Auto ToR Decision:

It has been observed that more than 90% of the applications are received for EC in Rajasthan are for mining projects, with areas less than 4 ha. These are also for standard minerals like sand stone, masonry stone, marble, granite, mica, feldspar and quartz. While the area may be small, even 1 ha., if they are received after cluster formation, they have to go through the TOR route. Presently, these cases also do not qualify in routine for auto-TOR. Therefore, they are examined by SEAC, then submitted to SEIAA for formal grant of TOR, and then the next round of examination by SEAC and SEIAA is done before issue of EC. The process takes several months. These are routine projects and all of similar kinds. Hence no individual customized TOR are framed by SEAC. Accordingly, with a view to ensure expeditious sanction of ECs, it was decided that in all mining projects, whose project area is 4 ha. or less, auto-TOR may be issued.

Meeting ended with vote of thanks to the chair.
