

Minutes of the 94th SEAC Meeting held on 08th September 2017

<p>94-07</p> <p>F. 6400</p>	<p>Proposed CETP project of 4 MLD Capacity at R5. No. 14/9, 11/1, 13/5, 13/2, 14/7, 13/3, 13/4, 14/8 of Aandikulam Village, Bhavani Taluk, Erode District, Tamilnadu by M/s. Sree Bhavani Dyeing cluster Development Limited – Category “B1”- under item No. 7 (h) of the Schedule of EIA Notification 2006 - 7 (h) Common Effluent Treatment Plants (CETPs) - Terms of Reference (ToR) - Regarding</p>
	<p>The Proponent, M/s. Sree Bhavani Dyeing cluster Development Limited has applied for Terms of Reference (ToR) for the Proposed CETP project of 4 MLD Capacity at R5. No. 14/9, 11/1, 13/5, 13/2, 14/7, 13/3, 13/4, 14/8 of Aandikulam Village, Bhavani Taluk, Erode District, Tamilnadu on 16.05.2017.</p> <p>The salient features of the project are as follows as stated in the project proposal submitted by the proponent.</p> <ol style="list-style-type: none"> 1. The Government of Tamil Nadu announced grants for the textile industry to install the pollution control facilities to treat the effluent generating from the bleaching and dyeing operation in industries. This project is based on the announcement made by the Hon'ble Chief Minister of Tamil Nadu under Rule 110 in the Legislative Assembly on 11.08.2014 for the Environment Department and as per the G.O. (Ms.) No. 48, dated: 31.03.2015 of E & F Department for establishment of integrated textile processing parks with common effluent treatment plants (CETPs) based on Zero Liquid Discharge (ZLD) for rehabilitation of micro, small and medium scale textile bleaching, dyeing and its allied units in the district of Namakkal, Erode, Salem and Karur. 2. In line with the above announcement of Government of Tamil Nadu, the M/s. Sree Bhavani Dyeing cluster Development Limited have prepared a project proposal to manage the effluents generated in 73 industries by installing the ZLD based common effluent plant at Aandikulam Village, Bhavani Taluk, Erode District. The units consists of Bleaching and dyeing units. They are non – consented industries under closure.

Minutes of the 94th SEAC Meeting held on 08th September 2017

3. The proposal prepared by the M/s. Sree Bhavani Dyeing cluster Development Limited have been approved by the TNPCB and recommended to the Joint Secretary, Ministry of Textiles, Government of India, to consider the same for financial assistances.
4. The overall strength of the project is Zero Liquid Discharge.
 - a) The Recovered water in terms of RO-Permeate and Distillate will be reused at member dyeing units.
 - b) The Sodium Chloride from membrane distillation will be reused at member units.
 - c) The Sludge Cake (Lime Sludge) will be utilized by the Cement Industries.
 - d) The recovered Glaubers's salt ($\text{Na}_2\text{SO}_4 \cdot 10\text{H}_2\text{O}$) will be reused at the member units.
 - e) The Bio Sludge from the filter press will be utilized as a fuel for boiler by making it as briquettes.
5. As per the Proposal, the only waste that remains to be disposed is the waste salt from Agitated Thin Film Drier (ATFD).

The project proposal was placed in the 94th meeting of the SEAC held on 08.09.2017. Based on the presentation made by the proponent and the documents furnished, the SEAC decided to recommend the proposal for the grant of Terms of References (ToR) with Public Hearing to SEIAA, subject to the following specific conditions in addition to the normal conditions as part of ToR:

1. There is a concern on the site already selected for the installation of the CETP. As per the map presented by the proponent, the Kadayampatti Lake surplus channel (canal) runs close to the Western boundary of the CETP site. Any operation in the CETP should not affect the functioning of the channel in terms of its geometry and hydraulics. The units forming part of the CETP should be located away from the channel as far as possible and a thick green belt should be

Minutes of the 94th SEAC Meeting held on 08th September 2017

	<p>created in between the channel and the CETP units.</p> <ol style="list-style-type: none">2. The textile effluent characteristics that will be used for the design of the CETP units have to be arrived at scientifically to represent the true characteristics of the combined effluents generated in the textile dyeing and bleaching units. The EIA report should contain the detailed methodology adopted for arriving at the design characteristics of the effluent.3. The treatment technology proposed to be used in the CETP should be technically feasible and environmentally safe. The EIA report should contain detailed report on the methodologies (laboratory studies) adopted for testing the feasibility of adopting the proposed technology in the treatment of the effluent. The report should also contain stage wise performance of each and every treatment unit.4. It is proposed that the recovered water will be reused in the industry. Similarly, the Sodium Chloride from membrane distillation will be reused at member units and the recovered Glaubers's salt ($\text{Na}_2\text{SO}_4 \cdot 10\text{H}_2\text{O}$) will be reused at the member units. The details of the complete characteristics of the reused products and the characteristics of the raw materials including water currently used by the industry should be furnished.5. The performance data from the CETPs in Tiruppur where the proposed technology is said to be in implementation, should be furnished.6. The waste salts resulting in the CETP is hazardous in nature. Hence the waste salt shall be collected and sent to notified TSDF site in accordance with the Hazardous and other waste (Management and Trans boundary movement) Rules, 2016.7. A minimum of 33% of the total area should be allocated for Green Belt Development with local tree species like Neem, Magilam, Vagai, Poovarasu, Palai and Pungai.8. The proponent should implement CSR activities involving an

STANDARD TERMS OF REFERENCE (TOR) FOR EIA/EMP REPORT FOR PROJECTS/
ACTIVITIES REQUIRING ENVIRONMENT CLEARANCE

7(h): STANDARD TERMS OF REFERENCE FOR CONDUCTING ENVIRONMENT
IMPACT ASSESSMENT STUDY FOR COMMON EFFLUENT TREATMENT
PLANTS (CETPs) AND INFORMATION TO BE INCLUDED IN EIA/EMP
REPORT

- 1) Reasons for selecting the site with details of alternate sites examined/rejected/selected on merit with comparative statement and reason/basis for selection. The examination should justify site suitability in terms of environmental angle, resources sustainability associated with selected site as compared to rejected sites. The analysis should include parameters considered along with weightage criteria for short-listing selected site.
- 2) Details of the land use break-up for the proposed project. Details of land use around 10 km radius of the project site.
- 3) Details of member units, its production capacity, waste generation, characteristic and details of primary treatment provided by the member units.
- 4) Details on present treatment and disposal systems
- 5) Details of effluent collection system from member units level.
- 6) Details of hazardous waste collection. Sill proof arrangement
- 7) Examine and submit details of inlet characteristics.
- 8) Details of the CETP with design parameters. Layout plan of CETP. And open spaces.
- 9) Details of the adequate power back up facility, to meet the energy requirement in case of power failure from the grid.
- 10) Details of the usage of treated effluent for green belt development and horticulture.
- 11) Submit a copy of MoU made between the Member units.
- 12) Details of storage facility available at the CETP.
- 13) Examine and submit details of sludge / solid waste generated and method of disposal. MoU in this regard.
- 14) Details of water requirement, source and water balance chart.
- 15) Details of green belt
- 16) Details of performance monitoring, lab facility with technical persons.
- 17) Details of litigation pending against the project, if any, with direction /order passed by any Court of Law against the Project should be given.
- 18) The cost of the Project (capital cost and recurring cost) as well as the cost towards implementation of EMP should be clearly spelt out.
- 19) Details of water meters for inflow and outflow monitoring etc.
- 20) Any further clarification on carrying out the above studies including anticipated impacts due to the project and mitigative measure, project proponent can refer to the model ToR available on Ministry website "<http://moef.nic.in/Manual/CETPs>".
