent has proposed to provide face mask to workers during the working hours. Medical examination is proposed to carry out for every six months for every worker. About 1.5 Lakhs recurring cost/annum is earmarked for environment pollution control measures. As part of socio economic activities it is proposed to furnish scholarship to primary school of Kherali, provision of drinking water facility to Kherali village, arrangement of malaria camp during the rainy season. Project proponent has proposed to spend Rs.50,000/- for social activities every year. Project proponent has suggested that there are no chances of tree plantation in lease area instead they shall develop green belt in Kherali primary school.

Observations/Discussions:

Considering the above project details, committee asked project proponent to submit the following details and decided to take up the proposal in one of the upcoming SEAC meeting for further consideration.

- 1 Referring to the satellite image, committee asked project proponent to submit details of the nearest human habitation for the outer periphery of the lease duly authenticated by the district geologist.
- 2 Submit mining plan approved by IBM for the proposed lease which shall include detailed plan of development of green belt.

ADDITIONAL AGENDA

EC AMENDMENT PROPOSAL

1. SAND MINING PROJECT, DIST.: PATAN

Sr. No.	Name of Applicant	lease area in hectare	Location Address	Village	Taluka	Name of River	Human Habitation	Rate of Mining
1	Thakor Hajurji Rupaji	existing 00.99.40	s.no - 258/p	Shankeshwar	Dantisana	Pushpavati	Dantisana :1 km	20,000 TPA

Environmental Clearance for the above proposal was issued on 24/08/2015 vide letter No. SEIAA/GUJ/EC/1(a)/3298/2015. Project proponent has submitted an application on 08/10/2015 for correction in name of the village, Taluka and name of the river mentioned in the EC.

In application comprising Form 1, applicant has mentioned that actual name of Taluka is Shankeshwar and name of Village is Dantisana. Also it is mentioned by the Asst. Geologist, Dist: Patan that name of the river is Rupen.

Referring the application made in Form I by the applicant and detailed deliberation, committee unanimously decided to recommend amendment to SEIAA in Environmental Clearance order issued on 24/08/2015 vide letter NO : SEIAA/GUJ/EC/1(a)/3298/2015 for correction in the name of Village, Taluka and name of the river as under.

Sr. No.	Name of Applicant	Location Address	Village	Taluka	Name of River
1	Thakor Hajurji Rupaji	s.no - 258/p	Dantisana	Shankeshwar	RUPEN

2. BLACK TRAP MINING PROJECTS - DISTRICT DEVBHUMI DWARKA

Sr. No.	Name of Applicant	Lease Area in Hectare	Location Address	Village	Taluka	Human Habitation	Rate of Mining
1	Ramde Vajshi Nandaniya	Existing 2.00.00	s.no - 16/1/p	Sakhpar	Khambhaliya	Khambhaliya - 8 km	2500 MT/M

Shri A.B.Premalani, Geological Assistant, Dist: Devbhumi Dwarka represented the above mentioned proposal on 14.07.2015. After presentation, Committee observed that proposals is located near the water body (Check dam) and asked R.O, Jamnagar to carry out detailed inspection and submit report showing location of the lease area from its outer periphery with reference to Check dam/water bodies. On 15.09.2015, RO, GPCB, Jamnagar inspected the proposed location and mentioned that mining activities are not in operation. Sinhan Dam is located at about 800m-900m from the mine. Jamnagar Dwarka highway is approx. 600 m away from mine. Considering detailed visit report of RO, GPCB, Jamnagar, proposed mitigation measures by the project proponent, the committee unanimously decided to recommend the above proposal for grant of environmental clearance to SEIAA with stipulation of standard conditions for Non Sand mining as approved in 232nd SEAC meeting held on 15th April 2015.

3. BLACK TRAP MINING PROJECTS - DISTRICT JAMNAGAR

Sr. No	Name of Applicant	Lease Area in Hectare	Location Address	Village	Taluka	Human Habitation	Rate of Mining
1	D.B.Bhimani, L.R.Bhimani,	Existing 1.00.00	s.no - 274/1p	Keshiya	Jodiya	Keshiya - 5	2000 MT/M

	K.D.Bhimani					km	
2	Nareshbhai Kanjibhai Kasundra, Brijrajsinh Narendrasinh Jadeja	New 1.20.00	s.no - 303/p	Keshiya	Jodiya	Keshiya - 5 km	2000 MT/M

Shri A.B.Premlani, Geological Assistant, Dist: Jamnagar presented the above projects before the committee on 14.07.2015. After presentation and deliberations on various aspects, committee observed that fields are existing neighboring to the lease area and asked district geologist to submit No Objection Certificate of the farmers of adjoining fields as all possibilities of soil erosion exist due to mining activities at the above lease areas.

On 03.10.2015, Geologist, Dist: Jamnagar submitted reply along with No Objection letter of farmer Shri Godhwani Ashwin Karman regarding carrying of balcktrap mining activities.

Considering proposed mitigation measures by lease holders, reply with No Objection letter of farmer owning neighbouring field, the committee unanimously decided to recommend the above proposals for grant of environmental clearance to SEIAA with stipulation of standard conditions for Non Sand mining as approved in 232nd SEAC meeting held on 15th April 2015.

4. SAND MINING PROJECTS – DISTRICT CHOTAUDEPUR

Sr. No.	Name of Applicant	Lease Area in Hactare	Location Address	Village	Taluka	Rate of Mining	NEW OR Existing	Distance of Nearest Town & City	Name of River
1.	Udesinghbhai Bhalabhai Baria	01.81.10	s.no - 23	Pitha	Bodeli	6383 MT/M	New	Pitha - 0.55 km	Orsang River

Shri D.M.Patel, Geologist, Dist: Chotaudepur represented the above proposal before SEAC on 11.08.2015. After presentation, Committee noticed that lease is located near the bank of river and asked district geologist to submit the details of set back distance to be left from the river bank in order to prevent erosion and notarized undertaking of the leaseholder stating that excavation will not be made beyond the level of adjoining fields. On 24.09.2015, Geologist, Dist: Chotaudepur submitted reply along with undertaking. It is mentioned by the lease holder in undertaking to maintain 10 meter setback distance from the river bank and mining will be carried out from their lease area and dry river bed only.

Considering proposed mitigation measures by lease holders, submission of reply by geologist along with undertaking by the lease holder, the committee unanimously decided to recommend the above proposal for grant of environmental clearance to SEIAA with stipulation of standard conditions for Sand mining as approved in 232nd SEAC meeting held on 15th April 2015.

5. SAND MINING PROJECTS – DISTRICT :VADODARA

Sr. No	Name of Applicant	Lease Area in Hactare	Location Address	Village	Taluka	Rate of Mining	NEW OR Existing	Distance of Nearest Town & City	Name of River
1.	Kirankumar K.Patel	4.80.00	s.no - 128	Sitpur	Dabhoi	4000 MT/M	Existing	Sitpar - 3 km	Orsang
