<p>Recommendations of the SEAC on 27.04.2022. Category: B1 The proposed project is Establishment of Laurus Captive Effluent Treatment Plant (LETP) of 3 MLD Design Capacity and 4.5 MW coal based Captive Power Plant (CPP) at Plot No. 18B, Atchuthapuram, APSEZ, De-notified Area, Moturupalem Village, Gurajapalem Village & Pudi Village, Rambilli (M), Visakhapatnam, Andhra</p>			

Pradesh.

As per the EIA Notification S.O. 1533 (E) dated 14-09-2006 and its amendments thereof, proposed project falls under the Activity - 7(h) - Common Effluent Treatment Plants (CETPs). Proposed project and the 6 member industries from Laurus Group whose effluent will be treated are all located in APIIC Industrial area and hence the project is considered under Category-B1. All the CETP projects will be considered at State level SEAC/ SEIAA.

The representative of proponent and their consultant M/s. SAMRAKSHAN have attended the meeting.

The Committee noted that the proposed project by M/s. Laurus Labs Limited is to establish LETP of 3 MLD design capacity in an area of 17.98 acres to treat the effluents generated at Laurus group of units of total 6 units in the same industrial area. Proposed LETP of 3 MLD capacity consists of primary(only for LETP effluent), Thermal treatment consisting of Steam Stripper, MEE & ATFD followed by Biological treatment with ASP with extended aeration and tertiary treatment using ACF & PSF and in case required UF, NF & RO/Oxidation. Treated effluent after confirming to marine disposal standards is sent to M/s. AETL for onward marine disposal after meeting marine disposal standards.

Proposed project also includes 4.5 MW Captive Power Plant.

Auto TOR was generated on 01.12.2021.

Proposed Project Cost is Rs. 184.44 crores. Capital Cost towards EMP would be Rs. 184.44 crores and Recurring cost would be Rs. 84 crores per annum.

Total water required for the proposed project will be about 725 KLD. Fresh water sourced through APIIC supply.

Effluent generated at individual Laurus units is segregated into HTDS and LTDS streams. The segregated streams are given primary treatment and separately sent to LETP for further treatment. The transportation of effluent is through dedicated and GPS enabled tankers.

Total effluent treated in the LETP will be about 1000 KLD of HTDS/HCOD effluent and 1640 KLD of LTDS/LCOD Effluent. Unit wise breakup of anticipated effluent is given below:

Sl. No.	Description	Anticipated Waste water Generation (KLD)	
		HTDS	LTDS
1	Laurus Labs Ltd. Unit-2	40.25	200
2	Laurus Labs Ltd., Unit-4	275	450
3	Laurus Labs Ltd., Unit-6	163.2	150

<p>The treated effluent will be stored in Guard ponds at LETP for Bio-Assay. After completing the Bio-Assay test and ensuring that the water meets the standards for marine disposal as prescribed in EP rules for marine discharge, the treated effluent will be sent to guard pond at AETL for onward marine disposal.</p> <p>Presently the treated effluent will be transported to M/s. AETL using dedicated and GPS enabled tankers till the pipeline for transportation is laid after obtaining necessary permissions for the same from APIIC.</p> <p>LETP has approached APIIC for usage of their Guard ponds for onward marine disposal, which has been accepted and acknowledged by APIIC.</p> <p>ESP to be installed for 35 TPH boiler and 2 x 24 TPH boilers to control the particulate (PM) emissions within statutory limit of 115 mg/Nm³.</p> <p>Proposed 3 nos. of 2000 KVA DG sets to meet the standby power requirements.</p>
